Founded in 1807, John Wiley & Sons, Inc. has been a valued source of knowledge and understanding for more than 200 years, helping people around the world meet their needs and fulfill their aspirations. Our company is built on a foundation of principles that include responsibility to the communities we serve and where we live and work. In 2008, we launched a Corporate Citizenship Initiative, a global effort to address the environmental, social, economic, and ethical challenges we face in our business. Among the issues we are addressing are carbon impact, paper specifications and procurement, ethical conduct within our business and among our vendors, and community and charitable support. For more information, please visit our website: [www.wiley.com/go/citizenship](http://www.wiley.com/go/citizenship).

Evaluation copies are provided to qualified academics and professionals for review purposes only, for use in their courses during the next academic year. These copies are licensed and may not be sold or transferred to a third party. Upon completion of the review period, please return the evaluation copy to Wiley. # From the Authors

Dear Student,

**Why This Course?** Remember your biology course in high school? Did you have one of those “invisible man” models (or maybe something more high-tech than that) that gave you the opportunity to look “inside” the human body? This accounting course offers something similar: To understand a business, you have to understand the financial insides of a business organization. An accounting course will help you understand the essential financial components of businesses. Whether you are looking at a large multinational company like Microsoft or Starbucks or a single-owner software consulting business or coffee shop, knowing the fundamentals of accounting will help you understand what is happening. As an employee, a manager, an investor, a business owner, or a director of your own personal finances—any of which roles you will have at some point in your life—you will be much the wiser for having taken this course.

**Why This Book?** Hundreds of thousands of students have used this textbook. Your instructor has chosen it for you because of its trusted reputation. The authors have worked hard to keep the book fresh, timely, and accurate.

This textbook contains features to help you learn best, whatever your learning style. To understand what your learning style is, spend about ten minutes to take the learning style quiz at the book’s companion website. Then, look at page vii for how you can apply an understanding of your learning style to this course. When you know more about your own learning style, browse through the Student Owner’s Manual on pages viii–xi. It shows you the main features you will find in this textbook and explains their purpose.

**How To Succeed?** We’ve asked many students and many instructors whether there is a secret for success in this course. The nearly unanimous answer turns out to be not much of a secret: “Do the homework.” This is one course where doing is learning, and the more time you spend on the homework assignments—using the various tools that this textbook provides—the more likely you are to learn the essential concepts, techniques, and methods of accounting. Besides the textbook itself, the book’s companion website offers various support resources.

Good luck in this course. We hope you enjoy the experience and that you put to good use throughout a lifetime of success the knowledge you obtain in this course. We are sure you will not be disappointed.

# About the Authors

## Jerry Weygandt

Jerry J. Weygandt, PhD, CPA, is Arthur Andersen Alumni Emeritus Professor of Accounting at the University of Wisconsin—Madison. He holds a Ph.D. in accounting from the University of Illinois. Articles by Professor Weygandt have appeared in the *Accounting Review*, *Journal of Accounting Research*, *Accounting Horizons*, *Journal of Accountancy*, and other academic and professional journals. These articles have examined such financial reporting issues as accounting for price-level adjustments, pensions, convertible securities, stock option contracts, and interim reports. Professor Weygandt is author of other accounting and financial reporting books and is a member of the American Accounting Association, the American Institute of Certified Public Accountants, and the Wisconsin Society of Certified Public Accountants. He has served on numerous committees of the American Accounting Association and as a member of the editorial board of the *Accounting Review*; he also has served as President and Secretary-Treasurer of the American Accounting Association. In addition, he has been actively involved with the American Institute of Certified Public Accountants and has been a member of the Accounting Standards Executive Committee (AcSEC) of that organization. He has served on the FASB task force that examined the reporting issues related to accounting for income taxes and served as a trustee of the Financial Accounting Foundation. Professor Weygandt has received the Chancellor's Award for Excellence in Teaching and the Beta Gamma Sigma Dean's Teaching Award. He is on the board of directors of M & I Bank of Southern Wisconsin. He is the recipient of the Wisconsin Institute of CPA's Outstanding Educator's Award and the Lifetime Achievement Award. In 2001 he received the American Accounting Association's Outstanding Educator Award.

## Paul Kimmel

Paul D. Kimmel, PhD, CPA, received his bachelor's degree from the University of Minnesota and his doctorate in accounting from the University of Wisconsin. He is an Associate Professor at the University of Wisconsin—Milwaukee, and has public accounting experience with Deloitte & Touche (Minneapolis). He was the recipient of the UWM School of Business Advisory Council Teaching Award, the Reggie Taite Excellence in Teaching Award and a three-time winner of the Outstanding Teaching Assistant Award at the University of Wisconsin. He is also a recipient of the Elijah Watts Sells Award for Honorary Distinction for his results on the CPA exam. He is a member of the American Accounting Association and the Institute of Management Accountants and has published articles in *Accounting Review*, *Accounting Horizons*, *Advances in Management Accounting*, *Managerial Finance*, *Issues in Accounting Education*, *Journal of Accounting Education*, as well as other journals. His research interests include accounting for financial instruments and innovation in accounting education. He has published papers and given numerous talks on incorporating critical thinking into accounting education, and helped prepare a catalog of critical thinking resources for the Federated Schools of Accountancy.

## Don Kieso

Donald E. Kieso, PhD, CPA, received his bachelor's degree from Aurora University and his doctorate in accounting from the University of Illinois. He has served as chairman of the Department of Accountancy and is currently the KPMG Emeritus Professor of Accountancy at Northern Illinois University. He has public accounting experience with Price Waterhouse & Co. (San Francisco and Chicago) and Arthur Andersen & Co. (Chicago) and research experience with the Research Division of the American Institute of Certified Public Accountants (New York). He has done post doctorate work as a Visiting Scholar at the University of California at Berkeley and is a recipient of NIU's Teaching Excellence Award and four Golden Apple Teaching Awards. Professor Kieso is the author of other accounting and business books and is a member of the American Accounting Association, the American Institute of Certified Public Accountants, and the Illinois CPA Society. He has served as a member of the Board of Directors of the Illinois CPA Society, then AACSB's Accounting Accreditation Committees, the State of Illinois Comptroller's Commission, as Secretary-Treasurer of the Federation of Schools of Accountancy, and as Secretary-Treasurer of the American Accounting Association. Professor Kieso is currently serving on the Board of Trustees and Executive Committee of Aurora University, as a member of the Board of Directors of Kishwaukee Community Hospital, and as Treasurer and Director of Valley West Community Hospital. From 1989 to 1993 he served as a charter member of the national Accounting Education Change Commission. He is the recipient of the Outstanding Accounting Educator Award from the Illinois CPA Society, the FSA's Joseph A. Silvano Award of Merit, the NIU Foundation's Humanitarian Award for Service to Higher Education, a Distinguished Service Award from the Illinois CPA Society, and in 2003 an honorary doctorate from Aurora University.

# Student Owner's Manual

## Using Your Textbook Effectively

The **Navigator** guides you through each chapter by pulling learning tools together into one learning system. Throughout the chapter, The Navigator prompts you to use listed learning aids and to set priorities as you study.

**The Navigator**

- Scan Study Objectives
- Read Feature Story
- Read Preview
- Read text and answer **Do it!** p. 102   
p. 110  p. 116  p. 121
- Work Comprehensive **Do it!** p. 122
- Review Summary of Study Objectives
- Answer Self-Test Questions
- Complete Assignments
- Go to WileyPLUS for practice and tutorials
- Read A Look at IFRS p. 148

Accrued Revenues

|   |  |
|---|--|
| <b>Asset</b><br>Debit<br>Adjusting<br>Entry (*) | <b>Revenue</b><br>Credit<br>Adjusting<br>Entry (*) |
|---|--|

↔

**Illustration 3-13**  
Adjusting entries for accrued revenues

**Helpful Hint**  
For accruals, there may have been no prior entry, and the accounts requiring adjustment may both have zero balances prior to adjustment.

**Helpful Hints** in the margins further clarify concepts being discussed. They are like having an instructor with you as you read.

**Ethics Notes and International Notes** point out ethical and international points related to the nearby text discussion.

Ethics Note

A report released by Fannie Mae's board of directors stated that improper adjusting entries at the mortgage-finance company resulted in delayed recognition of expenses caused by interest-rate changes. The motivation for such accounting apparently was the desire to hit earnings estimates.

International Note

Rules for accounting for specific events sometimes differ across countries. For example, European companies rely less on historical cost and more on fair value than U.S. companies. Despite the differences, the double-entry accounting system is the basis of accounting systems worldwide.

**INVESTOR INSIGHT**

**How to Read Stock Quotes**

Organized exchanges trade the stock of publicly held companies at dollar prices per share established by the interaction between buyers and sellers. For each listed security, the financial press reports the high and low prices of the stock during the year, the total volume of stock traded on a given day, the high and low prices for the day, and the closing market price, with the net change for the day. Nike is listed on the New York Stock Exchange. Here is a recent listing for Nike:

| Stock | 52 Weeks |       | Volume    | High  | Low   | Close | Net Change |
|-------|----------|-------|-----------|-------|-------|-------|------------|
|       | High     | Low   |           |       |       |       |            |
| Nike  | 78.55    | 48.76 | 5,375,651 | 72.44 | 69.78 | 70.61 | -1.69      |

These numbers indicate the following: The high and low market prices for the last 52 weeks have been \$78.55 and \$48.76. The trading volume for the day was 5,375,651 shares. The high, low, and closing prices for that date were \$72.44, \$69.78, and \$70.61, respectively. The net change for the day was a decrease of \$1.69 per share.

? For stocks traded on organized exchanges, how are the dollar prices per share established? What factors might influence the price of shares in the marketplace? (See page 629.)

**Insight examples** give you more glimpses into how actual companies make decisions using accounting information. These high-interest boxes focus on various themes—ethics, international, and investor concerns.

A **critical thinking question** asks you to apply your accounting learning to the story in the example. *Guideline Answers* appear at the end of the chapter.

**Accounting Across the Organization** examples show the use of accounting by people in non-accounting functions—such as finance, marketing, or management. *Guideline Answers* appear at the end of the chapter.

**ACCOUNTING ACROSS THE ORGANIZATION**

**Wall Street No Friend of Facebook**

In the 1990s, it was the dream of every young technology entrepreneur to start a company and do an initial public offering (IPO), that is, list company shares on a stock exchange. It seemed like there was a never-ending supply of 20-something year-old technology entrepreneurs that made millions doing IPOs of companies that never made a profit and eventually failed. In sharp contrast to this is Mark Zuckerberg, the 25-year-old founder and CEO of Facebook. If Facebook did an IPO, he would make billions of dollars. But, he is in no hurry to go public. Because his company doesn't need to invest in factories, distribution systems, or even marketing, it doesn't need to raise a lot of cash. Also, by not going public, Zuckerberg has more control over the direction of the company. Right now, he and the other founders don't have to answer to outside shareholders, who might be more concerned about short-term investment horizons rather than long-term goals. In addition, publicly traded companies face many more financial reporting disclosure requirements.

Source: Jessica E. Vascellaro, "Facebook CEO in No Rush to 'Friend' Wall Street," *Wall Street Journal Online* (March 4, 2010).

? Why has Mark Zuckerberg, the CEO and founder of Facebook, delayed taking his company's shares public through an initial public offering (IPO)? (See page 629.)

**Anatomy of a Fraud** boxes illustrate how a lack of specific internal controls resulted in real-world frauds.

**ANATOMY OF A FRAUD**

Bernie Ebbers was the founder and CEO of the phone company **WorldCom**. The company engaged in a series of increasingly large, debt-financed acquisitions of other companies. These acquisitions made the company grow quickly, which made the stock price increase dramatically. However, because the acquired companies all had different accounting systems, WorldCom's financial records were a mess. When WorldCom's performance started to flatten out, Bernie coerced WorldCom's accountants to engage in a number of fraudulent activities to make net income look better than it really was and thus prop up the stock price. One of these frauds involved treating \$7 billion of line costs as capital expenditures. The line costs, which were rental fees paid to other phone companies to use their phone lines, had always been properly expensed in previous years. Capitalization delayed expense recognition to future periods and thus boosted current-period profits.

**Total take: \$7 billion**

**THE MISSING CONTROLS**

**Documentation procedures.** The company's accounting system was a disorganized collection of non-integrated systems, which resulted from a series of corporate acquisitions. Top management took advantage of this disorganization to conceal its fraudulent activities.

**Independent internal verification.** A fraud of this size should have been detected by a routine comparison of the actual physical assets with the list of physical assets shown in the accounting records.

**Do it!**

**Adjusting Entries for Deferrals** The ledger of Hammond Company, on March 31, 2012, includes these selected accounts before adjusting entries are prepared.

|                                    | Debit    | Credit  |
|------------------------------------|----------|---------|
| Prepaid Insurance                  | \$ 3,600 |         |
| Supplies                           | 2,800    |         |
| Equipment                          | 25,000   |         |
| Accumulated Depreciation—Equipment |          | \$5,000 |
| Unearned Service Revenue           |          | 9,200   |

An analysis of the accounts shows the following.

- Insurance expires at the rate of \$100 per month.
- Supplies on hand total \$800.

Brief **Do it!** exercises ask you to put to work your newly acquired knowledge. They outline an **Action Plan** necessary to complete the exercise, and they show a **Solution**.

**Comprehensive Do it!** problem with **Action Plan** gives you an opportunity to see a detailed solution to a representative problem before you do your homework. Coincides with the Do it! problems within the chapter.

**COMPREHENSIVE Do it!**

Terry Thomas opens the Green Thumb Lawn Care Company on April 1. At April 30, the trial balance shows the following balances for selected accounts.

|                          |          |
|--------------------------|----------|
| Prepaid Insurance        | \$ 3,600 |
| Equipment                | 28,000   |
| Notes Payable            | 20,000   |
| Unearned Service Revenue | 4,200    |
| Service Revenue          | 1,800    |

**Do it! Review** problems appear in the homework material and provide another way for you to determine whether you have mastered the content in the chapters.

**Do it! Review**

**Do it! 3-1** Numerous timing concepts are discussed on pages 100–102. A list of concepts is provided below in the left column, with a description of the concept in the right column. There are more descriptions provided than concepts. Match the description of the concept to the concept.

|  |  |
|--|--|
| 1. <input type="checkbox"/> Cash-basis accounting.         | (a) Monthly and quarterly time periods.  |
| 2. <input type="checkbox"/> Fiscal year.                   | (b) Accountants divide the economic life of a business into artificial time periods. |
| 3. <input type="checkbox"/> Revenue recognition principle. | (c) Efforts (expenses) should be matched with accomplishments (revenues).            |
| 4. <input type="checkbox"/> Expense recognition principle. |  |

*Identify timing concepts. (SO 1, 2)*

What happens when no-par stock does not have a stated value? In that case, the corporation credits the entire proceeds to Common Stock. Thus, if Hydro-Slide does not assign a stated value to its no-par stock, it records the issuance of the 5,000 shares at \$8 per share for cash as follows.

| A          | = | L      | + SE   |
|------------|---|--------|--------|
| +40,000    |   |        |        |
| Cash       |   | 40,000 |        |
| +40,000 CS |   |        | 40,000 |
| Cash Flows |   |        |        |
| +40,000    |   |        |        |

Common Stock  
(To record issue of 5,000 shares of no-par stock)

**Accounting equation analyses** appear next to key journal entries. They will help you understand the impact of an accounting transaction on the components of the accounting equation, on the stockholders' equity accounts, and on the company's cash flows.

**Financial statements** appear regularly. Those from actual companies are identified by a company logo or a photo.

**Illustration 14-11**  
Disclosure of restriction

**Tektronix Inc.**  
Notes to the Financial Statements

Certain of the Company's debt agreements require compliance with debt covenants. Management believes that the Company is in compliance with such requirements. The Company had unrestricted retained earnings of \$223.8 million after meeting those requirements.

**Exercises: Set B** are available online at [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt).

**Exercises: Set B**

Visit the book's companion website, at [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), and choose the Student Companion site to access Exercise Set B.

In the textbook, two similar sets of **Problems—A and B**—are keyed to the same study objectives.

Selected problems, identified by this icon, can be solved using the **General Ledger Software (GLS)** package.

**P3-5A** On September 1, 2012, the account balances of Moore Equipment Repair were as follows.

| Debits |                           | Credits |   |
|--------|---------------------------|---------|---|
| No.    |                           | No.     |   |
| 101    | Cash \$ 4,880             | 154     | Accumulated Depreciation—Equipment \$ 1,500 |
| 112    | Accounts Receivable 3,520 | 201     | Accounts Payable 3,400                      |
| 126    | Supplies 2,000            | 209     | Unearned Service Revenue 1,400              |

|        |                           | 301     | Owner's Capital 18,600                      |
|        | <u>\$25,400</u>           |         | <u>\$25,400</u>                             |

**E3-10** Prepare correct income statement. (SO 2, 5, 6, 7)

The income statement of Brandon Co. for the month of July shows net income of \$1,400 based on Service Revenue \$5,500, Salaries and Wages Expense \$2,300, Supplies Expense \$1,200, and Utilities Expense \$600. In reviewing the statement, you discover the following.

- Insurance expired during July of \$400 was omitted.
- Supplies expense includes \$250 of supplies that are still on hand at July 31.

An icon identifies **Exercises and Problems** that can be solved using Excel templates at the student website.

Those exercises and problems that focus on accounting situations faced by **service companies** are identified by the icon shown here.

**E20-12** Determine cost of jobs and ending balance in work in process and overhead accounts. (SO 3, 4, 6)

Alma Ortiz and Associates, a CPA firm, uses job order costing to capture the costs of its audit jobs. There were no audit jobs in process at the beginning of November. Listed below are data concerning the three audit jobs conducted during November.

|                     | Perez   | Rivera  | Sofa    |
|---------------------|---------|---------|---------|
| Direct materials    | \$600   | \$400   | \$200   |
| Auditor labor costs | \$5,400 | \$6,600 | \$3,375 |
| Auditor hours       | 72      | 88      | 45      |

**Problems: Set C**

Visit the book's companion website, at [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), and choose the Student Companion site to access Problem Set C.

An additional parallel set of **C Problems** appears at the book's companion website.

**Comprehensive Problem: Chapters 3 to 7**

**CP7** Packard Company has the following opening account balances in its general and subsidiary ledgers on January 1 and uses the periodic inventory system. All accounts have normal debit and credit balances.

| General Ledger |               | January 1       |
|----------------|---------------|-----------------|
| Account Number | Account Title | Opening Balance |
| 101            | Cash          | \$33,750        |

**Comprehensive Problems** combine material from the current chapter with previous chapters so that you understand how "it all fits together."

The **Continuing Cookie Chronicle** exercise follows the continuing saga of accounting for a small business begun by an entrepreneurial student.

**Continuing Cookie Chronicle**

(Note: This is a continuation of the Cookie Chronicle from Chapters 1 and 2. Use the information from the previous chapters and follow the instructions below using the general ledger accounts you have already prepared.)

**Waterways Continuing Problem**

(Note: The Waterways Problem begins in Chapter 19 and continues in the remaining chapters. You can also find this problem at the book's Student Companion site.)

The **Waterways Continuing Problem** uses the business activities of a fictional company, to help you apply managerial accounting topics to a realistic entrepreneurial situation.

The **Broadening Your Perspective** section helps to pull together concepts from the chapter and apply them to real-world business situations.

**BROADENING YOUR PERSPECTIVE**

The **Financial Reporting Problem** focuses on reading and understanding the financial statements of **PepsiCo**, which are available in Appendix A.

**Financial Reporting and Analysis**

**Financial Reporting Problem: PepsiCo, Inc.**

**BYP3-1** The financial statements of PepsiCo, Inc. are presented in Appendix A at the end of this textbook.

**Instructions**

(a) Using the consolidated financial statements and related information, identify items that may result in

**Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company**

**BYP3-2** PepsiCo's financial statements are presented in Appendix A. Financial statements for The Coca-Cola Company are presented in Appendix B.

A **Comparative Analysis Problem** compares and contrasts the financial reporting of **PepsiCo** and **The Coca-Cola Company**.

**On the Web**

**BYP3-3** No financial decision maker should ever rely solely on the financial information reported in the annual report to make decisions. It is important to keep abreast of financial news. This activity demonstrates how to search for financial news on the Web.  
Address: <http://biz.yahoo.com/fi>, or go to [www.wiley.com/college/veygandt](http://www.wiley.com/college/veygandt)

**On the Web** exercises guide you to websites where you can find and analyze information related to the chapter topic.

**Decision Making Across the Organization** cases help you build decision-making skills by analyzing accounting information in a less structured situation. These cases require you to work in teams.

**Decision Making Across the Organization**

**BYP20-1** Burgio Parts Company uses a job order cost system. For a number of months, there has been an ongoing rift between the sales department and the production department concerning a special-order product, TC-1. TC-1 is a seasonal product that is manufactured in batches of 1,000 units. TC-1 is sold at cost plus a markup of 40% of cost.

**Communication Activity**

**BYP3-5** In reviewing the accounts of Keri Ann Co. at the end of the year, you discover that adjusting entries have not been made.

**Communication Activity** problems help you to apply and practice business communication skills.

**Ethics Cases** ask you to reflect on typical ethical dilemmas, analyze the stakeholders and the issues involved, and decide on an appropriate course of action.

**Ethics Case**

**BYP3-6** Bluestem Company is a pesticide manufacturer. Its sales declined greatly this year due to the passage of legislation outlawing the sale of several of Bluestem's chemical pesticides. In the coming year, Bluestem will have environmentally safe and competitive chemicals to replace these discontinued products. Sales in the next year are expected to greatly exceed any prior year's. The decline in sales and profits appears to be a one-year aberration. But even so, the company president fears a large dip in the current year's profits. He believes that such a dip could cause a significant drop in the market price of Bluestem's stock and make the company a takeover target.

**"All About You" Activity**

**BYP3-7** Companies must report or disclose in their financial statements information about all liabilities, including potential liabilities related to environmental clean-up. There are many situations in which you will be asked to provide personal financial information about your assets, liabilities, revenue, and expenses. Sometimes you will face difficult decisions regarding what to disclose and how to disclose it.

**All About You** activities are designed to get you thinking and talking about how accounting impacts your personal life.

**FASB Codification Activity** offers you the opportunity to use this online system, which contains all the authoritative literature related to a particular topic.

**FASB Codification Activity**

**BYP3-8** If your school has a subscription to the FASB Codification, go to <http://aaahq.org/asclgin.cfm> to log in and prepare responses to the following.

- Instructions**  
Access the glossary ("Master Glossary") to answer the following.
- (a) What is the definition of revenue?
  - (b) What is the definition of compensation?

**Managerial Analysis**

**BYP19-2** B.J. King is a fairly large manufacturing company located in the southern United States. The company manufactures tennis rackets, tennis balls, tennis clothing, and tennis shoes, all bearing the company's distinctive logo, a large green question mark on a white-flocked tennis ball. The company's sales have been increasing over the past 10 years.  
The tennis racket division has recently implemented several advanced manufacturing techniques. Robot arms hold the tennis rackets in place while glue dries, and machine vision systems check for defects. The engineering and design team uses computerized drafting and testing of new products. The following managers work in the tennis racket division.

**Managerial Analysis** assignments build analytical and decision-making skills in situations required by managers.

**Real World Focus** problems require you to apply techniques and concepts learned in the chapter to specific situations faced by actual companies.

**Real-World Focus**

**BYP19-3** Anchor Glass Container Corporation, the third largest manufacturer of glass containers in the United States, supplies beverage and food producers and consumer products manufacturers nationwide. Parent company **Consumers Packaging Inc.** (Toronto Stock Exchange: CGC) is a leading international designer and manufacturer of glass containers.  
The following management discussion appeared in a recent annual report of Anchor Glass.

**IFRS A Look at IFRS**

It is often difficult for companies to determine in what time period they should report particular revenues and expenses. Both the IASB and FASB are working on a joint project to develop a common conceptual framework, as well as a revenue recognition project, that will enable companies to better use the same principles to record transactions consistently over time.

**A Look at IFRS** provides an overview of the International Financial Reporting Standards (IFRS) that relate to the chapter topics, highlights the differences between GAAP and IFRS, discusses IFRS/GAAP convergence efforts, and tests your understanding through *IFRS Self-Test Questions* and *IFRS Concepts and Application*.

# Acknowledgments

*Accounting Principles* has benefited greatly from the input of focus group participants, manuscript reviewers, those who have sent comments by letter or e-mail, ancillary authors, and proofers. We greatly appreciate the constructive suggestions and innovative ideas of reviewers and the creativity and accuracy of the ancillary authors and checkers.

## Prior Editions

Thanks to the following reviewers and focus group participants of prior editions of *Accounting Principles*:

John Ahmad, *Northern Virginia Community College—Annandale*; Sylvia Allen, *Los Angeles Valley College*; Matt Anderson, *Michigan State University*; Alan Applebaum, *Broward Community College*; Juanita Ardovany, *Los Angeles Valley College*; Yvonne Baker, *Cincinnati State Tech Community College*; Peter Battelle, *University of Vermont*; Colin Battle, *Broward Community College*; Jim Benedum; Beverly Beatty, *Anne Arundel Community College*; *Milwaukee Area Technical College*; Jaswinder Bhangal, *Chabot College*; Bernard Bieg, *Bucks County College*; Michael Blackett, *National American University*; Barry Bomboy, *J. Sargeant Reynolds Community College*; Kent D. Bowen, *Butler County Community College*; David Boyd, *Arkansas State University*; Greg Brookins, *Santa Monica College*; Kurt H. Buerger, *Angelo State University*; Leroy Bugger, *Edison Community College*; Leon Button, *Scottsdale Community College*.

Our thanks to the publishing “pros” who contribute to our efforts to publish high-quality products that benefit both teachers and students: Terry Ann Tatro, development editor; Ed Brislin, project editor; Yana Mermel, project editor; Allie K. Morris, executive media editor; Greg Chaput, media editor; Jacqueline Kepping, editorial assistant; Valerie A. Vargas, senior production editor; Maddy Lesure, textbook designer; Dorothy Sinclair, managing editor; Erin Bascom, production editor; Pam Kennedy, director of production and manufacturing; Ann Berlin, vice president of higher education production and manufacturing; Mary Ann Price, photo editor; Sandra Rigby, illustration editor; Suzanne Ingrao of Ingrao Associates, project manager; Jo-Anne Naples, permissions editor; Denise Showers of Aptara Inc., project manager at Aptara Inc.; Danielle Urban, project manager at Elm Street Publishing Services; and Cyndy Taylor. They provided innumerable services that helped this project take shape.

We also appreciate the exemplary support and professional commitment given us by Chris DeJohn, associate publisher, and the enthusiasm

and ideas that Ramona Sherman, senior marketing manager, brings to the project.

Finally, our thanks to Amy Scholz, Susan Elbe, George Hoffman, Tim Stookesberry, Joe Heider, Bonnie Lieberman, and Will Pesce for their support and leadership in Wiley's College Division.

We thank PepsiCo, Inc. for permitting us the use of its 2009 annual reports for our specimen financial statements and accompanying notes. You can send your thoughts and ideas about the textbook to us via email at: [AccountingAuthors@yahoo.com](mailto:AccountingAuthors@yahoo.com).

# Contents

## chapter 1

### Accounting in Action 2

*Feature Story: Knowing the Numbers* 2

#### What Is Accounting? 4

Three Activities 4

Who Uses Accounting Data 6

#### The Building Blocks of Accounting 7

Ethics in Financial Reporting 7

Generally Accepted Accounting Principles 9

Measurement Principles 9

Assumptions 10

#### The Basic Accounting Equation 12

Assets 12

Liabilities 13

Owner's Equity 13

#### Using the Accounting Equation 14

Transaction Analysis 15

Summary of Transactions 20

#### Financial Statements 21

Income Statement 23

Owner's Equity Statement 23

Balance Sheet 24

Statement of Cash Flows 24

#### APPENDIX 1A Accounting Career Opportunities 29

Public Accounting 29

Private Accounting 29

Opportunities in Government 30

Forensic Accounting 30

"Show Me the Money" 30

*A Look at IFRS* 46

## chapter 2

### The Recording Process 50

*Feature Story: Accidents Happen* 50

#### The Account 52

Debits and Credits 52

Summary of Debit/Credit Rules 56

#### Steps in the Recording Process 57

The Journal 58

The Ledger 60

#### The Recording Process Illustrated 63

Summary Illustration of Journalizing and Posting 70

#### The Trial Balance 70

Limitations of a Trial Balance 72

Locating Errors 72

Use of Dollar Signs 73

*A Look at IFRS* 94

## chapter 3

### Adjusting the Accounts 98

*Feature Story: What Was Your Profit?* 98

#### Timing Issues 100

Fiscal and Calendar Years 100

Accrual- vs. Cash-Basis Accounting 101

Recognizing Revenues and Expenses 101

#### The Basics of Adjusting Entries 103

Types of Adjusting Entries 103

Adjusting Entries for Deferrals 104

Adjusting Entries for Accruals 111

Summary of Basic Relationships 117

#### The Adjusted Trial Balance and Financial Statements 119

Preparing the Adjusted Trial Balance 119

Preparing Financial Statements 120

#### APPENDIX 3A Alternative Treatment of Prepaid

#### Expenses and Unearned Revenues 124

Prepaid Expenses 125

Unearned Revenues 126

Summary of Additional Adjustment Relationships 127

*A Look at IFRS* 148

## chapter 4

### Completing the Accounting Cycle 152

*Feature Story: Everyone Likes to Win* 152

#### Using a Worksheet 154

Steps in Preparing a Worksheet 154

Preparing Financial Statements from a Worksheet 158

Preparing Adjusting Entries from a Worksheet 158

#### Closing the Books 160

Preparing Closing Entries 161

Posting Closing Entries 163

Preparing a Post-Closing Trial Balance 165

#### Summary of the Accounting Cycle 167

Reversing Entries—An Optional Step 168

Correcting Entries—An Avoidable Step 168

#### The Classified Balance Sheet 170

Current Assets 172

Long-Term Investments 172

Property, Plant, and Equipment 173

Intangible Assets 173

Current Liabilities 174

Long-Term Liabilities 175

Owner's Equity 176

## APPENDIX 4A Reversing Entries 181

Reversing Entries Example 181

*A Look at IFRS 204*

## chapter 5

# Accounting for Merchandising Operations 208

*Feature Story: Who Doesn't Shop at Wal-Mart? 208*

## Merchandising Operations 210

Operating Cycles 211

Flow of Costs 211

## Recording Purchases of Merchandise 213

Freight Costs 215

Purchase Returns and Allowances 216

Purchase Discounts 216

Summary of Purchasing Transactions 217

## Recording Sales of Merchandise 218

Sales Returns and Allowances 219

Sales Discounts 220

## Completing the Accounting Cycle 222

Adjusting Entries 222

Closing Entries 222

Summary of Merchandising Entries 223

## Forms of Financial Statements 224

Multiple-Step Income Statement 224

Single-Step Income Statement 227

Classified Balance Sheet 227

## APPENDIX 5A Periodic Inventory System 232

Determining Cost of Goods Sold Under a Periodic System 232

Recording Merchandise Transactions 233

Recording Purchases of Merchandise 233

Recording Sales of Merchandise 234

## APPENDIX 5B Worksheet for a Merchandising

### Company 236

Using a Worksheet 236

*A Look at IFRS 257*

## chapter 6

# Inventories 260

*Feature Story: "Where Is That Spare Bulldozer Blade?" 260*

## Classifying Inventory 262

## Determining Inventory Quantities 263

Taking a Physical Inventory 263

Determining Ownership of Goods 264

## Inventory Costing 266

Specific Identification 267

Cost Flow Assumptions 267

Financial Statement and Tax Effects of Cost Flow Methods 272

Using Inventory Cost Flow Methods

Consistently 274

Lower-of-Cost-or-Market 275

## Inventory Errors 276

Income Statement Effects 276

Balance Sheet Effects 277

## Statement Presentation and Analysis 278

Presentation 265

Analysis 279

## APPENDIX 6A Inventory Cost Flow Methods in

### Perpetual Inventory Systems 283

First-In, First-Out (FIFO) 283

Last-In, First-Out (LIFO) 284

Average-Cost 284

## APPENDIX 6B Estimating Inventories 286

Gross Profit Method 287

Retail Inventory Method 288

*A Look at IFRS 310*

## chapter 7

# Accounting Information Systems 314

*Feature Story: QuickBooks® Helps*

*This Retailer Sell Guitars 314*

## Basic Concepts of Accounting Information Systems 316

Computerized Accounting Systems 316

Manual Accounting Systems 319

## Subsidiary Ledgers 319

Subsidiary Ledger Example 320

Advantages of Subsidiary Ledgers 321

## Special Journals 322

Sales Journal 323

Cash Receipts Journal 325

Purchases Journal 329

Cash Payments Journal 331

Effects of Special Journals on the General Journal 334

*A Look at IFRS 357*

## chapter 8

# Fraud, Internal Control, and Cash 360

*Feature Story: Minding the Money in Moose Jaw 360*

## Fraud and Internal Control 362

Fraud 362

The Sarbanes-Oxley Act 363

Internal Control 363

Principles of Internal Control Activities 364

Limitations of Internal Control 371

## Cash Controls 372

Cash Receipts Controls 372

Cash Disbursements Controls 375

## Control Features: Use of a Bank 380

Making Bank Deposits 380

Writing Checks 380

Bank Statements 381

Reconciling the Bank Account 383  
Electronic Funds Transfer (EFT) System 387

### **Reporting Cash 388**

Cash Equivalents 388  
Restricted Cash 389

*A Look at IFRS 410*

## **chapter 9**

### **Accounting for Receivables 414**

*Feature Story: A Dose of Careful Management Keeps Receivables Healthy 414*

#### **Types of Receivables 416**

##### **Accounts Receivable 417**

Recognizing Accounts Receivable 417  
Valuing Accounts Receivable 418  
Disposing of Accounts Receivable 425

##### **Notes Receivable 427**

Determining the Maturity Date 428  
Computing Interest 429  
Recognizing Notes Receivable 430  
Valuing Notes Receivable 430  
Disposing of Notes Receivable 431

#### **Statement Presentation and Analysis 433**

Presentation 433  
Analysis 433

*A Look at IFRS 453*

## **chapter 10**

### **Plant Assets, Natural Resources, and Intangible Assets 456**

*Feature Story: How Much for a Ride to the Beach? 456*

#### **SECTION 1 Plant Assets 458**

##### **Determining the Cost of Plant Assets 459**

Land 459  
Land Improvements 459  
Buildings 460  
Equipment 460

##### **Depreciation 462**

Factors in Computing Depreciation 463  
Depreciation Methods 464  
Depreciation and Income Taxes 468  
Revising Periodic Depreciation 468

##### **Expenditures During Useful Life 470**

##### **Plant Assets Disposals 471**

Retirement of Plant Assets 471  
Sale of Plant Assets 472

#### **SECTION 2 Natural Resources 474**

#### **SECTION 3 Intangible Assets 475**

##### **Accounting for Intangible Assets 475**

Patents 476  
Copyrights 476  
Trademarks and Trade Names 476  
Franchises and Licenses 477  
Goodwill 477

### **Research and Development Costs 478**

#### **Statement Presentation and Analysis 479**

Presentation 479  
Analysis 480

#### **APPENDIX 10A Exchange of Plant Assets 484**

Loss Treatment 484  
Gain Treatment 485

*A Look at IFRS 504*

## **chapter 11**

### **Current Liabilities and Payroll Accounting 508**

*Feature Story: Financing His Dreams 508*

#### **Accounting for Current Liabilities 510**

Notes Payable 510  
Sales Taxes Payable 511  
Unearned Revenues 512  
Current Maturities of Long-Term Debt 513  
Statement Presentation and Analysis 514

#### **Contingent Liabilities 515**

Recording a Contingent Liability 516  
Disclosure of Contingent Liabilities 517

#### **Payroll Accounting 518**

Determining the Payroll 519  
Recording the Payroll 522  
Employer Payroll Taxes 525  
Filing and Remitting Payroll Taxes 528  
Internal Control for Payroll 528

#### **APPENDIX 11A Additional Fringe Benefits 532**

Paid Absences 532  
Post-Retirement Benefits 533

*A Look at IFRS 549*

## **chapter 12**

### **Accounting for Partnerships 552**

*Feature Story: From Trials to Top Ten 552*

#### **Partnership Form of Organization 554**

Characteristics of Partnerships 554  
Organizations with Partnership  
Characteristics 555  
Advantages and Disadvantages of  
Partnerships 556  
The Partnership Agreement 558

#### **Basic Partnership Accounting 559**

Forming a Partnership 559  
Dividing Net Income or Net Loss 560  
Partnership Financial Statements 563

#### **Liquidation of a Partnership 564**

No Capital Deficiency 565  
Capital Deficiency 568

#### **APPENDIX 12A Admission and Withdrawal of Partners 572**

Admission of a Partner 572  
Withdrawal of a Partner 576

## chapter 13

### Corporations: Organization and Capital Stock Transactions 592

*Feature Story: What's Cooking?* 592

#### The Corporate Form of Organization 594

- Characteristics of a Corporation 595
- Forming a Corporation 597
- Ownership Rights of Stockholders 598
- Stock Issue Considerations 598
- Corporate Capital 601

#### Accounting for Issues of Common Stock 603

- Issuing Par Value Common Stock for Cash 603
- Issuing No-Par Common Stock for Cash 604
- Issuing Common Stock for Services or Noncash Assets 605

#### Accounting for Treasury Stock 606

- Purchase of Treasury Stock 607
- Disposal of Treasury Stock 608

#### Preferred Stock 610

- Dividend Preferences 610
- Liquidation Preference 611

#### Statement Presentation 611

*A Look at IFRS* 629

## chapter 14

### Corporations: Dividends, Retained Earnings, and Income Reporting 632

*Feature Story: Owning a Piece of the Action* 632

#### Dividends 634

- Cash Dividends 634
- Stock Dividends 638
- Stock Splits 640

#### Retained Earnings 642

- Retained Earnings Restrictions 643
- Prior Period Adjustments 644
- Retained Earnings Statement 645

#### Statement Presentation and Analysis 646

- Stockholders' Equity Presentation 646
- Stockholders' Equity Analysis 647
- Income Statement Presentation 647
- Income Statement Analysis 648

*A Look at IFRS* 665

## chapter 15

### Long-Term Liabilities 668

*Feature Story: Thanks Goodness for Bankruptcy* 668

#### Bond Basics 670

- Types of Bonds 671
- Issuing Procedures 672
- Determining the Market Value of Bonds 672

#### Accounting for Bond Issues 674

- Issuing Bonds at Face Value 674

Discount or Premium on Bonds 675

Issuing Bonds at a Discount 676

Issuing Bonds at a Premium 677

#### Accounting for Bond Retirements 678

- Redeeming Bonds at Maturity 679
- Redeeming Bonds before Maturity 679
- Converting Bonds into Common Stock 679

#### Accounting for Other Long-Term Liabilities 680

- Long-Term Notes Payable 680
- Lease Liabilities 683

#### Statement Presentation and Analysis 684

- Presentation 684
- Analysis 685

#### APPENDIX 15A Present Value Concepts

##### Related to Bond Pricing 690

- Present Value of Face Value 690
- Present Value of Interest Payments (Annuities) 692
- Time Periods and Discounting 693
- Computing the Present Value of a Bond 693

#### APPENDIX 15B Effective-Interest Method of

##### Bond Amortization 695

- Amortizing Bond Discount 695
- Amortizing Bond Premium 697

#### APPENDIX 15C Straight-Line Amortization 699

- Amortizing Bond Discount 699
- Amortizing Bond Premium 700

*A Look at IFRS* 718

## chapter 16

### Investments 722

*Feature Story: "Is There Anything Else We Can Buy?"* 722

#### Why Corporations Invest 724

#### Accounting for Debt Investments 725

- Recording Acquisition of Bonds 726
- Recording Bond Interest 726
- Recording Sale of Bonds 726

#### Accounting for Stock Investments 727

- Holdings of Less than 20% 728
- Holdings Between 20% and 50% 729
- Holdings of More than 50% 730

#### Valuing and Reporting Investments 732

- Categories of Securities 733
- Balance Sheet Presentation 736
- Presentation of Realized and Unrealized Gain or Loss 737
- Classified Balance Sheet 738

*A Look at IFRS* 757

## chapter 17

### Statement of Cash Flows 760

*Feature Story: Got Cash?* 760

#### The Statement of Cash Flows: Usefulness and Format 762

Usefulness of the Statement of  
Cash Flows 762  
Classification of Cash Flows 763  
Significant Noncash Activities 764  
Format of the Statement of Cash Flows 765  
Preparing the Statement of Cash Flows 766  
Indirect and Direct Methods 767

### **Preparing the Statement of Cash Flows—Indirect Method 768**

Step 1: Operating Activities 769  
Summary of Conversion to Net Cash Provided  
by Operating Activities—Indirect Method 773  
Step 2: Investing and Financing Activities 774  
Step 3: Net Change in Cash 775

### **Using Cash Flows to Evaluate a Company 778**

Free Cash Flow 778

### **APPENDIX 17A Using a Work Sheet to Prepare the Statement of Cash Flows—Indirect Method 783**

Preparing the Worksheet 784

### **APPENDIX 17B Statement of Cash Flows—Direct Method 789**

Step 1: Operating Activities 790  
Step 2: Investing and Financing Activities 794  
Step 3: Net Change in Cash 795

*A Look at IFRS 820*

## **chapter 18**

### **Financial Statement Analysis 824**

*Feature Story: It Pays to Be Patient 824*

#### **Basics of Financial Statement Analysis 826**

Need for Comparative Analysis 826  
Tools of Analysis 827

#### **Horizontal Analysis 827**

Balance Sheet 828  
Income Statement 829  
Retained Earnings Statement 830

#### **Vertical Analysis 831**

Balance Sheet 831  
Income Statement 831

#### **Ratio Analysis 833**

Liquidity Ratios 835  
Profitability Ratios 838  
Solvency Ratios 842  
Summary of Ratios 843

#### **Earning Power and Irregular Items 846**

Discontinued Operations 846  
Extraordinary Items 847  
Changes in Accounting Principle 848  
Comprehensive Income 849

#### **Quality of Earnings 850**

Alternative Accounting Methods 850  
Pro Forma Income 850  
Improper Recognition 851

*A Look at IFRS 874*

## **chapter 19**

### **Managerial Accounting 876**

*Feature Story: Think Fast 876*

#### **Managerial Accounting Basics 878**

Comparing Managerial and Financial  
Accounting 879  
Management Functions 880  
Organizational Structure 881  
Business Ethics 882

#### **Managerial Cost Concepts 884**

Manufacturing Costs 884  
Product versus Period Costs 886

#### **Manufacturing Costs in Financial Statements 887**

Income Statement 887  
Cost of Goods Manufactured 888  
Balance Sheet 890  
Cost Concepts—A Review 891

#### **Managerial Accounting Today 894**

The Value Chain 894  
Technological Change 895  
Just-in-Time Inventory Methods 895  
Quality 896  
Activity-Based Costing 896

Balanced Scorecard 897

## **chapter 20**

### **Job Order Costing 922**

*Feature Story: “. . . And We’d Like It in Red” 922*

#### **Cost Accounting Systems 924**

Job Order Cost System 924  
Process Cost System 925

#### **Job Order Cost Flow 926**

Accumulating Manufacturing Costs 927  
Assigning Manufacturing Costs to Work in  
Process 929  
Assigning Costs to Finished Goods 936  
Assigning Costs to Cost of Goods Sold 937  
Job Order Costing for Service Companies 937  
Summary of Job Order Cost Flows 938  
Advantages and Disadvantages of Job Order  
Costing 940

#### **Reporting Job Cost Data 941**

#### **Under- or Overapplied Manufacturing Overhead 941**

## **chapter 21**

### **Process Costing 964**

*Feature Story: Ben & Jerry’s Tracks*

*Its Mix-Ups 964*

#### **The Nature of Process Cost Systems 966**

Uses of Process Cost Systems 966  
Process Costing for Service Companies 967

Similarities and Differences between Job Order  
Cost and Process Cost Systems 967  
Process Cost Flow 969  
Assignment of Manufacturing Costs—Journal  
Entries 970

### **Equivalent Units 972**

Weighted-Average Method 973  
Refinements on the Weighted-Average  
Method 974  
Production Cost Report 975

### **Comprehensive Example of Process Costing 976**

Compute the Physical Unit Flow (Step 1) 977  
Compute Equivalent Units of Production  
(Step 2) 978  
Compute Unit Production Costs (Step 3) 978  
Prepare a Cost Reconciliation Schedule  
(Step 4) 979  
Preparing the Production Cost Report 980  
Costing Systems—Final Comments 981

### **Contemporary Developments 982**

Just-in-Time Processing 982  
Activity-Based Costing 984

### **APPENDIX 21A Example of Traditional Costing versus Activity-Based Costing 989**

Production and Cost Data 989  
Unit Costs Under Traditional Costing 989  
Unit Costs Under ABC 989  
Comparing Unit Costs 990  
Benefits and Limitations of Activity-Based  
Costing 991

## **chapter 22**

### **Cost-Volume-Profit 1010**

*Feature Story: Understanding Medical Costs  
Might Lead to Better Health Care 1010*

#### **Cost Behavior Analysis 1012**

Variable Costs 1012  
Fixed Costs 1013  
Relevant Range 1014  
Mixed Costs 1015  
Importance of Identifying Variable and Fixed  
Costs 1019

#### **Cost-Volume-Profit Analysis 1020**

Basic Components 1020  
CVP Income Statement 1020  
Break-even Analysis 1023  
Target Net Income 1026  
Margin of Safety 1027  
CVP and Changes in the Business  
Environment 1028  
CVP Income Statement Revisited 1030

### **APPENDIX 22A Variable Costing 1034**

Effects of Variable Costing on Income 1035  
Rationale for Variable Costing 1036

## **chapter 23**

### **Budgetary Planning 1052**

*Feature Story: The Next amazon.com?  
Not Quite 1052*

#### **Budgeting Basics 1054**

Budgeting and Accounting 1054  
The Benefits of Budgeting 1055  
Essentials of Effective Budgeting 1055  
Length of the Budget Period 1055  
The Budgeting Process 1055  
Budgeting and Human Behavior 1056  
Budgeting and Long-Range Planning 1058  
The Master Budget 1058

#### **Preparing the Operating Budgets 1059**

Sales Budget 1059  
Production Budget 1060  
Direct Materials Budget 1061  
Direct Labor Budget 1063  
Manufacturing Overhead Budget 1064  
Selling and Administrative Expense  
Budget 1065  
Budgeted Income Statement 1065

#### **Preparing the Financial Budgets 1067**

Cash Budget 1067

# CHAPTER 1

## Accounting in Action

### Study Objectives

After studying this chapter, you should be able to:

- 1 Explain what accounting is.
- 2 Identify the users and uses of accounting.
- 3 Understand why ethics is a fundamental business concept.
- 4 Explain generally accepted accounting principles.
- 5 Explain the monetary unit assumption and the economic entity assumption.
- 6 State the accounting equation, and define its components.
- 7 Analyze the effects of business transactions on the accounting equation.
- 8 Understand the four financial statements and how they are prepared.

*Study Objectives give you a framework for learning the specific concepts covered in the chapter.*

### Feature Story

#### KNOWING THE NUMBERS

Many students who take this course do not plan to be accountants. If you are in that group, you might be thinking, "If I'm not going to be an accountant, why do I need to know accounting?" In response, consider the quote from Harold Geneen, the former chairman of IT&T: "To be good at your business, you have to know the numbers—cold." Success in any business comes back to the numbers. You will rely on them to make decisions, and managers will use them to evaluate your performance. That is true whether your job involves marketing, production, management, or information systems.

In business, accounting and financial statements are the means for communicating the numbers. If you don't know how to read financial statements, you can't really know your business.

Many companies spend significant resources teaching their employees basic accounting so

that they can read financial statements and understand how their actions affect the company's financial results. One such company is **Springfield ReManufacturing Corporation (SRC)**. When Jack Stack and 11 other managers purchased SRC for 10 cents a share, it was a failing division of **International Harvester**. Jack's 119 employees, however, were counting on him for their livelihood. He decided that for the company to survive, every employee needed to think like a businessperson and to act like an owner. To accomplish this, all employees at SRC took basic

accounting courses and participated in weekly reviews of the company's financial statements. SRC survived, and eventually thrived. To this day, every employee (now numbering more than 1,000) undergoes this same training.

Many other companies have adopted this approach, which is called "open-book management." Even in companies that do not practice open-book management, employers generally assume that managers in all areas of the company are "financially literate."

Taking this course will go a long way to making you financially literate. In this book, you will learn how to read and prepare financial statements, and how to use basic tools to evaluate financial results. Appendices A and B provide real financial statements of two well-known companies, **PepsiCo, Inc.** and **The Coca-Cola Company**. Throughout this textbook, we attempt to increase your familiarity with financial reporting by providing numerous references, questions, and exercises that encourage you to explore these financial statements.

*The Feature Story helps you picture how the chapter topic relates to the real world of accounting and business. You will find references to the story throughout the chapter.*

## Inside**CHAPTER**1

- **Accounting Across the Organization: The Scoop on Accounting** (p. 6)
- **Ethics Insight: The Numbers Behind Not-for-Profit Organizations** (p. 8)
- **International Insight: The Korean Discount** (p. 10)
- **Accounting Across the Organization: Spinning the Career Wheel** (p. 12)

*"Inside Chapter x" lists boxes in the chapter that should be of special interest to you.*

# Preview of CHAPTER 1

The opening story about **Springfield ReManufacturing Corporation** highlights the importance of having good financial information to make effective business decisions. Whatever one's pursuits or occupation, the need for financial information is inescapable. You cannot earn a living, spend money, buy on credit, make an investment, or pay taxes without receiving, using, or dispensing financial information. Good decision making depends on good information.

The purpose of this chapter is to show you that accounting is the system used to provide useful financial information. The content and organization of Chapter 1 are as follows.

| Accounting in Action   |  |   |   |  |
|--|--|---|---|--|
| What Is Accounting?  | The Building Blocks of Accounting  | The Basic Accounting Equation   | Using the Accounting Equation   | Financial Statements   |
| <ul style="list-style-type: none"> <li>• Three activities</li> <li>• Who uses accounting data</li> </ul> | <ul style="list-style-type: none"> <li>• Ethics in financial reporting</li> <li>• Generally accepted accounting principles</li> <li>• Measurement principles</li> <li>• Assumptions</li> </ul> | <ul style="list-style-type: none"> <li>• Assets</li> <li>• Liabilities</li> <li>• Owner's equity</li> </ul> | <ul style="list-style-type: none"> <li>• Transaction analysis</li> <li>• Summary of transactions</li> </ul> | <ul style="list-style-type: none"> <li>• Income statement</li> <li>• Owner's equity statement</li> <li>• Balance sheet</li> <li>• Statement of cash flows</li> </ul> |

The **Preview** describes and outlines the major topics and subtopics you will see in the chapter.

## What Is Accounting?

### Study Objective [1]

Explain what accounting is.

Why is accounting so popular? What consistently ranks as one of the top career opportunities in business? What frequently rates among the most popular majors on campus? What was the undergraduate degree chosen by **Nike** founder Phil Knight, **Home Depot** co-founder Arthur Blank, former acting director of the **Federal Bureau of Investigation (FBI)** Thomas Pickard, and numerous members of Congress? Accounting.<sup>1</sup> Why did these people choose accounting? They wanted to understand what was happening financially to their organizations. Accounting is the financial information system that provides these insights. In short, to understand your organization, you have to know the numbers.

**Accounting** consists of three basic activities—it **identifies**, **records**, and **communicates** the economic events of an organization to interested users. Let's take a closer look at these three activities.

### Three Activities

As a starting point to the accounting process, a company identifies the **economic events relevant to its business**. Examples of economic events are the sale of snack chips by **PepsiCo**, providing of telephone services by **AT&T**, and payment of wages by **Ford Motor Company**.

Once a company like PepsiCo identifies economic events, it **records** those events in order to provide a history of its financial activities. Recording consists of

<sup>1</sup>The appendix to this chapter describes job opportunities for accounting majors and explains why accounting is such a popular major.

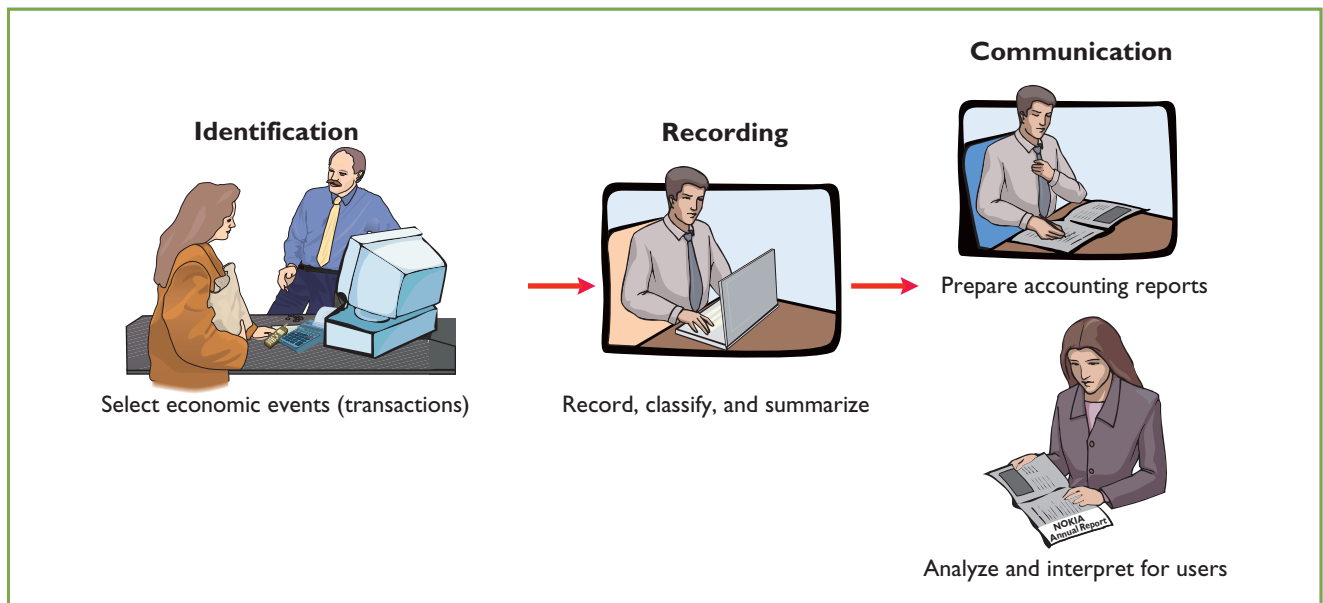

keeping a **systematic, chronological diary of events**, measured in dollars and cents. In recording, PepsiCo also classifies and summarizes economic events.

Finally, PepsiCo **communicates** the collected information to interested users by means of **accounting reports**. The most common of these reports are called **financial statements**. To make the reported financial information meaningful, PepsiCo reports the recorded data in a standardized way. It accumulates information resulting from similar transactions. For example, PepsiCo accumulates all sales transactions over a certain period of time and reports the data as one amount in the company’s financial statements. Such data are said to be reported **in the aggregate**. By presenting the recorded data in the aggregate, the accounting process simplifies a multitude of transactions and makes a series of activities understandable and meaningful.

A vital element in communicating economic events is the accountant’s ability to **analyze and interpret** the reported information. Analysis involves use of ratios, percentages, graphs, and charts to highlight significant financial trends and relationships. Interpretation involves **explaining the uses, meaning, and limitations of reported data**. Appendix A of this textbook shows the financial statements of **PepsiCo, Inc.**; Appendix B illustrates the financial statements of **The Coca-Cola Company**. We refer to these statements at various places throughout the text. At this point, they probably strike you as complex and confusing. By the end of this course, you’ll be surprised at your ability to understand, analyze, and interpret them.

Illustration 1-1 summarizes the activities of the accounting process.

**Illustration 1-1**  
The activities of the accounting process

You should understand that the accounting process **includes** the bookkeeping function. **Bookkeeping** usually involves **only** the recording of economic events. It is therefore just one part of the accounting process. In total, accounting involves **the entire process of identifying, recording, and communicating economic events**.<sup>2</sup>

*Essential terms are printed in blue when they first appear, and are defined in the end-of-chapter glossary.*

<sup>2</sup>The origins of accounting are generally attributed to the work of Luca Pacioli, an Italian Renaissance mathematician. Pacioli was a close friend and tutor to Leonardo da Vinci and a contemporary of Christopher Columbus. In his 1494 text *Summa de Arithmetica, Geometria, Proportione et Proportionalite*, Pacioli described a system to ensure that financial information was recorded efficiently and accurately.

## Who Uses Accounting Data

### Study Objective [2]

Identify the users and uses of accounting.

The information that a user of financial information needs depends upon the kinds of decisions the user makes. There are two broad groups of users of financial information: internal users and external users.

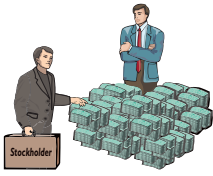

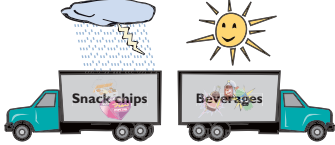

### INTERNAL USERS

**Internal users** of accounting information are managers who plan, organize, and run the business. These include marketing managers, production supervisors, finance directors, and company officers. In running a business, internal users must answer many important questions, as shown in Illustration 1-2.

#### Illustration 1-2

Questions that internal users ask

**Questions Asked by Internal Users**

|  |  |   |   |
|--|--|---|---|
|  <p><b>Finance</b></p> <p>Is cash sufficient to pay dividends to <b>Microsoft</b> stockholders?</p> |  <p><b>Marketing</b></p> <p>What price for an <b>Apple</b> iPod will maximize the company's net income?</p> |  <p><b>Human Resources</b></p> <p>Can we afford to give <b>General Motors</b> employees pay raises this year?</p> |  <p><b>Management</b></p> <p>Which <b>PepsiCo</b> product line is the most profitable? Should any product lines be eliminated?</p> |
|--|--|---|---|

To answer these and other questions, internal users need detailed information on a timely basis. **Managerial accounting** provides internal reports to help users make decisions about their companies. Examples are financial comparisons of operating alternatives, projections of income from new sales campaigns, and forecasts of cash needs for the next year.

## ACCOUNTING ACROSS THE ORGANIZATION

### The Scoop on Accounting

Accounting can serve as a useful recruiting tool even for the human resources department. Rhino Foods, located in Burlington, Vermont, is a manufacturer of specialty ice cream. Its corporate website includes the following:

"Wouldn't it be great to work where you were part of a team? Where your input and hard work made a difference? Where you weren't kept in the dark about what management was thinking? . . . Well—it's not a dream! It's the way we do business . . . Rhino Foods believes in family, honesty and open communication—we really care about and appreciate our employees—and it shows. Operating results are posted and monthly group meetings inform all employees about what's happening in the Company. Employees also share in the Company's profits, in addition to having an excellent comprehensive benefits package."

Source: [www.rhinofoods.com/workforus/workforus.html](http://www.rhinofoods.com/workforus/workforus.html).

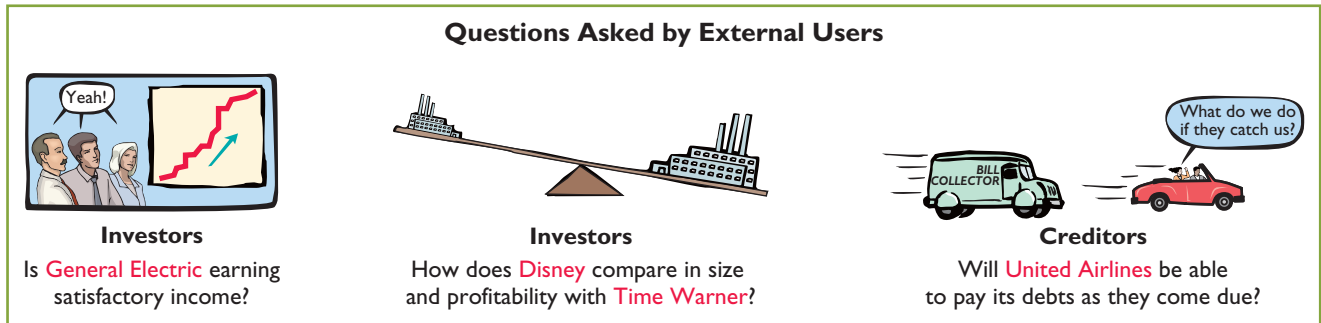

**?** What are the benefits to the company and to the employees of making the financial statements available to all employees? (See page 46.)

*Accounting Across the Organization boxes demonstrate applications of accounting information in various business functions.*

### EXTERNAL USERS

**External users** are individuals and organizations outside a company who want financial information about the company. The two most common types of external users are

investors and creditors. **Investors** (owners) use accounting information to make decisions to buy, hold, or sell ownership shares of a company. **Creditors** (such as suppliers and bankers) use accounting information to evaluate the risks of granting credit or lending money. Illustration 1-3 shows some questions that investors and creditors may ask.

**Illustration 1-3**  
Questions that external users ask

**Financial accounting** answers these questions. It provides economic and financial information for investors, creditors, and other external users. The information needs of external users vary considerably. **Taxing authorities**, such as the Internal Revenue Service, want to know whether the company complies with tax laws. **Regulatory agencies**, such as the Securities and Exchange Commission or the Federal Trade Commission, want to know whether the company is operating within prescribed rules. **Customers** are interested in whether a company like **General Motors** will continue to honor product warranties and support its product lines. **Labor unions** such as the **Major League Baseball Players Association** want to know whether the owners have the ability to pay increased wages and benefits.

## The Building Blocks of Accounting

A doctor follows certain standards in treating a patient's illness. An architect follows certain standards in designing a building. An accountant follows certain standards in reporting financial information. For these standards to work, a fundamental business concept must be at work—ethical behavior.

### Ethics in Financial Reporting

People won't gamble in a casino if they think it is "rigged." Similarly, people won't play the stock market if they think stock prices are rigged. In recent years the financial press has been full of articles about financial scandals at **Enron**, **WorldCom**, **HealthSouth**, **AIG**, and others. As the scandals came to light, mistrust of financial reporting in general grew. One article in the *Wall Street Journal* noted that "repeated disclosures about questionable accounting practices have bruised investors' faith in the reliability of earnings reports, which in turn has sent stock prices tumbling."<sup>3</sup> Imagine trying to carry on a business or invest money if you could not depend on the financial statements to be honestly prepared. Information would have no credibility. There is no doubt that a sound, well-functioning economy depends on accurate and dependable financial reporting.

United States regulators and lawmakers were very concerned that the economy would suffer if investors lost confidence in corporate accounting because of

**Study Objective [3]**  
Understand why ethics is a fundamental business concept.

<sup>3</sup>"U.S. Share Prices Slump," *Wall Street Journal* (February 21, 2002).

### Ethics Note

Circus-founder P.T. Barnum is alleged to have said, “Trust everyone, but cut the deck.” What Sarbanes-Oxley does is to provide measures that (like cutting the deck of playing cards) help ensure that fraud will not occur.

*Ethics Notes help sensitize you to some of the ethical issues in accounting.*

unethical financial reporting. In response, Congress passed the **Sarbanes-Oxley Act of 2002** (SOX, or Sarbox). Its intent is to reduce unethical corporate behavior and decrease the likelihood of future corporate scandals. As a result of SOX, top management must now certify the accuracy of financial information. In addition, penalties for fraudulent financial activity are much more severe. Also, SOX increased the independence of the outside auditors who review the accuracy of corporate financial statements and increased the oversight role of boards of directors.

The standards of conduct by which one’s actions are judged as right or wrong, honest or dishonest, fair or not fair, are **ethics**. Effective financial reporting depends on sound ethical behavior. To sensitize you to ethical situations in business and to give you practice at solving ethical dilemmas, we address ethics in a number of ways in this book:

1. A number of the *Feature Stories* and other parts of the text discuss the central importance of ethical behavior to financial reporting.
2. *Ethics Insight* boxes and marginal *Ethics Notes* highlight ethics situations and issues in actual business settings.
3. Many of the *All About You* topics (available on the book’s companion website) focus on ethical issues you may face in your college and early-career years.
4. At the end of the chapter, an *Ethics Case* simulates a business situation and asks you to put yourself in the position of a decision maker in that case.

When analyzing these various ethics cases, as well as experiences in your own life, it is useful to apply the three steps outlined in Illustration 1-4.

### Illustration 1-4

Steps in analyzing ethics cases and situations

**1. Recognize an ethical situation and the ethical issues involved.**

Use your personal ethics to identify ethical situations and issues. Some businesses and professional organizations provide written codes of ethics for guidance in some business situations.

**2. Identify and analyze the principal elements in the situation.**

Identify the *stakeholders*—persons or groups who may be harmed or benefited. Ask the question: What are the responsibilities and obligations of the parties involved?

**3. Identify the alternatives, and weigh the impact of each alternative on various stakeholders.**

Select the most ethical alternative, considering all the consequences. Sometimes there will be one right answer. Other situations involve more than one right solution; these situations require an evaluation of each and a selection of the best alternative.

*Insights provide examples of business situations from various perspectives—ethics, investor, and international.*

## ETHICS INSIGHT

### The Numbers Behind Not-for-Profit Organizations

Accounting plays an important role for a wide range of business organizations worldwide. Just as the integrity of the numbers matters for business, it matters at least as much for not-for-profit organizations. Proper control and reporting help ensure that money is used the way donors intended. Donors are less inclined to give to an organization if they think the organization is subject to waste or theft. The accounting challenges of some large international not-for-profits rival those of the world’s largest businesses. For example, after the Haitian earthquake, the Haitian-born musician Wyclef Jean was criticized for the poor accounting controls in a relief fund that he founded. Since then, he has hired a new accountant and improved the transparency regarding funds raised and spent.

**?** What benefits does a sound accounting system provide to a not-for-profit organization? (See page 46.)

## Generally Accepted Accounting Principles

The accounting profession has developed standards that are generally accepted and universally practiced. This common set of standards is called **generally accepted accounting principles (GAAP)**. These standards indicate how to report economic events.

The primary accounting standard-setting body in the United States is the **Financial Accounting Standards Board (FASB)**. The **Securities and Exchange Commission (SEC)** is the agency of the U.S. government that oversees U.S. financial markets and accounting standard-setting bodies. The SEC relies on the FASB to develop accounting standards, which public companies must follow. Many countries outside of the United States have adopted the accounting standards issued by the **International Accounting Standards Board (IASB)**. These standards are called International Financial Reporting Standards (IFRS).

As markets become more global, it is often desirable to compare the result of companies from different countries that report using different accounting standards. In order to increase comparability, in recent years the two standard-setting bodies have made efforts to reduce the differences between U.S. GAAP and IFRS. This process is referred to as **convergence**. As a result of these convergence efforts, it is likely that someday there will be a single set of high-quality accounting standards that are used by companies around the world. Because convergence is such an important issue, we highlight any major differences between GAAP and IFRS in *International Notes* (as shown in the margin here) and provide a more in-depth discussion in the *A Look at IFRS* section at the end of each chapter.

## Measurement Principles

GAAP generally uses one of two measurement principles, the cost principle or the fair value principle. Selection of which principle to follow generally relates to trade-offs between relevance and faithful representation. **Relevance** means that financial information is capable of making a difference in a decision. **Faithful representation** means that the numbers and descriptions match what really existed or happened—it is factual.

### COST PRINCIPLE

The **cost principle** (or historical cost principle) dictates that companies record assets at their cost. This is true not only at the time the asset is purchased, but also over the time the asset is held. For example if **Best Buy** purchases land for \$300,000, the company initially reports it in its accounting records at \$300,000. But what does Best Buy do if, by the end of the next year, the fair value of the land has increased to \$400,000? Under the cost principle, it continues to report the land at \$300,000.

### FAIR VALUE PRINCIPLE

The **fair value principle** states that assets and liabilities should be reported at fair value (the price received to sell an asset or settle a liability). Fair value information may be more useful than historical cost for certain types of assets and liabilities. For example, certain investment securities are reported at fair value because market value information is usually readily available for these types of assets. In determining which measurement principle to use, companies weigh the factual nature of cost figures versus the relevance of fair value. In general, most companies choose to use cost. Only in situations where assets are actively traded, such as investment securities, do companies apply the fair value principle extensively.

### Study Objective [4]

Explain generally accepted accounting principles.

### International Note

Over 100 countries use International Financial Reporting Standards (called IFRS). For example, all companies in the European Union follow international standards. The differences between U.S. and international standards are not generally significant.

*International Notes highlight differences between U.S. and international accounting standards.*

### Helpful Hint

*Relevance and faithful representation are two primary qualities that make accounting information useful for decision making.*

*Helpful Hints further clarify concepts being discussed.*

## INTERNATIONAL INSIGHT

### The Korean Discount

If you think that accounting standards don't matter, consider recent events in South Korea. For many years, international investors complained that the financial reports of South Korean companies were inadequate and inaccurate. Accounting practices there often resulted in huge differences between stated revenues and actual revenues. Because investors did not have faith in the accuracy of the numbers, they were unwilling to pay as much for the shares of these companies relative to shares of comparable companies in different countries. This difference in stock price was often referred to as the "Korean discount."

In response, Korean regulators decided that, beginning in 2011, companies will have to comply with international accounting standards. This change was motivated by a desire to "make the country's businesses more transparent" in order to build investor confidence and spur economic growth. Many other Asian countries, including China, India, Japan, and Hong Kong, have also decided either to adopt international standards or to create standards that are based on the international standards.

Source: Evan Ramstad, "End to 'Korea Discount'?" *Wall Street Journal* (March 16, 2007).

- ? What is meant by the phrase "make the country's businesses more transparent"?
- Why would increasing transparency spur economic growth? (See page 46.)

### Study Objective [5]

Explain the monetary unit assumption and the economic entity assumption.

## Assumptions

Assumptions provide a foundation for the accounting process. Two main assumptions are the **monetary unit assumption** and the **economic entity assumption**.

### MONETARY UNIT ASSUMPTION

The **monetary unit assumption** requires that companies include in the accounting records only transaction data that can be expressed in money terms. This assumption enables accounting to quantify (measure) economic events. The monetary unit assumption is vital to applying the cost principle.

This assumption prevents the inclusion of some relevant information in the accounting records. For example, the health of a company's owner, the quality of service, and the morale of employees are not included. The reason: Companies cannot quantify this information in money terms. Though this information is important, companies record only events that can be measured in money.

### ECONOMIC ENTITY ASSUMPTION

**An economic entity can be any organization or unit in society.** It may be a company (such as **Crocs, Inc.**), a governmental unit (the state of Ohio), a municipality (Seattle), a school district (St. Louis District 48), or a church (Southern Baptist). The **economic entity assumption** requires that the activities of the entity be kept separate and distinct from the activities of its owner and all other economic entities.

To illustrate, Sally Rider, owner of Sally's Boutique, must keep her personal living costs separate from the expenses of the Boutique. Similarly, **McDonald's**, **Coca-Cola**, and **Cadbury-Schweppes** are segregated into separate economic entities for accounting purposes.

**Proprietorship.** A business owned by one person is generally a **proprietorship**. The owner is often the manager/operator of the business. Small service-type businesses (plumbing companies, beauty salons, and auto repair shops), farms, and small retail stores (antique shops, clothing stores, and used-book stores) are often proprietorships. **Usually only a relatively small amount of money (capital) is necessary to start in business as a proprietorship. The owner (proprietor) receives any profits, suffers any losses, and is personally liable for all debts of the business.** There is no legal distinction between the business

### Ethics Note

The importance of the economic entity assumption is illustrated by scandals involving **Adelphia**. In this case, senior company employees entered into transactions that blurred the line between the employees' financial interests and those of the company. For example, Adelphia guaranteed over \$2 billion of loans to the founding family.

as an economic unit and the owner, but the accounting records of the business activities are kept separate from the personal records and activities of the owner.

**Partnership.** A business owned by two or more persons associated as partners is a **partnership**. In most respects a partnership is like a proprietorship except that more than one owner is involved. Typically a partnership agreement (written or oral) sets forth such terms as initial investment, duties of each partner, division of net income (or net loss), and settlement to be made upon death or withdrawal of a partner. Each partner generally has unlimited personal liability for the debts of the partnership. **Like a proprietorship, for accounting purposes the partnership transactions must be kept separate from the personal activities of the partners.** Partnerships are often used to organize retail and service-type businesses, including professional practices (lawyers, doctors, architects, and certified public accountants).

**Corporation.** A business organized as a separate legal entity under state corporation law and having ownership divided into transferable shares of stock is a **corporation**. The holders of the shares (stockholders) **enjoy limited liability**; that is, they are not personally liable for the debts of the corporate entity. Stockholders **may transfer all or part of their ownership shares to other investors at any time** (i.e., sell their shares). The ease with which ownership can change adds to the attractiveness of investing in a corporation. Because ownership can be transferred without dissolving the corporation, the corporation **enjoys an unlimited life**.

Although the combined number of proprietorships and partnerships in the United States is more than five times the number of corporations, the revenue produced by corporations is eight times greater. Most of the largest enterprises in the United States—for example, **ExxonMobil, Ford, Wal-Mart, Citigroup, and Apple**—are corporations.

*The Do it! exercises ask you to put newly acquired knowledge to work. They outline the Action Plan necessary to complete the exercise, and they show a Solution.*

## Do it!

Indicate whether each of the five statements presented below is true or false.

1. The three steps in the accounting process are identification, recording, and communication.
2. The two most common types of external users are investors and company officers.
3. Congress passed the Sarbanes-Oxley Act of 2002 to reduce unethical behavior and decrease the likelihood of future corporate scandals.
4. The primary accounting standard-setting body in the United States is the Financial Accounting Standards Board (FASB).
5. The cost principle dictates that companies record assets at their cost. In later periods, however, the fair value of the asset must be used if fair value is higher than its cost.

### Solution

1. True 2. False. The two most common types of external users are investors and creditors. 3. True. 4. True. 5. False. The cost principle dictates that companies record assets at their cost. Under the cost principle, the company must also use cost in later periods as well.

## Basic Concepts

### action plan

- ✓ Review the basic concepts learned to date.
- ✓ Develop an understanding of the key terms used.

Related exercise material: E1-1, E1-2, E1-3, E1-4, and **Do it!** 1-1.

## ACCOUNTING ACROSS THE ORGANIZATION

### Spinning the Career Wheel

One question that students frequently ask is, “How will the study of accounting help me?” It should help you a great deal, because a working knowledge of accounting is desirable for virtually every field of endeavor. Some examples of how accounting is used in other careers include:

**General management:** Imagine running **Ford Motors**, **Massachusetts General Hospital**, **Northern Virginia Community College**, a **Subway** franchise, a **Trek** bike shop. All general managers need to understand accounting data in order to make wise business decisions.

**Marketing:** A marketing specialist at a company like **Procter & Gamble** develops strategies to help the sales force be successful. But making a sale is meaningless unless it is a profitable sale. Marketing people must be sensitive to costs and benefits, which accounting helps them quantify and understand.

**Finance:** Do you want to be a banker for **Bank of America**, an investment analyst for **Goldman Sachs**, a stock broker for **Merrill Lynch**? These fields rely heavily on accounting. In all of them you will regularly examine and analyze financial statements. In fact, it is difficult to get a good finance job without two or three courses in accounting.

**Real estate:** Are you interested in being a real estate broker for **Prudential Real Estate**? Because a third party—the bank—is almost always involved in financing a real estate transaction, brokers must understand the numbers involved: Can the buyer afford to make the payments to the bank? Does the cash flow from an industrial property justify the purchase price? What are the tax benefits of the purchase?

? How might accounting help you? (See page 46.)

## The Basic Accounting Equation

### Study Objective [6]

State the accounting equation, and define its components.

The two basic elements of a business are what it owns and what it owes. **Assets** are the resources a business owns. For example, **Google** has total assets of approximately \$40.5 billion. Liabilities and owner’s equity are the rights or claims against these resources. Thus, Google has \$40.5 billion of claims against its \$40.5 billion of assets. Claims of those to whom the company owes money (creditors) are called **liabilities**. Claims of owners are called **owner’s equity**. Google has liabilities of \$4.5 billion and owners’ equity of \$36 billion.

We can express the relationship of assets, liabilities, and owner’s equity as an equation, as shown in Illustration 1-5.

### Illustration 1-5

The basic accounting equation

|        |   |             |   |                |
|--------|---|-------------|---|----------------|
| Assets | = | Liabilities | + | Owner’s Equity |
|--------|---|-------------|---|----------------|

This relationship is the **basic accounting equation**. Assets must equal the sum of liabilities and owner’s equity. Liabilities appear before owner’s equity in the basic accounting equation because they are paid first if a business is liquidated.

The accounting equation applies to all **economic entities** regardless of size, nature of business, or form of business organization. It applies to a small proprietorship such as a corner grocery store as well as to a giant corporation such as **PepsiCo**. The equation provides the **underlying framework** for recording and summarizing economic events.

Let’s look in more detail at the categories in the basic accounting equation.

### Assets

As noted above, **assets** are resources a business owns. The business uses its assets in carrying out such activities as production and sales. The common characteristic

possessed by all assets is **the capacity to provide future services or benefits**. In a business, that service potential or future economic benefit eventually results in cash inflows (receipts). For example, Campus Pizza owns a delivery truck that provides economic benefits from delivering pizzas. Other assets of Campus Pizza are tables, chairs, jukebox, cash register, oven, tableware, and, of course, cash.

## Liabilities

**Liabilities** are claims against assets—that is, existing debts and obligations. Businesses of all sizes usually borrow money and purchase merchandise on credit. These economic activities result in payables of various sorts:

- Campus Pizza, for instance, purchases cheese, sausage, flour, and beverages on credit from suppliers. These obligations are called **accounts payable**.
- Campus Pizza also has a **note payable** to First National Bank for the money borrowed to purchase the delivery truck.
- Campus Pizza may also have **salaries and wages payable** to employees and **sales and real estate taxes payable** to the local government.

All of these persons or entities to whom Campus Pizza owes money are its **creditors**.

Creditors may legally force the liquidation of a business that does not pay its debts. In that case, the law requires that creditor claims be paid **before** ownership claims.

## Owner's Equity

The ownership claim on total assets is **owner's equity**. It is equal to total assets minus total liabilities. Here is why: The assets of a business are claimed by either creditors or owners. To find out what belongs to owners, we subtract the creditors' claims (the liabilities) from assets. The remainder is the owner's claim on the assets—the owner's equity. Since the claims of creditors must be paid **before** ownership claims, owner's equity is often referred to as **residual equity**.

### INCREASES IN OWNER'S EQUITY

In a proprietorship, owner's investments and revenues increase owner's equity.

**Investments by Owner.** **Investments by owner** are the assets the owner puts into the business. These investments increase owner's equity. They are recorded in a category called **owner's capital**.

**Revenues.** **Revenues** are the **gross increase in owner's equity resulting from business activities entered into for the purpose of earning income**. Generally, revenues result from selling merchandise, performing services, renting property, and lending money. Common sources of revenue are sales, fees, services, commissions, interest, dividends, royalties, and rent.

Revenues usually result in an increase in an asset. They may arise from different sources and are called various names depending on the nature of the business. Campus Pizza, for instance, has two categories of sales revenues—pizza sales and beverage sales.

### DECREASES IN OWNER'S EQUITY

In a proprietorship, owner's drawings and expenses decrease owner's equity.

**Drawings.** An owner may withdraw cash or other assets for personal use. We use a separate classification called **drawings** to determine the total withdrawals for each accounting period. **Drawings decrease owner's equity**. They are recorded in a category called owner's drawings.

### Helpful Hint

In some places, we use the term "owner's equity" and in others we use "owners' equity." *Owner's* (singular, possessive) refers to one owner (the case with a sole proprietorship). *Owners'* (plural, possessive) refers to multiple owners (the case with partnerships or corporations).

**Expenses.** **Expenses** are the cost of assets consumed or services used in the process of earning revenue. They are **decreases in owner's equity that result from operating the business**. For example, Campus Pizza recognizes the following expenses: cost of ingredients (meat, flour, cheese, tomato paste, mushrooms, etc.); cost of beverages; salaries and wages expense; utilities expense (electric, gas, and water expense); delivery expense (gasoline, repairs, licenses, etc.); supplies expense (napkins, detergents, aprons, etc.); rent expense; interest expense; and property tax expense.

In summary, owner's equity is increased by an owner's investments and by revenues from business operations. Owner's equity is decreased by an owner's withdrawals of assets and by expenses. Illustration 1-6 expands the basic accounting equation by showing the accounts that comprise owner's equity. This format is referred to as the **expanded accounting equation**.

**Illustration 1-6**  
Expanded accounting equation

|                           |                             |   |   |
|---------------------------|-----------------------------|---|---|
| <b>Basic Equation:</b>    | <b>Assets = Liabilities</b> | + | <b>Owner's Equity</b>   |
| <b>Expanded Equation:</b> | <b>Assets = Liabilities</b> | + | <b>Owner's Capital – Owner's Drawings<br/>+ Revenues – Expenses</b> |

## Do it!

### Owner's Equity Effects

#### action plan

- ✓ Understand the sources of revenue.
- ✓ Understand what causes expenses.
- ✓ Review the rules for changes in owner's equity: Investments and revenues increase owner's equity. Expenses and drawings decrease owner's equity.
- ✓ Recognize that drawings are withdrawals of cash or other assets from the business for personal use.

Classify the following items as investment by owner (I), owner's drawings (D), revenues (R), or expenses (E). Then indicate whether each item increases or decreases owner's equity.

- |                     |                                |
|---------------------|--------------------------------|
| (1) Rent Expense    | (3) Drawings                   |
| (2) Service Revenue | (4) Salaries and Wages Expense |

#### Solution

1. Rent Expense is an expense (E); it decreases owner's equity.
2. Service Revenue is revenue (R); it increases owner's equity.
3. Drawings is owner's drawings (D); it decreases owner's equity.
4. Salaries and Wages Expense is an expense (E); it decreases owner's equity.

## Using the Accounting Equation

### Study Objective [7]

Analyze the effects of business transactions on the accounting equation.

**Transactions** (**business transactions**) are a business's economic events recorded by accountants. Transactions may be external or internal. **External transactions** involve economic events between the company and some outside enterprise. For example, Campus Pizza's purchase of cooking equipment from a supplier, payment of monthly rent to the landlord, and sale of pizzas to customers are external transactions. **Internal transactions** are economic events that occur entirely within one company. The use of cooking and cleaning supplies are internal transactions for Campus Pizza.

Companies carry on many activities that do not represent business transactions. Examples are hiring employees, answering the telephone, talking with customers, and placing merchandise orders. Some of these activities may lead to business transactions: Employees will earn wages, and suppliers will deliver ordered merchandise. The company must analyze each event to find out if it affects the components of the accounting equation. If it does, the company will record the transaction. Illustration 1-7 demonstrates the transaction-identification process.

**Illustration 1-7**  
Transaction-identification process

Each transaction must have a dual effect on the accounting equation. For example, if an asset is increased, there must be a corresponding: (1) decrease in another asset, or (2) increase in a specific liability, or (3) increase in owner's equity.

Two or more items could be affected. For example, as one asset is increased \$10,000, another asset could decrease \$6,000 and a liability could increase \$4,000. Any change in a liability or ownership claim is subject to similar analysis.

## Transaction Analysis

The following examples are business transactions for a computer programming business during its first month of operations.

**Transaction (1). Investment by Owner.** Ray Neal decides to open a computer programming service which he names Softbyte. On September 1, 2012, he invests \$15,000 cash in the business. This transaction results in an equal increase in assets and owner's equity.

### Helpful Hint

You will want to study these transactions until you are sure you understand them. They are not difficult, but understanding them is important to your success in this course. The ability to analyze transactions in terms of the basic accounting equation is essential in accounting.

|                |   |
|----------------|---|
| Basic Analysis | The asset Cash increases \$15,000, and owner's equity identified as Owner's Capital increases \$15,000. |
|----------------|---|

|                   |   |
|-------------------|---|
| Equation Analysis | <u>Assets</u> = <u>Liabilities</u> + <u>Owner's Equity</u>        |
|                   | Cash = <u>Owner's Capital</u>                                     |
|                   | (1) <b>+\$15,000</b> = <b>+\$15,000</b> <b>Initial investment</b> |

Observe that the equality of the accounting equation has been maintained. Note that the investments by the owner do not represent revenues, and they are excluded in determining net income. Therefore it is necessary to make clear that the increase is an investment (increasing Owner's Capital) rather than revenue.

**Transaction (2). Purchase of Equipment for Cash.** Softbyte purchases computer equipment for \$7,000 cash. This transaction results in an equal increase and decrease in total assets, though the composition of assets changes. Cash decreases \$7,000, and the asset Equipment increases \$7,000. The specific effect of this transaction and the cumulative effect of the first two transactions are:

|                |  |
|----------------|--|
| Basic Analysis | Cash decreases \$7,000, and the asset Equipment increases \$7,000. |
|----------------|--|

|                   |  |
|-------------------|--|
| Equation Analysis | <u>Assets</u> = <u>Liabilities</u> + <u>Owner's Equity</u> |
|                   | <u>Cash</u> + <u>Equipment</u> = <u>Owner's Capital</u>    |
|                   | \$15,000 = \$15,000  |
|                   | (2) <b>-7,000</b> + <b>+7,000</b> =                        |
|                   | <u>\$ 8,000 + \$7,000 = \$15,000</u>                       |

Observe that total assets are still \$15,000. Neal's equity also remains at \$15,000, the amount of his original investment.

**Transaction (3). Purchase of Supplies on Credit.** Softbyte purchases for \$1,600 from Acme Supply Company computer paper and other supplies expected to last several months. Acme agrees to allow Softbyte to pay this bill in October. This transaction is a purchase on account (a credit purchase). Assets increase because of the expected future benefits of using the paper and supplies, and liabilities increase by the amount due Acme Company.

|                |  |
|----------------|--|
| Basic Analysis | The asset Supplies increases \$1,600, and the liability Accounts Payable increases by \$1,600. |
|----------------|--|

|                   |   |
|-------------------|---|
| Equation Analysis | <u>Assets</u> = <u>Liabilities</u> + <u>Owner's Equity</u>  |
|                   | <u>Cash</u> + <u>Supplies</u> + <u>Equipment</u> = <u>Accounts Payable</u> + <u>Owner's Capital</u> |
|                   | \$8,000 + \$7,000 = \$15,000  |
|                   | (3) <b>+\$1,600</b> = <b>+\$1,600</b>   |
|                   | <u>\$8,000 + \$1,600 + \$7,000 = \$16,600</u>   |

Total assets are now \$16,600. This total is matched by a \$1,600 creditor's claim and a \$15,000 ownership claim.

**Transaction (4). Services Provided for Cash.** Softbyte receives \$1,200 cash from customers for programming services it has provided. This transaction represents Softbyte's principal revenue-producing activity. Recall that **revenue increases owner's equity**.

|                   |  |         |          |         |                    |          |                  |                       |                 |                 |                        |
|-------------------|--|---------|----------|---------|--------------------|----------|------------------|-----------------------|-----------------|-----------------|------------------------|
| Basic Analysis    | Cash increases \$1,200, and revenues (specifically, Service Revenue) increase \$1,200. |         |          |         |                    |          |                  |                       |                 |                 |                        |
| Equation Analysis | <u>Assets</u>  |         |          | =       | <u>Liabilities</u> |          | +                | <u>Owner's Equity</u> |                 |                 |                        |
|                   | Cash   | +       | Supplies | +       | Equipment          | =        | Accounts Payable | +                     | Owner's Capital | +               | Revenues               |
|                   | \$8,000  |         | \$1,600  |         | \$7,000            |          | \$1,600          |                       | \$15,000        |                 |                        |
|                   | (4) <b>+\$1,200</b>  |         |          |         |                    |          |                  |                       |                 | <b>+\$1,200</b> | <b>Service Revenue</b> |
| \$9,200           | +  | \$1,600 | +        | \$7,000 | =                  | \$1,600  | +                | \$15,000              | +               | \$1,200         |                        |
| \$17,800          |  |         |          |         |                    | \$17,800 |                  |                       |                 |                 |                        |

The two sides of the equation balance at \$17,800. Service Revenue is included in determining Softbyte's net income.

Note that we do not have room to give details for each individual revenue and expense account in this illustration. Thus, revenues (and expenses when we get to them) are summarized under one column heading for Revenues and one for Expenses. However, it is important to keep track of the category (account) titles affected (e.g., Service Revenue) as they will be needed when we prepare financial statements later in the chapter.

**Transaction (5). Purchase of Advertising on Credit.** Softbyte receives a bill for \$250 from the *Daily News* for advertising but postpones payment until a later date. This transaction results in an increase in liabilities and a decrease in owner's equity. The specific categories involved are Accounts Payable and expenses (specifically, Advertising Expense). The effect on the equation is:

|                   |  |         |          |         |                    |          |                  |                       |                 |               |                            |       |          |
|-------------------|--|---------|----------|---------|--------------------|----------|------------------|-----------------------|-----------------|---------------|----------------------------|-------|----------|
| Basic Analysis    | Accounts Payable increases \$250, and owner's equity decreases \$250 due to Advertising Expense. |         |          |         |                    |          |                  |                       |                 |               |                            |       |          |
| Equation Analysis | <u>Assets</u>  |         |          | =       | <u>Liabilities</u> |          | +                | <u>Owner's Equity</u> |                 |               |                            |       |          |
|                   | Cash   | +       | Supplies | +       | Equipment          | =        | Accounts Payable | +                     | Owner's Capital | +             | Revenues                   | -     | Expenses |
|                   | \$9,200  |         | \$1,600  |         | \$7,000            |          | \$1,600          |                       | \$15,000        |               | \$1,200                    |       |          |
|                   | (5)  |         |          |         |                    |          | <b>+250</b>      |                       |                 | <b>-\$250</b> | <b>Advertising Expense</b> |       |          |
| \$9,200           | +  | \$1,600 | +        | \$7,000 | =                  | \$1,850  | +                | \$15,000              | +               | \$1,200       | -                          | \$250 |          |
| \$17,800          |  |         |          |         |                    | \$17,800 |                  |                       |                 |               |                            |       |          |

The two sides of the equation still balance at \$17,800. Owner's equity decreases when Softbyte incurs the expense. Expenses are not always paid in cash at the time they are incurred. When Softbyte pays at a later date, the liability Accounts Payable will decrease, and the asset Cash will decrease [see Transaction (8)]. The cost of advertising is an expense (rather than an asset) because the company has *used* the benefits. Advertising Expense is included in determining net income.

**Transaction (6). Services Provided for Cash and Credit.** Softbyte provides \$3,500 of programming services for customers. The company receives cash of \$1,500 from customers, and it bills the balance of \$2,000 on account. This transaction results in an equal increase in assets and owner's equity.

**Basic Analysis** Three specific items are affected: Cash increases \$1,500, Accounts Receivable increases \$2,000, and Service Revenue increases \$3,500.

**Equation Analysis**

| Assets     |                     |          |           | = | Liabilities      | + | Owner's Equity  |          |                 |
|------------|---------------------|----------|-----------|---|------------------|---|-----------------|----------|-----------------|
| Cash       | Accounts Receivable | Supplies | Equipment | = | Accounts Payable | + | Owner's Capital | Revenues | - Expenses      |
| \$9,200    |                     | \$1,600  | \$7,000   | = | \$1,850          | + | \$15,000        | \$1,200  | \$250           |
| (6) +1,500 | +2,000              |          |           | = |                  |   |                 | +3,500   | Service Revenue |
| \$10,700   | \$2,000             | \$1,600  | \$7,000   | = | \$1,850          | + | \$15,000        | \$4,700  | \$250           |
| \$21,300   |                     |          |           |   | \$21,300         |   |                 |          |                 |

Softbyte earns revenues when it provides the service, and therefore it recognizes \$3,500 in revenue. In exchange for this service, it received \$1,500 in Cash and Accounts Receivable of \$2,000. This Accounts Receivable represents customers' promise to pay \$2,000 to Softbyte in the future. When it later receives collections on account, Softbyte will increase Cash and will decrease Accounts Receivable [see Transaction (9)].

**Transaction (7). Payment of Expenses.** Softbyte pays the following expenses in cash for September: store rent \$600, salaries and wages of employees \$900, and utilities \$200. These payments result in an equal decrease in assets and expenses. Cash decreases \$1,700, and the specific expense categories (Rent Expense, Salaries and Wages Expense, and Utilities Expense) decrease owner's equity by the same amount. The effect of these payments on the equation is:

| Assets     |                     |          |           | = | Liabilities      | + | Owner's Equity  |          |                     |
|------------|---------------------|----------|-----------|---|------------------|---|-----------------|----------|---------------------|
| Cash       | Accounts Receivable | Supplies | Equipment | = | Accounts Payable | + | Owner's Capital | Revenues | - Expenses          |
| \$10,700   | \$2,000             | \$1,600  | \$7,000   | = | \$1,850          | + | \$15,000        | \$4,700  | \$250               |
| (7) -1,700 |                     |          |           | = |                  |   |                 | -600     | Rent Expense        |
|            |                     |          |           | = |                  |   |                 | -900     | Sal. and Wages Exp. |
|            |                     |          |           | = |                  |   |                 | -200     | Utilities Exp.      |
| \$9,000    | \$2,000             | \$1,600  | \$7,000   | = | \$1,850          | + | \$15,000        | \$4,700  | \$1,950             |
| \$19,600   |                     |          |           |   | \$19,600         |   |                 |          |                     |

The two sides of the equation now balance at \$19,600. Three lines in the analysis indicate the different types of expenses that have been incurred.

**Transaction (8). Payment of Accounts Payable.** Softbyte pays its \$250 *Daily News* bill in cash. The company previously [in Transaction (5)] recorded the bill as an increase in Accounts Payable and a decrease in owner's equity.

Basic  
Analysis

This cash payment "on account" decreases the asset Cash by \$250 and also decreases the liability Accounts Payable by \$250.

| Assets   |                     |          |           | = | Liabilities      | + | Owner's Equity  |   |          |   |          |
|----------|---------------------|----------|-----------|---|------------------|---|-----------------|---|----------|---|----------|
| Cash     | Accounts Receivable | Supplies | Equipment | = | Accounts Payable | + | Owner's Capital | + | Revenues | - | Expenses |
| \$9,000  | \$2,000             | \$1,600  | \$7,000   | = | \$1,850          | + | \$15,000        | + | \$4,700  | - | \$1,950  |
| (8) -250 |                     |          |           | = | -250             |   |                 |   |          |   |          |
| \$8,750  | \$2,000             | \$1,600  | \$7,000   | = | \$1,600          | + | \$15,000        | + | \$4,700  | - | \$1,950  |
| \$19,350 |                     |          |           |   | \$19,350         |   |                 |   |          |   |          |

Observe that the payment of a liability related to an expense that has previously been recorded does not affect owner's equity. The company recorded this expense in Transaction (5) and should not record it again.

**Transaction (9). Receipt of Cash on Account.** Softbyte receives \$600 in cash from customers who had been billed for services [in Transaction (6)]. This does not change total assets, but it changes the composition of those assets.

Basic  
Analysis

Cash increases \$600, and Accounts Receivable decreases \$600.

| Assets   |                     |          |           | = | Liabilities      | + | Owner's Equity  |   |          |   |          |
|----------|---------------------|----------|-----------|---|------------------|---|-----------------|---|----------|---|----------|
| Cash     | Accounts Receivable | Supplies | Equipment | = | Accounts Payable | + | Owner's Capital | + | Revenues | - | Expenses |
| \$8,750  | \$2,000             | \$1,600  | \$7,000   | = | \$1,600          | + | \$15,000        | + | \$4,700  | - | \$1,950  |
| (9) +600 | -600                |          |           | = |                  |   |                 |   |          |   |          |
| \$9,350  | \$1,400             | \$1,600  | \$7,000   | = | \$1,600          | + | \$15,000        | + | \$4,700  | - | \$1,950  |
| \$19,350 |                     |          |           |   | \$19,350         |   |                 |   |          |   |          |

Note that the collection of an account receivable for services previously billed and recorded does not affect owner's equity. Softbyte already recorded this revenue in Transaction (6) and should not record it again.

**Transaction (10). Withdrawal of Cash by Owner.** Ray Neal withdraws \$1,300 in cash from the business for his personal use. This transaction results in an equal decrease in assets and owner's equity. Both Cash and Owner's Drawings decrease \$1,300, as shown on the next page.

Basic Analysis

Cash decreases \$1,300, and Owner's Drawings decreases \$1,300 due to owner's withdrawal.

| Assets   |                     |          |           | = | Liabilities   | + | Owner's Equity  |   |                  |   |          |   |          |
|--|---------------------|----------|-----------|---|---|---|-----------------|---|------------------|---|----------|---|----------|
| Cash   | Accounts Receivable | Supplies | Equipment | = | Accounts Payable  | + | Owner's Capital | - | Owner's Drawings | + | Revenues | - | Expenses |
| \$9,350  | \$1,400             | \$1,600  | \$7,000   | = | \$1,600   | + | \$15,000        | - |                  | + | \$4,700  | - | \$1,950  |
| (10) -1,300                                      |                     |          |           | = |   | + |                 | - | -1,300           | + |          | - | Drawings |
| \$8,050 + \$1,400 + \$1,600 + \$7,000 = \$18,050 |                     |          |           |   | \$1,600 + \$15,000 - \$1,300 + \$4,700 - \$1,950 = \$18,050 |   |                 |   |                  |   |          |   |          |

Observe that the effect of a cash withdrawal by the owner is the opposite of the effect of an investment by the owner. **Owner's drawings are not expenses.** Expenses are incurred for the purpose of earning revenue. Drawings do not generate revenue. They are a **disinvestment**. Like owner's investment, the company excludes owner's drawings in determining net income.

### Summary of Transactions

Illustration 1-8 summarizes the September transactions of Softbyte to show their cumulative effect on the basic accounting equation. It also indicates the transaction number and the specific effects of each transaction.

| Assets  |                     |          |           | = | Liabilities   | + | Owner's Equity  |   |                  |   |        |        |                 |
|---|---------------------|----------|-----------|---|---|---|-----------------|---|------------------|---|--------|--------|-----------------|
| Cash  | Accounts Receivable | Supplies | Equipment | = | Accounts Payable  | + | Owner's Capital | - | Owner's Drawings | + | Rev.   | -      | Exp.            |
| (1) +\$15,000                                     |                     |          |           | = |   | + | \$15,000        |   |                  |   |        |        | Initial inv.    |
| (2) -7,000  |                     |          | +7,000    | = |   |   |                 |   |                  |   |        |        |                 |
| (3)   |                     | +1,600   |           | = | +1,600  |   |                 |   |                  |   |        |        |                 |
| (4) +1,200  |                     |          |           | = |   |   |                 |   |                  |   | +1,200 |        | Ser. Rev.       |

| (6) +1,500  | +2,000              |          |           | = |   |   |                 |   |                  |   | +3,500 |        | Ser. Rev.       |
| (7) -600  |                     |          |           | = |   |   |                 |   |                  |   |        | -600   | Rent Exp.       |
| -900  |                     |          |           | = |   |   |                 |   |                  |   |        | -900   | Sal./Wages Exp. |
| -200  |                     |          |           | = |   |   |                 |   |                  |   |        | -200   | Utilities Exp.  |
| (8) -250  |                     |          |           | = | -250  |   |                 |   |                  |   |        |        |                 |
| (9) +600  | -600                |          |           | = |   |   |                 |   |                  |   |        |        |                 |
| (10) -1,300                                       |                     |          |           | = |   |   |                 |   |                  |   | -1,300 |        | Drawings        |
| \$ 8,050 + \$1,400 + \$1,600 + \$7,000 = \$18,050 |                     |          |           |   | \$1,600 + \$15,000 - \$1,300 + \$4,700 - \$1,950 = \$18,050 |   |                 |   |                  |   |        |        |                 |

**Illustration 1-8**  
Tabular summary of Softbyte transactions

Illustration 1-8 demonstrates some significant facts:

- Each transaction is analyzed in terms of its effect on:
  - the three components of the basic accounting equation.
  - specific items within each component.
- The two sides of the equation must always be equal.

There! You made it through your first transaction analysis. If you feel a bit shaky on any of the transactions, it might be a good idea at this point to get up, take a short break, and come back again for a 10- to 15-minute review of the transactions, to make sure you understand them before you go on to the next section.

## Do it!

Transactions made by Virmari & Co., a public accounting firm, for the month of August are shown below. Prepare a tabular analysis which shows the effects of these transactions on the expanded accounting equation, similar to that shown in Illustration 1-8.

1. The owner invested \$25,000 cash in the business.
2. The company purchased \$7,000 of office equipment on credit.
3. The company received \$8,000 cash in exchange for services performed.
4. The company paid \$850 for this month's rent.
5. The owner withdrew \$1,000 cash for personal use.

### Solution

| Assets          |                  | = | Liabilities      | + | Owner's Equity  |                    |                  |                |  |
|-----------------|------------------|---|------------------|---|-----------------|--------------------|------------------|----------------|--|
| Cash            | + Equipment      | = | Accounts Payable | + | Owner's Capital | - Owner's Drawings | + Revenues       | - Expenses     |  |
| 1. +\$25,000    |                  |   |                  |   | +\$25,000       |                    |                  |                |  |
| 2.              | +\$7,000         |   | +\$7,000         |   |                 |                    |                  |                |  |
| 3. +8,000       |                  |   |                  |   |                 |                    | +\$8,000         |                |  |
| 4. -850         |                  |   |                  |   |                 |                    |                  | -\$850         |  |
| 5. -1,000       |                  |   |                  |   |                 | -\$1,000           |                  |                |  |
| <u>\$31,150</u> | + <u>\$7,000</u> | = | <u>\$7,000</u>   | + | <u>\$25,000</u> | - <u>\$1,000</u>   | + <u>\$8,000</u> | - <u>\$850</u> |  |
| \$38,150        |                  |   | \$38,150         |   |                 |                    |                  |                |  |

## Financial Statements

Companies prepare four financial statements from the summarized accounting data:

1. An **income statement** presents the revenues and expenses and resulting net income or net loss for a specific period of time.
2. An **owner's equity statement** summarizes the changes in owner's equity for a specific period of time.
3. A **balance sheet** reports the assets, liabilities, and owner's equity at a specific date.
4. A **statement of cash flows** summarizes information about the cash inflows (receipts) and outflows (payments) for a specific period of time.

These statements provide relevant financial data for internal and external users. Illustration 1-9 (page 22) shows the financial statements of Softbyte.

### Study Objective [8]

Understand the four financial statements and how they are prepared.

### International Note

The primary types of financial statements required by GAAP and IFRS are the same. In practice, some format differences do exist in presentations commonly employed by GAAP companies compared to IFRS companies.

**Illustration 1-9**

Financial statements and their interrelationships

**Helpful Hint**

The heading of each statement identifies the company, the type of statement, and the specific date or time period covered by the statement.

**Helpful Hint**

Note that final sums are double-underlined, and negative amounts (in the statement of cash flows) are presented in parentheses.

**Helpful Hint**

The arrows in this illustration show the interrelationships of the four financial statements.

1. Net income is computed first and is needed to determine the ending balance in owner's equity.
2. The ending balance in owner's equity is needed in preparing the balance sheet.
3. The cash shown on the balance sheet is needed in preparing the statement of cash flows.

| Cash flows from investing activities      |                |                        |
| Purchase of equipment                     |                | (7,000)                |
| Cash flows from financing activities      |                |                        |
| Investments by owner                      | \$15,000)      |                        |
| Drawings by owner                         | <u>(1,300)</u> | 13,700                 |
| Net increase in cash                      |                | 8,050                  |
| Cash at the beginning of the period       |                | <u>0</u>               |
| Cash at the end of the period             |                | <u><u>\$ 8,050</u></u> |

Note that the statements shown in Illustration 1-9 are interrelated:

1. Net income of \$2,750 on the **income statement** is added to the beginning balance of owner's capital in the **owner's equity statement**.
2. Owner's capital of \$16,450 at the end of the reporting period shown in the **owner's equity statement** is reported on the **balance sheet**.
3. Cash of \$8,050 on the **balance sheet** is reported on the **statement of cash flows**.

Also, explanatory notes and supporting schedules are an integral part of every set of financial statements. We illustrate these notes and schedules in later chapters of this textbook.

Be sure to carefully examine the format and content of each statement in Illustration 1-9. We describe the essential features of each in the following sections.

## Income Statement

The income statement reports the revenues and expenses for a specific period of time. (In Softbyte's case, this is "For the Month Ended September 30, 2012.") Softbyte's income statement is prepared from the data appearing in the owner's equity columns of Illustration 1-8 (page 20).

The income statement lists revenues first, followed by expenses. Finally the statement shows net income (or net loss). **Net income** results when revenues exceed expenses. A **net loss** occurs when expenses exceed revenues.

Although practice varies, we have chosen in our illustrations and homework solutions to list expenses in order of magnitude. (We will consider alternative formats for the income statement in later chapters.)

Note that the income statement does **not** include investment and withdrawal transactions between the owner and the business in measuring net income. For example, as explained earlier, Ray Neal's withdrawal of cash from Softbyte was not regarded as a business expense.

## Owner's Equity Statement

The owner's equity statement reports the changes in owner's equity for a specific period of time. The time period is the same as that covered by the income statement. Data for the preparation of the owner's equity statement come from the owner's equity columns of the tabular summary (Illustration 1-8) and from the income statement. The first line of the statement shows the beginning owner's equity amount (which was zero at the start of the business). Then come the owner's investments, net income (or loss), and the owner's drawings. This statement indicates *why* owner's equity has increased or decreased during the period.

What if Softbyte had reported a net loss in its first month? Let's assume that during the month of September 2012, Softbyte lost \$10,000. Illustration 1-10 (page 24) shows the presentation of a net loss in the owner's equity statement.

### Helpful Hint

The income statement, owner's equity statement, and statement of cash flows are all for a *period* of time, whereas the balance sheet is for a *point* in time.

*Alternative Terminology notes introduce other terms you might hear or read.*

### Alternative Terminology

The income statement is sometimes referred to as the *statement of operations, earnings statement, or profit and loss statement*.

**Illustration 1-10**

Presentation of net loss

| <b>Softbyte</b><br>Owner's Equity Statement<br>For the Month Ended September 30, 2012 |                      |                        |
|---|----------------------|------------------------|
| Owner's capital, September 1  |                      | \$ -0-                 |
| Add: Investments  |                      | <u>15,000</u>          |
|   |                      | 15,000                 |
| Less: Drawings  | \$ 1,300             |                        |
| <b>Net loss</b>   | <u><b>10,000</b></u> | <u>11,300</u>          |
| Owner's capital, September 30   |                      | <u><u>\$ 3,700</u></u> |

If the owner makes any additional investments, the company reports them in the owner's equity statement as investments.

### **Balance Sheet**

Softbyte's balance sheet reports the assets, liabilities, and owner's equity at a specific date (in Softbyte's case, September 30, 2012). The company prepares the balance sheet from the column headings of the tabular summary (Illustration 1-8) and the month-end data shown in its last line.

Observe that the balance sheet lists assets at the top, followed by liabilities and owner's equity. Total assets must equal total liabilities and owner's equity. Softbyte reports only one liability—accounts payable—in its balance sheet. In most cases, there will be more than one liability. When two or more liabilities are involved, a customary way of listing is as follows.

**Illustration 1-11**

Presentation of liabilities

| <b>Liabilities</b>         |                 |
|----------------------------|-----------------|
| Notes payable              | \$10,000        |
| Accounts payable           | 63,000          |
| Salaries and wages payable | <u>18,000</u>   |
| Total liabilities          | <u>\$91,000</u> |

The balance sheet is a snapshot of the company's financial condition at a specific moment in time (usually the month-end or year-end).

### **Statement of Cash Flows**

The statement of cash flows provides information on the cash receipts and payments for a specific period of time. The statement of cash flows reports (1) the cash effects of a company's operations during a period, (2) its investing transactions, (3) its financing transactions, (4) the net increase or decrease in cash during the period, and (5) the cash amount at the end of the period.

Reporting the sources, uses, and change in cash is useful because investors, creditors, and others want to know what is happening to a company's most liquid resource. The statement of cash flows provides answers to the following simple but important questions.

1. Where did cash come from during the period?
2. What was cash used for during the period?
3. What was the change in the cash balance during the period?

**Helpful Hint**

Investing activities pertain to investments made by the company, not investments made by the owner.

As shown in Softbyte's statement of cash flows, cash increased \$8,050 during the period. Net cash flow provided from operating activities increased cash \$1,350. Cash flow from investing transactions decreased cash \$7,000. And cash flow from financing transactions increased cash \$13,700. At this time, you need not be concerned with how these amounts are determined. Chapter 17 will examine the statement of cash flows in detail.

## Do it!

Presented below is selected information related to Flanagan Company at December 31, 2012. Flanagan reports financial information monthly.

|                  |          |                            |          |
|------------------|----------|----------------------------|----------|
| Equipment        | \$10,000 | Utilities Expense          | \$ 4,000 |
| Cash             | 8,000    | Accounts Receivable        | 9,000    |
| Service Revenue  | 36,000   | Salaries and Wages Expense | 7,000    |
| Rent Expense     | 11,000   | Notes Payable              | 16,500   |
| Accounts Payable | 2,000    | Owner's Drawings           | 5,000    |

- Determine the total assets of Flanagan Company at December 31, 2012.
- Determine the net income that Flanagan Company reported for December 2012.
- Determine the owner's equity of Flanagan Company at December 31, 2012.

### Solution

- The total assets are \$27,000, comprised of Cash \$8,000, Accounts Receivable \$9,000, and Equipment \$10,000.
- Net income is \$14,000, computed as follows.

|                            |          |                 |
|----------------------------|----------|-----------------|
| Revenues                   |          |                 |
| Service revenue            |          | \$36,000        |
| Expenses                   |          |                 |
| Rent expense               | \$11,000 |                 |
| Salaries and wages expense | 7,000    |                 |
| Utilities expense          | 4,000    |                 |
| Total expenses             |          | <u>22,000</u>   |
| Net income                 |          | <u>\$14,000</u> |

- The ending owner's equity of Flanagan Company is \$8,500. By rewriting the accounting equation, we can compute owner's equity as assets minus liabilities, as follows:

|                                   |          |                 |
|-----------------------------------|----------|-----------------|
| Total assets [as computed in (a)] |          | \$27,000        |
| Less: Liabilities                 |          |                 |
| Notes payable                     | \$16,500 |                 |
| Accounts payable                  | 2,000    |                 |
| Owner's equity                    |          | <u>\$ 8,500</u> |

Note that it is not possible to determine the company's owner's equity in any other way, because the beginning total for owner's equity is not provided.

### Financial Statement Items

#### action plan

- ✓ Remember the basic accounting equation: assets must equal liabilities plus owner's equity.
- ✓ Review previous financial statements to determine how total assets, net income, and owner's equity are computed.

Related exercise material: BE1-10, BE1-11, E1-9, E1-12, E1-13, E1-14, E1-15, E1-16, and **Do it!** 1-4.

**COMPREHENSIVE**

**Do it!**

The *Comprehensive Do it!* is a final review of the chapter. The *Action Plan* gives tips about how to approach the problem, and the *Solution* demonstrates both the form and content of complete answers.

Joan Robinson opens her own law office on July 1, 2012. During the first month of operations, the following transactions occurred.

1. Joan invested \$11,000 in cash in the law practice.
2. Paid \$800 for July rent on office space.
3. Purchased office equipment on account \$3,000.
4. Provided legal services to clients for cash \$1,500.
5. Borrowed \$700 cash from a bank on a note payable.
6. Performed legal services for client on account \$2,000.
7. Paid monthly expenses: salaries and wages \$500, utilities \$300, and supplies \$100.
8. Joan withdraws \$1,000 cash for personal use.

**Instructions**

- (a) Prepare a tabular summary of the transactions.
- (b) Prepare the income statement, owner's equity statement, and balance sheet at July 31 for Joan Robinson, Attorney.

**Solution to Comprehensive Do it!**

**action plan (cont'd)**

✓ The owner's equity statement shows the changes in owner's equity for the same period of time as the income statement.

✓ The balance sheet reports assets, liabilities, and owner's equity at a specific date.

**Joan Robinson, Attorney**  
Balance Sheet  
July 31, 2012

|                                       |  |                        |
|---------------------------------------|--|------------------------|
| <u>Assets</u>                         |  |                        |
| Cash                                  |  | \$10,500               |
| Accounts receivable                   |  | 2,000                  |
| Equipment                             |  | <u>3,000</u>           |
| Total assets                          |  | <u><u>\$15,500</u></u> |
| <u>Liabilities and Owner's Equity</u> |  |                        |
| Liabilities                           |  |                        |
| Notes payable                         |  | \$ 700                 |
| Accounts payable                      |  | <u>3,000</u>           |
| Total liabilities                     |  | 3,700                  |
| Owner's equity                        |  |                        |
| Owner's capital                       |  | <u>11,800</u>          |
| Total liabilities and owner's equity  |  | <u><u>\$15,500</u></u> |

*This would be a good time to return to the **Student Owner's Manual** at the beginning of the book (or look at it for the first time if you skipped it before) to read about the various types of assignment materials that appear at the end of each chapter. Knowing the purpose of the different assignments will help you appreciate what each contributes to your accounting skills and competencies.*

## Summary of Study Objectives

**[1] Explain what accounting is.** Accounting is an information system that identifies, records, and communicates the economic events of an organization to interested users.

**[2] Identify the users and uses of accounting.** The major users and uses of accounting are as follows: (a) Management uses accounting information to plan, organize, and run the business. (b) Investors (owners) decide whether to buy, hold, or sell their financial interests on the basis of accounting data. (c) Creditors (suppliers and bankers) evaluate the risks of granting credit or lending money on the basis of accounting information. Other groups that use accounting information are taxing authorities, regulatory agencies, customers, and labor unions.

**[3] Understand why ethics is a fundamental business concept.** Ethics are the standards of conduct by which actions

are judged as right or wrong. Effective financial reporting depends on sound ethical behavior.

**[4] Explain generally accepted accounting principles.** Generally accepted accounting principles are a common set of standards used by accountants.

**[5] Explain the monetary unit assumption and the economic entity assumption.** The monetary unit assumption requires that companies include in the accounting records only transaction data that can be expressed in terms of money. The economic entity assumption requires that the activities of each economic entity be kept separate from the activities of its owner(s) and other economic entities.

**[6] State the accounting equation, and define its components.** The basic accounting equation is:

$$\text{Assets} = \text{Liabilities} + \text{Owner's Equity}$$

Assets are resources a business owns. Liabilities are creditorship claims on total assets. Owner's equity is the ownership claim on total assets.

The expanded accounting equation is:

$$\text{Assets} = \text{Liabilities} + \text{Owner's Capital} - \text{Owner's Drawings} + \text{Revenues} - \text{Expenses}$$

Owner's capital is assets the owner puts into the business. Owner's drawings are the assets the owner withdraws for personal use. Revenues are increases in assets resulting from income-earning activities. Expenses are the costs of assets consumed or services used in the process of earning revenue.

**[7] Analyze the effects of business transactions on the accounting equation.** Each business transaction must have a dual effect on the accounting equation. For example, if an individual asset increases, there must be a corresponding (1) decrease in another asset, or (2) increase in a specific liability, or (3) increase in owner's equity.

**[8] Understand the four financial statements and how they are prepared.** An income statement presents the revenues and expenses, and resulting net income or net loss, for a specific period of time. An owner's equity statement summarizes the changes in owner's equity for a specific period of time. A balance sheet reports the assets, liabilities, and owner's equity at a specific date. A statement of cash flows summarizes information about the cash inflows (receipts) and outflows (payments) for a specific period of time.

## Glossary

**Accounting** The information system that identifies, records, and communicates the economic events of an organization to interested users. (p. 4).

**Assets** Resources a business owns. (p. 12).

**Balance sheet** A financial statement that reports the assets, liabilities, and owner's equity at a specific date. (p. 21).

**Basic accounting equation**  $\text{Assets} = \text{Liabilities} + \text{Owner's Equity}$ . (p. 12).

**Bookkeeping** A part of accounting that involves only the recording of economic events. (p. 5).

**Convergence** The process of reducing the differences between GAAP and IFRS. (p. 9).

**Corporation** A business organized as a separate legal entity under state corporation law, having ownership divided into transferable shares of stock. (p. 11).

**Cost principle** An accounting principle that states that companies should record assets at their cost. (p. 9).

**Drawings** Withdrawal of cash or other assets from an unincorporated business for the personal use of the owner(s). (p. 13).

**Economic entity assumption** An assumption that requires that the activities of the entity be kept separate and distinct from the activities of its owner and all other economic entities. (p. 10).

**Ethics** The standards of conduct by which one's actions are judged as right or wrong, honest or dishonest, fair or not fair. (p. 8).

**Expanded accounting equation**  $\text{Assets} = \text{Liabilities} + \text{Owner's Capital} - \text{Owner's Drawings} + \text{Revenues} - \text{Expenses}$ . (p. 14).

**Expenses** The cost of assets consumed or services used in the process of earning revenue. (p. 14).

**Fair value principle** An accounting principle stating that assets and liabilities should be reported at fair value (the price received to sell an asset or settle a liability). (p. 9).

**Faithful representation** Numbers and descriptions match what really existed or happened—it is factual. (p. 9).

**Financial accounting** The field of accounting that provides economic and financial information for investors, creditors, and other external users. (p. 7).

**Financial Accounting Standards Board (FASB)** A private organization that establishes generally accepted accounting principles (GAAP). (p. 9).

**Generally accepted accounting principles (GAAP)** Common standards that indicate how to report economic events. (p. 9).

**Income statement** financial statement that presents the revenues and expenses and resulting net income or net loss of a company for a specific period of time. (p. 21).

**International Accounting Standards Board (IASB)** An accounting standard-setting body that issues standards adopted by many countries outside of the United States. (p. 9).

**Investments by owner** The assets an owner puts into the business. (p. 13).

**Liabilities** Creditor claims on total assets. (p. 13).

**Managerial accounting** The field of accounting that provides internal reports to help users make decisions about their companies. (p. 6).

**Monetary unit assumption** An assumption stating that companies include in the accounting records only transaction data that can be expressed in terms of money. (p. 10).

**Net income** The amount by which revenues exceed expenses. (p. 23).

**Net loss** The amount by which expenses exceed revenues. (p. 23).

**Owner's equity** The ownership claim on total assets. (p. 13).

**Owner's equity statement** A financial statement that summarizes the changes in owner's equity for a specific period of time. (p. 21).

**Partnership** A business owned by two or more persons associated as partners. (p. 11).

**Proprietorship** A business owned by one person. (p. 10).

**Relevance** Financial information that is capable of making a difference in a decision. (p. 9).

**Revenues** The gross increase in owner's equity resulting from business activities entered into for the purpose of earning income. (p. 13).

**Sarbanes-Oxley Act of 2002 (SOX)** Law passed by Congress in 2002 intended to reduce unethical corporate behavior. (p. 8).

**Securities and Exchange Commission (SEC)** A governmental agency that oversees U.S. financial markets and accounting standard-setting bodies. (p. 9).

**Statement of cash flows** A financial statement that summarizes information about the cash inflows (receipts) and cash outflows (payments) for a specific period of time. (p. 21).

**Transactions** The economic events of a business that are recorded by accountants. (p. 14).

## APPENDIX 1A

### Accounting Career Opportunities

Why is accounting such a popular major and career choice? First, there are a lot of jobs. In many cities in recent years, the demand for accountants exceeded the supply. Not only are there a lot of jobs, but there are a wide array of opportunities. As one accounting organization observed, “accounting is one degree with 360 degrees of opportunity.”

Accounting is also hot because it is obvious that accounting matters. Interest in accounting has increased, ironically, because of the attention caused by the accounting failures of companies such as **Enron** and **WorldCom**. These widely publicized scandals revealed the important role that accounting plays in society. Most people want to make a difference, and an accounting career provides many opportunities to contribute to society. Finally, the Sarbanes-Oxley Act of 2002 (SOX) (see page 8) significantly increased the accounting and internal control requirements for corporations. This dramatically increased demand for professionals with accounting training.

Accountants are in such demand that it is not uncommon for accounting students to have accepted a job offer a year before graduation. As the following discussion reveals, the job options of people with accounting degrees are virtually unlimited.

#### Public Accounting

Individuals in **public accounting** offer expert service to the general public, in much the same way that doctors serve patients and lawyers serve clients. A major portion of public accounting involves **auditing**. In auditing, a certified public accountant (CPA) examines company financial statements and provides an opinion as to how accurately the financial statements present the company's results and financial position. Analysts, investors, and creditors rely heavily on these “audit opinions,” which CPAs have the exclusive authority to issue.

**Taxation** is another major area of public accounting. The work that tax specialists perform includes tax advice and planning, preparing tax returns, and representing clients before governmental agencies such as the Internal Revenue Service.

A third area in public accounting is **management consulting**. It ranges from installing basic accounting software or highly complex enterprise resource planning systems, to providing support services for major marketing projects or merger and acquisition activities.

Many CPAs are entrepreneurs. They form small- or medium-sized practices that frequently specialize in tax or consulting services.

#### Private Accounting

Instead of working in public accounting, you might choose to be an employee of a for-profit company such as **Starbucks**, **Google**, or **PepsiCo**. In **private** (or **managerial**) **accounting**, you would be involved in activities such as cost accounting (finding the cost of producing specific products), budgeting, accounting information system

**Study Objective [9]**  
Explain the career opportunities in accounting.

design and support, or tax planning and preparation. You might also be a member of your company's internal audit team. In response to SOX, the internal auditors' job of reviewing the company's operations to ensure compliance with company policies and to increase efficiency has taken on increased importance.

Alternatively, many accountants work for not-for-profit organizations such as the **Red Cross** or the **Bill and Melinda Gates Foundation**, or for museums, libraries, or performing arts organizations.

## Opportunities in Government

Another option is to pursue one of the many accounting opportunities in governmental agencies. For example, the Internal Revenue Service (IRS), Federal Bureau of Investigation (FBI), and the Securities and Exchange Commission (SEC) all employ accountants. The FBI has a stated goal that at least 15 percent of its new agents should be CPAs. There is also a very high demand for accounting educators at public colleges and universities and in state and local governments.

## Forensic Accounting

**Forensic accounting** uses accounting, auditing, and investigative skills to conduct investigations into theft and fraud. It is listed among the top 20 career paths of the future. The job of forensic accountants is to catch the perpetrators of the estimated \$600 billion per year of theft and fraud occurring at U.S. companies. This includes tracing money-laundering and identity-theft activities as well as tax evasion. Insurance companies hire forensic accountants to detect insurance frauds such as arson, and law offices employ forensic accountants to identify marital assets in divorces. Forensic accountants often have FBI, IRS, or similar government experience.

## "Show Me the Money"

How much can a new accountant make? Salary estimates are constantly changing, and salaries vary considerably across the country. At the time this text was written, the following general information was available from Robert Half International.

### Illustration 1A-1

Salary estimates for jobs in public and corporate accounting

The average salary for a first-year partner in a CPA firm is close to \$130,000, with experienced partners often making substantially more. On the corporate side, controllers (the head accountant) can earn \$150,000, while chief financial officers can earn as much as \$350,000.

For up-to-date salary estimates, as well as a wealth of additional information regarding accounting as a career, check out [www.startheregoplaces.com](http://www.startheregoplaces.com).

## Summary of Study Objective for Appendix 1A

**[9] Explain the career opportunities in accounting.** Accounting offers many different jobs in fields such as public and private accounting, government, and forensic accounting.

Accounting is a popular major because there are many different types of jobs, with unlimited potential for career advancement.

## Glossary for Appendix 1A

**Auditing** The examination of financial statements by a certified public accountant in order to express an opinion as to the fairness of presentation. (p. 29).

**Forensic accounting** An area of accounting that uses accounting, auditing, and investigative skills to conduct investigations into theft and fraud. (p. 30).

**Management consulting** An area of public accounting ranging from development of accounting and computer systems to support services for marketing projects and merger and acquisition activities. (p. 29).

**Private (or managerial) accounting** An area of accounting within a company that involves such activities as cost accounting, budgeting, design and support of accounting information systems, and tax planning and preparation. (p. 29).

**Public accounting** An area of accounting in which the accountant offers expert service to the general public. (p. 29).

**Taxation** An area of public accounting involving tax advice, tax planning, preparing tax returns, and representing clients before governmental agencies. (p. 29).

Self-Test, Brief Exercises, Exercises, Problem Set A, and many more components are available for practice in *WileyPLUS*

\***Note:** All asterisked Questions, Exercises, and Problems relate to material in the appendix to the chapter.

## Self-Test Questions

Answers are on page 46.

- (SO 1) 1. Which of the following is *not* a step in the accounting process?
- a. Identification.                      c. Recording.  
b. Verification.                         d. Communication.
- (SO 2) 2. Which of the following statements about users of accounting information is *incorrect*?
- a. Management is an internal user.  
b. Taxing authorities are external users.  
c. Present creditors are external users.  
d. Regulatory authorities are internal users.
- (SO 4) 3. The cost principle states that:
- a. assets should be initially recorded at cost and adjusted when the fair value changes.  
b. activities of an entity are to be kept separate and distinct from its owner.  
c. assets should be recorded at their cost.  
d. only transaction data capable of being expressed in terms of money be included in the accounting records.
- (SO 5) 4. Which of the following statements about basic assumptions is *correct*?
- a. Basic assumptions are the same as accounting principles.  
b. The economic entity assumption states that there should be a particular unit of accountability.  
c. The monetary unit assumption enables accounting to measure employee morale.  
d. Partnerships are not economic entities.

5. The three types of business entities are: (SO 5)
- a. proprietorships, small businesses, and partnerships.  
b. proprietorships, partnerships, and corporations.  
c. proprietorships, partnerships, and large businesses.  
d. financial, manufacturing, and service companies.
6. Net income will result during a time period when: (SO 6)
- a. assets exceed liabilities.  
b. assets exceed revenues.  
c. expenses exceed revenues.  
d. revenues exceed expenses.
7. Performing services on account will have the following effects on the components of the basic accounting equation: (SO 7)
- a. increase assets and decrease owner's equity.  
b. increase assets and increase owner's equity.  
c. increase assets and increase liabilities.  
d. increase liabilities and increase owner's equity.
8. As of December 31, 2012, Stoneland Company has assets of \$3,500 and owner's equity of \$2,000. What are the liabilities for Stoneland Company as of December 31, 2012? (SO 7)
- a. \$1,500.    b. \$1,000.    c. \$2,500.    d. \$2,000.
9. Which of the following events is *not* recorded in the accounting records? (SO 7)
- a. Equipment is purchased on account.  
b. An employee is terminated.  
c. A cash investment is made into the business.  
d. The owner withdraws cash for personal use.

## 32 1 Accounting in Action

- (SO 7) 10. During 2012, Gibson Company's assets decreased \$50,000 and its liabilities decreased \$90,000. Its owner's equity therefore:
- increased \$40,000.
  - decreased \$140,000.
  - decreased \$40,000.
  - increased \$140,000.
- (SO 7) 11. Payment of an account payable affects the components of the accounting equation in the following way.
- Decreases owner's equity and decreases liabilities.
  - Increases assets and decreases liabilities.
  - Decreases assets and increases owner's equity.
  - Decreases assets and decreases liabilities.
- (SO 8) 12. Which of the following statements is *false*?
- A statement of cash flows summarizes information about the cash inflows (receipts) and outflows (payments) for a specific period of time.
  - A balance sheet reports the assets, liabilities, and owner's equity at a specific date.
  - An income statement presents the revenues, expenses, changes in owner's equity, and resulting net income or net loss for a specific period of time.
  - An owner's equity statement summarizes the changes in owner's equity for a specific period of time.
13. On the last day of the period, Jim Otto Company buys a \$900 machine on credit. This transaction will affect the:
- income statement only.
  - balance sheet only.
  - income statement and owner's equity statement only.
  - income statement, owner's equity statement, and balance sheet.
14. The financial statement that reports assets, liabilities, and owner's equity is the:
- income statement.
  - owner's equity statement.
  - balance sheet.
  - statement of cash flows.
- \*15. Services provided by a public accountant include:
- auditing, taxation, and management consulting.
  - auditing, budgeting, and management consulting.
  - auditing, budgeting, and cost accounting.
  - internal auditing, budgeting, and management consulting.

Go to the book's companion website,  
[www.wiley.com/college/veygandt](http://www.wiley.com/college/veygandt),  
for additional Self-Test Questions.

## Questions

- "Accounting is ingrained in our society and it is vital to our economic system." Do you agree? Explain.
- Identify and describe the steps in the accounting process.
- (a) Who are internal users of accounting data? (b) How does accounting provide relevant data to these users?
- What uses of financial accounting information are made by (a) investors and (b) creditors?
- "Bookkeeping and accounting are the same." Do you agree? Explain.
- Eve Myles Travel Agency purchased land for \$90,000 cash on December 10, 2012. At December 31, 2012, the land's value has increased to \$93,000. What amount should be reported for land on Eve Myles's balance sheet at December 31, 2012? Explain.
- What is the monetary unit assumption?
- What is the economic entity assumption?
- What are the three basic forms of business organizations for profit-oriented enterprises?
- Maria Contreras is the owner of a successful printing shop. Recently, her business has been increasing, and Maria has been thinking about changing the organization of her business from a proprietorship to a corporation. Discuss some of the advantages Maria would enjoy if she were to incorporate her business.
- What is the basic accounting equation?
- (a) Define the terms assets, liabilities, and owner's equity. (b) What items affect owner's equity?
- Which of the following items are liabilities of Karl Jewelry Stores?
  - Cash.
  - Accounts payable.
  - Owner's drawings.
  - Accounts receivable.
  - Supplies.
  - Equipment.
  - Salaries and wages payable.
  - Service revenue.
  - Rent expense.
- Can a business enter into a transaction in which only the left side of the basic accounting equation is affected? If so, give an example.
- Are the following events recorded in the accounting records? Explain your answer in each case.
  - The owner of the company dies.
  - Supplies are purchased on account.
  - An employee is fired.
  - The owner of the business withdraws cash from the business for personal use.
- Indicate how the following business transactions affect the basic accounting equation.
  - Paid cash for janitorial services.
  - Purchased equipment for cash.
  - Invested cash in the business.
  - Paid accounts payable in full.
- Listed below are some items found in the financial statements of Dave Ramsey Co. Indicate in which financial statement(s) the following items would appear.
  - Service revenue.
  - Equipment.
  - Advertising expense.
  - Accounts receivable.
  - Owner's capital.
  - Salaries and wages payable.
- In February 2012, Betty King invested an additional \$10,000 in her business, King's Pharmacy, which is organized as a proprietorship. King's accountant, Leroy James, recorded this receipt as an increase in cash and revenues. Is this treatment appropriate? Why or why not?
- "A company's net income appears directly on the income statement and the owner's equity statement, and it is

included indirectly in the company's balance sheet." Do you agree? Explain.

20. Torchwood Enterprises had a capital balance of \$168,000 at the beginning of the period. At the end of the accounting period, the capital balance was \$198,000.
- (a) Assuming no additional investment or withdrawals during the period, what is the net income for the period?
  - (b) Assuming an additional investment of \$13,000 but no withdrawals during the period, what is the net income for the period?
21. Summarized operations for J. R. Ewing Co. for the month of July are as follows.

Revenues earned: for cash \$20,000; on account \$70,000.

Expenses incurred: for cash \$26,000; on account \$40,000.

Indicate for J. R. Ewing Co. (a) the total revenues, (b) the total expenses, and (c) net income for the month of July.

22. The basic accounting equation is: Assets = Liabilities + Owner's Equity. Replacing the words in that equation with dollar amounts, what is Coca-Cola's accounting equation at December 31, 2009? (*Hint: Owner's equity is equivalent to shareowners' equity.*)

## Brief Exercises

**BE1-1** Presented below is the basic accounting equation. Determine the missing amounts.

| Assets       | = | Liabilities | + | Owner's Equity |
|--------------|---|-------------|---|----------------|
| (a) \$90,000 |   | \$50,000    |   | ?              |
| (b) ?        |   | \$40,000    |   | \$70,000       |
| (c) \$94,000 |   | ?           |   | \$53,000       |

*Use basic accounting equation.*  
(SO 6)

**BE1-2** Given the accounting equation, answer each of the following questions.

- (a) The liabilities of Buerhle Company are \$120,000 and the owner's equity is \$232,000. What is the amount of Buerhle Company's total assets?
- (b) The total assets of Buerhle Company are \$190,000 and its owner's equity is \$91,000. What is the amount of its total liabilities?
- (c) The total assets of Buerhle Company are \$800,000 and its liabilities are equal to one half of its total assets. What is the amount of Buerhle Company's owner's equity?

*Use basic accounting equation.*  
(SO 6)

**BE1-3** At the beginning of the year, Danks Company had total assets of \$800,000 and total liabilities of \$300,000. Answer the following questions.

- (a) If total assets increased \$150,000 during the year and total liabilities decreased \$80,000, what is the amount of owner's equity at the end of the year?
- (b) During the year, total liabilities increased \$100,000 and owner's equity decreased \$70,000. What is the amount of total assets at the end of the year?
- (c) If total assets decreased \$80,000 and owner's equity increased \$120,000 during the year, what is the amount of total liabilities at the end of the year?

*Use basic accounting equation.*  
(SO 6)

**BE1-4** Use the expanded accounting equation to answer each of the following questions.

- (a) The liabilities of Falk Company are \$90,000. Owner's capital account is \$150,000; drawings are \$40,000; revenues, \$450,000; and expenses, \$320,000. What is the amount of Falk Company's total assets?
- (b) The total assets of Pierogi Company are \$57,000. Owner's capital account is \$25,000; drawings are \$7,000; revenues, \$52,000; and expenses, \$35,000. What is the amount of the company's total liabilities?
- (c) The total assets of Yanko Co. are \$600,000 and its liabilities are equal to two-thirds of its total assets. What is the amount of Yanko Co.'s owner's equity?

*Solve expanded accounting equation.*  
(SO 6)

**BE1-5** Indicate whether each of the following items is an asset (A), liability (L), or part of owner's equity (OE).

- |                                      |                           |
|--------------------------------------|---------------------------|
| _____ (a) Accounts receivable        | _____ (d) Supplies        |
| _____ (b) Salaries and wages payable | _____ (e) Owner's capital |
| _____ (c) Equipment                  | _____ (f) Notes payable   |

*Identify assets, liabilities, and owner's equity.*  
(SO 6)

**BE1-6** Presented below are three business transactions. On a sheet of paper, list the letters (a), (b), and (c) with columns for assets, liabilities, and owner's equity. For each column, indicate whether the transactions increased (+), decreased (-), or had no effect (NE) on assets, liabilities, and owner's equity.

- (a) Purchased supplies on account.
- (b) Received cash for providing a service.
- (c) Paid expenses in cash.

*Determine effect of transactions on basic accounting equation.*  
(SO 7)

## 34 1 Accounting in Action

Determine effect of transactions on basic accounting equation.

(SO 7)

**BE1-7** Follow the same format as BE1-6 on the previous page. Determine the effect on assets, liabilities, and owner's equity of the following three transactions.

- (a) Invested cash in the business.
- (b) Withdrawal of cash by owner.
- (c) Received cash from a customer who had previously been billed for services provided.

Classify items affecting owner's equity.

(SO 7)

**BE1-8** Classify each of the following items as owner's drawings (D), revenue (R), or expense (E).

- |                                      |                             |
|--------------------------------------|-----------------------------|
| _____ (a) Advertising expense        | _____ (e) Owner's drawings  |
| _____ (b) Service revenue            | _____ (f) Rent revenue      |
| _____ (c) Insurance expense          | _____ (g) Utilities expense |
| _____ (d) Salaries and wages expense |                             |

Determine effect of transactions on basic owner's equity.

(SO 7)

**BE1-9** Presented below are three transactions. Mark each transaction as affecting owner's investment (I), owner's drawings (D), revenue (R), expense (E), or not affecting owner's equity (NOE).

- \_\_\_\_\_ (a) Received cash for services performed
- \_\_\_\_\_ (b) Paid cash to purchase equipment
- \_\_\_\_\_ (c) Paid employee salaries

Prepare a balance sheet.

(SO 8)

**BE1-10** In alphabetical order below are balance sheet items for George Company at December 31, 2012. Kayla George is the owner of George Company. Prepare a balance sheet, following the format of Illustration 1-9.

|                     |          |
|---------------------|----------|
| Accounts payable    | \$90,000 |
| Accounts receivable | \$72,500 |
| Cash                | \$49,000 |
| Owner's capital     | \$31,500 |

Determine where items appear on financial statements.

(SO 8)

**BE1-11** Indicate whether the following items would appear on the income statement (IS), balance sheet (BS), or owner's equity statement (OE).

- |                               |                           |
|-------------------------------|---------------------------|
| _____ (a) Notes payable       | _____ (d) Cash            |
| _____ (b) Advertising expense | _____ (e) Service revenue |
| _____ (c) Owner's capital     |                           |

## Do it! Review

Review basic concepts.

(SO 1, 2, 4)

**Do it! 1-1** Indicate whether each of the five statements presented below is true or false.

1. The three steps in the accounting process are identification, recording, and examination.
2. The two most common types of external users are investors and creditors.
3. Congress passed the Sarbanes-Oxley Act of 2002 to ensure that investors invest only in companies that will be profitable.
4. The primary accounting standard-setting body in the United States is the Securities and Exchange Commission (SEC).
5. The cost principle dictates that companies record assets at their cost and continue to report them at their cost over the time the asset is held.

Evaluate effects of transactions on owner's equity.

(SO 6)

**Do it! 1-2** Classify the following items as investment by owner (I), owner's drawings (D), revenues (R), or expenses (E). Then indicate whether each item increases or decreases owner's equity.

- |                  |  |
|------------------|--|
| (1) Drawings     | (3) Advertising Expense                          |
| (2) Rent Revenue | (4) Owner puts personal assets into the business |

Prepare tabular analysis.

(SO 7)

**Do it! 1-3** Transactions made by Orlando Bloom and Co., a law firm, for the month of March are shown below. Prepare a tabular analysis which shows the effects of these transactions on the expanded accounting equation, similar to that shown in Illustration 1-8.

1. The company provided \$20,000 of services for customers, on credit.
2. The company received \$20,000 in cash from customers who had been billed for services [in transaction (1)].
3. The company received a bill for \$2,300 of advertising, but will not pay it until a later date.
4. Orlando Bloom withdrew \$3,600 cash from the business for personal use.

**Do it! 1-4** Presented below is selected information related to Lance Company at December 31, 2012. Lance reports financial information monthly.

|                     |          |                            |          |
|---------------------|----------|----------------------------|----------|
| Accounts Payable    | \$ 3,000 | Salaries and Wages Expense | \$16,500 |
| Cash                | 4,500    | Notes Payable              | 25,000   |
| Advertising Expense | 6,000    | Rent Expense               | 10,500   |
| Service Revenue     | 51,500   | Accounts Receivable        | 13,500   |
| Equipment           | 29,000   | Owner's Drawings           | 7,500    |

Calculate effects of transactions on financial statement items.

(SO 8)

- Determine the total assets of Lance Company at December 31, 2012.
- Determine the net income that Lance Company reported for December 2012.
- Determine the owner's equity of Lance Company at December 31, 2012.

## Exercises

**E1-1** Jenks Company performs the following accounting tasks during the year.

- \_\_\_\_\_ Analyzing and interpreting information.
- \_\_\_\_\_ Classifying economic events.
- \_\_\_\_\_ Explaining uses, meaning, and limitations of data.
- \_\_\_\_\_ Keeping a systematic chronological diary of events.
- \_\_\_\_\_ Measuring events in dollars and cents.
- \_\_\_\_\_ Preparing accounting reports.
- \_\_\_\_\_ Reporting information in a standard format.
- \_\_\_\_\_ Selecting economic activities relevant to the company.
- \_\_\_\_\_ Summarizing economic events.

Classify the three activities of accounting.

(SO 1)

Accounting is “an information system that **identifies, records, and communicates** the economic events of an organization to interested users.”

### Instructions

Categorize the accounting tasks performed by Jenks as relating to either the identification (I), recording (R), or communication (C) aspects of accounting.

**E1-2 (a)** The following are users of financial statements.

- |                                |  |
|--------------------------------|--|
| _____ Customers                | _____ Securities and Exchange Commission |
| _____ Internal Revenue Service | _____ Store manager                      |
| _____ Labor unions             | _____ Suppliers                          |
| _____ Marketing manager        | _____ Vice president of finance          |
| _____ Production supervisor    |  |

Identify users of accounting information.

(SO 2)

### Instructions

Identify the users as being either **external users** or **internal users**.

**(b)** The following questions could be asked by an internal user or an external user.

- \_\_\_\_\_ Can we afford to give our employees a pay raise?
- \_\_\_\_\_ Did the company earn a satisfactory income?
- \_\_\_\_\_ Do we need to borrow in the near future?
- \_\_\_\_\_ How does the company's profitability compare to other companies?
- \_\_\_\_\_ What does it cost us to manufacture each unit produced?
- \_\_\_\_\_ Which product should we emphasize?
- \_\_\_\_\_ Will the company be able to pay its short-term debts?

### Instructions

Identify each of the questions as being more likely asked by an **internal user** or an **external user**.

**E1-3** Lovie Smith, president of Smith Company, has instructed Michelle Martz, the head of the accounting department for Smith Company, to report the company's land in the company's accounting reports at its fair value of \$170,000 instead of its cost of \$100,000. Smith says, “Showing the land at \$170,000 will make our company look like a better investment when we try to attract new investors next month.”

Discuss ethics and the cost principle.

(SO 3)

Use accounting concepts.  
(SO 4, 5)

### Instructions

Explain the ethical situation involved for Michelle Martz, identifying the stakeholders and the alternatives.

**E1-4** The following situations involve accounting principles and assumptions.

1. Rex Company owns buildings that are worth substantially more than they originally cost. In an effort to provide more relevant information, Rex reports the buildings at fair value in its accounting reports.
2. Levi Company includes in its accounting records only transaction data that can be expressed in terms of money.
3. Josh Borke, owner of Josh's Photography, records his personal living costs as expenses of the business.

### Instructions

For each of the three situations, say if the accounting method used is correct or incorrect. If correct, identify which principle or assumption supports the method used. If incorrect, identify which principle or assumption has been violated.

Classify accounts as assets,  
liabilities, and owner's equity.  
(SO 6)

**E1-5** Garcia Cleaners has the following balance sheet items.

|                  |                            |
|------------------|----------------------------|
| Accounts payable | Accounts receivable        |
| Cash             | Notes payable              |
| Equipment        | Salaries and wages payable |
| Supplies         | Owner's capital            |

### Instructions

Classify each item as an asset, liability, or owner's equity.

Analyze the effect of  
transactions.  
(SO 6, 7)

**E1-6** Selected transactions for Linebrink Lawn Care Company are listed below.

1. Made cash investment to start business.
2. Paid monthly rent.
3. Purchased equipment on account.
4. Billed customers for services performed.
5. Withdrew cash for owner's personal use.
6. Received cash from customers billed in (4).
7. Incurred advertising expense on account.
8. Purchased additional equipment for cash.
9. Received cash from customers when service was performed.

### Instructions

List the numbers of the above transactions and describe the effect of each transaction on assets, liabilities, and owner's equity. For example, the first answer is: (1) Increase in assets and increase in owner's equity.

Analyze the effect of transac-  
tions on assets, liabilities, and  
owner's equity.  
(SO 6, 7)

**E1-7** Thornton Computer Timeshare Company entered into the following transactions during May 2012.

1. Purchased computer terminals for \$20,000 from Digital Equipment on account.
2. Paid \$4,000 cash for May rent on storage space.
3. Received \$17,000 cash from customers for contracts billed in April.
4. Provided computer services to Fisher Construction Company for \$3,000 cash.
5. Paid Northern States Power Co. \$11,000 cash for energy usage in May.
6. Thornton invested an additional \$29,000 in the business.
7. Paid Digital Equipment for the terminals purchased in (1) above.
8. Incurred advertising expense for May of \$1,200 on account.

### Instructions

Indicate with the appropriate letter whether each of the transactions above results in:

- (a) An increase in assets and a decrease in assets.
- (b) An increase in assets and an increase in owner's equity.
- (c) An increase in assets and an increase in liabilities.
- (d) A decrease in assets and a decrease in owner's equity.
- (e) A decrease in assets and a decrease in liabilities.
- (f) An increase in liabilities and a decrease in owner's equity.
- (g) An increase in owner's equity and a decrease in liabilities.

**E1-8** An analysis of the transactions made by Mark Kotsay & Co., a certified public accounting firm, for the month of August is shown below. The expenses were \$650 for rent, \$4,800 for salaries and wages, and \$500 for utilities. *Analyze transactions and compute net income.* (SO 7)

| Cash         | Accounts Receivable | Supplies | Equipment | = | Accounts Payable | Owner's Capital | Owner's Drawings | Revenues | Expenses |
|--------------|---------------------|----------|-----------|---|------------------|-----------------|------------------|----------|----------|
| 1. +\$15,000 |                     |          |           |   |                  | +\$15,000       |                  |          |          |
| 2. -2,000    |                     |          | +\$5,000  |   | +\$3,000         |                 |                  |          |          |
| 3. -750      |                     | +\$750   |           |   |                  |                 |                  |          |          |
| 4. +4,600    | +\$3,900            |          |           |   |                  |                 |                  | +\$8,500 |          |
| 5. -1,500    |                     |          |           |   | -1,500           |                 |                  |          |          |
| 6. -2,000    |                     |          |           |   |                  |                 | -\$2,000         |          |          |
| 7. -650      |                     |          |           |   |                  |                 |                  |          | -\$650   |
| 8. +450      | -450                |          |           |   |                  |                 |                  |          |          |
| 9. -4,800    |                     |          |           |   |                  |                 |                  |          | -4,800   |
| 10.          |                     |          |           |   | +500             |                 |                  |          | -500     |

**Instructions**

- (a) Describe each transaction that occurred for the month.
- (b) Determine how much owner's equity increased for the month.
- (c) Compute the amount of net income for the month.

**E1-9** An analysis of transactions for Mark Kotsay & Co. was presented in E1-8. *Prepare financial statements.* (SO 8)

**Instructions**

Prepare an income statement and an owner's equity statement for August and a balance sheet at August 31, 2012.

**E1-10** Andruw Company had the following assets and liabilities on the dates indicated. *Determine net income (or loss).* (SO 7)

| December 31 | Total Assets | Total Liabilities |
|-------------|--------------|-------------------|
| 2011        | \$400,000    | \$250,000         |
| 2012        | \$460,000    | \$300,000         |
| 2013        | \$590,000    | \$400,000         |

Andruw began business on January 1, 2011, with an investment of \$100,000.

**Instructions**

From an analysis of the change in owner's equity during the year, compute the net income (or loss) for:

- (a) 2011, assuming Andruw's drawings were \$15,000 for the year.
- (b) 2012, assuming Andruw made an additional investment of \$45,000 and had no drawings in 2012.
- (c) 2013, assuming Andruw made an additional investment of \$15,000 and had drawings of \$25,000 in 2013.

**E1-11** Two items are omitted from each of the following summaries of balance sheet and income statement data for two proprietorships for the year 2012, Gavin's Goods and Floyd Enterprises. *Analyze financial statements items.* (SO 6, 7)

|  | Gavin's Goods | Floyd Enterprises |
|--|---------------|-------------------|
| Beginning of year:                     |               |                   |
| Total assets                           | \$110,000     | \$129,000         |
| Total liabilities                      | 85,000        | (c)               |
| Total owner's equity                   | (a)           | 80,000            |
| End of year:                           |               |                   |
| Total assets                           | 160,000       | 180,000           |
| Total liabilities                      | 120,000       | 50,000            |
| Total owner's equity                   | 40,000        | 130,000           |
| Changes during year in owner's equity: |               |                   |
| Additional investment                  | (b)           | 25,000            |
| Drawings                               | 29,000        | (d)               |
| Total revenues                         | 215,000       | 100,000           |
| Total expenses                         | 175,000       | 60,000            |

**Instructions**

Determine the missing amounts.

## 38 1 Accounting in Action

Prepare income statement and owner's equity statement.

(SO 8)

**E1-12** The following information relates to Jake Peavy Co. for the year 2012.

|                                  |          |                     |          |
|----------------------------------|----------|---------------------|----------|
| Owner's capital, January 1, 2012 | \$48,000 | Advertising expense | \$ 1,800 |
| Owner's drawings during 2012     | 6,000    | Rent expense        | 10,400   |
| Service revenue                  | 63,600   | Utilities expense   | 3,100    |
| Salaries and wages expense       | 29,500   |                     |          |

### Instructions

After analyzing the data, prepare an income statement and an owner's equity statement for the year ending December 31, 2012.

Correct an incorrectly prepared balance sheet.

(SO 8)

**E1-13** Linda Puff is the bookkeeper for Sajuki Company. Linda has been trying to get the balance sheet of Sajuki Company to balance. Sajuki's balance sheet is shown below.

### SAJUKI COMPANY Balance Sheet December 31, 2012

| Assets           |                 | Liabilities                             |                 |
|------------------|-----------------|---|-----------------|
| Cash             | \$15,000        | Accounts payable                        | \$21,000        |
| Supplies         | 8,000           | Accounts receivable                     | (9,500)         |
| Equipment        | 46,000          | Owner's capital                         | <u>67,500</u>   |
| Owner's drawings | 10,000          | Total liabilities and<br>owner's equity | <u>\$79,000</u> |
| Total assets     | <u>\$79,000</u> |   |                 |

### Instructions

Prepare a correct balance sheet.

Compute net income and prepare a balance sheet.

(SO 8)

**E1-14** Toni Pena is the sole owner of Deer Park, a public camping ground near the Lake Mead National Recreation Area. Toni has compiled the following financial information as of December 31, 2012.

|                                    |           |                         |           |
|------------------------------------|-----------|-------------------------|-----------|
| Revenues during 2012—camping fees  | \$140,000 | Fair value of equipment | \$140,000 |
| Revenues during 2012—general store | 65,000    | Notes payable           | 60,000    |
| Accounts payable                   | 11,000    | Expenses during 2012    | 150,000   |
| Cash on hand                       | 23,000    | Supplies on hand        | 17,500    |
| Original cost of equipment         | 105,500   |                         |           |

### Instructions

(a) Determine Toni Pena's net income from Deer Park for 2012.

(b) Prepare a balance sheet for Deer Park as of December 31, 2012.

Prepare an income statement.

(SO 8)

**E1-15** Presented below is financial information related to the 2012 operations of J. J. Putz Cruise Company.

|                                 |           |
|---------------------------------|-----------|
| Maintenance and repairs expense | \$ 95,000 |
| Supplies expense                | 10,000    |
| Salaries and wages expense      | 142,000   |
| Advertising expense             | 24,500    |
| Ticket revenue                  | 410,000   |

### Instructions

Prepare the 2012 income statement for J. J. Putz Cruise Company.

Prepare an owner's equity statement.

(SO 8)

**E1-16** Presented below is information related to the sole proprietorship of Sergio Santos attorney.

|                                |           |
|--------------------------------|-----------|
| Legal service revenue—2012     | \$335,000 |
| Total expenses—2012            | 211,000   |
| Assets, January 1, 2012        | 96,000    |
| Liabilities, January 1, 2012   | 62,000    |
| Assets, December 31, 2012      | 168,000   |
| Liabilities, December 31, 2012 | 100,000   |
| Drawings—2012                  | ?         |

### Instructions

Prepare the 2012 owner's equity statement for Sergio Santos' legal practice.

## Exercises: Set B

Visit the book's companion website, at [www.wiley.com/college/veygandt](http://www.wiley.com/college/veygandt), and choose the Student Companion site to access Exercise Set B.

## Problems: Set A

**P1-1A** Threet's Repair Shop was started on May 1 by Erica Threet. A summary of May transactions is presented below.

1. Invested \$10,000 cash to start the repair shop.
2. Purchased equipment for \$5,000 cash.
3. Paid \$400 cash for May office rent.
4. Paid \$500 cash for supplies.
5. Incurred \$250 of advertising costs in the *Beacon News* on account.
6. Received \$6,100 in cash from customers for repair service.
7. Withdrew \$1,000 cash for personal use.
8. Paid part-time employee salaries \$2,000.
9. Paid utility bills \$170.
10. Provided repair service on account to customers \$750.
11. Collected cash of \$120 for services billed in transaction (10).

### Instructions

- (a) Prepare a tabular analysis of the transactions, using the following column headings: Cash, Accounts Receivable, Supplies, Equipment, Accounts Payable, Owner's Capital, Owner's Drawings, Revenues, and Expenses.
- (b) From an analysis of the owner's equity columns, compute the net income or net loss for May.

Analyze transactions and compute net income.

(SO 6, 7)

**P1-2A** Ramona Castro opened a veterinary business in Nashville, Tennessee, on August 1. On August 31, the balance sheet showed Cash \$9,000, Accounts Receivable \$1,700, Supplies \$600, Equipment \$6,000, Accounts Payable \$3,600, and Owner's Capital \$13,700. During September, the following transactions occurred.

1. Paid \$2,900 cash on accounts payable.
2. Collected \$1,300 of accounts receivable.
3. Purchased additional office equipment for \$2,100, paying \$800 in cash and the balance on account.
4. Earned revenue of \$7,800, of which \$2,500 is received in cash and the balance is due in October.
5. Withdrew \$1,100 cash for personal use.
6. Paid salaries \$1,700, rent for September \$900, and advertising expense \$450.
7. Incurred utilities expense for month on account \$170.
8. Received \$10,000 from Capital Bank (money borrowed on a note payable).

### Instructions

- (a) Prepare a tabular analysis of the September transactions beginning with August 31 balances. The column headings should be as follows: Cash + Accounts Receivable + Supplies + Equipment = Notes Payable + Accounts Payable + Owner's Capital - Owner's Drawings + Revenues - Expenses.
- (b) Prepare an income statement for September, an owner's equity statement for September, and a balance sheet at September 30.

Analyze transactions and prepare income statement, owner's equity statement, and balance sheet.

(SO 6, 7, 8)

**P1-3A** On May 1, A. J. Pierzynski started AJ Flying School, a company that provides flying lessons, by investing \$40,000 cash in the business. Following are the assets and liabilities of the company on May 31, 2012, and the revenues and expenses for the month of May.

|                     |          |                                 |          |
|---------------------|----------|---------------------------------|----------|
| Cash                | \$ 3,400 | Notes Payable                   | \$30,000 |
| Accounts Receivable | 4,900    | Rent Expense                    | 1,200    |
| Equipment           | 64,000   | Maintenance and Repairs Expense | 400      |
| Service Revenue     | 8,100    | Gasoline Expense                | 2,500    |
| Advertising Expense | 600      | Insurance Expense               | 400      |
|                     |          | Accounts Payable                | 800      |

(a) Total assets \$29,350

(b) Net income \$4,580  
Ending capital \$17,180

Prepare income statement, owner's equity statement, and balance sheet.

(SO 8)

A. J. Pierzynski made no additional investment in May, but he withdrew \$1,500 in cash for personal use.

**Instructions**

- (a) Net income \$3,000  
Owner's equity \$41,500  
Total assets \$72,300
- (b) Net income \$2,400  
Owner's equity \$40,900

- (a) Prepare an income statement and owner's equity statement for the month of May and a balance sheet at May 31.
- (b) Prepare an income statement and owner's equity statement for May assuming the following data are not included above: (1) \$900 of revenue was earned and billed but not collected at May 31, and (2) \$1,500 of gasoline expense was incurred but not paid.

Analyze transactions and prepare financial statements. (SO 6, 7, 8)

**P1-4A** Gordon Beckham started his own delivery service, Beckham Deliveries, on June 1, 2012. The following transactions occurred during the month of June.

- June 1 Gordon invested \$10,000 cash in the business.
- 2 Purchased a used van for deliveries for \$12,000. Gordon paid \$2,000 cash and signed a note payable for the remaining balance.
- 3 Paid \$500 for office rent for the month.
- 5 Performed \$4,400 of services on account.
- 9 Withdrew \$200 cash for personal use.
- 12 Purchased supplies for \$150 on account.
- 15 Received a cash payment of \$1,250 for services provided on June 5.
- 17 Purchased gasoline for \$200 on account.
- 20 Received a cash payment of \$1,300 for services provided.
- 23 Made a cash payment of \$600 on the note payable.
- 26 Paid \$250 for utilities.
- 29 Paid for the gasoline purchased on account on June 17.
- 30 Paid \$1,000 for employee salaries.

**Instructions**

- (a) Total assets \$23,100

- (a) Show the effects of the previous transactions on the accounting equation using the following format.

| Assets |      |                     |                      | Liabilities   |                  | Owner's Equity  |                  |                             |
|--------|------|---------------------|----------------------|---------------|------------------|-----------------|------------------|-----------------------------|
| Date   | Cash | Accounts Receivable | Supplies + Equipment | Notes Payable | Accounts Payable | Owner's Capital | Owner's Drawings | Owner's Revenues - Expenses |

- (b) Net income \$3,750
- (c) Cash \$7,800

- (b) Prepare an income statement for the month of June.
- (c) Prepare a balance sheet at June 30, 2012.

Determine financial statement amounts and prepare owner's equity statement. (SO 7, 8)

**P1-5A** Financial statement information about four different companies is as follows.

|                                | Alexei Company | Ramirez Company | Dayan Company | Viciedo Company |
|--------------------------------|----------------|-----------------|---------------|-----------------|
| January 1, 2012                |                |                 |               |                 |
| Assets                         | \$ 95,000      | \$110,000       | (g)           | \$170,000       |
| Liabilities                    | 50,000         | (d)             | 75,000        | (j)             |
| Owner's equity                 | (a)            | 60,000          | 45,000        | 90,000          |
| December 31, 2012              |                |                 |               |                 |
| Assets                         | (b)            | 141,000         | 200,000       | (k)             |
| Liabilities                    | 55,000         | 75,000          | (h)           | 80,000          |
| Owner's equity                 | 63,000         | (e)             | 130,000       | 162,000         |
| Owner's equity changes in year |                |                 |               |                 |
| Additional investment          | (c)            | 15,000          | 10,000        | 15,000          |
| Drawings                       | 25,000         | (f)             | 14,000        | 20,000          |
| Total revenues                 | 350,000        | 420,000         | (i)           | 520,000         |
| Total expenses                 | 320,000        | 385,000         | 342,000       | (l)             |

**Instructions**

- (a) Determine the missing amounts. (Hint: For example, to solve for (a), Assets - Liabilities = Owner's equity = \$45,000.)
- (b) Prepare the owner's equity statement for Ramirez Company.
- (c)  Write a memorandum explaining the sequence for preparing financial statements and the interrelationship of the owner's equity statement to the income statement and balance sheet.

## Problems: Set B

**P1-1B** On April 1, Vince Morelli established Vince's Travel Agency. The following transactions were completed during the month.

1. Invested \$15,000 cash to start the agency.
2. Paid \$600 cash for April office rent.
3. Purchased office equipment for \$3,000 cash.
4. Incurred \$700 of advertising costs in the *Chicago Tribune*, on account.
5. Paid \$800 cash for office supplies.
6. Earned \$10,000 for services rendered: \$3,000 cash is received from customers, and the balance of \$7,000 is billed to customers on account.
7. Withdrew \$500 cash for personal use.
8. Paid *Chicago Tribune* \$500 of the amount due in transaction (4).
9. Paid employees' salaries \$2,500.
10. Received \$4,000 in cash from customers who have previously been billed in transaction (6).

### Instructions

- (a) Prepare a tabular analysis of the transactions using the following column headings: Cash, Accounts Receivable, Supplies, Equipment, Accounts Payable, Owner's Capital, Owner's Drawings, Revenues, and Expenses.
- (b) From an analysis of the owner's equity columns, compute the net income or net loss for April.

**P1-2B** Juanita Pierre opened a law office, on July 1, 2012. On July 31, the balance sheet showed Cash \$5,000, Accounts Receivable \$1,500, Supplies \$500, Equipment \$6,000, Accounts Payable \$4,200, and Owner's Capital \$8,800. During August, the following transactions occurred.

1. Collected \$1,200 of accounts receivable.
2. Paid \$2,800 cash on accounts payable.
3. Earned revenue of \$7,500 of which \$3,000 is collected in cash and the balance is due in September.
4. Purchased additional office equipment for \$2,000, paying \$400 in cash and the balance on account.
5. Paid salaries \$2,500, rent for August \$900, and advertising expenses \$400.
6. Withdrew \$700 in cash for personal use.
7. Received \$2,000 from Standard Federal Bank—money borrowed on a note payable.
8. Incurred utility expenses for month on account \$270.

### Instructions

- (a) Prepare a tabular analysis of the August transactions beginning with July 31 balances. The column headings should be as follows: Cash + Accounts Receivable + Supplies + Equipment = Notes Payable + Accounts Payable + Owner's Capital – Owner's Drawings + Revenues – Expenses.
- (b) Prepare an income statement for August, an owner's equity statement for August, and a balance sheet at August 31.

**P1-3B** On June 1, Alexia Rios started Crazy Creations Co., a company that provides craft opportunities, by investing \$12,000 cash in the business. Following are the assets and liabilities of the company at June 30 and the revenues and expenses for the month of June.

|                     |          |                   |         |
|---------------------|----------|-------------------|---------|
| Cash                | \$10,150 | Notes Payable     | \$9,000 |
| Accounts Receivable | 3,000    | Accounts Payable  | 1,200   |
| Service Revenue     | 6,700    | Supplies Expense  | 1,600   |
| Supplies            | 2,000    | Gasoline Expense  | 200     |
| Advertising Expense | 500      | Utilities Expense | 150     |
| Equipment           | 10,000   |                   |         |

Alexia made no additional investment in June but withdrew \$1,300 in cash for personal use during the month.

### Instructions

- (a) Prepare an income statement and owner's equity statement for the month of June and a balance sheet at June 30, 2012.
- (b) Prepare an income statement and owner's equity statement for June assuming the following data are not included above: (1) \$900 of revenue was earned and billed but not collected at June 30, and (2) \$150 of gasoline expense was incurred but not paid.

Analyze transactions and compute net income.

(SO 6, 7)

(a) Total assets \$20,900

(b) Net income \$6,200

Analyze transactions and prepare income statement, owner's equity statement, and balance sheet.

(SO 6, 7, 8)

(a) Total assets \$16,800

(b) Net income \$3,430  
Ending capital \$11,530

Prepare income statement, owner's equity statement, and balance sheet.

(SO 8)

(a) Net income \$4,250  
Owner's equity \$14,950  
Total assets \$25,150  
(b) Net income \$5,000  
Owner's equity \$15,700

Analyze transactions and prepare financial statements. (SO 6, 7, 8)

**P1-4B** Carla Quentin started her own consulting firm, Quentin Consulting, on May 1, 2012. The following transactions occurred during the month of May.

- May 1 Carla invested \$7,000 cash in the business.
- 2 Paid \$900 for office rent for the month.
- 3 Purchased \$600 of supplies on account.
- 5 Paid \$125 to advertise in the *County News*.
- 9 Received \$4,000 cash for services provided.
- 12 Withdrew \$1,000 cash for personal use.
- 15 Performed \$5,400 of services on account.
- 17 Paid \$2,500 for employee salaries.
- 20 Paid for the supplies purchased on account on May 3.
- 23 Received a cash payment of \$4,000 for services provided on account on May 15.
- 26 Borrowed \$5,000 from the bank on a note payable.
- 29 Purchased office equipment for \$4,200 on account.
- 30 Paid \$275 for utilities.

**Instructions**

(a) Total assets \$20,800

(a) Show the effects of the previous transactions on the accounting equation using the following format.

| Assets |      |            |          | Liabilities |               | Owner's Equity   |                 |                  |          |          |
|--------|------|------------|----------|-------------|---------------|------------------|-----------------|------------------|----------|----------|
| Date   | Cash | Receivable | Supplies | Equipment   | Notes Payable | Accounts Payable | Owner's Capital | Owner's Drawings | Revenues | Expenses |
|        | +    | +          | +        | =           | +             | +                | +               | -                | +        | -        |

(b) Net income \$5,600  
(c) Cash \$14,600

(b) Prepare an income statement for the month of May.  
(c) Prepare a balance sheet at May 31, 2012.

Determine financial statement amounts and prepare owner's equity statement. (SO 7, 8)

**P1-5B** Financial statement information about four different companies is as follows.

|                                | Brent Company | Lillibridge Company | Omar Company | Vizquel Company |
|--------------------------------|---------------|---------------------|--------------|-----------------|
| January 1, 2012                |               |                     |              |                 |
| Assets                         | \$ 80,000     | \$ 90,000           | (g)          | \$150,000       |
| Liabilities                    | 48,000        | (d)                 | 80,000       | (j)             |
| Owner's equity                 | (a)           | 40,000              | 49,000       | 90,000          |
| December 31, 2012              |               |                     |              |                 |
| Assets                         | (b)           | 112,000             | 180,000      | (k)             |
| Liabilities                    | 60,000        | 72,000              | (h)          | 100,000         |
| Owner's equity                 | 50,000        | (e)                 | 82,000       | 151,000         |
| Owner's equity changes in year |               |                     |              |                 |
| Additional investment          | (c)           | 8,000               | 10,000       | 15,000          |
| Drawings                       | 15,000        | (f)                 | 12,000       | 10,000          |
| Total revenues                 | 350,000       | 410,000             | (i)          | 500,000         |
| Total expenses                 | 333,000       | 385,000             | 350,000      | (l)             |

**Instructions**

- (a) Determine the missing amounts. (*Hint:* For example, to solve for (a), Assets – Liabilities = Owner's equity = \$32,000.)
- (b) Prepare the owner's equity statement for Brent Company.
- (c)  Write a memorandum explaining the sequence for preparing financial statements and the interrelationship of the owner's equity statement to the income statement and balance sheet.

## Problems: Set C

Visit the book's companion website, at [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), and choose the Student Companion site to access Problem Set C.

## Continuing Cookie Chronicle

**CCC1** Natalie Koebel spent much of her childhood learning the art of cookie-making from her grandmother. They passed many happy hours mastering every type of cookie imaginable and later creating new recipes that were both healthy and delicious. Now at the start of her second year in college, Natalie is investigating various possibilities for starting her own business as part of the requirements of the entrepreneurship program in which she is enrolled.

A long-time friend insists that Natalie has to somehow include cookies in her business plan. After a series of brainstorming sessions, Natalie settles on the idea of operating a cookie-making school. She will start on a part-time basis and offer her services in people's homes. Now that she has started thinking about it, the possibilities seem endless. During the fall, she will concentrate on holiday cookies. She will offer individual lessons and group sessions (which will probably be more entertainment than education for the participants). Natalie also decides to include children in her target market.

The first difficult decision is coming up with the perfect name for her business. In the end, she settles on "Cookie Creations" and then moves on to more important issues.

### Instructions

- What form of business organization—proprietorship, partnership, or corporation—do you recommend that Natalie use for her business? Discuss the benefits and weaknesses of each form and give the reasons for your choice.
- Will Natalie need accounting information? If yes, what information will she need and why? How often will she need this information?
- Identify specific asset, liability, and owner's equity accounts that Cookie Creations will likely use to record its business transactions.
- Should Natalie open a separate bank account for the business? Why or why not?

*The Continuing Cookie Chronicle starts in this chapter and continues in every chapter. You also can find this problem at the book's Student Companion site.*

# BROADENING YOUR PERSPECTIVE

## Financial Reporting and Analysis

### Financial Reporting Problem: PepsiCo, Inc.

**BYP1-1** The actual financial statements of **PepsiCo, Inc.**, as presented in the company's 2009 annual report, are contained in Appendix A (at the back of the textbook).

### Instructions

Refer to PepsiCo's financial statements and answer the following questions.

- What were PepsiCo's total assets at December 26, 2009? At December 27, 2008?
- How much cash (and cash equivalents) did PepsiCo have on December 26, 2009?
- What amount of accounts payable did PepsiCo report on December 26, 2009? On December 27, 2008?
- What were PepsiCo's net revenues in 2007? In 2008? In 2009?
- What is the amount of the change in PepsiCo's net income from 2008 to 2009?

### Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

**BYP1-2** PepsiCo's financial statements are presented in Appendix A. Financial statements of **The Coca-Cola Company** are presented in Appendix B.

### Instructions

- Based on the information contained in these financial statements, determine the following for each company.
  - Total assets at December 26, 2009, for PepsiCo and for Coca-Cola at December 31, 2009.
  - Accounts (notes) receivable, net at December 26, 2009, for PepsiCo and at December 31, 2009, for Coca-Cola.

- (3) Net revenues for year ended in 2009.  
 (4) Net income for year ended in 2009.  
 (b) What conclusions concerning the two companies can be drawn from these data?

## On the Web

**BYP1-3** This exercise will familiarize you with skill requirements, job descriptions, and salaries for accounting careers.

**Address:** [www.careers-in-accounting.com](http://www.careers-in-accounting.com), or go to [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt)

### Instructions

Go to the site shown above. Answer the following questions.

- (a) What are the three broad areas of accounting (from “Skills and Talents”)?  
 (b) List eight skills required in accounting.  
 (c) How do the three accounting areas differ in terms of these eight required skills?  
 (d) Explain one of the key job options in accounting.  
 (e) What is the overall salary range for a junior staff accountant?

## Critical Thinking

### Decision Making Across the Organization

**BYP1-4** Mary and Jack Gray, local golf stars, opened the Chip-Shot Driving Range on March 1, 2012, by investing \$25,000 of their cash savings in the business. A caddy shack was constructed for cash at a cost of \$8,000, and \$800 was spent on golf balls and golf clubs. The Grays leased five acres of land at a cost of \$1,000 per month and paid the first month’s rent. During the first month, advertising costs totaled \$750, of which \$150 was unpaid at March 31, and \$400 was paid to members of the high-school golf team for retrieving golf balls. All revenues from customers were deposited in the company’s bank account. On March 15, Mary and Jack withdrew a total of \$1,000 in cash for personal living expenses. A \$100 utility bill was received on March 31 but was not paid. On March 31, the balance in the company’s bank account was \$18,900.

Mary and Jack thought they had a pretty good first month of operations. But, their estimates of profitability ranged from a loss of \$6,100 to net income of \$2,450.

### Instructions

With the class divided into groups, answer the following.

- (a) How could the Grays have concluded that the business operated at a loss of \$6,100? Was this a valid basis on which to determine net income?  
 (b) How could the Grays have concluded that the business operated at a net income of \$2,450? (*Hint:* Prepare a balance sheet at March 31.) Was this a valid basis on which to determine net income?  
 (c) Without preparing an income statement, determine the actual net income for March.  
 (d) What was the revenue earned in March?

### Communication Activity

**BYP1-5** Lynn Benedict, the bookkeeper for New York Company, has been trying to get the balance sheet to balance. The company’s balance sheet is shown below.

| New York Company<br>Balance Sheet<br>For the Month Ended December 31, 2012 |          |                     |          |
|--|----------|---------------------|----------|
| Assets   |          | Liabilities         |          |
| Equipment  | \$25,500 | Owner’s capital     | \$26,000 |
| Cash   | 9,000    | Accounts receivable | (6,000)  |
| Supplies   | 2,000    | Owner’s drawings    | (2,000)  |
| Accounts payable   | (8,000)  | Notes payable       | 10,500   |
|  | \$28,500 |                     | \$28,500 |

**Instructions**

Explain to Lynn Benedict in a memo why the original balance sheet is incorrect, and what should be done to correct it.

**Ethics Case**

**BYP1-6** After numerous campus interviews, Steve Baden, a senior at Great Northern College, received two office interview invitations from the Baltimore offices of two large firms. Both firms offered to cover his out-of-pocket expenses (travel, hotel, and meals). He scheduled the interviews for both firms on the same day, one in the morning and one in the afternoon. At the conclusion of each interview, he submitted to both firms his total out-of-pocket expenses for the trip to Baltimore: mileage \$112 (280 miles at \$0.40), hotel \$130, meals \$36, and parking and tolls \$18, for a total of \$296. He believes this approach is appropriate. If he had made two trips, his cost would have been two times \$296. He is also certain that neither firm knew he had visited the other on that same trip. Within ten days, Steve received two checks in the mail, each in the amount of \$296.

**Instructions**

- (a) Who are the stakeholders (affected parties) in this situation?
- (b) What are the ethical issues in this case?
- (c) What would you do in this situation?

**“All About You” Activity**

**BYP1-7** Some people are tempted to make their finances look worse to get financial aid. Companies sometimes also manage their financial numbers in order to accomplish certain goals. Earnings management is the planned timing of revenues, expenses, gains, and losses to smooth out bumps in net income. In managing earnings, companies' actions vary from being within the range of ethical activity, to being both unethical and illegal attempts to mislead investors and creditors.

**Instructions**

Provide responses for each of the following questions.

- (a) Discuss whether you think each of the following actions (adapted from [www.finaid.org/fafsa/maximize.phtml](http://www.finaid.org/fafsa/maximize.phtml)) to increase the chances of receiving financial aid is ethical.
  - (i) Spend down the student's assets and income first, before spending parents' assets and income.
  - (ii) Accelerate necessary expenses to reduce available cash. For example, if you need a new car, buy it before applying for financial aid.
  - (iii) State that a truly financially dependent child is independent.
  - (iv) Have a parent take an unpaid leave of absence for long enough to get below the “threshold” level of income.
- (b) What are some reasons why a *company* might want to overstate its earnings?
- (c) What are some reasons why a *company* might want to understate its earnings?
- (d) Under what circumstances might an otherwise ethical person decide to illegally overstate or understate earnings?

**FASB Codification Activity**

**BYP1-8** The FASB has developed the Financial Accounting Standards Board Accounting Standards Codification (or more simply “the Codification”). The FASB's primary goal in developing the Codification is to provide in one place all the authoritative literature related to a particular topic. To provide easy access to the Codification, the FASB also developed the Financial Accounting Standards Board Codification Research System (CRS). CRS is an online, real-time database that provides easy access to the Codification. The Codification and the related CRS provide a topically organized structure, subdivided into topic, subtopics, sections, and paragraphs, using a numerical index system.

You may find this system useful in your present and future studies, and so we have provided an opportunity to use this online system as part of the *Broadening Your Perspective* section.

**Instructions**

Academic access to the FASB Codification is available through university subscriptions, obtained from the American Accounting Association (at <http://aaahq.org/FASB/Access.cfm>), for an annual fee of \$150. This subscription covers an unlimited number of students within a single institution. Once this access has been obtained by your school, you should log in (at <http://aaahq.org/ascLogin.cfm>) and familiarize yourself with the resources that are accessible at the FASB Codification site.

### Answers to Insight and Accounting Across the Organization Questions

**p. 6 The Scoop on Accounting** **Q:** What are the benefits to the company and to the employees of making the financial statements available to all employees? **A:** If employees can read and use financial reports, a company will benefit in the following ways. The *marketing department* will make better decisions about products to offer and prices to charge. The *finance department* will make better decisions about debt and equity financing and how much to distribute in dividends. The *production department* will make better decisions about when to buy new equipment and how much inventory to produce. The *human resources department* will be better able to determine whether employees can be given raises. Finally, *all employees* will be better informed about the basis on which they are evaluated, which will increase employee morale.

**p. 8 The Numbers Behind Not-for-Profit Organizations** **Q:** What benefits does a sound accounting system provide to a not-for-profit organization? **A:** Accounting provides at least two benefits to not-for-profit organizations. First, it helps to ensure that money is used in the way that donors intended. Second, it assures donors that their money is not going to waste and thus increases the likelihood of future donations.

**p. 10 The Korean Discount** **Q:** What is meant by the phrase “make the country’s businesses more transparent”? Why would increasing transparency spur economic growth? **A:** Transparency refers to the extent to which outsiders have knowledge regarding a company’s financial performance and financial position. If a company lacks transparency, its financial reports do not adequately inform investors of critical information that is needed to make investment decisions. If corporate transparency is increased, investors will be more willing to supply the financial capital that businesses need in order to grow, which would spur the country’s economic growth.

**p. 12 Spinning the Career Wheel** **Q:** How might accounting help you? **A:** You will need to understand financial reports in any enterprise with which you are associated. Whether you become a manager, a doctor, a lawyer, a social worker, a teacher, an engineer, an architect, or an entrepreneur, a working knowledge of accounting is relevant.

## IFRS A Look at IFRS

Most agree that there is a need for one set of international accounting standards. Here is why:

**Multinational corporations.** Today’s companies view the entire world as their market. For example, **Coca-Cola**, **Intel**, and **McDonald’s** generate more than 50% of their sales outside the United States, and many foreign companies, such as **Toyota**, **Nestlé**, and **Sony**, find their largest market to be the United States.

**Mergers and acquisitions.** The mergers between **Fiat/Chrysler** and **Vodafone/Mannesmann** suggest that we will see even more such business combinations in the future.

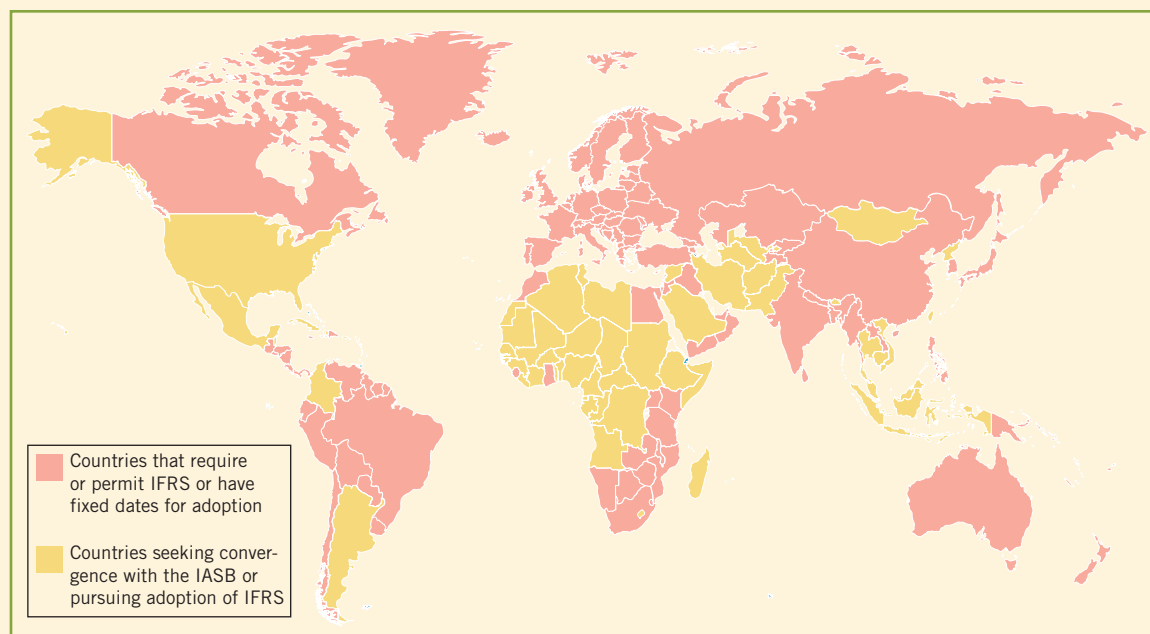

**Information technology.** As communication barriers continue to topple through advances in technology, companies and individuals in different countries and markets are becoming more comfortable buying and selling goods and services from one another.

**Financial markets.** Financial markets are of international significance today. Whether it is currency, equity securities (stocks), bonds, or derivatives, there are active markets throughout the world trading these types of instruments.

### Key Points

- International standards are referred to as *International Financial Reporting Standards (IFRS)*, developed by the International Accounting Standards Board (IASB).
- Recent events in the global capital markets have underscored the importance of financial disclosure and transparency not only in the United States but in markets around the world. As a result, many are examining which accounting and financial disclosure rules should be

Source: <http://www.pwc.com/us/en/issues/ifrs-reporting/country-adoption/index.jhtml>.

followed. As indicated in the graphic above, much of the world has voted for the standards issued by the IASB. Over 115 countries require or permit use of IFRS.

- U.S. standards, referred to as generally accepted accounting principles (GAAP), are developed by the Financial Accounting Standards Board (FASB). The fact that there are differences between what is in this textbook (which is based on U.S. standards) and IFRS should not be surprising because the FASB and IASB have responded to different user needs. In some countries, the primary users of financial statements are private investors; in others, the primary users are tax authorities or central government planners. It appears that the United States and the international standard-setting environment are primarily driven by meeting the needs of investors and creditors.
- The internal control standards applicable to Sarbanes-Oxley (SOX) apply only to large public companies listed on U.S. exchanges. There is a continuing debate as to whether non-U.S. companies should have to comply with this extra layer of regulation. Debate about international companies (non-U.S.) adopting SOX-type standards centers on whether the benefits exceed the costs. The concern is that the higher costs of SOX compliance are making the U.S. securities markets less competitive.
- The textbook mentions a number of ethics violations, such as **Enron**, **WorldCom**, and **AIG**. These problems have also occurred internationally, for example, at **Satyam Computer Services** (India), **Parmalat** (Italy), and **Royal Ahold** (the Netherlands).
- IFRS tends to be simpler in its accounting and disclosure requirements; some people say more “principles-based.” GAAP is more detailed; some people say it is more “rules-based.” This difference in approach has resulted in a debate about the merits of “principles-based” versus “rules-based” standards.
- U.S. regulators have recently eliminated the need for foreign companies that trade shares in U.S. markets to reconcile their accounting with GAAP.
- The three most common forms of business organization, proprietorships, partnerships, and corporations, are also found in countries that use IFRS. Because the choice of business organization is influenced by factors such as legal environment, tax rates and regulations, and degree of entrepreneurship, the relative use of each form will vary across countries.
- The conceptual framework that underlies IFRS is very similar to that used to develop GAAP. The basic definitions provided in this textbook for the key elements of financial statements,

that is, assets, liabilities, equity, revenues (**referred to as income**), and expenses, are simplified versions of the official definitions provided by the FASB. The more substantive definitions, using the IASB definitional structure, are as follows.

**Assets.** A resource controlled by the entity as a result of past events and from which future economic benefits are expected to flow to the entity.

**Liabilities.** A present obligation of the entity arising from past events, the settlement of which is expected to result in an outflow from the entity of resources embodying economic benefits. Liabilities may be legally enforceable via a contract or law, but need not be, i.e., they can arise due to normal business practice or customs.

**Equity.** A residual interest in the assets of the entity after deducting all its liabilities.

**Income.** Increases in economic benefits that result in increases in equity (other than those related to contributions from shareholders). Income includes both revenues (resulting from ordinary activities) and gains.

**Expenses.** Decreases in economic benefits that result in decreases in equity (other than those related to distributions to shareholders). Expenses includes losses that are not the result of ordinary activities.

## Looking to the Future

Both the IASB and the FASB are hard at work developing standards that will lead to the elimination of major differences in the way certain transactions are accounted for and reported. In fact, at one time the IASB stated that no new major standards would become effective until 2011. The major reason for this policy was to provide companies the time to translate and implement IFRS into practice, as much has happened in a very short period of time. Consider, for example, that as a result of a joint project on the conceptual framework, the definitions of the most fundamental elements (assets, liabilities, equity, revenues, and expenses) may actually change. However, whether the IASB adopts internal control provisions similar to those in SOX remains to be seen.

## IFRS Self-Test Questions

- Which of the following is *not* a reason why a single set of high-quality international accounting standards would be beneficial?
  - Mergers and acquisition activity.
  - Financial markets.
  - Multinational corporations.
  - GAAP is widely considered to be a superior reporting system.
- The Sarbanes-Oxley Act determines:
  - international tax regulations.
  - internal control standards as enforced by the IASB.
  - internal control standards of U.S. publicly traded companies.
  - U.S. tax regulations.
- IFRS is considered to be more:
  - principles-based and less rules-based than GAAP.
  - rules-based and less principles-based than GAAP.
  - detailed than GAAP.
  - None of the above.
- Which of the following statements is *false*?
  - IFRS is based on a conceptual framework that is similar to that used to develop GAAP.
  - Assets are defined by the IASB as resources controlled by the entity as a result of past events and from which future economic benefits are expected to flow to the entity.

- (c) Non-U.S. companies that trade shares in U.S. markets must reconcile their accounting with GAAP.
  - (d) Proprietorships, partnerships, and corporations are also found in countries that use IFRS.
5. Which of the following statements is *true*?
- (a) Under IFRS, the term income refers to what would be called revenues and gains under GAAP.
  - (b) The term income is not used under IFRS.
  - (c) The term income refers only to gains on investments.
  - (d) Under IFRS, expenses include distributions to owners.

## IFRS Concepts and Application

**IFRS1-1** Who are the two key international players in the development of international accounting standards? Explain their role.

**IFRS1-2** What might explain the fact that different accounting standard-setters have developed accounting standards that are sometimes quite different in nature?

**IFRS1-3** What is the benefit of a single set of high-quality accounting standards?

**IFRS1-4** Discuss the potential advantages and disadvantages that countries outside the United States should consider before adopting regulations, such as those in the Sarbanes-Oxley Act, that increase corporate internal control requirements.

### *International Financial Reporting*

#### **Problem: Zetar plc**

**IFRS1-5** The financial statements of **Zetar plc** are presented in Appendix C. The company's complete annual report, including the notes to its financial statements, is available at [www.zetarplc.com](http://www.zetarplc.com).

#### **Instructions**

Visit Zetar's corporate website and answer the following questions from Zetar's 2009 annual report.

- (a) What accounting firm performed the audit of Zetar's financial statements?
- (b) What is the address of the company's corporate headquarters?
- (c) What is the company's reporting currency?
- (d) What two segments does the company operate in, and what were the sales for each segment in the year ended April 30, 2009?

# CHAPTER 2

## The Recording Process

### Study Objectives

After studying this chapter, you should be able to:

- 1 Explain what an account is and how it helps in the recording process.
- 2 Define debits and credits and explain their use in recording business transactions.
- 3 Identify the basic steps in the recording process.
- 4 Explain what a journal is and how it helps in the recording process.
- 5 Explain what a ledger is and how it helps in the recording process.
- 6 Explain what posting is and how it helps in the recording process.
- 7 Prepare a trial balance and explain its purposes.

### Feature Story

#### ACCIDENTS HAPPEN

How organized are you financially? Take a short quiz. Answer *yes* or *no* to each question:

- Does your wallet contain so many cash machine receipts that you've been declared a walking fire hazard?
- Is your wallet such a mess that it is often faster to fish for money in the crack of your car seat than to dig around in your wallet?
- Was Dwight Howard playing high school basketball the last time you balanced your checkbook?
- Have you ever been tempted to burn down your house so you don't have to try to find all of the receipts and records that you need to fill out your tax return?

If you think it is hard to keep track of the many transactions that make up *your* life, imagine what it is like for a major

corporation like **Fidelity Investments**. Fidelity is one of the largest mutual fund management firms in the world. If you had your life savings invested at Fidelity Investments, you might be just slightly displeased if, when you called to find out your balance, the representative said, “You know, I kind of remember someone with a name like yours sending us some money—now what did we do with that?”

To ensure the accuracy of your balance and the security of your funds, Fidelity Investments, like all other companies large and small, relies on a sophisticated accounting information system. That’s not to say that Fidelity or any other company is error-free. In fact,

if you’ve ever really messed up your checkbook register, you may take some comfort from one accountant’s mistake at Fidelity Investments. The accountant failed to include a minus sign while doing a calculation, making what was actually a \$1.3 billion loss look like a \$1.3 billion—yes, *billion*—gain! Fortunately, like most accounting errors, it was detected before any real harm was done.

No one expects that kind of mistake at a company like Fidelity, which has sophisticated computer systems and top investment managers. In explaining the mistake to shareholders, a spokesperson wrote, “Some people have asked how, in this age of technology, such a mistake could be made. While many of our processes are computerized, accounting systems are complex and dictate that some steps must be handled manually by our managers and accountants, and people can make mistakes.”

## Inside **CHAPTER 2**

- **Investor Insight: Keeping Score** (p. 55)
- **Accounting Across the Organization: What Would Sam Do?** (p. 61)
- **Investor Insight: Why Accuracy Matters?** (p. 73)

# Preview of CHAPTER 2

In Chapter 1, we analyzed business transactions in terms of the accounting equation, and we presented the cumulative effects of these transactions in tabular form. Imagine a company like **Fidelity Investments** (as in the Feature Story) using the same tabular format as Softbyte to keep track of its transactions. In a single day, Fidelity engages in thousands of business transactions. To record each transaction this way would be impractical, expensive, and unnecessary. Instead, companies use a set of procedures and records to keep track of transaction data more easily. This chapter introduces and illustrates these basic procedures and records.

The content and organization of Chapter 2 are as follows.

| The Recording Process   |   |  |  |
|---|---|--|--|
| The Account   | Steps in the Recording Process  | The Recording Process Illustrated  | The Trial Balance  |
| <ul style="list-style-type: none"> <li>• Debits and credits</li> <li>• Summary of debit/credit rules</li> </ul> | <ul style="list-style-type: none"> <li>• Journal</li> <li>• Ledger</li> </ul> | <ul style="list-style-type: none"> <li>• Summary illustration of journalizing and posting</li> </ul> | <ul style="list-style-type: none"> <li>• Limitations of a trial balance</li> <li>• Locating errors</li> <li>• Use of dollar signs</li> </ul> |

## The Account

### Study Objective [1]

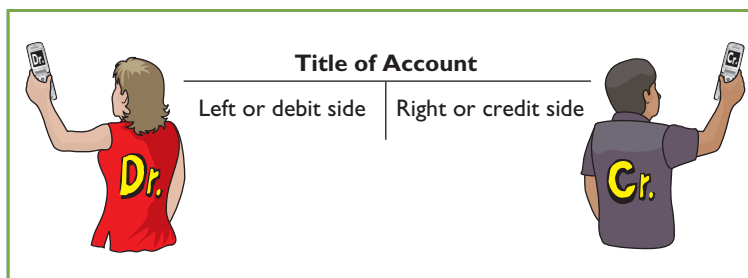

Explain what an account is and how it helps in the recording process.

An **account** is an individual accounting record of increases and decreases in a specific asset, liability, or owner's equity item. For example, Softbyte (the company discussed in Chapter 1) would have separate accounts for Cash, Accounts Receivable, Accounts Payable, Service Revenue, Salaries and Wages Expense, and so on. (Note that whenever we are referring to a specific account, we capitalize the name.)

In its simplest form, an account consists of three parts: (1) a title, (2) a left or debit side, and (3) a right or credit side. Because the format of an account resembles the letter T, we refer to it as a **T account**. Illustration 2-1 shows the basic form of an account.

Illustration 2-1

Basic form of account

We use this form often throughout this book to explain basic accounting relationships.

### Study Objective [2]

Define debits and credits and explain how they are used to record business transactions.

## Debits and Credits

The term **debit** indicates the left side of an account, and **credit** indicates the right side. They are commonly abbreviated as **Dr.** for debit and **Cr.** for credit. They **do not** mean increase or decrease, as is commonly thought. We use the terms *debit* and *credit* repeatedly in the recording process to describe **where** entries are made in accounts. For

example, the act of entering an amount on the left side of an account is called **debiting** the account. Making an entry on the right side is **crediting** the account.

When comparing the totals of the two sides, an account shows a **debit balance** if the total of the debit amounts exceeds the credits. An account shows a **credit balance** if the credit amounts exceed the debits. Note the position of the debit side and credit side in Illustration 2-1.

The procedure of recording debits and credits in an account is shown in Illustration 2-2 for the transactions affecting the Cash account of Softbyte. The data are taken from the Cash column of the tabular summary in Illustration 1-8 (page 20).

| Tabular Summary   | Account Form |           |        |       |       |        |      |     |        |                 |   |  |      |  |          |        |           |       |  |       |  |       |  |       |  |     |  |     |  |       |         |       |  |  |         |  |  |  |
|---|--------------|-----------|--------|-------|-------|--------|------|-----|--------|-----------------|---|--|------|--|----------|--------|-----------|-------|--|-------|--|-------|--|-------|--|-----|--|-----|--|-------|---------|-------|--|--|---------|--|--|--|

| -1,700  |              |           |        |       |       |        |      |     |        |                 |   |  |      |  |          |        |           |       |  |       |  |       |  |       |  |     |  |     |  |       |         |       |  |  |         |  |  |  |
| -250  |              |           |        |       |       |        |      |     |        |                 |   |  |      |  |          |        |           |       |  |       |  |       |  |       |  |     |  |     |  |       |         |       |  |  |         |  |  |  |
| 600   |              |           |        |       |       |        |      |     |        |                 |   |  |      |  |          |        |           |       |  |       |  |       |  |       |  |     |  |     |  |       |         |       |  |  |         |  |  |  |
| -1,300  |              |           |        |       |       |        |      |     |        |                 |   |  |      |  |          |        |           |       |  |       |  |       |  |       |  |     |  |     |  |       |         |       |  |  |         |  |  |  |
| <u>\$ 8,050</u>   |              |           |        |       |       |        |      |     |        |                 |   |  |      |  |          |        |           |       |  |       |  |       |  |       |  |     |  |     |  |       |         |       |  |  |         |  |  |  |
| Cash  |              |           |        |       |       |        |      |     |        |                 |   |  |      |  |          |        |           |       |  |       |  |       |  |       |  |     |  |     |  |       |         |       |  |  |         |  |  |  |
| (Debits)  | 15,000       | (Credits) | 7,000  |       |       |        |      |     |        |                 |   |  |      |  |          |        |           |       |  |       |  |       |  |       |  |     |  |     |  |       |         |       |  |  |         |  |  |  |
|   | 1,200        |           | 1,700  |       |       |        |      |     |        |                 |   |  |      |  |          |        |           |       |  |       |  |       |  |       |  |     |  |     |  |       |         |       |  |  |         |  |  |  |
|   | 1,500        |           | 250    |       |       |        |      |     |        |                 |   |  |      |  |          |        |           |       |  |       |  |       |  |       |  |     |  |     |  |       |         |       |  |  |         |  |  |  |
|   | 600          |           | 1,300  |       |       |        |      |     |        |                 |   |  |      |  |          |        |           |       |  |       |  |       |  |       |  |     |  |     |  |       |         |       |  |  |         |  |  |  |
| Balance   | 8,050        |           |        |       |       |        |      |     |        |                 |   |  |      |  |          |        |           |       |  |       |  |       |  |       |  |     |  |     |  |       |         |       |  |  |         |  |  |  |
| (Debit)   |              |           |        |       |       |        |      |     |        |                 |   |  |      |  |          |        |           |       |  |       |  |       |  |       |  |     |  |     |  |       |         |       |  |  |         |  |  |  |

**Illustration 2-2**

Tabular summary and account form for Softbyte's Cash account

Every positive item in the tabular summary represents a receipt of cash; every negative amount represents a payment of cash. **Notice that in the account form we record the increases in cash as debits, and the decreases in cash as credits.** For example, the \$15,000 receipt of cash (in red) is debited to Cash, and the -\$7,000 payment of cash (in blue) is credited to Cash.

Having increases on one side and decreases on the other reduces recording errors and helps in determining the totals of each side of the account as well as the account balance. The balance is determined by netting the two sides (subtracting one amount from the other). The account balance, a debit of \$8,050, indicates that Softbyte had \$8,050 more increases than decreases in cash. That is, since it started with a balance of zero, it has \$8,050 in its Cash account.

## DEBIT AND CREDIT PROCEDURE

In Chapter 1, you learned the effect of a transaction on the basic accounting equation. Remember that each transaction must affect two or more accounts to keep the basic accounting equation in balance. In other words, for each transaction, debits must equal credits. The equality of debits and credits provides the basis for the **double-entry system** of recording transactions.

Under the double-entry system, the dual (two-sided) effect of each transaction is recorded in appropriate accounts. This system provides a logical method for recording transactions. The double-entry system also helps ensure the accuracy of the recorded amounts and helps to detect errors such as those at **Fidelity Investments** as discussed in the Feature Story. If every transaction is recorded with equal debits and credits, the sum of all the debits to the accounts must equal the sum of all the credits.

The double-entry system for determining the equality of the accounting equation is much more efficient than the plus/minus procedure used in Chapter 1. On the following pages, we will illustrate debit and credit procedures in the double-entry system.

### International Note

Rules for accounting for specific events sometimes differ across countries. For example, European companies rely less on historical cost and more on fair value than U.S. companies. Despite the differences, the double-entry accounting system is the basis of accounting systems worldwide.

**DR./CR. PROCEDURES FOR ASSETS AND LIABILITIES**

In Illustration 2-2 for Softbyte, increases in Cash—an asset—were entered on the left side, and decreases in Cash were entered on the right side. We know that both sides of the basic equation (Assets = Liabilities + Owner’s Equity) must be equal. It therefore follows that increases and decreases in liabilities will have to be recorded *opposite from* increases and decreases in assets. Thus, increases in liabilities must be entered on the right or credit side, and decreases in liabilities must be entered on the left or debit side. The effects that debits and credits have on assets and liabilities are summarized in Illustration 2-3.

**Illustration 2-3**  
Debit and credit effects—  
assets and liabilities

| Debits               | Credits              |
|----------------------|----------------------|
| Increase assets      | Decrease assets      |
| Decrease liabilities | Increase liabilities |

**Asset accounts normally show debit balances.** That is, debits to a specific asset account should exceed credits to that account. Likewise, **liability accounts normally show credit balances.** That is, credits to a liability account should exceed debits to that account. The **normal balance** of an account is on the side where an increase in the account is recorded. Illustration 2-4 shows the normal balances for assets and liabilities.

**Illustration 2-4**  
Normal balances—assets  
and liabilities

Knowing the normal balance in an account may help you trace errors. For example, a credit balance in an asset account such as Land or a debit balance in a liability account such as Salaries and Wages Payable usually indicates an error. Occasionally, though, an abnormal balance may be correct. The Cash account, for example, will have a credit balance when a company has overdrawn its bank balance (i.e., written a check that “bounced”).

**DR./CR. PROCEDURES FOR OWNER’S EQUITY**

As Chapter 1 indicated, owner’s investments and revenues increase owner’s equity. Owner’s drawings and expenses decrease owner’s equity. Companies keep accounts for each of these types of transactions.

**Owner’s Capital.** Investments by owners are credited to the Owner’s Capital account. Credits increase this account, and debits decrease it. When an owner invests cash in the business, the company debits (increases) Cash and credits (increases) Owner’s Capital. When the owner’s investment in the business is reduced, Owner’s Capital is debited (decreased).

Illustration 2-5 shows the rules of debit and credit for the Owner’s Capital account.

**Illustration 2-5**  
Debit and credit effects—  
Owner’s Capital

| Debits                   | Credits                  |
|--------------------------|--------------------------|
| Decrease Owner’s Capital | Increase Owner’s Capital |

We can diagram the normal balance in Owner’s Capital as follows.

**Illustration 2-6**  
Normal balance—Owner's Capital

**Owner's Drawings.** An owner may withdraw cash or other assets for personal use. Withdrawals could be debited directly to Owner's Capital to indicate a decrease in owner's equity. However, it is preferable to use a separate account, called Owner's Drawings. This separate account makes it easier to determine total withdrawals for each accounting period. Owner's Drawings is increased by debits and decreased by credits. Normally, the drawings account will have a debit balance.

Illustration 2-7 shows the rules of debit and credit for the drawings account.

**Illustration 2-7**  
Debit and credit effects—Owner's Drawings

We can diagram the normal balance as follows.

**Illustration 2-8**  
Normal balance—Owner's Drawings

**The Owner's Drawings account decreases owner's equity. It is not an income statement account like revenues and expenses.**

## INVESTOR INSIGHT

### Keeping Score

The Chicago Cubs baseball team has these major revenue and expense accounts:

| Revenues                  | Expenses                |
|---------------------------|-------------------------|
| Admissions (ticket sales) | Players' salaries       |
| Concessions               | Administrative salaries |
| Television and radio      | Travel                  |
| Advertising               | Ballpark maintenance    |

**?** Do you think that the Chicago Bears football team would be likely to have the same major revenue and expense accounts as the Cubs? (See page 94.)

**Revenues and Expenses.** The purpose of earning revenues is to benefit the owner(s) of the business. When a company earns revenues, owner's equity increases. Therefore, **the effect of debits and credits on revenue accounts is the same as their effect on Owner's Capital.** That is, revenue accounts are increased by credits and decreased by debits.

**Helpful Hint**

Because revenues increase owner’s equity, a revenue account has the same debit/credit rules as the Owner’s Capital account. Expenses have the opposite effect.

Expenses have the opposite effect: Expenses decrease owner’s equity. Since expenses decrease net income, and revenues increase it, it is logical that the increase and decrease sides of expense accounts should be the opposite of revenue accounts. Thus, expense accounts are increased by debits and decreased by credits. Illustration 2-9 shows the rules of debits and credits for revenues and expenses.

**Illustration 2-9**

Debit and credit effects—revenues and expenses

| Debits            | Credits           |
|-------------------|-------------------|
| Decrease revenues | Increase revenues |
| Increase expenses | Decrease expenses |

Credits to revenue accounts should exceed debits. Debits to expense accounts should exceed credits. Thus, revenue accounts normally show credit balances, and expense accounts normally show debit balances. We can diagram the normal balances as follows.

**Illustration 2-10**

Normal balances—revenues and expenses

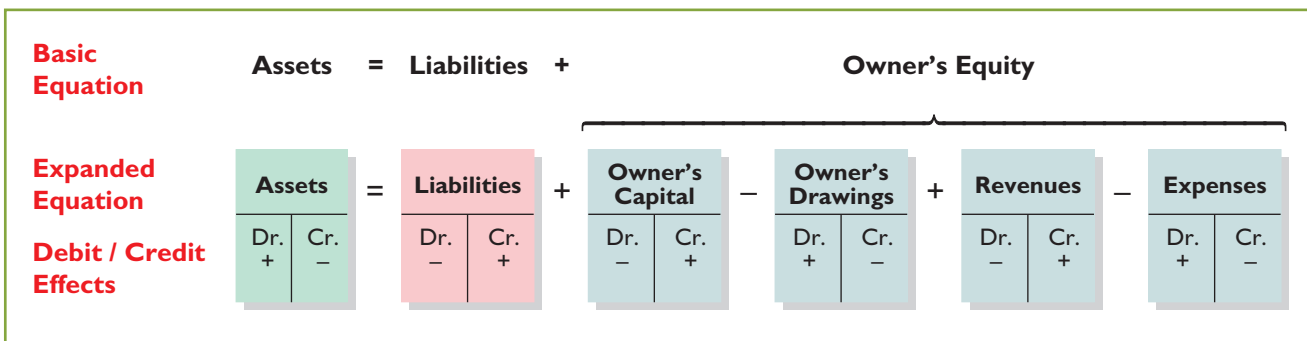

**Helpful Hint**

You may want to bookmark Illustration 2-11. You probably will refer to it often.

**Summary of Debit/Credit Rules**

Illustration 2-11 shows a summary of the debit/credit rules and effects on each type of account. Study this diagram carefully. It will help you understand the fundamentals of the double-entry system.

**Illustration 2-11**

Summary of debit/credit rules

**Do it!**

**Normal Balances**

Kate Browne has just rented space in a shopping mall. In this space, she will open a hair salon, to be called “Hair It Is.” A friend has advised Kate to set up a double-entry set of accounting records in which to record all of her business transactions.

Identify the balance sheet accounts that Kate will likely need to record the transactions needed to open her business. Indicate whether the normal balance of each account is a debit or a credit.

**Solution**

Kate would likely need the following accounts in which to record the transactions necessary to ready her hair salon for opening day:

|                                   |  |
|-----------------------------------|--|
| Cash (debit balance)              | If she borrows money: Notes Payable (credit balance) |
| Equipment (debit balance)         |  |
| Supplies (debit balance)          | Owner's Capital (credit balance)                     |
| Accounts Payable (credit balance) |  |

Related exercise material: BE2-1, BE2-2, BE2-5, E2-1, E2-2, E2-4, and **Do it!** 2-1.

**action plan**

- ✓ Determine the types of accounts needed: Kate will need asset accounts for each different type of asset she invests in the business, and liability accounts for any debts she incurs.
- ✓ Understand the types of owner's equity accounts: Only Owner's Capital will be needed when Kate begins the business. Other owner's equity accounts will be needed later.

## Steps in the Recording Process

Although it is possible to enter transaction information directly into the accounts without using a journal, few businesses do so. Practically every business uses three basic steps in the recording process:

1. Analyze each transaction for its effects on the accounts.
2. Enter the transaction information in a *journal*.
3. Transfer the journal information to the appropriate accounts in the *ledger*.

The recording process begins with the transaction. **Business documents**, such as a sales slip, a check, a bill, or a cash register tape, provide evidence of the transaction. The company analyzes this evidence to determine the transaction's effects on specific accounts. The company then enters the transaction in the journal. Finally, it transfers the journal entry to the designated accounts in the ledger. Illustration 2-12 shows the recording process.

The steps in the recording process occur repeatedly. In Chapter 1, we illustrated the first step, the analysis of transactions, and will give further examples in this and later chapters. The other two steps in the recording process are explained in the next sections.

**Study Objective [3]**

Identify the basic steps in the recording process.

**Ethics Note**

Business documents provide evidence that transactions actually occurred. **International Outsourcing Services, LLC**, was accused of submitting fraudulent documents (store coupons) to companies such as **Kraft Foods** and **PepsiCo** for reimbursement of as much as \$250 million. Ensuring that all recorded transactions are backed up by proper business documents reduces the likelihood of fraudulent activity.

**Illustration 2-12**  
The recording process

**Study Objective [4]**

Explain what a journal is and how it helps in the recording process.

## The Journal

Companies initially record transactions in chronological order (the order in which they occur). Thus, the **journal** is referred to as the book of original entry. For each transaction the journal shows the debit and credit effects on specific accounts.

Companies may use various kinds of journals, but every company has the most basic form of journal, a **general journal**. Typically, a general journal has spaces for dates, account titles and explanations, references, and two amount columns. See the format of the journal in Illustration 2-13. *Whenever we use the term “journal” in this text-book without a modifying adjective, we mean the general journal.*

The journal makes several significant contributions to the recording process:

1. It discloses in one place the **complete effects of a transaction**.
2. It provides a **chronological record** of transactions.
3. It helps to **prevent or locate errors** because the debit and credit amounts for each entry can be easily compared.

### JOURNALIZING

Entering transaction data in the journal is known as **journalizing**. Companies make separate journal entries for each transaction. A complete entry consists of (1) the date of the transaction, (2) the accounts and amounts to be debited and credited, and (3) a brief explanation of the transaction.

Illustration 2-13 shows the technique of journalizing, using the first two transactions of Softbyte. On September 1, Ray Neal invested \$15,000 cash in the business, and Softbyte purchased computer equipment for \$7,000 cash. The number J1 indicates that these two entries are recorded on the first page of the journal. Illustration 2-13 shows the standard form of journal entries for these two transactions. (The boxed numbers correspond to explanations in the list below the illustration.)

**Illustration 2-13**  
Technique of journalizing

| General Journal |  |          |        | J1     |        |
|-----------------|--|----------|--------|--------|--------|
| Date            | Account Titles and Explanation           | Ref.     | Debit  | Credit |        |
| 2012            |  | <b>5</b> |        |        |        |
| Sept. 1         | Cash                                     |          | 15,000 |        |        |
| <b>1</b>        | Owner's Capital                          |          |        |        | 15,000 |
|                 | (Owner's investment of cash in business) |          |        |        |        |
| 1               | Equipment                                |          | 7,000  |        |        |
|                 | Cash                                     |          |        |        | 7,000  |
|                 | (Purchase of equipment for cash)         |          |        |        |        |

- 1** The date of the transaction is entered in the Date column.
- 2** The debit account title (that is, the account to be debited) is entered first at the extreme left margin of the column headed “Account Titles and Explanation,” and the amount of the debit is recorded in the Debit column.
- 3** The credit account title (that is, the account to be credited) is indented and entered on the next line in the column headed “Account Titles and Explanation,” and the amount of the credit is recorded in the Credit column.

- 4 A brief explanation of the transaction appears on the line below the credit account title. A space is left between journal entries. The blank space separates individual journal entries and makes the entire journal easier to read.
- 5 The column titled Ref. (which stands for Reference) is left blank when the journal entry is made. This column is used later when the journal entries are transferred to the ledger accounts.

**It is important to use correct and specific account titles in journalizing.** Erroneous account titles lead to incorrect financial statements. However, some flexibility exists initially in selecting account titles. The main criterion is that each title must appropriately describe the content of the account. Once a company chooses the specific title to use, it should record under that account title all later transactions involving the account.<sup>1</sup>

### SIMPLE AND COMPOUND ENTRIES

Some entries involve only two accounts, one debit and one credit. (See, for example, the entries in Illustration 2-13.) An entry like these is considered a **simple entry**. Some transactions, however, require more than two accounts in journalizing. An entry that requires three or more accounts is a **compound entry**. To illustrate, assume that on July 1, Butler Company purchases a delivery truck costing \$14,000. It pays \$8,000 cash now and agrees to pay the remaining \$6,000 on account (to be paid later). The compound entry is as follows.

| General Journal |  |      |        | J1     |
|-----------------|--|------|--------|--------|
| Date            | Account Titles and Explanation                     | Ref. | Debit  | Credit |
| 2012<br>July 1  | Equipment  |      | 14,000 |        |
|                 | Cash   |      |        | 8,000  |
|                 | Accounts Payable                                   |      |        | 6,000  |
|                 | (Purchased truck for cash with balance on account) |      |        |        |

**Illustration 2-14**  
Compound journal entry

In a compound entry, the standard format requires that all debits be listed before the credits.

## Do it!

Kate Browne engaged in the following activities in establishing her salon, Hair It Is:

1. Opened a bank account in the name of Hair It Is and deposited \$20,000 of her own money in this account as her initial investment.
2. Purchased equipment on account (to be paid in 30 days) for a total cost of \$4,800.
3. Interviewed three persons for the position of hair stylist.

In what form (type of record) should Kate record these three activities? Prepare the entries to record the transactions.

### Recording Business Activities

<sup>1</sup>In homework problems, you should use specific account titles when they are given. When account titles are not given, you may select account titles that identify the nature and content of each account. The account titles used in journalizing should not contain explanations such as Cash Paid or Cash Received.

**action plan**

✓ Understand which activities need to be recorded and which do not. Any that affect assets, liabilities, or owner's capital should be recorded in a journal.

✓ Analyze the effects of transactions on asset, liability, and owner's equity accounts.

**Solution**

Each transaction that is recorded is entered in the general journal. The three activities would be recorded as follows.

|   |        |        |
|---|--------|--------|
| 1. Cash   | 20,000 | 20,000 |
| Owner's Capital<br>(Owner's investment of cash in business) |        |        |
| 2. Equipment  | 4,800  | 4,800  |
| Accounts Payable<br>(Purchase of equipment on account)      |        |        |
| 3. No entry because no transaction has occurred.            |        |        |

Related exercise material: BE2-3, BE2-6, E2-3, E2-5, E2-6, E2-7, and **Do it!** 2-2.

**Study Objective [5]**

Explain what a ledger is and how it helps in the recording process.

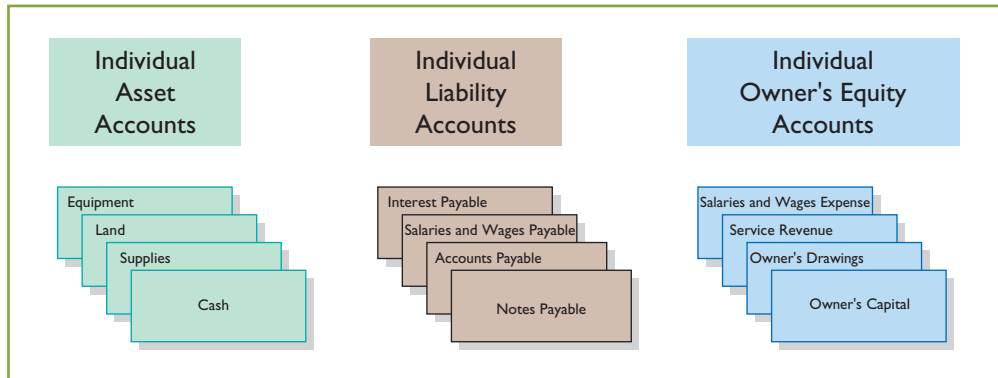

## The Ledger

The entire group of accounts maintained by a company is the **ledger**. The ledger keeps in one place all the information about changes in specific account balances.

Companies may use various kinds of ledgers, but every company has a general ledger. A **general ledger** contains all the asset, liability, and owner's equity accounts, as shown in Illustration 2-15 for J. Lind Company. *Whenever we use the term "ledger" in this textbook, we are referring to the general ledger, unless we specify otherwise.*

**Illustration 2-15**

The general ledger, which contains all of a company's accounts

Companies arrange the ledger in the sequence in which they present the accounts in the financial statements, beginning with the balance sheet accounts. First in order are the asset accounts, followed by liability accounts, owner's capital, owner's drawings, revenues, and expenses. Each account is numbered for easier identification.

The ledger provides the balance in each of the accounts. For example, the Cash account shows the amount of cash available to meet current obligations. The Accounts Receivable account shows amounts due from customers. Accounts Payable shows amounts owed to creditors.

# ACCOUNTING ACROSS THE ORGANIZATION

## What Would Sam Do?

In his autobiography, Sam Walton described the double-entry accounting system he used when **Wal-Mart** was just getting started: “We kept a little pigeonhole on the wall for the cash receipts and paperwork of each [Wal-Mart] store. I had a blue binder ledger book for each store. When we added a store, we added a pigeonhole. We did this at least up to twenty stores. Then once a month, the bookkeeper and I would enter the merchandise, enter the sales, enter the cash, and balance it.”

Source: Sam Walton, *Made in America* (New York: Doubleday, 1992), p. 53.

**?** Why did Sam Walton keep separate pigeonholes and blue binders? Why bother to keep separate records for each store? (See page 94.)

## STANDARD FORM OF ACCOUNT

The simple T-account form used in accounting textbooks is often very useful for illustration purposes. However, in practice, the account forms used in ledgers are much more structured. Illustration 2-16 shows a typical form, using assumed data from a cash account.

| Cash   |             |      |        |        | No. 101 |
|--------|-------------|------|--------|--------|---------|
| Date   | Explanation | Ref. | Debit  | Credit | Balance |
| 2012   |             |      |        |        |         |
| June 1 |             |      | 25,000 |        | 25,000  |
| 2      |             |      |        | 8,000  | 17,000  |
| 3      |             |      | 4,200  |        | 21,200  |
| 9      |             |      | 7,500  |        | 28,700  |
| 17     |             |      |        | 11,700 | 17,000  |
| 20     |             |      |        | 250    | 16,750  |
| 30     |             |      |        | 7,300  | 9,450   |

**Illustration 2-16**

Three-column form of account

This format is called the **three-column form of account**. It has three money columns—debit, credit, and balance. The balance in the account is determined after each transaction. Companies use the explanation space and reference columns to provide special information about the transaction.

## POSTING

Transferring journal entries to the ledger accounts is called **posting**. This phase of the recording process accumulates the effects of journalized transactions into the individual accounts. Posting involves the following steps.

1. In the **ledger**, in the appropriate columns of the account(s) debited, enter the date, journal page, and debit amount shown in the journal.
2. In the reference column of the **journal**, write the account number to which the debit amount was posted.
3. In the **ledger**, in the appropriate columns of the account(s) credited, enter the date, journal page, and credit amount shown in the journal.
4. In the reference column of the **journal**, write the account number to which the credit amount was posted.

### Study Objective [6]

Explain what posting is and how it helps in the recording process.

Illustration 2-17 shows these four steps using Softbyte's first journal entry. The boxed numbers indicate the sequence of the steps.

**Illustration 2-17**  
Posting a journal entry

| GENERAL JOURNAL |  |            |        |        | J1 |
|-----------------|--|------------|--------|--------|----|
| Date            | Account Titles and Explanation   | Ref.       | Debit  | Credit |    |
| 2012<br>Sept. 1 | Cash<br>Owner's Capital<br>(Owner's investment of<br>cash in business) | 101<br>306 | 15,000 | 15,000 |    |

| GENERAL LEDGER  |             |      |        |        |         |
|-----------------|-------------|------|--------|--------|---------|
| Cash            |             |      |        |        | No. 101 |
| Date            | Explanation | Ref. | Debit  | Credit | Balance |
| 2012<br>Sept. 1 |             | J1   | 15,000 |        | 15,000  |

| Owner's Capital |             |      |       |        | No. 306 |
|-----------------|-------------|------|-------|--------|---------|
| Date            | Explanation | Ref. | Debit | Credit | Balance |
| 2012<br>Sept. 1 |             | J1   |       | 15,000 | 15,000  |

Key: **1** Post to debit account—date, journal page number, and amount.  
**2** Enter debit account number in journal reference column.  
**3** Post to credit account—date, journal page number, and amount.  
**4** Enter credit account number in journal reference column.

Posting should be performed in chronological order. That is, the company should post all the debits and credits of one journal entry before proceeding to the next journal entry. Postings should be made on a timely basis to ensure that the ledger is up to date.<sup>2</sup>

The reference column of a ledger account indicates the journal page from which the transaction was posted.<sup>3</sup> The explanation space of the ledger account is used infrequently because an explanation already appears in the journal.

### CHART OF ACCOUNTS

The number and type of accounts differ for each company. The number of accounts depends on the amount of detail management desires. For example, the management of one company may want a single account for all types of utility expense. Another may keep separate expense accounts for each type of utility, such as gas, electricity, and water. Similarly, a small company like Softbyte will have fewer accounts than a corporate giant like Dell. Softbyte may be able to manage and report its activities in 20 to 30 accounts, while Dell may require thousands of accounts to keep track of its worldwide activities.

<sup>2</sup>In homework problems, you can journalize all transactions before posting any of the journal entries.

<sup>3</sup>After the last entry has been posted, the accountant should scan the reference column **in the journal**, to confirm that all postings have been made.

Most companies have a **chart of accounts**. This chart lists the accounts and the account numbers that identify their location in the ledger. The numbering system that identifies the accounts usually starts with the balance sheet accounts and follows with the income statement accounts.

In this and the next two chapters, we will be explaining the accounting for Pioneer Advertising Agency (a service company). Accounts 101–199 indicate asset accounts; 200–299 indicate liabilities; 301–350 indicate owner’s equity accounts; 400–499, revenues; 601–799, expenses; 800–899, other revenues; and 900–999, other expenses. Illustration 2-18 shows Pioneer’s chart of accounts. (C. R. Byrd is Pioneer’s owner.) Accounts listed in red are used in this chapter; accounts shown in black are explained in later chapters.

### Helpful Hint

On the book’s endpapers, you also will find an expanded chart of accounts.

| Pioneer Advertising Agency<br>Chart of Accounts |                                |
|---|--------------------------------|
| <b>Assets</b>                                   | <b>Owner’s Equity</b>          |
| 101 Cash  | 301 Owner’s Capital            |
| 112 Accounts Receivable                         | 306 Owner’s Drawings           |
| 126 Supplies                                    | 350 Income Summary             |
| 130 Prepaid Insurance                           |                                |
| 157 Equipment                                   | <b>Revenues</b>                |
| 158 Accumulated Depreciation—Equipment          | 400 Service Revenue            |
|   |                                |
| <b>Liabilities</b>                              | <b>Expenses</b>                |
| 200 Notes Payable                               | 631 Supplies Expense           |
| 201 Accounts Payable                            | 711 Depreciation Expense       |
| 209 Unearned Service Revenue                    | 722 Insurance Expense          |
| 212 Salaries and Wages Payable                  | 726 Salaries and Wages Expense |
| 230 Interest Payable                            | 729 Rent Expense               |
|   | 905 Interest Expense           |

**Illustration 2-18**  
Chart of accounts

You will notice that there are gaps in the numbering system of the chart of accounts for Pioneer Advertising. Companies leave gaps to permit the insertion of new accounts as needed during the life of the business.

## The Recording Process Illustrated

Illustrations 2-19 through 2-28 show the basic steps in the recording process, using the October transactions of Pioneer Advertising Agency. Pioneer’s accounting period is a month. In these illustrations, a basic analysis, an equation analysis, and a debit-credit analysis precede the journal entry and posting of each transaction. For simplicity, we use the T-account form to show the posting instead of the standard account form.

Study these transaction analyses carefully. **The purpose of transaction analysis is first to identify the type of account involved, and then to determine whether to make a debit or a credit to the account.** You should always perform this type of analysis before preparing a journal entry. Doing so will help you understand the journal entries discussed in this chapter as well as more complex journal entries in later chapters.

**Illustration 2-19**

Investment of cash by owner

**Transaction** On October 1, C. R. Byrd invests \$10,000 cash in an advertising company called Pioneer Advertising Agency.

**Basic Analysis** The asset Cash increases \$10,000, and owner's equity (specifically, Owner's Capital) increases \$10,000.

**Equation Analysis**

|               |   |                    |   |                       |
|---------------|---|--------------------|---|-----------------------|
| <u>Assets</u> | = | <u>Liabilities</u> | + | <u>Owner's Equity</u> |
| Cash          | = |                    |   | Owner's<br>Capital    |
| +10,000       |   |                    |   | +10,000               |

**Debit-Credit Analysis** Debits increase assets: debit Cash \$10,000. Credits increase owner's equity: credit Owner's Capital \$10,000.

**Journal Entry**

|  |        |  |     |        |        |
|--|--------|--|-----|--------|--------|
|  | Oct. 1 | Cash                                     | 101 |        |        |
|  |        | Owner's Capital                          | 301 | 10,000 |        |
|  |        | (Owner's investment of cash in business) |     |        | 10,000 |

**Posting**

|        |        |     |  |                 |        |
|--------|--------|-----|--|-----------------|--------|
|        | Cash   | 101 |  | Owner's Capital | 301    |
| Oct. 1 | 10,000 |     |  | Oct. 1          | 10,000 |

**Helpful Hint**

- Follow these steps:
1. Determine what type of account is involved.
  2. Determine what items increased or decreased and by how much.
  3. Translate the increases and decreases into debits and credits.

**Illustration 2-20**

Purchase of office equipment

**Transaction** On October 1, Pioneer purchases office equipment costing \$5,000 by signing a 3-month, 12%, \$5,000 note payable.

**Basic Analysis** The asset Equipment increases \$5,000, and the liability Notes Payable increases \$5,000.

**Equation Analysis**

|               |   |                    |   |                       |
|---------------|---|--------------------|---|-----------------------|
| <u>Assets</u> | = | <u>Liabilities</u> | + | <u>Owner's Equity</u> |
| Equipment     | = | Notes<br>Payable   |   |                       |
| +5,000        |   | +5,000             |   |                       |

**Debit-Credit Analysis** Debits increase assets: debit Equipment \$5,000. Credits increase liabilities: credit Notes Payable \$5,000.

**Journal Entry**

|  |        |   |     |       |       |
|--|--------|---|-----|-------|-------|
|  | Oct. 1 | Equipment                                       | 157 |       |       |
|  |        | Notes Payable                                   | 200 | 5,000 |       |
|  |        | (Issued 3-month, 12% note for office equipment) |     |       | 5,000 |

**Posting**

|        |           |     |  |               |       |
|--------|-----------|-----|--|---------------|-------|
|        | Equipment | 157 |  | Notes Payable | 200   |
| Oct. 1 | 5,000     |     |  | Oct. 1        | 5,000 |

**Transaction** On October 2, Pioneer receives a \$1,200 cash advance from R. Knox, a client, for advertising services that are expected to be completed by December 31.

**Basic Analysis** The asset Cash increases \$1,200; the liability Unearned Service Revenue increases \$1,200 because the service has not been provided yet. That is, when Pioneer receives an advance payment, it should record an unearned revenue (a liability) in order to recognize the obligation that exists. Note also that although many liabilities have the word “payable” in their title, unearned revenue is considered a liability even though the word payable is not used.

**Equation Analysis**

|               |   |                          |   |                       |
|---------------|---|--------------------------|---|-----------------------|
| <u>Assets</u> | = | <u>Liabilities</u>       | + | <u>Owner's Equity</u> |
| Cash          | = | Unearned Service Revenue |   |                       |
| +1,200        |   | +1,200                   |   |                       |

**Debit–Credit Analysis** Debits increase assets: debit Cash \$1,200.  
Credits increase liabilities: credit Unearned Service Revenue \$1,200.

**Journal Entry**

|        |   |  |     |       |       |
|--------|---|--|-----|-------|-------|
|        |   |  |     |       |       |
| Oct. 2 | Cash  |  | 101 | 1,200 |       |
|        | Unearned Service Revenue<br>(Received cash from R. Knox for future service) |  | 209 |       | 1,200 |

**Posting**

|  |                          |              |     |        |        |  |   |       |  |  |  |                          |     |  |  |              |
|--|--------------------------|--------------|-----|--------|--------|--|---|-------|--|--|--|--------------------------|-----|--|--|--------------|
| <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 10%;"></td> <td style="width: 30%; text-align: center;">Cash</td> <td style="width: 20%; text-align: center;">101</td> </tr> <tr> <td style="text-align: center;">Oct. 1</td> <td style="text-align: right;">10,000</td> <td></td> </tr> <tr> <td style="text-align: center;">2</td> <td style="text-align: right;">1,200</td> <td></td> </tr> </table> |                          | Cash         | 101 | Oct. 1 | 10,000 |  | 2 | 1,200 |  | <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 10%;"></td> <td style="width: 30%; text-align: center;">Unearned Service Revenue</td> <td style="width: 20%; text-align: center;">209</td> </tr> <tr> <td></td> <td></td> <td style="text-align: right;">Oct. 2 1,200</td> </tr> </table> |  | Unearned Service Revenue | 209 |  |  | Oct. 2 1,200 |
|  | Cash                     | 101          |     |        |        |  |   |       |  |  |  |                          |     |  |  |              |
| Oct. 1   | 10,000                   |              |     |        |        |  |   |       |  |  |  |                          |     |  |  |              |
| 2  | 1,200                    |              |     |        |        |  |   |       |  |  |  |                          |     |  |  |              |
|  | Unearned Service Revenue | 209          |     |        |        |  |   |       |  |  |  |                          |     |  |  |              |
|  |                          | Oct. 2 1,200 |     |        |        |  |   |       |  |  |  |                          |     |  |  |              |

**Illustration 2-21**  
Receipt of cash for future service

**Transaction** On October 3, Pioneer pays office rent for October in cash, \$900.

**Basic Analysis** The expense account Rent Expense increases \$900 because the payment pertains only to the current month; the asset Cash decreases \$900.

**Equation Analysis**

|               |   |                    |   |                       |
|---------------|---|--------------------|---|-----------------------|
| <u>Assets</u> | = | <u>Liabilities</u> | + | <u>Owner's Equity</u> |
| Cash          | = |                    |   | Rent Expense          |
| -900          |   |                    |   | -900                  |

**Debit–Credit Analysis** Debits increase expenses: debit Rent Expense \$900.  
Credits decrease assets: credit Cash \$900.

Payment of monthly rent

**Illustration 2-23**  
Payment for insurance

**Transaction** On October 4, Pioneer pays \$600 for a one-year insurance policy that will expire next year on September 30.

**Basic Analysis** The asset Prepaid Insurance increases \$600 because the payment extends to more than the current month; the asset Cash decreases \$600. Payments of expenses that will benefit more than one accounting period are prepaid expenses or prepayments. When a company makes a payment, it debits an asset account in order to show the service or benefit that will be received in the future.

| <b>Event</b>          | On October 9, Pioneer hires four employees to begin work on October 15. Each employee is to receive a weekly salary of \$500 for a 5-day work week, payable every 2 weeks—first payment made on October 26.   |
| <b>Basic Analysis</b> | A business transaction has not occurred. There is only an agreement between the employer and the employees to enter into a business transaction beginning on October 15. Thus, a debit–credit analysis is not needed because there is no accounting entry. (See transaction of October 26 for first entry.) |

### Accounting Cycle Tutorial

The diagrams in Illustrations 2-19 to 2-28 review the accounting cycle. If you would like additional practice, an Accounting Cycle Tutorial is available on *WileyPLUS*. The illustration to the left is an example of a screen from the tutorial.

## Do it!

Kate Brown recorded the following transactions in a general journal during the month of March.

|      |    |                            |       |       |  |
|------|----|----------------------------|-------|-------|--|
| Mar. | 4  | Cash                       | 2,280 |       |  |
|      |    | Service Revenue            |       | 2,280 |  |
|      | 15 | Salaries and Wages Expense | 400   |       |  |
|      |    | Cash                       |       | 400   |  |
|      | 19 | Utilities Expense          | 92    |       |  |
|      |    | Cash                       |       | 92    |  |

Post these entries to the Cash account of the general ledger to determine the ending balance in cash. The beginning balance of cash on March 1 was \$600.

### Solution

| Cash      |       |      |     |
|-----------|-------|------|-----|
| 3/1       | 600   | 3/15 | 400 |
| 3/4       | 2,280 | 3/19 | 92  |
| 3/31 Bal. | 2,388 |      |     |

Related exercise material: BE2-7, BE2-8, E2-8, E2-12 and **Do it!** 2-3.

### Posting

#### action plan

- ✓ Recall that posting involves transferring the journalized debits and credits to specific accounts in the ledger.
- ✓ Determine the ending balance by netting the total debits and credits.

## Summary Illustration of Journalizing and Posting

Illustration 2-29 shows the journal for Pioneer Advertising Agency for October. Illustration 2-30 (on page 71) shows the ledger, with all balances in color.

|                 | (Received cash for services provided)            |      |        |        |         |

## The Trial Balance

**Study Objective [7]**  
Prepare a trial balance and explain its purposes.

A **trial balance** is a list of accounts and their balances at a given time. Customarily, companies prepare a trial balance at the end of an accounting period. They list accounts in the order in which they appear in the ledger. Debit balances appear in the left column and credit balances in the right column.

| General Journal                           |             |      |        |        |               |

**Illustration 2-30**  
General ledger

**The trial balance proves the mathematical equality of debits and credits after posting.** Under the double-entry system, this equality occurs when the sum of the debit account balances equals the sum of the credit account balances. **A trial balance may also uncover errors in journalizing and posting.** For example, a trial balance may well have detected the error at Fidelity Investments discussed in the Feature Story. **In addition, a trial balance is useful in the preparation of financial statements,** as we will explain in the next two chapters.

The steps for preparing a trial balance are:

1. List the account titles and their balances in the appropriate debit or credit column.
2. Total the debit and credit columns.
3. Prove the equality of the two columns.

Illustration 2-31 (on the next page) shows the trial balance prepared from Pioneer Advertising's ledger. Note that the total debits equal the total credits.

**Illustration 2-31**

A trial balance

**Helpful Hint**

Note that the order of presentation in the trial balance is:

Assets  
Liabilities  
Owner's equity  
Revenues  
Expenses

**Pioneer Advertising Agency**

Trial Balance  
October 31, 2012

|                            | <u>Debit</u>    | <u>Credit</u>   |
|----------------------------|-----------------|-----------------|
| Cash                       | \$15,200        |                 |
| Supplies                   | 2,500           |                 |
| Prepaid Insurance          | 600             |                 |
| Equipment                  | 5,000           |                 |
| Notes Payable              |                 | \$ 5,000        |
| Accounts Payable           |                 | 2,500           |
| Unearned Service Revenue   |                 | 1,200           |
| Owner's Capital            |                 | 10,000          |
| Owner's Drawings           | 500             |                 |
| Service Revenue            |                 | 10,000          |
| Salaries and Wages Expense | 4,000           |                 |
| Rent Expense               | 900             |                 |
|                            | <u>\$28,700</u> | <u>\$28,700</u> |

A trial balance is a necessary checkpoint for uncovering certain types of errors. For example, if only the debit portion of a journal entry has been posted, the trial balance would bring this error to light.

**Ethics Note**

An *error* is the result of an unintentional mistake; it is neither ethical nor unethical. An *irregularity* is an intentional misstatement, which is viewed as unethical.

**Limitations of a Trial Balance**

A trial balance does not guarantee freedom from recording errors, however. Numerous errors may exist even though the trial balance columns agree. For example, the trial balance may balance even when:

1. a transaction is not journalized,
2. a correct journal entry is not posted,
3. a journal entry is posted twice,
4. incorrect accounts are used in journalizing or posting, or
5. offsetting errors are made in recording the amount of a transaction.

As long as equal debits and credits are posted, even to the wrong account or in the wrong amount, the total debits will equal the total credits. **The trial balance does not prove that the company has recorded all transactions or that the ledger is correct.**

**Locating Errors**

Errors in a trial balance generally result from mathematical mistakes, incorrect postings, or simply transcribing data incorrectly. What do you do if you are faced with a trial balance that does not balance? First determine the amount of the difference between the two columns of the trial balance. After this amount is known, the following steps are often helpful:

1. If the error is \$1, \$10, \$100, or \$1,000, re-add the trial balance columns and recompute the account balances.
2. If the error is divisible by 2, scan the trial balance to see whether a balance equal to half the error has been entered in the wrong column.

- If the error is divisible by 9, retrace the account balances on the trial balance to see whether they are incorrectly copied from the ledger. For example, if a balance was \$12 and it was listed as \$21, a \$9 error has been made. Reversing the order of numbers is called a **transposition error**.
- If the error is not divisible by 2 or 9, scan the ledger to see whether an account balance in the amount of the error has been omitted from the trial balance, and scan the journal to see whether a posting of that amount has been omitted.

## Use of Dollar Signs

Note that dollar signs do not appear in journals or ledgers. Dollar signs are typically used only in the trial balance and the financial statements. Generally, a dollar sign is shown only for the first item in the column and for the total of that column. A single line (a totaling rule) is placed under the column of figures to be added or subtracted. Total amounts are double-underlined to indicate they are final sums.

*Insight boxes provide examples of business situations from various perspectives—ethics, investor, and international. Guideline answers are provided on the last page of the chapter.*

## INVESTOR INSIGHT

### Why Accuracy Matters

While most companies record transactions very carefully, the reality is that mistakes still happen. For example, bank regulators fined **Bank One Corporation** (now **Chase**) \$1.8 million because they felt that the unreliability of the bank's accounting system caused it to violate regulatory requirements.

Also, in recent years **Fannie Mae**, the government-chartered mortgage association, announced a series of large accounting errors. These announcements caused alarm among investors, regulators, and politicians because they fear that the errors may suggest larger, undetected problems. This is important because the home-mortgage market depends on Fannie Mae to buy hundreds of billions of dollars of mortgages each year from banks, thus enabling the banks to issue new mortgages.

Finally, before a major overhaul of its accounting system, the financial records of **Waste Management Company** were in such disarray that of the company's 57,000 employees, 10,000 were receiving pay slips that were in error.

The Sarbanes-Oxley Act of 2002 was created to minimize the occurrence of errors like these by increasing every employee's responsibility for accurate financial reporting.

**?** In order for these companies to prepare and issue financial statements, their accounting equations (debits and credits) must have been in balance at year-end. How could these errors or misstatements have occurred? (See page 94.)

## Do it!

The following accounts come from the ledger of SnowGo Company at December 31, 2012.

|                         |          |                        |          |
|-------------------------|----------|------------------------|----------|
| 157 Equipment           | \$88,000 | 301 Owner's Capital    | \$20,000 |
| 306 Owner's Drawings    | 8,000    | 212 Salaries and Wages |          |
| 201 Accounts Payable    | 22,000   | Payable                | 2,000    |
| 726 Salaries and Wages  |          | 200 Notes Payable      | 19,000   |
| Expense                 | 42,000   | 722 Insurance Expense  | 3,000    |
| 112 Accounts Receivable | 4,000    | 130 Prepaid Insurance  | 6,000    |
| 400 Service Revenue     | 95,000   | 101 Cash               | 7,000    |

Prepare a trial balance in good form.

## Trial Balance

**action plan**

- ✓ Determine normal balances and list accounts in the order they appear in the ledger.
- ✓ Accounts with debit balances appear in the left column, and those with credit balances in the right column.
- ✓ Total the debit and credit columns to prove equality.

**Solution**

**COMPREHENSIVE****Do it!****Transactions**

Bob Sample opened the Campus Laundromat on September 1, 2012. During the first month of operations, the following transactions occurred.

- Sept. 1 Bob invested \$20,000 cash in the business.  
 2 The company paid \$1,000 cash for store rent for September.  
 3 Purchased washers and dryers for \$25,000, paying \$10,000 in cash and signing a \$15,000, 6-month, 12% note payable.  
 4 Paid \$1,200 for a one-year accident insurance policy.  
 10 Received a bill from the *Daily News* for advertising the opening of the laundromat \$200.  
 20 Bob withdrew \$700 cash for personal use.  
 30 The company determined that cash receipts for laundry services for the month were \$6,200.

The chart of accounts for the company is the same as that for Pioneer Advertising Agency plus No. 610 Advertising Expense.

**Instructions**

- (a) Journalize the September transactions. (Use J1 for the journal page number.)  
 (b) Open ledger accounts and post the September transactions.  
 (c) Prepare a trial balance at September 30, 2012.

|         | (Received cash for services provided)                                |      |        |        |

**action plan**

- ✓ Make separate journal entries for each transaction.
- ✓ In journalizing, make sure debits equal credits.
- ✓ In journalizing, use specific account titles taken from the chart of accounts.
- ✓ Provide appropriate description of each journal entry.
- ✓ Arrange ledger in statement order, beginning with the balance sheet accounts.
- ✓ Post in chronological order.
- ✓ Use numbers in the reference column to indicate the amount has been posted.
- ✓ In the trial balance, list accounts in the order in which they appear in the ledger.
- ✓ List debit balances in the left column, and credit balances in the right column.

**(b) GENERAL LEDGER**

## Summary of Study Objectives

**[1] Explain what an account is and how it helps in the recording process.** An account is a record of increases and decreases in specific asset, liability, and owner's equity items.

**[2] Define debits and credits and explain their use in recording business transactions.** The terms debit and credit are synonymous with left and right. Assets, drawings, and expenses are increased by debits and decreased by credits. Liabilities, owner's capital, and revenues are increased by credits and decreased by debits.

**[3] Identify the basic steps in the recording process.** The basic steps in the recording process are: (a) analyze each transaction for its effects on the accounts, (b) enter the transaction information in a journal, (c) transfer the journal information to the appropriate accounts in the ledger.

**[4] Explain what a journal is and how it helps in the recording process.** The initial accounting record of a transaction is entered in a journal before the data are entered in the accounts. A journal (a) discloses in one place the complete effects of a transaction, (b) provides a chronological record of transactions, and (c) prevents or locates errors

because the debit and credit amounts for each entry can be easily compared.

**[5] Explain what a ledger is and how it helps in the recording process.** The ledger is the entire group of accounts maintained by a company. The ledger keeps in one place all the information about changes in specific account balances.

**[6] Explain what posting is and how it helps in the recording process.** Posting is the transfer of journal entries to the ledger accounts. This phase of the recording process accumulates the effects of journalized transactions in the individual accounts.

**[7] Prepare a trial balance and explain its purposes.** A trial balance is a list of accounts and their balances at a given time. Its primary purpose is to prove the equality of debits and credits after posting. A trial balance also uncovers errors in journalizing and posting and is useful in preparing financial statements.

## Glossary

- Account** A record of increases and decreases in specific asset, liability, or owner's equity items. (p. 52).
- Chart of accounts** A list of accounts and the account numbers that identify their location in the ledger. (p. 63).
- Compound entry** A journal entry that involves three or more accounts. (p. 59).
- Credit** The right side of an account. (p. 52).
- Debit** The left side of an account. (p. 52).
- Double-entry system** A system that records in appropriate accounts the dual effect of each transaction. (p. 53).
- General journal** The most basic form of journal. (p. 58).
- General ledger** A ledger that contains all asset, liability, and owner's equity accounts. (p. 60).
- Journal** An accounting record in which transactions are initially recorded in chronological order. (p. 58).
- Journalizing** The entering of transaction data in the journal. (p. 58).
- Ledger** The entire group of accounts maintained by a company. (p. 60).
- Normal balance** An account balance on the side where an increase in the account is recorded. (p. 54).
- Posting** The procedure of transferring journal entries to the ledger accounts. (p. 61).
- Simple entry** A journal entry that involves only two accounts. (p. 59).
- T account** The basic form of an account. (p. 52).
- Three-column form of account** A form with columns for debit, credit, and balance amounts in an account. (p. 61).
- Trial balance** A list of accounts and their balances at a given time. (p. 70).

Self-Test, Brief Exercises, Exercises, Problem Set A, and many more components are available for practice in *WileyPLUS*

## Self-Test Questions

Answers are on page 94.

- (SO 1) 1. Which of the following statements about an account is *true*?
- In its simplest form, an account consists of two parts.
  - An account is an individual accounting record of increases and decreases in specific asset, liability, and owner's equity items.
  - There are separate accounts for specific assets and liabilities but only one account for owner's equity items.
  - The left side of an account is the credit or decrease side.
- (SO 2) 2. Debits:
- increase both assets and liabilities.
  - decrease both assets and liabilities.
  - increase assets and decrease liabilities.
  - decrease assets and increase liabilities.
- (SO 2) 3. A revenue account:
- is increased by debits.
  - is decreased by credits.
  - has a normal balance of a debit.
  - is increased by credits.
- (SO 2) 4. Accounts that normally have debit balances are:
- assets, expenses, and revenues.
  - assets, expenses, and owner's capital.
  - assets, liabilities, and owner's drawings.
  - assets, owner's drawings, and expenses.
- (SO 2) 5. The expanded accounting equation is:
- $\text{Assets} + \text{Liabilities} = \text{Owner's Capital} + \text{Owner's Drawings} + \text{Revenues} + \text{Expenses}$
  - $\text{Assets} = \text{Liabilities} + \text{Owner's Capital} + \text{Owner's Drawings} + \text{Revenues} - \text{Expenses}$
  - $\text{Assets} = \text{Liabilities} - \text{Owner's Capital} - \text{Owner's Drawings} - \text{Revenues} - \text{Expenses}$
  - $\text{Assets} = \text{Liabilities} + \text{Owner's Capital} - \text{Owner's Drawings} + \text{Revenues} - \text{Expenses}$
6. Which of the following is *not* part of the recording process? (SO 3)
- Analyzing transactions.
  - Preparing a trial balance.
  - Entering transactions in a journal.
  - Posting transactions.
7. Which of the following statements about a journal is *false*? (SO 4)
- It is not a book of original entry.
  - It provides a chronological record of transactions.
  - It helps to locate errors because the debit and credit amounts for each entry can be readily compared.
  - It discloses in one place the complete effect of a transaction.
8. The purchase of supplies on account should result in: (SO 4)
- a debit to Supplies Expense and a credit to Cash.
  - a debit to Supplies Expense and a credit to Accounts Payable.
  - a debit to Supplies and a credit to Accounts Payable.
  - a debit to Supplies and a credit to Accounts Receivable.
9. The order of the accounts in the ledger is: (SO 5)
- assets, revenues, expenses, liabilities, owner's capital, owner's drawings.
  - assets, liabilities, owner's capital, owner's drawings, revenues, expenses.
  - owner's capital, assets, revenues, expenses, liabilities, owner's drawings.
  - revenues, assets, expenses, liabilities, owner's capital, owner's drawings.

- (SO 5) 10. A ledger:
- contains only asset and liability accounts.
  - should show accounts in alphabetical order.
  - is a collection of the entire group of accounts maintained by a company.
  - is a book of original entry.
- (SO 6) 11. Posting:
- normally occurs before journalizing.
  - transfers ledger transaction data to the journal.
  - is an optional step in the recording process.
  - transfers journal entries to ledger accounts.
- (SO 6) 12. Before posting a payment of \$5,000, the Accounts Payable of Senator Company had a normal balance of \$16,000. The balance after posting this transaction was:
- \$21,000.
  - \$5,000.
  - \$11,000.
  - Cannot be determined.
- (SO 7) 13. A trial balance:
- is a list of accounts with their balances at a given time.
  - proves the mathematical accuracy of journalized transactions.
  - will not balance if a correct journal entry is posted twice.
  - proves that all transactions have been recorded.
14. A trial balance will not balance if:
- a correct journal entry is posted twice.
  - the purchase of supplies on account is debited to Supplies and credited to Cash.
  - a \$100 cash drawing by the owner is debited to Owner's Drawings for \$1,000 and credited to Cash for \$100.
  - a \$450 payment on account is debited to Accounts Payable for \$45 and credited to Cash for \$45.
15. The trial balance of Clooney Company had accounts with the following normal balances: Cash \$5,000, Service Revenue \$85,000, Salaries and Wages Payable \$4,000, Salaries and Wages Expense \$40,000, Rent Expense \$10,000, Owner's Capital \$42,000; Owner's Drawings \$15,000; Equipment \$61,000. In preparing a trial balance, the total in the debit column is:
- \$131,000.
  - \$216,000.
  - \$91,000.
  - \$116,000.

 for additional Self-Test Questions.

## Questions

- Describe the parts of a T account.
- "The terms *debit* and *credit* mean increase and decrease, respectively." Do you agree? Explain.
- Jeff Hiller, a fellow student, contends that the double-entry system means each transaction must be recorded twice. Is Jeff correct? Explain.
- Maria Alvarez, a beginning accounting student, believes debit balances are favorable and credit balances are unfavorable. Is Maria correct? Discuss.
- State the rules of debit and credit as applied to (a) asset accounts, (b) liability accounts, and (c) the owner's equity accounts (revenue, expenses, owner's drawings, and owner's capital).
- What is the normal balance for each of the following accounts? (a) Accounts Receivable. (b) Cash. (c) Owner's Drawings. (d) Accounts Payable. (e) Service Revenue. (f) Salaries and Wages Expense. (g) Owner's Capital.
- Indicate whether each of the following accounts is an asset, a liability, or an owner's equity account and whether it has a normal debit or credit balance: (a) Accounts Receivable, (b) Accounts Payable, (c) Equipment, (d) Owner's Drawings, (e) Supplies.
- For the following transactions, indicate the account debited and the account credited.
  - Supplies are purchased on account.
  - Cash is received on signing a note payable.
  - Employees are paid salaries in cash.
- Indicate whether the following accounts generally will have (a) debit entries only, (b) credit entries only, or (c) both debit and credit entries.
  - Cash.
  - Accounts Receivable.
  - Owner's Drawings.
  - Accounts Payable.
  - Salaries and Wages Expense.
  - Service Revenue.
- What are the basic steps in the recording process?
- What are the advantages of using a journal in the recording process?
- When entering a transaction in the journal, should the debit or credit be written first?
  - Which should be indented, the debit or credit?
- Describe a compound entry, and provide an example.
- Should business transaction debits and credits be recorded directly in the ledger accounts?
  - What are the advantages of first recording transactions in the journal and then posting to the ledger?
- The account number is entered as the last step in posting the amounts from the journal to the ledger. What is the advantage of this step?
- Journalize the following business transactions.
  - Hector Molina invests \$9,000 cash in the business.
  - Insurance of \$800 is paid for the year.
  - Supplies of \$2,000 are purchased on account.
  - Cash of \$7,500 is received for services rendered.
- What is a ledger?
  - What is a chart of accounts and why is it important?
- What is a trial balance and what are its purposes?
- Jim Benes is confused about how accounting information flows through the accounting system. He believes the flow of information is as follows.
  - Debits and credits posted to the ledger.
  - Business transaction occurs.

- (c) Information entered in the journal.
  - (d) Financial statements are prepared.
  - (e) Trial balance is prepared.
- Is Jim correct? If not, indicate to Jim the proper flow of the information.
20. Two students are discussing the use of a trial balance. They wonder whether the following errors, each considered separately, would prevent the trial balance from balancing.
- (a) The bookkeeper debited Cash for \$600 and credited Salaries and Wages Expense for \$600 for payment of wages.
  - (b) Cash collected on account was debited to Cash for \$900 and Service Revenue was credited for \$90.
- What would you tell them?
21.  **PEPSICO** What are the normal balances for PepsiCo's Cash, Accounts Payable, and Interest Expense accounts?

## Brief Exercises

**BE2-1** For each of the following accounts, indicate the effects of (a) a debit and (b) a credit on the accounts and (c) the normal balance of the account.

1. Accounts Payable.
2. Advertising Expense.
3. Service Revenue.
4. Accounts Receivable.
5. Owner's Capital.
6. Owner's Drawings.

*Indicate debit and credit effects and normal balance.*

(SO 2)

**BE2-2** Transactions for the Daniel Hudson Company for the month of June are presented below. Identify the accounts to be debited and credited for each transaction.

- June 1 Dan Hudson invests \$5,000 cash in a small welding business of which he is the sole proprietor.
- 2 Purchases equipment on account for \$2,100.
  - 3 \$800 cash is paid to landlord for June rent.
  - 12 Bills O. Guillen \$300 for welding work done on account.

*Identify accounts to be debited and credited.*

(SO 2)

**BE2-3** Using the data in BE2-2, journalize the transactions. (You may omit explanations.)

*Journalize transactions.*

(SO 4)

**BE2-4**  Kenny Williams a fellow student, is unclear about the basic steps in the recording process. Identify and briefly explain the steps in the order in which they occur.

*Identify and explain steps in recording process.*

(SO 3)

**BE2-5** J. Reinsdorf has the following transactions during August of the current year. Indicate (a) the effect on the accounting equation and (b) the debit-credit analysis illustrated on pages 64–68 of the text.

*Indicate basic and debit-credit analysis.*

(SO 2)

- Aug. 1 Opens an office as a financial advisor, investing \$8,000 in cash.
- 4 Pays insurance in advance for 6 months, \$1,800 cash.
  - 16 Receives \$3,400 from clients for services provided.
  - 27 Pays secretary \$1,000 salary.

**BE2-6** Using the data in BE2-5, journalize the transactions. (You may omit explanations.)

*Journalize transactions.*

(SO 4)

**BE2-7** Selected transactions for the Anthony Adams Company are presented in journal form below. Post the transactions to T accounts. Make one T account for each item and determine each account's ending balance.

*Post journal entries to T accounts.*

(SO 6)

| J1    |                                       |      |       |        |
|-------|---------------------------------------|------|-------|--------|
| Date  | Account Titles and Explanation        | Ref. | Debit | Credit |
| May 5 | Accounts Receivable                   |      | 4,100 |        |
|       | Service Revenue                       |      |       | 4,100  |
|       | (Billed for services provided)        |      |       |        |
| 12    | Cash                                  |      | 2,400 |        |
|       | Accounts Receivable                   |      |       | 2,400  |
|       | (Received cash in payment of account) |      |       |        |
| 15    | Cash                                  |      | 3,000 |        |
|       | Service Revenue                       |      |       | 3,000  |
|       | (Received cash for services provided) |      |       |        |

## 80 2 The Recording Process

Post journal entries to standard form of account.

(SO 6)

Prepare a trial balance.

(SO 7)

Prepare a correct trial balance.

(SO 7)

**BE2-8** Selected journal entries for the Anthony Adams Company are presented in BE2-7. Post the transactions using the standard form of account.

**BE2-9** From the ledger balances given below, prepare a trial balance for the Afalava Company at June 30, 2012. List the accounts in the order shown on page 63 of the text. All account balances are normal.

Accounts Payable \$9,000, Cash \$5,800, Owner's Capital \$15,000, Owner's Drawings \$1,200, Equipment \$17,000, Service Revenue \$10,000, Accounts Receivable \$3,000, Salaries and Wages Expense \$6,000, and Rent Expense \$1,000.

**BE2-10** An inexperienced bookkeeper prepared the following trial balance. Prepare a correct trial balance, assuming all account balances are normal.

### WALTER COMPANY

#### Trial Balance

December 31, 2012

|                            | <u>Debit</u>    | <u>Credit</u>   |
|----------------------------|-----------------|-----------------|
| Cash                       | \$10,800        |                 |
| Prepaid Insurance          |                 | \$ 3,500        |
| Accounts Payable           |                 | 3,000           |
| Unearned Service Revenue   | 2,200           |                 |
| Owner's Capital            |                 | 9,000           |
| Owner's Drawings           |                 | 4,500           |
| Service Revenue            |                 | 25,600          |
| Salaries and Wages Expense | 18,600          |                 |
| Rent Expense               |                 | 2,400           |
|                            | <u>\$31,600</u> | <u>\$48,000</u> |

## Do it! Review

Identify normal balances.

(SO 1, 2)

**Do it! 2-1** Joe Seacat has just rented space in a strip mall. In this space, he will open a photography studio, to be called "Picture This!" A friend has advised Joe to set up a double-entry set of accounting records in which to record all of his business transactions.

Identify the balance sheet accounts that Joe will likely need to record the transactions needed to open his business. Indicate whether the normal balance of each account is a debit or credit.

Record business activities.

(SO 4)

**Do it! 2-2** Joe Seacat engaged in the following activities in establishing his photography studio, Picture This!:

1. Opened a bank account in the name of Picture This! and deposited \$6,300 of his own money into this account as his initial investment.
2. Purchased photography supplies at a total cost of \$1,100. The business paid \$400 in cash and the balance is on account.
3. Obtained estimates on the cost of photography equipment from three different manufacturers.

In what form (type of record) should Joe record these three activities? Prepare the entries to record the transactions.

Post transactions.

(SO 6)

**Do it! 2-3** Joe Seacat recorded the following transactions during the month of April.

|          |                            |       |       |
|----------|----------------------------|-------|-------|
| April 3  | Cash                       | 3,400 |       |
|          | Service Revenue            |       | 3,400 |
| April 16 | Rent Expense               | 700   |       |
|          | Cash                       |       | 700   |
| April 20 | Salaries and Wages Expense | 300   |       |
|          | Cash                       |       | 300   |

Post these entries to the Cash T account of the general ledger to determine the ending balance in cash. The beginning balance in cash on April 1 was \$1,600.

**Do it! 2-4** The following accounts are taken from the ledger of Angulo Company at December 31, 2012.

Prepare a trial balance.  
(SO 7)

|     |                            |          |     |                            |          |
|-----|----------------------------|----------|-----|----------------------------|----------|
| 200 | Notes Payable              | \$20,000 | 101 | Cash                       | \$ 6,000 |
| 301 | Owner's Capital            | 28,000   | 126 | Supplies                   | 6,000    |
| 157 | Equipment                  | 80,000   | 631 | Supplies Expense           | 4,000    |
| 306 | Owner's Drawings           | 8,000    | 212 | Salaries and Wages Payable | 3,000    |
| 726 | Salaries and Wages Expense | 38,000   | 201 | Accounts Payable           | 11,000   |
| 400 | Service Revenue            | 88,000   | 112 | Accounts Receivable        | 8,000    |

Prepare a trial balance in good form.

## Exercises

**E2-1** Johan Aslata has prepared the following list of statements about accounts.

Analyze statements about accounting and the recording process.  
(SO 1)

1. An account is an accounting record of either a specific asset or a specific liability.
2. An account shows only increases, not decreases, in the item it relates to.
3. Some items, such as Cash and Accounts Receivable, are combined into one account.
4. An account has a left, or credit side, and a right, or debit side.
5. A simple form of an account consisting of just the account title, the left side, and the right side, is called a T account.

### Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

**E2-2** Selected transactions for M. Anderson, an interior decorator, in her first month of business, are as follows.

Identify debits, credits, and normal balances.  
(SO 2)

- Jan. 2 Invested \$10,000 cash in business.
- 3 Purchased used car for \$4,000 cash for use in business.
- 9 Purchased supplies on account for \$500.
- 11 Billed customers \$2,100 for services performed.
- 16 Paid \$350 cash for advertising.
- 20 Received \$700 cash from customers billed on January 11.
- 23 Paid creditor \$300 cash on balance owed.
- 28 Withdrew \$1,000 cash for personal use by owner.

### Instructions

For each transaction, indicate the following.

- (a) The basic type of account debited and credited (asset, liability, owner's equity).
- (b) The specific account debited and credited (cash, rent expense, service revenue, etc.).
- (c) Whether the specific account is increased or decreased.
- (d) The normal balance of the specific account.

Use the following format, in which the January 2 transaction is given as an example.

| Date   | Account Debited      |                            |               |                          | Account Credited     |                            |               |                          |
|--------|----------------------|----------------------------|---------------|--------------------------|----------------------|----------------------------|---------------|--------------------------|
|        | (a)<br>Basic<br>Type | (b)<br>Specific<br>Account | (c)<br>Effect | (d)<br>Normal<br>Balance | (a)<br>Basic<br>Type | (b)<br>Specific<br>Account | (c)<br>Effect | (d)<br>Normal<br>Balance |
| Jan. 2 | Asset                | Cash                       | Increase      | Debit                    | Owner's<br>Equity    | Owner's<br>Capital         | Increase      | Credit                   |

**E2-3** Data for M. Anderson, interior decorator, are presented in E2-2.

Journalize transactions.  
(SO 4)

### Instructions

Journalize the transactions using journal page J1. (You may omit explanations.)

**E2-4** Presented below is information related to Aromashodu Real Estate Agency.

Analyze transactions and determine their effect on accounts.  
(SO 2)

- Oct. 1 Devin Aromashodu begins business as a real estate agent with a cash investment of \$15,000.
- 2 Hires an administrative assistant.
- 3 Purchases office furniture for \$1,900, on account.

- 6 Sells a house and lot for H. Harrelson; bills H. Harrelson \$3,600 for realty services provided.
- 27 Pays \$1,100 on the balance related to the transaction of October 3.
- 30 Pays the administrative assistant \$2,500 in salary for October.

**Instructions**

Prepare the debit-credit analysis for each transaction as illustrated on pages 64–68.

*Journalize transactions.*  
(SO 4)

**E2-5** Transaction data for Aromashodu Real Estate Agency are presented in E2-4.

**Instructions**

Journalize the transactions. (You may omit explanations.)

*Analyze transactions and journalize.*  
(SO 2, 3, 4)

**E2-6** Barnes Industries had the following transactions.

- 1. Borrowed \$5,000 from the bank by signing a note.
- 2. Paid \$3,100 cash for a computer.
- 3. Purchased \$850 of supplies on account.

**Instructions**

- (a) Indicate what accounts are increased and decreased by each transaction.
- (b) Journalize each transaction. (Omit explanations.)

*Analyze transactions and journalize.*  
(SO 2, 3, 4)

**E2-7** Beekman Enterprises had the following selected transactions.

- 1. Jo Beekman invested \$4,000 cash in the business.
- 2. Paid office rent of \$950.
- 3. Performed consulting services and billed a client \$5,200.
- 4. Jo Beekman withdrew \$750 cash for personal use.

**Instructions**

- (a) Indicate the effect each transaction has on the accounting equation (Assets = Liabilities + Owner’s Equity), using plus and minus signs.
- (b) Journalize each transaction. (Omit explanations.)

*Analyze statements about the ledger.*  
(SO 5)

**E2-8** Kahlil Bell has prepared the following list of statements about the general ledger.

- 1. The general ledger contains all the asset and liability accounts but no owner’s equity accounts.
- 2. The general ledger is sometimes referred to as simply the ledger.
- 3. The accounts in the general ledger are arranged in alphabetical order.
- 4. Each account in the general ledger is numbered for easier identification.
- 5. The general ledger is a book of original entry.

**Instructions**

Identify each statement as true or false. If false, indicate how to correct the statement.

*Post journal entries and prepare a trial balance.*  
(SO 6, 7)

**E2-9** Selected transactions from the journal of Consuela Brown, investment broker, are presented below.

| Date   | Account Titles and Explanation                   | Ref. | Debit | Credit |
|--------|--|------|-------|--------|
| Aug. 1 | Cash   |      | 5,000 |        |
|        | Owner’s Capital                                  |      |       | 5,000  |
|        | (Owner’s investment of cash in business)         |      |       |        |
| 10     | Cash   |      | 2,400 |        |
|        | Service Revenue                                  |      |       | 2,400  |
|        | (Received cash for services provided)            |      |       |        |
| 12     | Equipment  |      | 5,000 |        |
|        | Cash   |      |       | 3,000  |
|        | Notes Payable                                    |      |       | 2,000  |
|        | (Purchased equipment for cash and notes payable) |      |       |        |
| 25     | Accounts Receivable                              |      | 1,700 |        |
|        | Service Revenue                                  |      |       | 1,700  |
|        | (Billed clients for services provided)           |      |       |        |
| 31     | Cash   |      | 900   |        |
|        | Accounts Receivable                              |      |       | 900    |
|        | (Receipt of cash on account)                     |      |       |        |

**Instructions**

- (a) Post the transactions to T accounts.
- (b) Prepare a trial balance at August 31, 2012.

**E2-10** The T accounts below summarize the ledger of Bennet Landscaping Company at the end of the first month of operations.

*Journalize transactions from account data and prepare a trial balance.*  
(SO 4, 7)

| Cash |        | No. 101 |       |
|------|--------|---------|-------|
| 4/1  | 12,000 | 4/15    | 1,300 |
| 4/12 | 900    | 4/25    | 1,500 |
| 4/29 | 400    |         |       |
| 4/30 | 1,000  |         |       |

| Unearned Service Revenue |  | No. 209 |       |
|--------------------------|--|---------|-------|
|                          |  | 4/30    | 1,000 |

| Accounts Receivable |       | No. 112 |     |
|---------------------|-------|---------|-----|
| 4/7                 | 3,200 | 4/29    | 400 |

| Owner's Capital |  | No. 301 |        |
|-----------------|--|---------|--------|
|                 |  | 4/1     | 12,000 |

| Supplies |       | No. 126 |  |
|----------|-------|---------|--|
| 4/4      | 1,800 |         |  |

| Service Revenue |  | No. 400 |       |

| Salaries and Wages Expense |       | No. 726 |  |
|----------------------------|-------|---------|--|
| 4/15                       | 1,300 |         |  |

**Instructions**

- (a) Prepare the complete general journal (including explanations) from which the postings to Cash were made.
- (b) Prepare a trial balance at April 30, 2012.

**E2-11** Presented below is the ledger for Bowman Co.

*Journalize transactions from account data and prepare a trial balance.*  
(SO 4, 7)

| Cash  |       | No. 101 |       |
|-------|-------|---------|-------|
| 10/1  | 3,000 | 10/4    | 400   |
| 10/10 | 500   | 10/12   | 1,500 |
| 10/10 | 4,000 | 10/15   | 250   |

|----------|-----|---------|--|
| 10/4     | 400 |         |  |

| Service Revenue |  | No. 400 |     |
|-----------------|--|---------|-----|
|                 |  | 10/6    | 800 |
|                 |  | 10/10   | 500 |
|                 |  | 10/20   | 940 |

| Equipment |       | No. 157 |  |
|-----------|-------|---------|--|
| 10/3      | 2,000 |         |  |

| Salaries and Wages Expense |     | No. 726 |  |
|----------------------------|-----|---------|--|
| 10/31                      | 500 |         |  |

| Notes Payable |  | No. 200 |       |
|---------------|--|---------|-------|
|               |  | 10/10   | 4,000 |

| Rent Expense |     | No. 729 |  |
|--------------|-----|---------|--|
| 10/15        | 250 |         |  |

| Accounts Payable |       | No. 201 |       |
|------------------|-------|---------|-------|
| 10/12            | 1,500 | 10/3    | 2,000 |

**Instructions**

- (a) Reproduce the journal entries for the transactions that occurred on October 1, 10, and 20, and provide explanations for each.
- (b) Determine the October 31 balance for each of the accounts above, and prepare a trial balance at October 31, 2012.

Prepare journal entries and post using standard account form.

(SO 4, 6)

**E2-12** Selected transactions for Roberta Garza Company during its first month in business are presented below.

- Sept. 1 Invested \$10,000 cash in the business.
- 5 Purchased equipment for \$12,000 paying \$4,000 in cash and the balance on account.
- 25 Paid \$3,000 cash on balance owed for equipment.
- 30 Withdrew \$700 cash for personal use.

Garza’s chart of accounts shows: No. 101 Cash, No. 157 Equipment, No. 201 Accounts Payable, No. 301 Owner’s Capital, and No. 306 Owner’s Drawings.

**Instructions**

- (a) Journalize the transactions on page J1 of the journal. (Omit explanations.)
- (b) Post the transactions using the standard account form.

Analyze errors and their effects on trial balance.

(SO 7)

**E2-13** The bookkeeper for Lance Briggs Equipment Repair made a number of errors in journalizing and posting, as described below.

1. A credit posting of \$525 to Accounts Receivable was omitted.
2. A debit posting of \$750 for Prepaid Insurance was debited to Insurance Expense.
3. A collection from a customer of \$100 in payment of its account owed was journalized and posted as a debit to Cash \$100 and a credit to Service Revenue \$100.
4. A credit posting of \$415 to Property Taxes Payable was made twice.
5. A cash purchase of supplies for \$250 was journalized and posted as a debit to Supplies \$25 and a credit to Cash \$25.
6. A debit of \$475 to Advertising Expense was posted as \$457.

**Instructions**

For each error:

- (a) Indicate whether the trial balance will balance.
- (b) If the trial balance will not balance, indicate the amount of the difference.
- (c) Indicate the trial balance column that will have the larger total.

Consider each error separately. Use the following form, in which error (1) is given as an example.

| <u>Error</u> | <u>(a)<br/>In Balance</u> | <u>(b)<br/>Difference</u> | <u>(c)<br/>Larger Column</u> |
|--------------|---------------------------|---------------------------|------------------------------|
| (1)          | No                        | \$525                     | debit                        |

Prepare a trial balance.

(SO 2, 7)

**E2-14** The accounts in the ledger of Bullucks Delivery Service contain the following balances on July 31, 2012.

|                     |          |                                 |          |
|---------------------|----------|---------------------------------|----------|
| Accounts Receivable | \$ 7,642 | Prepaid Insurance               | \$ 1,968 |
| Accounts Payable    | 8,396    | Maintenance and Repairs Expense | 961      |
| Cash                | ?        | Service Revenue                 | 10,610   |
| Equipment           | 49,360   | Owner’s Drawings                | 700      |
| Gasoline Expense    | 758      | Owner’s Capital                 | 42,000   |
| Insurance Expense   | 523      | Salaries and Wages Expense      | 4,428    |
| Notes Payable       | 17,000   | Salaries and Wages Payable      | 815      |

**Instructions**

Prepare a trial balance with the accounts arranged as illustrated in the chapter and fill in the missing amount for Cash.

## Exercises: Set B

Visit the book’s companion website, at [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), and choose the Student Companion site to access Exercise Set B.

## Problems: Set A

Journalize a series of transactions.

(SO 2, 4)

**P2-1A** Frontier Park was started on April 1 by H. Hillenmeyer. The following selected events and transactions occurred during April.

- Apr. 1 Hillenmeyer invested \$35,000 cash in the business.
- 4 Purchased land costing \$27,000 for cash.
- 8 Incurred advertising expense of \$1,800 on account.
- 11 Paid salaries to employees \$1,500.
- 12 Hired park manager at a salary of \$4,000 per month, effective May 1.
- 13 Paid \$1,650 cash for a one-year insurance policy.
- 17 Withdrew \$1,000 cash for personal use.
- 20 Received \$6,800 in cash for admission fees.
- 25 Sold 100 coupon books for \$25 each. Each book contains 10 coupons that entitle the holder to one admission to the park.
- 30 Received \$8,900 in cash admission fees.
- 30 Paid \$900 on balance owed for advertising incurred on April 8.

Hillenmeyer uses the following accounts: Cash, Prepaid Insurance, Land, Accounts Payable, Unearned Service Revenue, Owner’s Capital, Owner’s Drawings, Service Revenue, Advertising Expense, and Salaries and Wages Expense.

**Instructions**

Journalize the April transactions.

**P2-2A** Desiree Clark is a licensed CPA. During the first month of operations of her business, the following events and transactions occurred.

*Journalize transactions, post, and prepare a trial balance.*

(SO 2, 4, 6, 7)

- May 1 Clark invested \$20,000 cash in her business.
- 2 Hired a secretary-receptionist at a salary of \$2,000 per month.
- 3 Purchased \$2,500 of supplies on account from Read Supply Company.
- 7 Paid office rent of \$900 cash for the month.
- 11 Completed a tax assignment and billed client \$3,200 for services provided.
- 12 Received \$3,500 advance on a management consulting engagement.
- 17 Received cash of \$1,200 for services completed for C. Desmond Co.
- 31 Paid secretary-receptionist \$2,000 salary for the month.
- 31 Paid 60% of balance due Read Supply Company.

Desiree uses the following chart of accounts: No. 101 Cash, No. 112 Accounts Receivable, No. 126 Supplies, No. 201 Accounts Payable, No. 209 Unearned Service Revenue, No. 301 Owner’s Capital, No. 400 Service Revenue, No. 726 Salaries and Wages Expense, and No. 729 Rent Expense.

**Instructions**

- (a) Journalize the transactions.
- (b) Post to the ledger accounts.
- (c) Prepare a trial balance on May 31, 2012.

Trial balance totals \$28,900

**P2-3A** Jay Cutler owns and manages a computer repair service, which had the following trial balance on December 31, 2011 (the end of its fiscal year).

*Journalize transactions, post, and prepare a trial balance.*

(SO 2, 4, 6, 7)

**MEGA REPAIR SERVICE**

Trial Balance  
December 31, 2011

|                     |          |          |
|---------------------|----------|----------|
| Cash                | \$ 8,000 |          |
| Accounts Receivable | 15,000   |          |
| Supplies            | 13,000   |          |
| Prepaid Rent        | 3,000    |          |
| Equipment           | 20,000   |          |
| Accounts Payable    |          | \$19,000 |
| Owner’s Capital     |          | 40,000   |
|                     | \$59,000 | \$59,000 |

Summarized transactions for January 2012 were as follows.

- 1. Advertising costs, paid in cash, \$1,000.
- 2. Additional supplies acquired on account \$4,200.
- 3. Miscellaneous expenses, paid in cash, \$2,000.
- 4. Cash collected from customers in payment of accounts receivable \$14,000.
- 5. Cash paid to creditors for accounts payable due \$15,000.

6. Supplies used during January \$4,000.
7. Repair services performed during January: for cash \$6,000; on account \$9,000.
8. Wages for January, paid in cash, \$3,500.
9. Jay's drawings during January were \$3,000.

**Instructions**

- (a) Open T accounts for each of the accounts listed in the trial balance, and enter the opening balances for 2012.
- (b) Prepare journal entries to record each of the January transactions. (Omit explanations.)
- (c) Post the journal entries to the accounts in the ledger. (Add accounts as needed.)
- (d) Prepare a trial balance as of January 31, 2012.

Trial balance totals \$63,200

Prepare a correct trial balance.  
(SO 7)

**P2-4A** The trial balance of the Kellen Davis Company shown below does not balance.

**KELLEN DAVIS COMPANY**

Trial Balance  
May 31, 2012

|                            | <u>Debit</u>    | <u>Credit</u>   |
|----------------------------|-----------------|-----------------|
| Cash                       | \$ 5,850        |                 |
| Accounts Receivable        |                 | \$ 2,750        |
| Prepaid Insurance          | 700             |                 |
| Equipment                  | 8,000           |                 |
| Accounts Payable           |                 | 4,500           |
| Unearned Service Revenue   | 650             |                 |
| Owner's Capital            |                 | 11,700          |
| Service Revenue            | 6,690           |                 |
| Salaries and Wages Expense | 4,200           |                 |
| Advertising Expense        |                 | 1,100           |
| Insurance Expense          | 890             |                 |
|                            | <u>\$26,980</u> | <u>\$20,050</u> |

Your review of the ledger reveals that each account has a normal balance. You also discover the following errors.

1. The totals of the debit sides of Prepaid Insurance, Accounts Payable, and Insurance Expense were each understated \$100.
2. Transposition errors were made in Accounts Receivable and Service Revenue. Based on postings made, the correct balances were \$2,570 and \$6,960, respectively.
3. A debit posting to Salaries and Wages Expense of \$200 was omitted.
4. A \$1,000 cash drawing by the owner was debited to Owner's Capital for \$1,000 and credited to Cash for \$1,000.
5. A \$520 purchase of supplies on account was debited to Equipment for \$520 and credited to Cash for \$520.
6. A cash payment of \$540 for advertising was debited to Advertising Expense for \$54 and credited to Cash for \$54.
7. A collection from a customer for \$210 was debited to Cash for \$210 and credited to Accounts Payable for \$210.

**Instructions**

Prepare a correct trial balance. Note that the chart of accounts includes the following: Owner's Drawings and Supplies. (*Hint:* It helps to prepare the correct journal entry for the transaction described and compare it to the mistake made.)

Trial balance totals \$25,020

Journalize transactions, post,  
and prepare a trial balance.  
(SO 2, 4, 6, 7)

**P2-5A** The Chicago Theater is owned by Rashied Davis. All facilities were completed on March 31. At this time, the ledger showed: No. 101 Cash \$4,000, No. 140 Land \$10,000, No. 145 Buildings (concession stand, projection room, ticket booth, and screen) \$8,000, No. 157 Equipment \$6,000, No. 201 Accounts Payable \$2,000, No. 275 Mortgage Payable \$8,000, and No. 301 Owner's Capital \$18,000. During April, the following events and transactions occurred.

- Apr. 2 Paid film rental of \$1,100 on first movie.
- 3 Ordered two additional films at \$1,000 each.
- 9 Received \$2,800 cash from admissions.
- 10 Made \$2,000 payment on mortgage and \$1,000 for accounts payable due.

- 11 Chicago Theater contracted with Virginia McCaskey to operate the concession stand. McCaskey is to pay 17% of gross concession receipts (payable monthly) for the rental of the concession stand.
- 12 Paid advertising expenses \$500.
- 20 Received one of the films ordered on April 3 and was billed \$1,000. The film will be shown in April.
- 25 Received \$5,200 cash from admissions.
- 29 Paid salaries \$2,000.
- 30 Received statement from Virginia McCaskey showing gross concession receipts of \$1,000 and the balance due to The Chicago Theater of \$170 ( $\$1,000 \times 17\%$ ) for April. McCaskey paid one-half of the balance due and will remit the remainder on May 5.
- 30 Prepaid \$1,200 rental on special film to be run in May.

In addition to the accounts identified above, the chart of accounts shows: No. 112 Accounts Receivable, No. 136 Prepaid Rent, No. 400 Service Revenue, No. 429 Rent Revenue, No. 610 Advertising Expense, No. 726 Salaries and Wages Expense, and No. 729 Rent Expense.

### Instructions

- (a) Enter the beginning balances in the ledger as of April 1. Insert a check mark (✓) in the reference column of the ledger for the beginning balance.
- (b) Journalize the April transactions. Chicago records admission revenue as service revenue, rental of the concession stand as rent revenue, and film rental expense as rent expense.
- (c) Post the April journal entries to the ledger. Assume that all entries are posted from page 1 of the journal.
- (d) Prepare a trial balance on April 30, 2012.

Trial balance totals \$34,170

## Problems: Set B

**P2-1B** Forte Disc Golf Course was opened on March 1 by Matt Forte. The following selected events and transactions occurred during March.

- Mar. 1 Invested \$20,000 cash in the business.
- 3 Purchased Heeren's Golf Land for \$15,000 cash. The price consists of land \$12,000, shed \$2,000, and equipment \$1,000. (Make one compound entry.)
- 5 Paid advertising expenses of \$700.
- 6 Paid cash \$600 for a one-year insurance policy.
- 10 Purchased golf discs and other equipment for \$1,050 from Innova Company payable in 30 days.
- 18 Received \$1,100 in cash for golf fees earned (Forte records golf fees as service revenue).
- 19 Sold 150 coupon books for \$10 each. Each book contains 4 coupons that enable the holder to play one round of disc golf.
- 25 Withdrew \$800 cash for personal use.
- 30 Paid salaries of \$250.
- 30 Paid Innova Company in full.
- 31 Received \$2,100 cash for fees earned.

Matt Forte uses the following accounts: Cash, Prepaid Insurance, Land, Buildings, Equipment, Accounts Payable, Unearned Service Revenue, Owner's Capital, Owner's Drawings, Service Revenue, Advertising Expense, and Salaries and Wages Expense.

### Instructions

Journalize the March transactions.

**P2-2B** Victoria Hall is a licensed dentist. During the first month of the operation of her business, the following events and transactions occurred.

- April 1 Invested \$20,000 cash in her business.
- 1 Hired a secretary-receptionist at a salary of \$700 per week payable monthly.
- 2 Paid office rent for the month \$1,100.
- 3 Purchased dental supplies on account from Smile Company \$4,000.

Journalize a series of transactions.

(SO 2, 4)

Journalize transactions, post, and prepare a trial balance.

(SO 2, 4, 6, 7)

- 10 Provided dental services and billed insurance companies \$5,100.
- 11 Received \$1,000 cash advance from Trudy Borke for an implant.
- 20 Received \$2,100 cash for services completed and delivered to John Carl.
- 30 Paid secretary-receptionist for the month \$2,800.
- 30 Paid \$2,400 to Smile Company for accounts payable due.

Victoria uses the following chart of accounts: No. 101 Cash, No. 112 Accounts Receivable, No. 126 Supplies, No. 201 Accounts Payable, No. 209 Unearned Service Revenue, No. 301 Owner’s Capital, No. 400 Service Revenue, No. 726 Salaries and Wages Expense, and No. 729 Rent Expense.

**Instructions**

Trial balance totals \$29,800

- (a) Journalize the transactions.
- (b) Post to the ledger accounts.
- (c) Prepare a trial balance on April 30, 2012.

Journalize transactions, post, and prepare a trial balance. (SO 2, 4, 6, 7)

**P2-3B** San Jose Services was formed on May 1, 2012. The following transactions took place during the first month.

Transactions on May 1:

- 1. Jarron Gilbert invested \$40,000 cash in the company, as its sole owner.
- 2. Hired two employees to work in the warehouse. They will each be paid a salary of \$3,050 per month.
- 3. Signed a 2-year rental agreement on a warehouse; paid \$24,000 cash in advance for the first year.
- 4. Purchased furniture and equipment costing \$30,000. A cash payment of \$10,000 was made immediately; the remainder will be paid in 6 months.
- 5. Paid \$1,800 cash for a one-year insurance policy on the furniture and equipment.

Transactions during the remainder of the month:

- 6. Purchased basic office supplies for \$500 cash.
- 7. Purchased more office supplies for \$1,500 on account.
- 8. Total revenues earned were \$20,000—\$8,000 cash and \$12,000 on account.
- 9. Paid \$400 to suppliers for accounts payable due.
- 10. Received \$3,000 from customers in payment of accounts receivable.
- 11. Received utility bills in the amount of \$350, to be paid next month.
- 12. Paid the monthly salaries of the two employees, totalling \$6,100.

**Instructions**

Trial balance totals \$81,450

- (a) Prepare journal entries to record each of the events listed. (Omit explanations.)
- (b) Post the journal entries to T accounts.
- (c) Prepare a trial balance as of May 31, 2012.

Prepare a correct trial balance. (SO 7)

**P2-4B** The trial balance of Robbie Gould Co. shown below does not balance.

**ROBBIE GOULD CO.**

Trial Balance  
June 30, 2012

|                            | <u>Debit</u>    | <u>Credit</u>   |
|----------------------------|-----------------|-----------------|
| Cash                       |                 | \$ 3,340        |
| Accounts Receivable        | \$ 2,812        |                 |
| Supplies                   | 1,200           |                 |
| Equipment                  | 2,600           |                 |
| Accounts Payable           |                 | 3,666           |
| Unearned Service Revenue   | 1,100           |                 |
| Owner’s Capital            |                 | 8,000           |
| Owner’s Drawings           | 800             |                 |
| Service Revenue            |                 | 2,480           |
| Salaries and Wages Expense | 3,200           |                 |
| Supplies Expense           | 810             |                 |
|                            | <u>\$12,522</u> | <u>\$17,486</u> |

Each of the listed accounts has a normal balance per the general ledger. An examination of the ledger and journal reveals the following errors.

1. Cash received from a customer in payment of its account was debited for \$580, and Accounts Receivable was credited for the same amount. The actual collection was for \$850.
2. The purchase of a computer on account for \$710 was recorded as a debit to Supplies for \$710 and a credit to Accounts Payable for \$710.
3. Services were performed on account for a client for \$980. Accounts Receivable was debited for \$980, and Service Revenue was credited for \$98.
4. A debit posting to Salaries and Wages Expense of \$700 was omitted.
5. A payment of a balance due for \$306 was credited to Cash for \$306 and credited to Accounts Payable for \$360.
6. The withdrawal of \$600 cash for Gould's personal use was debited to Salaries and Wages Expense for \$600 and credited to Cash for \$600.

### Instructions

Prepare a correct trial balance. (*Hint:* It helps to prepare the correct journal entry for the transaction described and compare it to the mistake made.)

Trial balance totals \$15,462

**P2-5B** The Cora Theater, owned by Cora Graham, will begin operations in March. The Cora will be unique in that it will show only triple features of sequential theme movies. As of March 1, the ledger of Cora showed: No. 101 Cash \$3,000, No. 140 Land \$24,000, No. 145 Buildings (concession stand, projection room, ticket booth, and screen) \$10,000, No. 157 Equipment \$10,000, No. 201 Accounts Payable \$7,000, and No. 301 Owner's Capital \$40,000. During the month of March the following events and transactions occurred.

Journalize transactions, post, and prepare a trial balance.

(SO 2, 4, 6, 7)

- Mar. 2 Rented the three *Indiana Jones* movies to be shown for the first 3 weeks of March. The film rental was \$3,500; \$1,500 was paid in cash and \$2,000 will be paid on March 10.
- 3 Ordered the *Lord of the Rings* movies to be shown the last 10 days of March. It will cost \$200 per night.
- 9 Received \$4,000 cash from admissions.
- 10 Paid balance due on *Indiana Jones* movies rental and \$2,100 on March 1 accounts payable.
- 11 Cora Theater contracted with Caleb Hanie to operate the concession stand. Hanie is to pay 15% of gross concession receipts (payable monthly) for the rental of the concession stand.
- 12 Paid advertising expenses \$800.
- 20 Received \$5,000 cash from customers for admissions.
- 20 Received the *Lord of the Rings* movies and paid the rental fee of \$2,000.
- 31 Paid salaries of \$3,100.
- 31 Received statement from Caleb Hanie showing gross receipts from concessions of \$6,000 and the balance due to Cora Theater of \$900 ( $\$6,000 \times 15\%$ ) for March. Hanie paid one-half the balance due and will remit the remainder on April 5.
- 31 Received \$9,000 cash from customers for admissions.

In addition to the accounts identified above, the chart of accounts includes: No. 112 Accounts Receivable, No. 400 Service Revenue, No. 429 Rent Revenue, No. 610 Advertising Expense, No. 726 Salaries and Wages Expense, and No. 729 Rent Expense.

### Instructions

- (a) Enter the beginning balances in the ledger. Insert a check mark (✓) in the reference column of the ledger for the beginning balance.
- (b) Journalize the March transactions. Cora records admission revenue as service revenue, rental of the concession stand as rent revenue, and film rental expense as rent expense.
- (c) Post the March journal entries to the ledger. Assume that all entries are posted from page 1 of the journal.
- (d) Prepare a trial balance on March 31, 2012.

Trial balance totals \$63,800

Visit the book's companion website, at [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), and choose the Student Companion site to access Problem Set C.

### Continuing Cookie Chronicle

(Note: This is a continuation of the Cookie Chronicle from Chapter 1.)

**CCC2** After researching the different forms of business organization, Natalie Koebel decides to operate “Cookie Creations” as a proprietorship. She then starts the process of getting the business running. In November 2011, the following activities take place.

- Nov. 8 Natalie cashes her U.S. Savings Bonds and receives \$520, which she deposits in her personal bank account.
- 8 She opens a bank account under the name “Cookie Creations” and transfers \$500 from her personal account to the new account.
- 11 Natalie pays \$65 for advertising.
- 13 She buys baking supplies, such as flour, sugar, butter, and chocolate chips, for \$125 cash. (*Hint:* Use Supplies account.)
- 14 Natalie starts to gather some baking equipment to take with her when teaching the cookie classes. She has an excellent top-of-the-line food processor and mixer that originally cost her \$750. Natalie decides to start using it only in her new business. She estimates that the equipment is currently worth \$300. She invests the equipment in the business.
- 16 Natalie realizes that her initial cash investment is not enough. Her grandmother lends her \$2,000 cash, for which Natalie signs a note payable in the name of the business. Natalie deposits the money in the business bank account. (*Hint:* The note does not have to be repaid for 24 months. As a result, the note payable should be reported in the accounts as the last liability and also on the balance sheet as the last liability.)
- 17 She buys more baking equipment for \$900 cash.
- 20 She teaches her first class and collects \$125 cash.
- 25 Natalie books a second class for December 4 for \$150. She receives \$30 cash in advance as a down payment.
- 30 Natalie pays \$1,320 for a one-year insurance policy that will expire on December 1, 2011.

#### Instructions

- Prepare journal entries to record the November transactions.
- Post the journal entries to general ledger accounts.
- Prepare a trial balance at November 30.

## BROADENING YOUR PERSPECTIVE

### Financial Reporting and Analysis

#### Financial Reporting Problem: PepsiCo, Inc.

**BYP2-1** The financial statements of PepsiCo, Inc. are presented in Appendix A. The notes accompanying the statements contain the following selected accounts, stated in millions of dollars.

Accounts Payable  
Accounts Receivable  
Property, Plant, and Equipment

Income Taxes Payable  
Interest Expense  
Inventory

**Instructions**

- (a) Answer the following questions.
- (1) What is the increase and decrease side for each account?
  - (2) What is the normal balance for each account?
- (b) Identify the probable other account in the transaction and the effect on that account when:
- (1) Accounts Receivable is decreased.
  - (2) Accounts Payable is decreased.
  - (3) Inventory is increased.
- (c) Identify the other account(s) that ordinarily would be involved when:
- (1) Interest Expense is increased.
  - (2) Property, Plant, and Equipment is increased.

## Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

**BYP2-2** PepsiCo's financial statements are presented in Appendix A. Financial statements of The Coca-Cola Company are presented in Appendix B.

**Instructions**

- (a) Based on the information contained in the financial statements, determine the normal balance of the listed accounts for each company.

| PepsiCo   | Coca-Cola   |
|---|---|
| <ol style="list-style-type: none"> <li>1. Inventory</li> <li>2. Property, Plant, and Equipment</li> <li>3. Accounts Payable</li> <li>4. Interest Expense</li> </ol> | <ol style="list-style-type: none"> <li>1. Accounts Receivable</li> <li>2. Cash and Cash Equivalents</li> <li>3. Cost of Goods Sold</li> <li>4. Sales (revenue)</li> </ol> |

- (b) Identify the other account ordinarily involved when:
- (1) Accounts Receivable is increased.
  - (2) Salaries and Wages Payable is decreased.
  - (3) Property, Plant, and Equipment is increased.
  - (4) Interest Expense is increased.

## On the Web

**BYP2-3** Much information about specific companies is available on the Internet. Such information includes basic descriptions of the company's location, activities, industry, financial health, and financial performance.

**Address:** [biz.yahoo.com/i](http://biz.yahoo.com/i), or go to [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt)

**Steps**

1. Type in a company name, or use index to find company name.
2. Choose **Profile**. Perform instructions (a)–(c) below.
3. Click on the company's specific industry to identify competitors. Perform instructions (d)–(g) below.

**Instructions**

Answer the following questions.

- (a) What is the company's industry?
- (b) What was the company's total sales?
- (c) What was the company's net income?
- (d) What are the names of four of the company's competitors?
- (e) Choose one of these competitors.
- (f) What is this competitor's name? What were its sales? What was its net income?
- (g) Which of these two companies is larger by size of sales? Which one reported higher net income?

## Critical Thinking

### Decision Making Across the Organization

**BYP2-4** Lisa Ortega operates Ortega Riding Academy. The academy's primary sources of revenue are riding fees and lesson fees, which are paid on a cash basis. Lisa also boards horses for owners, who are billed monthly for boarding fees. In a few cases, boarders pay in advance of expected use. For its revenue transactions, the academy maintains the following accounts: No. 1 Cash, No. 5 Boarding Accounts Receivable, No. 27 Unearned Boarding Revenue, No. 51 Riding Revenue, No. 52 Lesson Revenue, and No. 53 Boarding Revenue.

The academy owns 10 horses, a stable, a riding corral, riding equipment, and office equipment. These assets are accounted for in accounts No. 11 Horses, No. 12 Building, No. 13 Riding Corral, No. 14 Riding Equipment, and No. 15 Office Equipment.

For its expenses, the academy maintains the following accounts: No. 6 Hay and Feed Supplies, No. 7 Prepaid Insurance, No. 21 Accounts Payable, No. 60 Salaries and Wages Expense, No. 61 Advertising Expense, No. 62 Utilities Expense, No. 63 Veterinary Expense, No. 64 Hay and Feed Expense, and No. 65 Insurance Expense.

Lisa makes periodic withdrawals of cash for personal living expenses. To record Lisa's equity in the business and her drawings, two accounts are maintained: No. 50 Owner's Capital, and No. 51 Owner's Drawings.

During the first month of operations an inexperienced bookkeeper was employed. Lisa Ortega asks you to review the following eight entries of the 50 entries made during the month. In each case, the explanation for the entry is correct.

|       |  |        |        |
|-------|--|--------|--------|
| May 1 | Cash   | 18,000 | 18,000 |
|       | Owner's Capital  |        |        |
|       | (Invested \$18,000 cash in business)   |        |        |
| 5     | Cash   | 250    | 250    |
|       | Riding Revenue   |        |        |
|       | (Received \$250 cash for lessons provided)                                       |        |        |
| 7     | Cash   | 300    | 300    |
|       | Boarding Revenue   |        |        |
|       | (Received \$300 for boarding of horses beginning June 1)                         |        |        |
| 14    | Riding Equipment   | 80     | 800    |
|       | Cash   |        |        |
|       | (Purchased desk and other office equipment for \$800 cash)                       |        |        |
| 15    | Salaries and Wages Expense   | 400    | 400    |
|       | Cash   |        |        |
|       | (Issued check to Lisa Ortega for personal use)                                   |        |        |
| 20    | Cash   | 148    | 184    |
|       | Riding Revenue   |        |        |
|       | (Received \$184 cash for riding fees)  |        |        |
| 30    | Veterinary Expense   | 75     | 75     |
|       | Accounts Payable   |        |        |
|       | (Received bill of \$75 from veterinarian for services rendered)                  |        |        |
| 31    | Hay and Feed Expense   | 1,700  | 1,700  |
|       | Cash   |        |        |
|       | (Purchased an estimated 2 months' supply of feed and hay for \$1,700 on account) |        |        |

#### Instructions

With the class divided into groups, answer the following.

- (a) Identify each journal entry that is correct. For each journal entry that is incorrect, prepare the entry that should have been made by the bookkeeper.

- (b) Which of the incorrect entries would prevent the trial balance from balancing?
- (c) What was the correct net income for May, assuming the bookkeeper reported net income of \$4,500 after posting all 50 entries?
- (d) What was the correct cash balance at May 31, assuming the bookkeeper reported a balance of \$12,475 after posting all 50 entries (and the only errors occurred in the items listed above)?

## Communication Activity

**BYP2-5** Woderson's Maid Company offers home-cleaning service. Two recurring transactions for the company are billing customers for services rendered and paying employee salaries. For example, on March 15, bills totaling \$6,000 were sent to customers and \$2,000 was paid in salaries to employees.

### Instructions

Write a memo to your instructor that explains and illustrates the steps in the recording process for each of the March 15 transactions. Use the format illustrated in the text under the heading, "The Recording Process Illustrated" (p. 64).

## Ethics Case

**BYP2-6** Mary Jansen is the assistant chief accountant at Casey Company, a manufacturer of computer chips and cellular phones. The company presently has total sales of \$20 million. It is the end of the first quarter. Mary is hurriedly trying to prepare a general ledger trial balance so that quarterly financial statements can be prepared and released to management and the regulatory agencies. The total credits on the trial balance exceed the debits by \$1,000. In order to meet the 4 p.m. deadline, Mary decides to force the debits and credits into balance by adding the amount of the difference to the Equipment account. She chose Equipment because it is one of the larger account balances; percentage-wise, it will be the least misstated. Mary "plugs" the difference! She believes that the difference will not affect anyone's decisions. She wishes that she had another few days to find the error but realizes that the financial statements are already late.

### Instructions

- (a) Who are the stakeholders in this situation?
- (b) What are the ethical issues involved in this case?
- (c) What are Mary's alternatives?

## "All About You" Activity

**BYP2-7** Every company needs to plan in order to move forward. Its top management must consider where it wants the company to be in three to five years. Like a company, you need to think about where you want to be three to five years from now, and you need to start taking steps now in order to get there. With some forethought, you can help yourself avoid a situation, like those described in the **All About You** feature (available online at the book's companion website) in which your résumé seems to need creative writing.

### Instructions

Provide responses to each of the following items.

- (a) Where would you like to be working in three to five years? Describe your plan for getting there by identifying between five and 10 specific steps that you need to take.
- (b) In order to get the job you want, you will need a résumé. Your résumé is the equivalent of a company's annual report. It needs to provide relevant and reliable information about your past accomplishments so that employers can decide whether to "invest" in you. Do a search on the Internet to find a good résumé format. What are the basic elements of a résumé?
- (c) A company's annual report provides information about a company's accomplishments. In order for investors to use the annual report, the information must be reliable; that is, users must have faith that the information is accurate and believable. How can you provide assurance that the information on your résumé is reliable?
- (d) Prepare a résumé assuming that you have accomplished the five to 10 specific steps you identified in part (a). Also, provide evidence that would give assurance that the information is reliable.

**Answers to Insight and Accounting Across the Organization Questions**

**p. 55 Keeping Score** **Q:** Do you think that the Chicago Bears football team would be likely to have the same major revenue and expense accounts as the Cubs? **A:** Because their businesses are similar—professional sports—many of the revenue and expense accounts for the baseball and football teams might be similar.

**p. 61 What Would Sam Do?** **Q:** Why did Sam Walton keep separate pigeonholes and blue binders? **A:** Using separate pigeonholes and blue binders for each store enabled Walton to accumulate and track the performance of each individual store easily. **Q:** Why bother to keep separate records for each store? **A:** Keeping separate records for each store provided Walton with more information about performance of individual stores and managers, and greater control. Walton would want and need the same advantages if he were starting his business today. The difference is that he might now use a computerized system for small businesses.

**p. 73 Why Accuracy Matters** **Q:** In order for these companies to prepare and issue financial statements, their accounting equations (debit and credits) must have been in balance at year-end. How could these errors or misstatements have occurred? **A:** A company's accounting equation (its books) can be in balance yet its financial statements have errors or misstatements because of the following: entire transactions were not recorded; transactions were recorded at wrong amounts; transactions were recorded in the wrong accounts; transactions were recorded in the wrong accounting period. Audits of financial statements uncover some, but obviously not all, errors or misstatements.

**Answers to Self-Test Questions**

1. b 2. c 3. d 4. d 5. d 6. b 7. a 8. c 9. b 10. c 11. d 12. c (\$16,000 - \$5,000) 13. a 14. c 15. a (\$5,000 + \$40,000 + \$10,000 + \$15,000 + \$61,000)

## IFRS A Look at IFRS

International companies use the same set of procedures and records to keep track of transaction data. Thus, the material in Chapter 2 dealing with the account, general rules of debit and credit, and steps in the recording process—the journal, ledger, and chart of accounts—is the same under both GAAP and IFRS.

## Key Points

- Transaction analysis is the same under IFRS and GAAP but, as you will see in later chapters, different standards sometimes impact how transactions are recorded.
- Rules for accounting for specific events sometimes differ across countries. For example, European companies rely less on historical cost and more on fair value than U.S. companies. Despite the differences, the double-entry accounting system is the basis of accounting systems worldwide.
- Both the IASB and FASB go beyond the basic definitions provided in this textbook for the key elements of financial statements, that is, assets, liabilities, equity, revenues, and expenses. The more substantive definitions, using the IASB definitional structure, are provided in the Chapter 1 *A Look at IFRS* discussion.
- A trial balance under IFRS follows the same format as shown in the textbook.

- As shown in the textbook, dollars signs are typically used only in the trial balance and the financial statements. The same practice is followed under IFRS, using the currency of the country that the reporting company is headquartered.
- In February 2010, the SEC expressed a desire to continue working toward a single set of high-quality standards. In deciding whether the United States should adopt IFRS, some of the issues the SEC said should be considered are:
  - ◆ Whether IFRS is sufficiently developed and consistent in application.
  - ◆ Whether the IASB is sufficiently independent.
  - ◆ Whether IFRS is established for the benefit of investors.
  - ◆ The issues involved in educating investors about IFRS.
  - ◆ The impact of a switch to IFRS on U.S. laws and regulations.
  - ◆ The impact on companies including changes to their accounting systems, contractual arrangements, corporate governance, and litigation.
  - ◆ The issues involved in educating accountants, so they can prepare statements under IFRS.

## Looking to the Future

The basic recording process shown in this textbook is followed by companies across the globe. It is unlikely to change in the future. The definitional structure of assets, liabilities, equity, revenues, and expenses may change over time as the IASB and FASB evaluate their overall conceptual framework for establishing accounting standards.

## IFRS Self-Test Questions

1. Which statement is *correct* regarding IFRS?
  - (a) IFRS reverses the rules of debits and credits, that is, debits are on the right and credits are on the left.
  - (b) IFRS uses the same process for recording transactions as GAAP.
  - (c) The chart of accounts under IFRS is different because revenues follow assets.
  - (d) None of the above statements are correct.
2. The expanded accounting equation under IFRS is as follows:
  - (a)  $\text{Assets} = \text{Liabilities} + \text{Owner's Capital} + \text{Owner's Drawings} + \text{Revenues} - \text{Expenses}$ .
  - (b)  $\text{Assets} + \text{Liabilities} = \text{Owner's Capital} + \text{Owner's Drawings} + \text{Revenues} - \text{Expenses}$ .
  - (c)  $\text{Assets} = \text{Liabilities} + \text{Owner's Capital} - \text{Owner's Drawings} + \text{Revenues} - \text{Expenses}$ .
  - (d)  $\text{Assets} = \text{Liabilities} + \text{Owner's Capital} + \text{Owner's Drawings} - \text{Revenues} - \text{Expenses}$ .
3. A trial balance:
  - (a) is the same under IFRS and GAAP.
  - (b) proves that transactions are recorded correctly.
  - (c) proves that all transactions have been recorded.
  - (d) will not balance if a correct journal entry is posted twice.
4. One difference between IFRS and GAAP is that:
  - (a) GAAP uses accrual-accounting concepts and IFRS uses primarily the cash basis of accounting.
  - (b) IFRS uses a different posting process than GAAP.
  - (c) IFRS uses more fair value measurements than GAAP.
  - (d) the limitations of a trial balance are different between IFRS and GAAP.

5. The general policy for using proper currency signs (dollar, yen, pound, etc.) is the same for both IFRS and this textbook. This policy is as follows:
- (a) Currency signs only appear in ledgers and journal entries.
  - (b) Currency signs are only shown in the trial balance.
  - (c) Currency signs are shown for all compound journal entries.
  - (d) Currency signs are shown in trial balances and financial statements.

## IFRS Concepts and Application

**IFRS2-1** Describe some of the issues the SEC must consider in deciding whether the United States should adopt IFRS.

### *International Financial Reporting*

#### **Problem: Zetar plc**

**IFRS2-2** The financial statements of *Zetar plc* are presented in Appendix C. The company's complete annual report, including the notes to its financial statements, is available at [www.zetarplc.com](http://www.zetarplc.com).

#### **Instructions**

Describe in which statement each of the following items is reported, and the position in the statement (e.g., current asset).

- (a) Other administrative expenses.
- (b) Cash at bank.
- (c) Borrowings and overdrafts.
- (d) Finance costs.

# CHAPTER 3

## Adjusting the Accounts

### Study Objectives

After studying this chapter, you should be able to:

- 1 Explain the time period assumption.
- 2 Explain the accrual basis of accounting.
- 3 Explain the reasons for adjusting entries.
- 4 Identify the major types of adjusting entries.
- 5 Prepare adjusting entries for deferrals.
- 6 Prepare adjusting entries for accruals.
- 7 Describe the nature and purpose of an adjusted trial balance.

### Feature Story

#### WHAT WAS YOUR PROFIT?

The accuracy of the financial reporting system depends on answers to a few fundamental questions: At what point has revenue been earned? At what point is the earnings process complete? When have expenses really been incurred?

During the 1990s, the stock prices of dot-com companies boomed. Most dot-coms earned most of their revenue from selling advertising space on their websites. To boost reported revenue, some dot-coms began swapping website ad space. Company A would put an ad for its website on company B's website, and company B would put an ad for its website on company A's website. No money changed hands, but each company recorded revenue (for the value of the space that it gave the other company on its site). This practice did little to boost net income, and it resulted in no additional cash flow—but it did boost *reported revenue*.

Regulators eventually put an end to this misleading practice.

Another type of transgression results from companies recording revenues or expenses in the wrong year. In fact, shifting revenues and expenses is one of the most common abuses of financial accounting. **Xerox**

admitted reporting billions of dollars of lease revenue in periods earlier than it should have been reported. And **WorldCom** stunned the financial markets with its admission that it had boosted net income by billions of dollars by delaying the recognition of expenses until later years.

Unfortunately, revelations such as these have become all too common in the corporate world. It is no wonder that a U.S. Trust survey of affluent Americans reported that 85% of respondents believed that there should be tighter regulation of financial disclosures; 66% said they did not trust the management of publicly traded companies.

Why did so many companies violate basic financial reporting rules and sound ethics? Many speculate that as stock prices climbed, executives were under increasing pressure to meet higher and higher earnings expectations. If actual results weren't as good as hoped for, some gave in to temptation and "adjusted" their numbers to meet market expectations.

## Inside **CHAPTER 3**

- **Ethics Insight: Cooking the Books?** (p.102)
- **Accounting Across the Organization: Turning Gift Cards into Revenue** (p.110)
- **International Insight: Cashing In on Accrual Accounting** (p.114)

# Preview of CHAPTER 3

In Chapter 1, you learned a neat little formula: Net income = Revenues – Expenses. In Chapter 2, you learned some rules for recording revenue and expense transactions. Guess what? Things are not really that nice and neat. In fact, it is often difficult for companies to determine in what time period they should report some revenues and expenses. In other words, in measuring net income, timing is everything.

The content and organization of Chapter 3 are as follows.

| Adjusting the Accounts   |   |  |
|--|---|--|
| Timing Issues  | The Basics of Adjusting Entries   | The Adjusted Trial Balance and Financial Statements  |
| <ul style="list-style-type: none"> <li>• Fiscal and calendar years</li> <li>• Accrual- vs. cash-basis accounting</li> <li>• Recognizing revenues and expenses</li> </ul> | <ul style="list-style-type: none"> <li>• Types of adjusting entries</li> <li>• Adjusting entries for deferrals</li> <li>• Adjusting entries for accruals</li> <li>• Summary of basic relationships</li> </ul> | <ul style="list-style-type: none"> <li>• Preparing the adjusted trial balance</li> <li>• Preparing financial statements</li> </ul> |

## Timing Issues

**Study Objective [1]**  
Explain the time period assumption.

### Alternative Terminology

The time period assumption is also called the *periodicity assumption*.

We would need no adjustments if we could wait to prepare financial statements until a company ended its operations. At that point, we could easily determine its final balance sheet and the amount of lifetime income it earned.

However, most companies need immediate feedback about how well they are doing. For example, management usually wants monthly financial statements, and the Internal Revenue Service requires all businesses to file annual tax returns. Therefore, **accountants divide the economic life of a business into artificial time periods**. This convenient assumption is referred to as the **time period assumption**.

Many business transactions affect more than one of these arbitrary time periods. For example, the airplanes purchased by **Southwest Airlines** five years ago are still in use today. We must determine the relevance of each business transaction to specific accounting periods. (How much of the cost of an airplane contributed to operations this year?)

### Fiscal and Calendar Years

Both small and large companies prepare financial statements periodically in order to assess their financial condition and results of operations. **Accounting time periods are generally a month, a quarter, or a year**. Monthly and quarterly time periods are called **interim periods**. Most large companies must prepare both quarterly and annual financial statements.

An accounting time period that is one year in length is a **fiscal year**. A fiscal year usually begins with the first day of a month and ends twelve months later on the last day of a month. Most businesses use the **calendar year** (January 1 to December 31) as their accounting period. Some do not. Companies whose fiscal year differs from the calendar year include **Delta Air Lines**, June 30, and **Walt Disney**

**Productions**, September 30. Sometimes a company's year-end will vary from year to year. For example, **PepsiCo's** fiscal year ends on the Friday closest to December 31, which was December 30 in 2008 and December 29 in 2009.

## Accrual- vs. Cash-Basis Accounting

What you will learn in this chapter is **accrual-basis accounting**. Under the accrual basis, companies record transactions that change a company's financial statements **in the periods in which the events occur**. For example, using the accrual basis to determine net income means companies recognize revenues when earned (rather than when they receive cash). It also means recognizing expenses when incurred (rather than when paid).

An alternative to the accrual basis is the cash basis. Under **cash-basis accounting**, companies record revenue when they receive cash. They record an expense when they pay out cash. The cash basis seems appealing due to its simplicity, but it often produces misleading financial statements. It fails to record revenue that a company has earned but for which it has not received the cash. Also, it does not match expenses with earned revenues. **Cash-basis accounting is not in accordance with generally accepted accounting principles (GAAP)**.

Individuals and some small companies do use cash-basis accounting. The cash basis is justified for small businesses because they often have few receivables and payables. Medium and large companies use accrual-basis accounting.

## Recognizing Revenues and Expenses

It can be difficult to determine the amount of revenues and expenses to report in a given accounting period. Two principles help in this task: the revenue recognition principle and the expense recognition principle.

### REVENUE RECOGNITION PRINCIPLE

The **revenue recognition principle** requires that companies recognize revenue in the accounting period **in which it is earned**. In a service enterprise, revenue is considered to be earned at the time the service is performed. To illustrate, assume that Dave's Dry Cleaning cleans clothing on June 30 but customers do not claim and pay for their clothes until the first week of July. Under the revenue recognition principle, Dave's earns revenue in June when it performed the service, rather than in July when it received the cash. At June 30, Dave's would report a receivable on its balance sheet and revenue in its income statement for the service performed.

### EXPENSE RECOGNITION PRINCIPLE

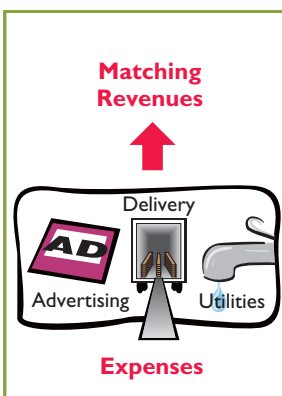

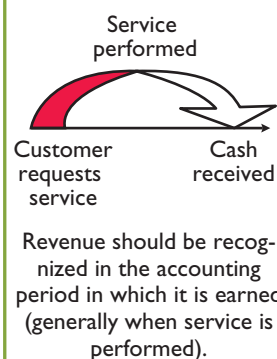

Accountants follow a simple rule in recognizing expenses: "Let the expenses follow the revenues." Thus, expense recognition is tied to revenue recognition. In the dry cleaning example, this means that Dave's should report the salary expense incurred in performing the June 30 cleaning service in the same period in which it recognizes the service revenue. The critical issue in expense recognition is when the expense makes its contribution to revenue. This may or may not be the same period in which the expense is paid. If Dave's does not pay the salary incurred on June 30 until July, it would report salaries payable on its June 30 balance sheet.

This practice of expense recognition is referred to as the **expense recognition principle** (often referred to as the **matching principle**). It dictates that efforts (expenses) be matched with results (revenues). Illustration 3-1 (page 102) summarizes the revenue and expense recognition principles.

### Study Objective [2]

Explain the accrual basis of accounting.

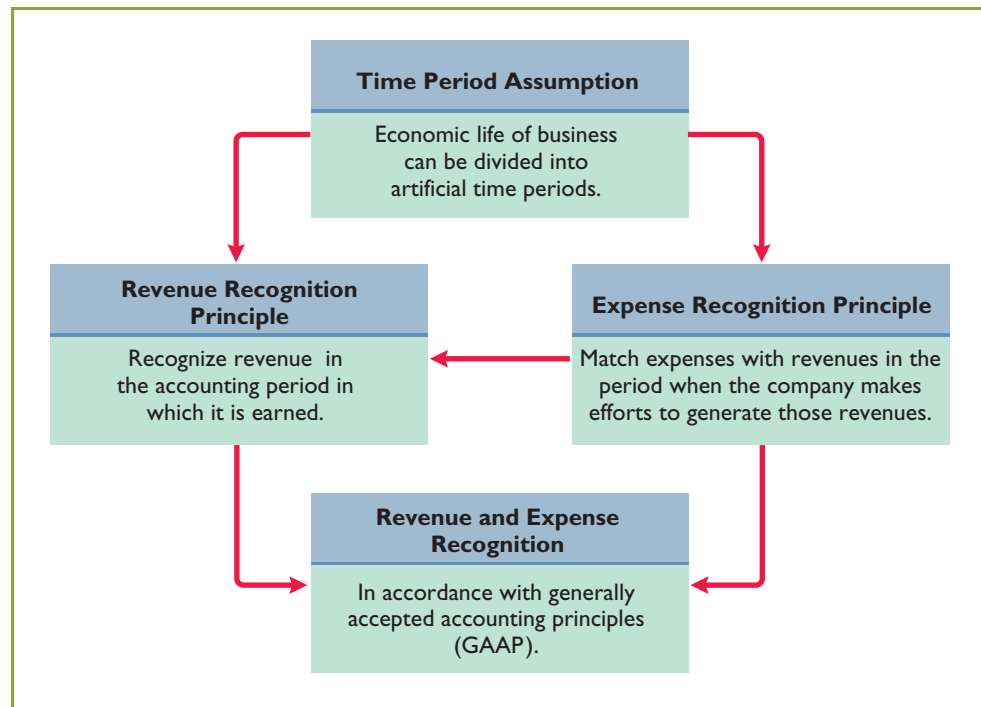

#### Revenue Recognition

**Illustration 3-1**

GAAP relationships in revenue and expense recognition

**ETHICS INSIGHT****Cooking the Books?**

Allegations of abuse of the revenue recognition principle have become all too common in recent years. For example, it was alleged that **Krispy Kreme** sometimes doubled the number of doughnuts shipped to wholesale customers at the end of a quarter to boost quarterly results. The customers shipped the unsold doughnuts back after the beginning of the next quarter for a refund. Conversely, **Computer Associates International** was accused of backdating sales—that is, saying that a sale that occurred at the beginning of one quarter occurred at the end of the previous quarter in order to achieve the previous quarter's sales targets.

**?** What motivates sales executives and finance and accounting executives to participate in activities that result in inaccurate reporting of revenues? (See page 148.)

**Do it!****Timing Concepts**

Numerous timing concepts are discussed on pages 100–102. A list of concepts is provided in the left column below, with a description of the concept in the right column below and on the next page. There are more descriptions provided than concepts. Match the description of the concept to the concept.

Related exercise material: E3-1, E3-2, E3-3, and **Do it!** 3-1.

## The Basics of Adjusting Entries

In order for revenues to be recorded in the period in which they are earned, and for expenses to be recognized in the period in which they are incurred, companies make adjusting entries. **Adjusting entries ensure that the revenue recognition and expense recognition principles are followed.**

Adjusting entries are necessary because the **trial balance**—the first pulling together of the transaction data—may not contain up-to-date and complete data. This is true for several reasons:

1. Some events are not recorded daily because it is not efficient to do so. Examples are the use of supplies and the earning of wages by employees.
2. Some costs are not recorded during the accounting period because these costs expire with the passage of time rather than as a result of recurring daily transactions. Examples are charges related to the use of buildings and equipment, rent, and insurance.
3. Some items may be unrecorded. An example is a utility service bill that will not be received until the next accounting period.

**Adjusting entries are required every time a company prepares financial statements.** The company analyzes each account in the trial balance to determine whether it is complete and up to date for financial statement purposes. **Every adjusting entry will include one income statement account and one balance sheet account.**

**Study Objective [3]**

Explain the reasons for adjusting entries.

**International Note**

Internal controls are a system of checks and balances designed to detect and prevent fraud and errors. The Sarbanes-Oxley Act requires U.S. companies to enhance their systems of internal control. However, many foreign companies do not have to meet strict internal control requirements. Some U.S. companies believe that this gives foreign firms an unfair advantage because developing and maintaining internal controls can be very expensive.

### Types of Adjusting Entries

Adjusting entries are classified as either **deferrals** or **accruals**. As Illustration 3-2 shows, each of these classes has two subcategories.

**Study Objective [4]**

Identify the major types of adjusting entries.

**Deferrals:**

1. **Prepaid expenses:** Expenses paid in cash and recorded as assets before they are used or consumed.
2. **Unearned revenues:** Cash received and recorded as liabilities before revenue is earned.

**Accruals:**

1. **Accrued revenues:** Revenues earned but not yet received in cash or recorded.
2. **Accrued expenses:** Expenses incurred but not yet paid in cash or recorded.

**Illustration 3-2**

Categories of adjusting entries

Subsequent sections give examples of each type of adjustment. Each example is based on the October 31 trial balance of Pioneer Advertising, from Chapter 2, reproduced in Illustration 3-3.

**Illustration 3-3**

Trial balance

|-----------------------------------|-----------------|-----------------|
| Trial Balance                     |                 |                 |
| October 31, 2012                  |                 |                 |
|                                   | <u>Debit</u>    | <u>Credit</u>   |
| Cash                              | \$15,200        |                 |
| Supplies                          | 2,500           |                 |
| Prepaid Insurance                 | 600             |                 |
| Equipment                         | 5,000           |                 |
| Notes Payable                     |                 | \$ 5,000        |
| Accounts Payable                  |                 | 2,500           |
| Unearned Service Revenue          |                 | 1,200           |
| Owner's Capital                   |                 | 10,000          |
| Owner's Drawings                  | 500             |                 |
| Service Revenue                   |                 | 10,000          |
| Salaries and Wages Expense        | 4,000           |                 |
| Rent Expense                      | 900             |                 |
|                                   | <u>\$28,700</u> | <u>\$28,700</u> |

We assume that Pioneer Advertising uses an accounting period of one month. Thus, monthly adjusting entries are made. The entries are dated October 31.

### *Adjusting Entries For Deferrals*

#### Study Objective [5]

Prepare adjusting entries for deferrals.

To defer means to postpone or delay. **Deferrals** are costs or revenues that are recognized at a date later than the point when cash was originally exchanged. Companies make adjusting entries for deferrals to record the portion of the deferred item that was incurred as an expense or earned as revenue during the current accounting period. The two types of deferrals are prepaid expenses and unearned revenues.

#### **PREPAID EXPENSES**

Companies record payments of expenses that will benefit more than one accounting period as assets called **prepaid expenses** or **prepayments**. When expenses are prepaid, an asset account is increased (debited) to show the service or benefit that the company will receive in the future. Examples of common prepayments are insurance, supplies, advertising, and rent. In addition, companies make prepayments when they purchase buildings and equipment.

**Prepaid expenses are costs that expire either with the passage of time** (e.g., rent and insurance) **or through use** (e.g., supplies). The expiration of these costs does not require daily entries, which would be impractical and unnecessary. Accordingly, companies postpone the recognition of such cost expirations until they prepare financial statements. At each statement date, they make adjusting entries to record the expenses applicable to the current accounting period and to show the remaining amounts in the asset accounts.

Prior to adjustment, assets are overstated and expenses are understated. Therefore, as shown in Illustration 3-4, **an adjusting entry for prepaid expenses results in an increase (a debit) to an expense account and a decrease (a credit) to an asset account.**

**Illustration 3-4**  
Adjusting entries for prepaid expenses

Let's look in more detail at some specific types of prepaid expenses, beginning with supplies.

**Supplies.** The purchase of supplies, such as paper and envelopes, results in an increase (a debit) to an asset account. During the accounting period, the company uses supplies. Rather than record supplies expense as the supplies are used, companies recognize supplies expense at the **end** of the accounting period. At the end of the accounting period, the company counts the remaining supplies. The difference between the unadjusted balance in the Supplies (asset) account and the actual cost of supplies on hand represents the supplies used (an expense) for that period (page 106).

Recall from Chapter 2 that Pioneer Advertising purchased supplies costing \$2,500 on October 5. Pioneer recorded the purchase by increasing (debiting) the asset Supplies. This account shows a balance of \$2,500 in the October 31 trial balance. An inventory count at the close of business on October 31 reveals that \$1,000 of supplies are still on hand. Thus, the cost of supplies used is \$1,500 (\$2,500 - \$1,000). This use of supplies decreases an asset, Supplies. It also decreases owner's equity by increasing an expense account, Supplies Expense. This is shown in Illustration 3-5.

**Supplies**

| 1 YEAR \$600     |               |               |              |

Oct. 31  
Insurance expired;  
record insurance expense

After adjustment, the asset account Supplies shows a balance of \$1,000, which is equal to the cost of supplies on hand at the statement date. In addition, Supplies Expense shows a balance of \$1,500, which equals the cost of supplies used in October. **If Pioneer does not make the adjusting entry, October expenses will be understated and net income overstated by \$1,500. Moreover, both assets and owner's equity will be overstated by \$1,500 on the October 31 balance sheet.**

**Insurance.** Companies purchase insurance to protect themselves from losses due to fire, theft, and unforeseen events. Insurance must be paid in advance, often for more than one year. The cost of insurance (premiums) paid in advance is recorded as an increase (debit) in the asset account prepaid insurance. At the financial statement date, companies increase (debit) Insurance expense and decrease (credit) Prepaid insurance for the cost of insurance that has expired during the period.

On October 4, Pioneer Advertising paid \$600 for a one-year fire insurance policy. Coverage began on October 1. Pioneer recorded the payment by increasing (debiting) Prepaid Insurance. This account shows a balance of \$600 in the October 31 trial balance. Insurance of \$50 ( $\$600 \div 12$ ) expires each month. The expiration of prepaid insurance decreases an asset, Prepaid Insurance. It also decreases owner's equity by increasing an expense account, Insurance Expense.

As shown in Illustration 3-6, the asset Prepaid Insurance shows a balance of \$550, which represents the unexpired cost for the remaining 11 months of coverage. At the same time, the balance in Insurance Expense equals the insurance cost that expired in October. If Pioneer does not make this adjustment, October expenses are understated by \$50 and net income is overstated by \$50. Moreover, as the accounting equation shows, both assets and owner's equity will be overstated by \$50 on the October 31 balance sheet.

**Depreciation.** A company typically owns a variety of assets that have long lives, such as buildings, equipment, and motor vehicles. The period of service is referred to as the **useful life** of the asset. Because a building is expected to provide service for many years, it is recorded as an asset, rather than an expense, on the date it is acquired. As explained in Chapter 1, companies record such assets **at cost**, as required by the cost principle. To follow the expense recognition principle, companies allocate a portion of this cost as an expense during each period of the asset's useful life. **Depreciation** is the process of allocating the cost of an asset to expense over its useful life.

**Need for Adjustment.** The acquisition of long-lived assets is essentially a long-term prepayment for the use of an asset. An adjusting entry for depreciation is needed to recognize the cost that has been used (an expense) during the period and to report the unused cost (an asset) at the end of the period. One very important point to understand: **Depreciation is an allocation concept, not a valuation concept.** That is, depreciation **allocates an asset's cost to the periods in which it is used. Depreciation does not attempt to report the actual change in the value of the asset.**

For Pioneer Advertising, assume that depreciation on the equipment is \$480 a year, or \$40 per month. As shown in Illustration 3-7 below, rather than decrease (credit) the asset account directly, Pioneer instead credits Accumulated Depreciation—Equipment. Accumulated Depreciation is called a **contra asset account**. Such an account is offset against an asset account on the balance sheet. Thus, the Accumulated Depreciation—Equipment account offsets the asset Equipment. This account keeps track of the total amount of depreciation expense taken over the life of the asset. To keep the accounting equation in balance, Pioneer decreases owner's equity by increasing an expense account, Depreciation Expense.

**Depreciation**

**Illustration 3-7**  
Adjustment for depreciation

**Helpful Hint**

All contra accounts have increases, decreases, and normal balances **opposite** to the account to which they relate.

The balance in the Accumulated Depreciation—Equipment account will increase \$40 each month, and the balance in Equipment remains \$5,000.

**Statement Presentation.** As indicated, Accumulated Depreciation—Equipment is a contra asset account. It is offset against Equipment on the balance sheet. The normal balance of a contra asset account is a credit. A theoretical alternative to using a contra asset account would be to decrease (credit) the asset account by the amount of depreciation each period. But using the contra account is preferable for a simple reason: It discloses *both* the original cost of the equipment *and* the total cost that has expired to date. Thus, in the balance sheet, Pioneer deducts Accumulated Depreciation—Equipment from the related asset account, as shown in Illustration 3-8.

**Illustration 3-8**

Balance sheet presentation of accumulated depreciation

|  |         |
|--|---------|
| Equipment                                | \$5,000 |
| Less: Accumulated depreciation—equipment | 40      |
|  | \$4,960 |

**Alternative Terminology**

Book value is also referred to as *carrying value*.

**Book value** is the difference between the cost of any depreciable asset and its related accumulated depreciation. In Illustration 3-8, the book value of the equipment at the balance sheet date is \$4,960. The book value and the fair value of the asset are generally two different values. As noted earlier, **the purpose of depreciation is not valuation but a means of cost allocation.**

Depreciation expense identifies the portion of an asset’s cost that expired during the period (in this case, in October). The accounting equation shows that without this adjusting entry, total assets, total owner’s equity, and net income are overstated by \$40 and depreciation expense is understated by \$40.

Illustration 3-9 summarizes the accounting for prepaid expenses.

**Illustration 3-9**

Accounting for prepaid expenses

**Unearned Revenues**

Oct. 2

Cash is received in advance; liability is recorded

Oct. 31

Some service has been provided; some revenue is recorded

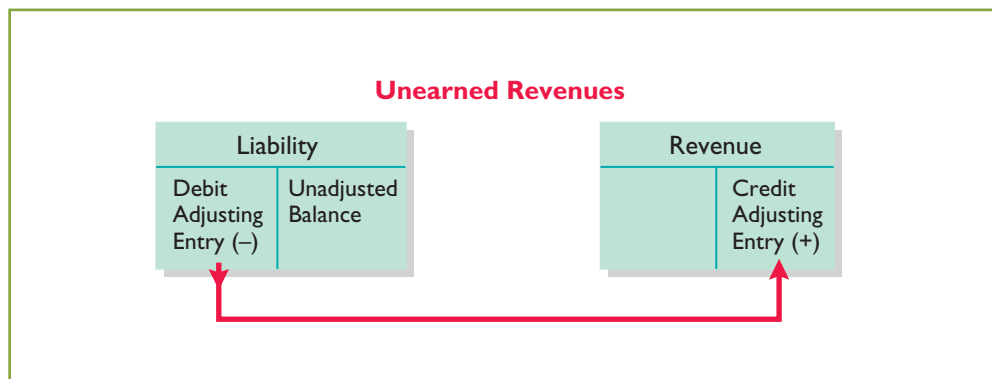

**UNEARNED REVENUES**

Companies record cash received before revenue is earned by increasing (crediting) a liability account called **unearned revenues**. Items like rent, magazine subscriptions, and customer deposits for future service may result in unearned revenues. Airlines such as **United**, **American**, and **Delta**, for instance, treat receipts from the sale of tickets as unearned revenue until the flight service is provided.

Unearned revenues are the opposite of prepaid expenses. Indeed, unearned revenue on the books of one company is likely to be a prepaid expense on the books of the company that has made the advance payment. For example, if identical accounting periods are assumed, a landlord will have unearned rent revenue when a tenant has prepaid rent.

When a company receives payment for services to be provided in a future accounting period, it increases (credits) an unearned revenue (a liability) account to recognize the liability that exists. The company subsequently earns revenues by

providing service. During the accounting period, it is not practical to make daily entries as the company earns the revenue. Instead, we delay recognition of earned revenue until the adjustment process. Then the company makes an adjusting entry to record the revenue earned during the period and to show the liability that remains at the end of the accounting period. Typically, prior to adjustment, liabilities are overstated and revenues are understated. Therefore, as shown in Illustration 3-10, **the adjusting entry for unearned revenues results in a decrease (a debit) to a liability account and an increase (a credit) to a revenue account.**

**Illustration 3-10**  
Adjusting entries for unearned revenues

Pioneer Advertising received \$1,200 on October 2 from R. Knox for advertising services expected to be completed by December 31. Pioneer credited the payment to Unearned Service Revenue, and this liability account shows a balance of \$1,200 in the October 31 trial balance. From an evaluation of the service Pioneer performed for Knox during October, the company determines that it has earned \$400 in October. The liability (Unearned Service Revenue) is therefore decreased, and owner's equity (Service Revenue) is increased.

As shown in Illustration 3-11, the liability Unearned Service Revenue now shows a balance of \$800. That amount represents the remaining advertising services

**Illustration 3-11**  
Service revenue accounts after adjustment

expected to be performed in the future. At the same time, Service Revenue shows total revenue earned in October of \$10,400. **Without this adjustment, revenues and net income are understated by \$400 in the income statement. Moreover, liabilities are overstated and owner’s equity is understated by \$400 on the October 31 balance sheet.**

Illustration 3-12 summarizes the accounting for unearned revenues.

## ACCOUNTING ACROSS THE ORGANIZATION

### Turning Gift Cards into Revenue

Those of you who are marketing majors (and even most of you who are not) know that gift cards are among the hottest marketing tools in merchandising today. Customers purchase gift cards and give them to someone for later use. In a recent year, gift-card sales topped \$95 billion.

Although these programs are popular with marketing executives, they create accounting questions. Should revenue be recorded at the time the gift card is sold, or when it is exercised? How should expired gift cards be accounted for? In its 2009 balance sheet, Best Buy reported unearned revenue related to gift cards of \$479 million.

Source: Robert Berner, "Gift Cards: No Gift to Investors," *BusinessWeek* (March 14, 2005), p. 86.

**?** Suppose that Robert Jones purchases a \$100 gift card at Best Buy on December 24, 2011, and gives it to his wife, Mary Jones, on December 25, 2011. On January 3, 2012, Mary uses the card to purchase \$100 worth of CDs. When do you think Best Buy should recognize revenue and why? (See page 148.)

## Do it!

### Adjusting Entries for Deferrals

The ledger of Hammond Company, on March 31, 2012, includes these selected accounts before adjusting entries are prepared.

|                                    | <u>Debit</u> | <u>Credit</u> |
|------------------------------------|--------------|---------------|
| Prepaid Insurance                  | \$ 3,600     |               |
| Supplies                           | 2,800        |               |
| Equipment                          | 25,000       |               |
| Accumulated Depreciation—Equipment |              | \$5,000       |
| Unearned Service Revenue           |              | 9,200         |

An analysis of the accounts shows the following.

1. Insurance expires at the rate of \$100 per month.
2. Supplies on hand total \$800.
3. The equipment depreciates \$200 a month.
4. One-half of the unearned service revenue was earned in March.

Prepare the adjusting entries for the month of March.

**Solution**

|                                    |       |       |
|------------------------------------|-------|-------|
| 1. Insurance Expense               | 100   |       |
| Prepaid Insurance                  |       | 100   |
| (To record insurance expired)      |       |       |
| 2. Supplies Expense                | 2,000 |       |
| Supplies                           |       | 2,000 |
| (To record supplies used)          |       |       |

| 4. Unearned Service Revenue        | 4,600 |       |
| Service Revenue                    |       | 4,600 |
| (To record revenue earned)         |       |       |

Related exercise material: BE3-3, BE3-4, BE3-6, and **Do it!** 3-2.

**action plan**

- ✓ Make adjusting entries at the end of the period for revenues earned and expenses incurred in the period.
- ✓ Don't forget to make adjusting entries for deferrals. Failure to adjust for deferrals leads to overstatement of the asset or liability and understatement of the related expense or revenue.

## Adjusting Entries for Accruals

The second category of adjusting entries is **accruals**. Prior to an accrual adjustment, the revenue account (and the related asset account) or the expense account (and the related liability account) are understated. Thus, the adjusting entry for accruals will **increase both a balance sheet and an income statement account**.

### ACCRUED REVENUES

Revenues earned but not yet recorded at the statement date are **accrued revenues**. Accrued revenues may accumulate (accrue) with the passing of time, as in the case of interest revenue. These are unrecorded because the earning of interest does not involve daily transactions. Companies do not record interest revenue on a daily basis because it is often impractical to do so. Accrued revenues also may result from services that have been performed but not yet billed nor collected, as in the case of commissions and fees. These may be unrecorded because only a portion of the total service has been provided and the clients won't be billed until the service has been completed.

An adjusting entry records the receivable that exists at the balance sheet date and the revenue earned during the period. Prior to adjustment, both assets and revenues are understated. As shown in Illustration 3-13, **an adjusting entry for accrued revenues results in an increase (a debit) to an asset account and an increase (a credit) to a revenue account**.

### Study Objective [6]

Prepare adjusting entries for accruals.

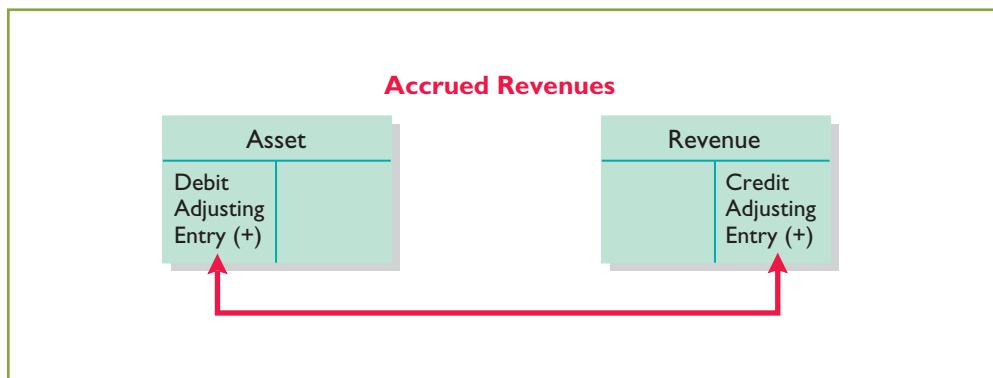

**Accrued Revenues**

Oct. 31

Revenue and receivable are recorded for unbilled services

Nov. 10

Cash is received; receivable is reduced

**Illustration 3-13**

Adjusting entries for accrued revenues

**Helpful Hint**

For accruals, there may have been no prior entry, and the accounts requiring adjustment may both have zero balances prior to adjustment.

In October, Pioneer Advertising earned \$200 for advertising services that were not billed to clients on or before October 31. Because these services are not billed, they are not recorded. The accrual of unrecorded service revenue increases an asset account, Accounts Receivable. It also increases owner's equity by increasing a revenue account, Service Revenue, as shown in Illustration 3-14.

**Illustration 3-14**  
Adjustment for accrued revenue

| Basic Analysis        | The asset Accounts Receivable is increased \$200, and the revenue Service Revenue is increased \$200.   |  |                     |                 |         |  |                     |     |         |          |                 |   |  |                 |  |        |         |        |  |    |     |  |    |          |  |         |             |  |

*Equation analyses summarize the effects of transactions on the three elements of the accounting equation, as well as the effect on cash flows.*

|                   |   |      |   |    |
|-------------------|---|------|---|----|
| A                 | = | L    | + | OE |
| +200              |   | -200 |   |    |
| <b>Cash Flows</b> |   |      |   |    |
| +200              |   |      |   |    |

The asset Accounts Receivable shows that clients owe Pioneer \$200 at the balance sheet date. The balance of \$10,600 in Service Revenue represents the total revenue Pioneer earned during the month (\$10,000 + \$400 + \$200). **Without the adjusting entry, assets and owner's equity on the balance sheet and revenues and net income on the income statement are understated.**

On November 10, Pioneer receives cash of \$200 for the services performed in October and makes the following entry.

|         |                                       |     |     |
|---------|---------------------------------------|-----|-----|
| Nov. 10 | Cash                                  | 200 |     |
|         | Accounts Receivable                   |     | 200 |
|         | (To record cash collected on account) |     |     |

The company records the collection of the receivables by a debit (increase) to Cash and a credit (decrease) to Accounts Receivable.

Illustration 3-15 summarizes the accounting for accrued revenues.

**Illustration 3-15**  
Accounting for accrued revenues

|--|---|--|----------------------------|
| Examples   | Reason for Adjustment   | Accounts Before Adjustment                   | Adjusting Entry            |
| Interest, rent, services performed but not collected | Revenues have been earned but not yet received in cash or recorded. | Assets understated.<br>Revenues understated. | Dr. Assets<br>Cr. Revenues |

### ACCRUED EXPENSES

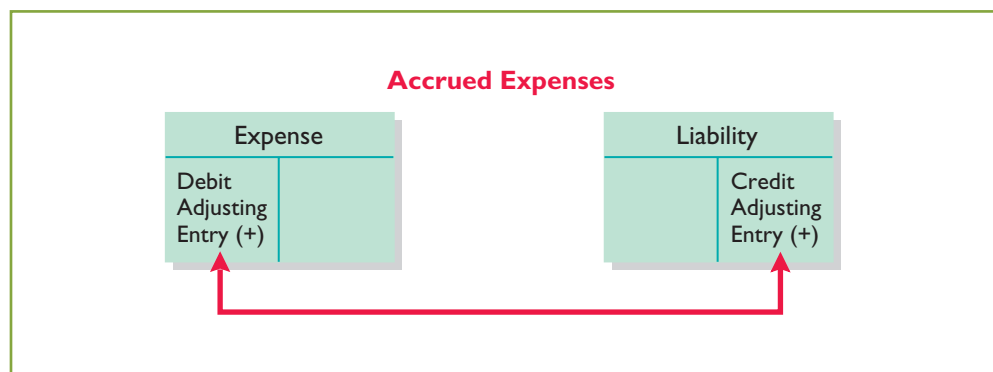

Expenses incurred but not yet paid or recorded at the statement date are called **accrued expenses**. Interest, taxes, and salaries are common examples of accrued expenses.

Companies make adjustments for accrued expenses to record the obligations that exist at the balance sheet date and to recognize the expenses that apply to the current accounting period. Prior to adjustment, both liabilities and expenses are understated. Therefore, as Illustration 3-16 shows, **an adjusting entry for accrued expenses results in an increase (a debit) to an expense account and an increase (a credit) to a liability account.**

#### Ethics Note

A report released by Fannie Mae's board of directors stated that improper adjusting entries at the mortgage-finance company resulted in delayed recognition of expenses caused by interest-rate changes. The motivation for such accounting apparently was the desire to hit earnings estimates.

**Illustration 3-16**  
Adjusting entries for accrued expenses

Let's look in more detail at some specific types of accrued expenses, beginning with accrued interest.

**Accrued Interest.** Pioneer Advertising signed a three-month note payable in the amount of \$5,000 on October 1. The note requires Pioneer to pay interest at an annual rate of 12%.

The amount of the interest recorded is determined by three factors: (1) the face value of the note; (2) the interest rate, which is always expressed as an annual rate; and (3) the length of time the note is outstanding. For Pioneer, the total interest due on the \$5,000 note at its maturity date three months in the future is \$150 ( $\$5,000 \times 12\% \times \frac{3}{12}$ ), or \$50 for one month. Illustration 3-17 shows the formula for computing interest and its application to Pioneer for the month of October.

|                    |   |                      |   |                           |   |          |
|--------------------|---|----------------------|---|---------------------------|---|----------|
| Face Value of Note | × | Annual Interest Rate | × | Time in Terms of One Year | = | Interest |
| \$5,000            | × | 12%                  | × | $\frac{1}{12}$            | = | \$50     |

**Illustration 3-17**  
Formula for computing interest

As Illustration 3-18 (page 114) shows, the accrual of interest at October 31 increases a liability account, Interest Payable. It also decreases owner's equity by increasing an expense account, Interest Expense.

Interest Expense shows the interest charges for the month of October. Interest Payable shows the amount of interest the company owes at the statement date. Pioneer will not pay the interest until the note comes due at the end of three months. Companies use the Interest Payable account, instead of crediting Notes Payable, to disclose the two different types of obligations—interest and principal—in the accounts and statements. **Without this adjusting entry, liabilities and interest expense are understated, and net income and owner's equity are overstated.**

#### Helpful Hint

In computing interest, we express the time period as a fraction of a year.

## INTERNATIONAL INSIGHT

### Cashing In on Accrual Accounting

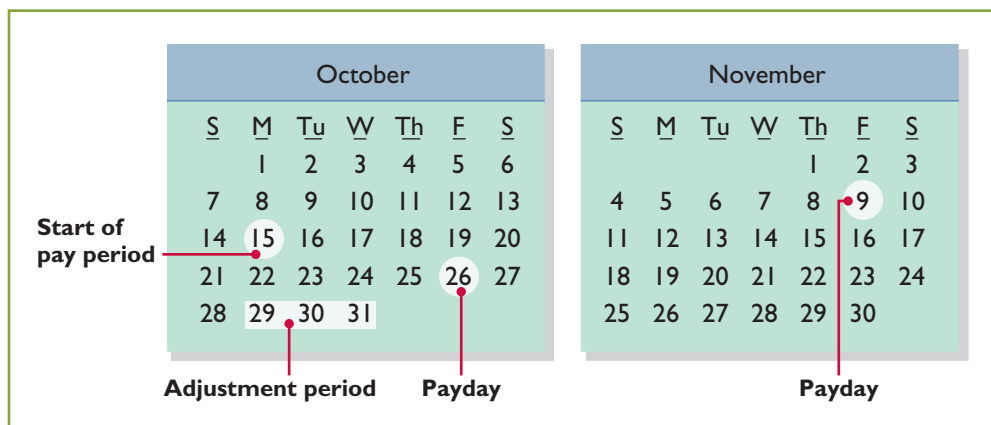

The Chinese government, like most governments, uses cash accounting. It was therefore interesting when it was recently reported that for about \$38 billion of expenditures in a recent budget projection, the Chinese government decided to use accrual accounting versus cash accounting. It decided to expense the amount in the year in which it was originally allocated rather than when the payments would be made. Why did it do this? It enabled the government to keep its projected budget deficit below a 3% threshold. While it was able to keep its projected shortfall below 3%, China did suffer some criticism for its inconsistent accounting. Critics charge that this inconsistent treatment reduces the transparency of China's accounting information. That is, it is not easy for outsiders to accurately evaluate what is really going on.

Source: Andrew Batson, "China Altered Budget Accounting to Reduce Deficit Figure," *Wall Street Journal Online* (March 15, 2010).

**?** Accrual accounting is often considered superior to cash accounting. Why, then, were some people critical of China's use of accrual accounting in this instance? (See page 148.)

**Accrued Salaries and Wages.** Companies pay for some types of expenses, such as employee salaries and wages, after the services have been performed. Pioneer paid salaries and wages on October 26 for its employees' first two weeks of work; the next payment of salaries will not occur until November 9. As Illustration 3-19 shows, three working days remain in October (October 29–31).

At October 31, the salaries and wages for these three days represent an accrued expense and a related liability to Pioneer. The employees receive total salaries and wages of \$2,000 for a five-day work week, or \$400 per day. Thus, accrued salaries and wages at October 31 are \$1,200 (\$400 × 3). This accrual increases a liability, Salaries and Wages Payable. It also decreases

**Illustration 3-19**  
Calendar showing Pioneer's pay periods

owner's equity by increasing an expense account, Salaries and Wages Expense, as shown in Illustration 3-20.

| Basic Analysis             | The expense Salaries and Wages Expense is increased \$1,200, and the liability account Salaries and Wages Payable is decreased \$1,200.   |                            |  |             |                  |                            |                            |           |            |  |         |            |  |   |                            |  |     |         |            |  |         |            |  |  |

**Illustration 3-20**  
Adjustment for accrued salaries and wages

After this adjustment, the balance in Salaries and Wages Expense of \$5,200 (13 days × \$400) is the actual salary and wages expense for October. The balance in Salaries and Wages Payable of \$1,200 is the amount of the liability for salaries and wages Pioneer owes as of October 31. **Without the \$1,200 adjustment for salaries and wages, Pioneer's expenses are understated \$1,200 and its liabilities are understated \$1,200.**

Pioneer Advertising pays salaries and wages every two weeks. Consequently, the next payday is November 9, when the company will again pay total salaries and wages of \$4,000. The payment consists of \$1,200 of salaries and wages payable at October 31 plus \$2,800 of salaries and wages expense for November (7 working days, as shown in the November calendar × \$400). Therefore, Pioneer makes the following entry on November 9.

|        |  |                |       |
|--------|--|----------------|-------|
| Nov. 9 | Salaries and Wages Payable<br>Salaries and Wages Expense<br>Cash<br>(To record November 9 payroll) | 1,200<br>2,800 | 4,000 |
|--------|--|----------------|-------|

This entry eliminates the liability for Salaries and Wages Payable that Pioneer recorded in the October 31 adjusting entry, and it records the proper amount of Salaries and Wages Expense for the period between November 1 and November 9.

Illustration 3-21 summarizes the accounting for accrued expenses.

## Do it!

### Adjusting Entries for Accruals

Calvin and Hobbs are the new owners of Micro Computer Services. At the end of August 2012, their first month of operations, Calvin and Hobbs attempted to prepare monthly financial statements. The following information relates to August.

1. At August 31, the company owed its employees \$800 in salaries and wages that will be paid on September 1.
2. On August 1, the company borrowed \$30,000 from a local bank on a 15-year mortgage. The annual interest rate is 10%.
3. Revenue earned but unrecorded for August totaled \$1,100.

Prepare the adjusting entries needed at August 31, 2012.

**action plan**

- ✓ Make adjusting entries at the end of the period for revenues earned and expenses incurred in the period.
- ✓ Don't forget to make adjusting entries for accruals. Adjusting entries for accruals will increase both a balance sheet and an income statement account.

**Solution**

## Summary of Basic Relationships

Illustration 3-22 summarizes the four basic types of adjusting entries. Take some time to study and analyze the adjusting entries. Be sure to note that **each adjusting entry affects one balance sheet account and one income statement account.**

| Type of Adjustment | Accounts Before Adjustment                      | Adjusting Entry                 |
|--------------------|---|---------------------------------|
| Prepaid expenses   | Assets overstated<br>Expenses understated       | Dr. Expenses<br>Cr. Assets      |
| Unearned revenues  | Liabilities overstated<br>Revenues understated  | Dr. Liabilities<br>Cr. Revenues |
| Accrued revenues   | Assets understated<br>Revenues understated      | Dr. Assets<br>Cr. Revenues      |
| Accrued expenses   | Expenses understated<br>Liabilities understated | Dr. Expenses<br>Cr. Liabilities |

**Illustration 3-22**  
Summary of adjusting entries

Illustrations 3-23 (below) and 3-24 (on page 118) show the journalizing and posting of adjusting entries for Pioneer Advertising Agency on October 31. The ledger identifies all adjustments by the reference J2 because they have been recorded on page 2 of the general journal. The company may insert a center caption “Adjusting Entries” between the last transaction entry and the first adjusting entry in the journal. When you review the general ledger in Illustration 3-24, note that the entries highlighted in color are the adjustments.

**Illustration 3-23**  
General journal showing adjusting entries

### Helpful Hint

- (1) Adjusting entries should not involve debits or credits to cash.
- (2) Evaluate whether the adjustment makes sense. For example, an adjustment to recognize supplies used should increase supplies expense.
- (3) Double-check all computations.
- (4) Each adjusting entry affects one balance sheet account and one income statement account.

## The Adjusted Trial Balance and Financial Statements

After a company has journalized and posted all adjusting entries, it prepares another trial balance from the ledger accounts. This trial balance is called an **adjusted trial balance**. It shows the balances of all accounts, including those adjusted, at the end of the accounting period. The purpose of an adjusted trial balance is to **prove the equality** of the total debit balances and the total credit balances in the ledger after all adjustments. Because the accounts contain all data needed for financial statements, the adjusted trial balance is the **primary basis for the preparation of financial statements**.

### Study Objective [7]

Describe the nature and purpose of an adjusted trial balance.

### Preparing the Adjusted Trial Balance

Illustration 3-25 presents the adjusted trial balance for Pioneer Advertising Agency prepared from the ledger accounts in Illustration 3-24. The amounts affected by the adjusting entries are highlighted in color. Compare these amounts to those in the unadjusted trial balance in Illustration 3-3 on page 104. In this comparison, you will see that there are more accounts in the adjusted trial balance as a result of the adjusting entries made at the end of the month.

Adjusted trial balance

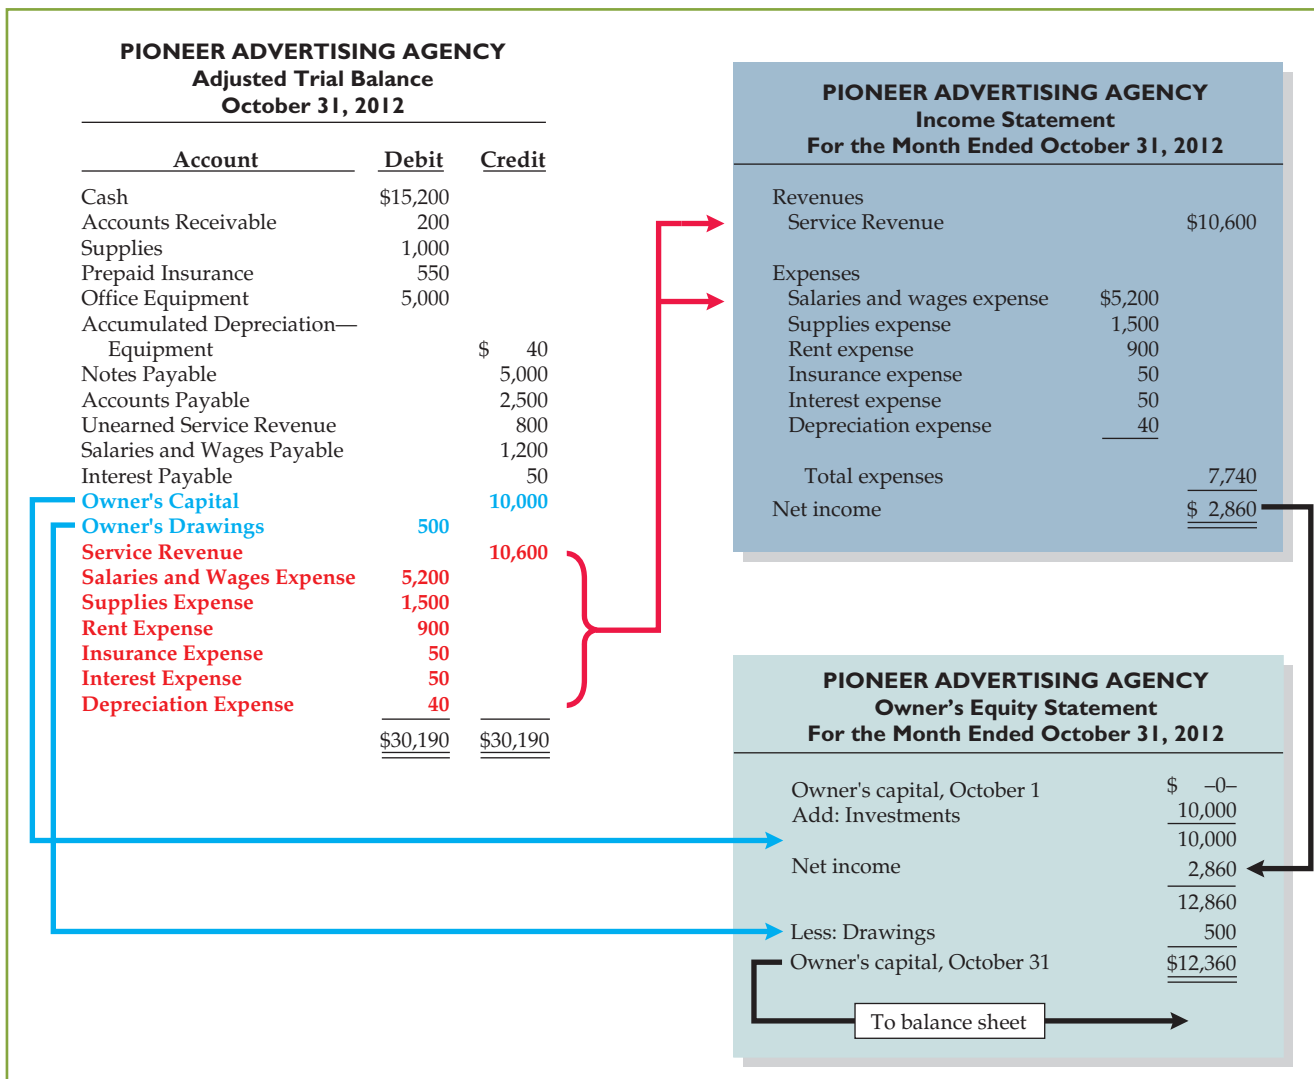

## Preparing Financial Statements

**Companies can prepare financial statements directly from the adjusted trial balance.** Illustrations 3-26 and 3-27 present the interrelationships of data in the adjusted trial balance and the financial statements.

As Illustration 3-26 shows, companies prepare the income statement from the revenue and expense accounts. Next, they use the owner's capital and drawings accounts and the net income (or net loss) from the income statement to prepare the owner's equity statement. As Illustration 3-27 shows, companies then prepare the balance sheet from the asset and liability accounts and the ending owner's capital balance as reported in the owner's equity statement.

**Illustration 3-26**  
Preparation of the income statement and owner's equity statement from the adjusted trial balance

Preparation of the balance sheet from the adjusted trial balance

## Do it!

Skolnick Co. was organized on April 1, 2012. The company prepares quarterly financial statements. The adjusted trial balance amounts at June 30 are shown below.

### Trial Balance

|                            | Debits   |                                    | Credits  |
|----------------------------|----------|------------------------------------|----------|
| Cash                       | \$ 6,700 | Accumulated Depreciation—Equipment | \$ 850   |
| Accounts Receivable        | 600      | Notes Payable                      | 5,000    |
| Prepaid Rent               | 900      | Accounts Payable                   | 1,510    |
| Supplies                   | 1,000    | Salaries and Wages Payable         | 400      |
| Equipment                  | 15,000   | Interest Payable                   | 50       |
| Owner's Drawings           | 600      | Unearned Rent Revenue              | 500      |
| Salaries and Wages Expense | 9,400    | Owner's Capital                    | 14,000   |
| Rent Expense               | 1,500    | Service Revenue                    | 14,200   |
| Depreciation Expense       | 850      | Rent Revenue                       | 800      |
| Supplies Expense           | 200      |                                    |          |
| Utilities Expense          | 510      |                                    |          |
| Interest Expense           | 50       |                                    |          |
| Total debits               | \$37,310 | Total credits                      | \$37,310 |

- Determine the net income for the quarter April 1 to June 30.
- Determine the total assets and total liabilities at June 30, 2012, for Skolnick Co.
- Determine the amount that appears for Owner's Capital at June 30, 2012.

**action plan**

✓ In an adjusted trial balance, all asset, liability, revenue, and expense accounts are properly stated.

✓ To determine the ending balance in Owner's Capital, add net income and subtract dividends.

**Solution**

- (a) The net income is determined by adding revenues and subtracting expenses. The net income is computed as follows.

|                            |            |                 |
|----------------------------|------------|-----------------|
| Revenues                   |            |                 |
| Service revenue            | \$14,200   |                 |
| Rent revenue               | <u>800</u> |                 |
| Total revenues             |            | \$15,000        |
| Expenses                   |            |                 |
| Salaries and wages expense | \$ 9,400   |                 |
| Rent expense               | 1,500      |                 |
| Depreciation expense       | 850        |                 |
| Utilities expense          | 510        |                 |
| Supplies expense           | 200        |                 |
| Interest expense           | <u>50</u>  |                 |
| Total expenses             |            | <u>12,510</u>   |
| Net income                 |            | <u>\$ 2,490</u> |

- (b) Total assets and liabilities are computed as follows.

| Assets                                   |                 | Liabilities                |                |
|--|-----------------|----------------------------|----------------|
| Cash                                     | \$ 6,700        | Notes payable              | \$5,000        |
| Accounts receivable                      | 600             | Accounts payable           | 1,510          |
| Supplies                                 | 1,000           | Unearned rent revenue      | 500            |
| Prepaid rent                             | 900             | Salaries and wages payable | 400            |
| Equipment                                | 15,000          | Interest payable           | 50             |
| Less: Accumulated depreciation—equipment | <u>850</u>      | Total liabilities          | <u>\$7,460</u> |
| Total assets                             | <u>\$23,350</u> |                            |                |
| (c) Owner's capital, April 1             | \$14,000        |                            |                |
| Add: Net income                          | 2,490           |                            |                |
| Less: Drawings                           | <u>600</u>      |                            |                |
| Owner's capital, June 30                 | <u>\$15,890</u> |                            |                |

**COMPREHENSIVE****Do it!**

Terry Thomas opens the Green Thumb Lawn Care Company on April 1. At April 30, the trial balance shows the following balances for selected accounts.

|                          |          |
|--------------------------|----------|
| Prepaid Insurance        | \$ 3,600 |
| Equipment                | 28,000   |
| Notes Payable            | 20,000   |
| Unearned Service Revenue | 4,200    |
| Service Revenue          | 1,800    |

Analysis reveals the following additional data.

1. Prepaid insurance is the cost of a 2-year insurance policy, effective April 1.
2. Depreciation on the equipment is \$500 per month.
3. The note payable is dated April 1. It is a 6-month, 12% note.
4. Seven customers paid for the company's 6 months' lawn service package of \$600 beginning in April. The company performed services for these customers in April.
5. Lawn services provided other customers but not recorded at April 30 totaled \$1,500.

### Instructions

Prepare the adjusting entries for the month of April. Show computations.

### action plan

- ✓ Note that adjustments are being made for one month.
- ✓ Make computations carefully.
- ✓ Select account titles carefully.
- ✓ Make sure debits are made first and credits are indented.
- ✓ Check that debits equal credits for each entry.

### Solution to Comprehensive Do it!

## Summary of Study Objectives

**[1] Explain the time period assumption.** The time period assumption assumes that the economic life of a business is divided into artificial time periods.

**[2] Explain the accrual basis of accounting.** Accrual-basis accounting means that companies record events that change a company's financial statements in the periods in which those events occur, rather than in the periods in which the company receives or pays cash.

**[3] Explain the reasons for adjusting entries.** Companies make adjusting entries at the end of an accounting period. Such

entries ensure that companies record revenues in the period in which they are earned and that they recognize expenses in the period in which they are incurred.

**[4] Identify the major types of adjusting entries.** The major types of adjusting entries are deferrals (prepaid expenses and unearned revenues), and accruals (accrued revenues and accrued expenses).

**[5] Prepare adjusting entries for deferrals.** Deferrals are either prepaid expenses or unearned revenues. Companies make adjusting entries for deferrals to record the portion of

the prepayment that represents the expense incurred or the revenue earned in the current accounting period.

**[6] Prepare adjusting entries for accruals.** Accruals are either accrued revenues or accrued expenses. Companies make adjusting entries for accruals to record revenues earned and expenses incurred in the current accounting period that have not been recognized through daily entries.

**[7] Describe the nature and purpose of an adjusted trial balance.** An adjusted trial balance shows the balances of all accounts, including those that have been adjusted, at the end of an accounting period. Its purpose is to prove the equality of the total debit balances and total credit balances in the ledger after all adjustments.

## Glossary

**Accrual-basis accounting** Accounting basis in which companies record transactions that change a company's financial statements in the periods in which the events occur. (p. 101).

**Accruals** Adjusting entries for either accrued revenues or accrued expenses. (p. 103).

**Accrued expenses** Expenses incurred but not yet paid in cash or recorded. (p. 113).

**Accrued revenues** Revenues earned but not yet received in cash or recorded. (p. 111).

**Adjusted trial balance** A list of accounts and their balances after the company has made all adjustments. (p. 119).

**Adjusting entries** Entries made at the end of an accounting period to ensure that companies follow the revenue recognition and expense recognition principles. (p. 103).

**Book value** The difference between the cost of a depreciable asset and its related accumulated depreciation. (p. 108).

**Calendar year** An accounting period that extends from January 1 to December 31. (p. 100).

**Cash-basis accounting** Accounting basis in which companies record revenue when they receive cash and an expense when they pay cash. (p. 101).

**Contra asset account** An account offset against an asset account on the balance sheet. (p. 107).

**Deferrals** Adjusting entries for either prepaid expenses or unearned revenues. (p. 103).

**Depreciation** The allocation of the cost of an asset to expense over its useful life in a rational and systematic manner. (p. 107).

**Expense recognition principle (matching principle)** The principle that companies match efforts (expenses) with accomplishments (revenues). (p. 101).

**Fiscal year** An accounting period that is one year in length. (p. 100).

**Interim periods** Monthly or quarterly accounting time periods. (p. 100).

**Prepaid expenses (prepayments)** Expenses paid in cash that benefit more than one accounting period and that are recorded as assets. (p. 104).

**Revenue recognition principle** The principle that companies recognize revenue in the accounting period in which it is earned. (p. 101).

**Time period assumption** An assumption that accountants can divide the economic life of a business into artificial time periods. (p. 100).

**Unearned revenues** Cash received and recorded as liabilities before revenue is earned. (p. 108).

**Useful life** The length of service of a long-lived asset. (p. 107).

## APPENDIX 3A

### Alternative Treatment of Prepaid Expenses and Unearned Revenues

#### Study Objective [8]

Prepare adjusting entries for the alternative treatment of deferrals.

In discussing adjusting entries for prepaid expenses and unearned revenues, we illustrated transactions for which companies made the initial entries to balance sheet accounts. In the case of prepaid expenses, the company debited the prepayment to an asset account. In the case of unearned revenue, the company credited a liability account to record the cash received.

Some companies use an alternative treatment: (1) When a company prepays an expense, it debits that amount to an expense account. (2) When it receives payment for future services, it credits the amount to a revenue account. In this appendix, we describe the circumstances that justify such entries and the different adjusting entries

that may be required. This alternative treatment of prepaid expenses and unearned revenues has the same effect on the financial statements as the procedures described in the chapter.

### Prepaid Expenses

Prepaid expenses become expired costs either through the passage of time (e.g., insurance) or through consumption (e.g., advertising supplies). If, at the time of purchase, the company expects to consume the supplies before the next financial statement date, **it may choose to debit (increase) an expense account rather than an asset account. This alternative treatment is simply more convenient.**

Assume that Pioneer Advertising expects that it will use before the end of the month all of the supplies purchased on October 5. A debit of \$2,500 to Supplies Expense (rather than to the asset account Supplies) on October 5 will eliminate the need for an adjusting entry on October 31. At October 31, the Supplies Expense account will show a balance of \$2,500, which is the cost of supplies used between October 5 and October 31.

But what if the company does not use all the supplies? For example, what if an inventory of \$1,000 of advertising supplies remains on October 31? Obviously, the company would need to make an adjusting entry. Prior to adjustment, the expense account Supplies Expense is overstated \$1,000, and the asset account Supplies is understated \$1,000. Thus, Pioneer makes the following adjusting entry.

|         |                                |       |       |
|---------|--------------------------------|-------|-------|
| Oct. 31 | Supplies                       | 1,000 | 1,000 |
|         | Supplies Expense               |       |       |
|         | (To record supplies inventory) |       |       |

After the company posts the adjusting entry, the accounts show:

| Supplies |            | Supplies Expense |            |       |            |
|----------|------------|------------------|------------|-------|------------|
| 10/31    | Adj. 1,000 | 10/5             | 2,500      | 10/31 | Adj. 1,000 |
|          |            | 10/31            | Bal. 1,500 |       |            |

After adjustment, the asset account Supplies shows a balance of \$1,000, which is equal to the cost of supplies on hand at October 31. In addition, Supplies Expense shows a balance of \$1,500. This is equal to the cost of supplies used between October 5 and October 31. Without the adjusting entry expenses are overstated and net income is understated by \$1,000 in the October income statement. Also, both assets and owner's equity are understated by \$1,000 on the October 31 balance sheet.

Illustration 3A-2 compares the entries and accounts for advertising supplies in the two adjustment approaches.

| Prepayment Initially Debited to Asset Account (per chapter) |                  |       |       | Prepayment Initially Debited to Expense Account (per appendix) |                  |       |       |
|---|------------------|-------|-------|--|------------------|-------|-------|
| Oct. 5  | Supplies         | 2,500 |       | Oct. 5   | Supplies Expense | 2,500 |       |
|   | Accounts Payable |       | 2,500 |  | Accounts Payable |       | 2,500 |
| Oct. 31   | Supplies Expense | 1,500 |       | Oct. 31  | Supplies         | 1,000 |       |
|   | Supplies         |       | 1,500 |  | Supplies Expense |       | 1,000 |

|                   |   |   |   |            |

**Illustration 3A-1**  
Prepaid expenses accounts after adjustment

**Illustration 3A-2**  
Adjustment approaches— a comparison

After Pioneer posts the entries, the accounts appear as follows.

**Illustration 3A-3**  
Comparison of accounts

| (per chapter)    |       |            |       | (per appendix)   |       |            |       |
|------------------|-------|------------|-------|------------------|-------|------------|-------|
| Supplies         |       |            |       | Supplies         |       |            |       |
| 10/5             | 2,500 | 10/31 Adj. | 1,500 | 10/31 Adj.       | 1,000 |            |       |
| 10/31 Bal.       | 1,000 |            |       |                  |       |            |       |
| Supplies Expense |       |            |       | Supplies Expense |       |            |       |
| 10/31 Adj.       | 1,500 |            |       | 10/5             | 2,500 | 10/31 Adj. | 1,000 |
|                  |       |            |       | 10/31 Bal.       | 1,500 |            |       |

Note that the account balances under each alternative are the same at October 31: Supplies \$1,000, and Supplies Expense \$1,500.

### Unearned Revenues

Unearned revenues become earned either through the passage of time (e.g., unearned rent revenue) or through providing the service (e.g., unearned service revenue). Similar to the case for prepaid expenses, companies may credit (increase) a revenue account when they receive cash for future services.

To illustrate, assume that Pioneer Advertising received \$1,200 for future services on October 2. Pioneer expects to perform the services before October 31.<sup>1</sup> In such a case, the company credits Service Revenue. If it in fact earns the revenue before October 31, no adjustment is needed.

However, if at the statement date Pioneer has not performed \$800 of the services, it would make an adjusting entry. Without the entry, the revenue account Service Revenue is overstated \$800, and the liability account Unearned Service Revenue is understated \$800. Thus, Pioneer makes the following adjusting entry.

|         |                              |     |     |
|---------|------------------------------|-----|-----|
| Oct. 31 | Service Revenue              | 800 | 800 |
|         | Unearned Service Revenue     |     |     |
|         | (To record unearned revenue) |     |     |

After Pioneer posts the adjusting entry, the accounts show:

| Unearned Service Revenue |            |     | Service Revenue |     |            |       |
|--------------------------|------------|-----|-----------------|-----|------------|-------|
|                          | 10/31 Adj. | 800 | 10/31 Adj.      | 800 | 10/2       | 1,200 |
|                          |            |     |                 |     | 10/31 Bal. | 400   |

The liability account Unearned Service Revenue shows a balance of \$800. This equals the services that will be provided in the future. In addition, the balance in Service Revenue equals the services provided in October. Without the adjusting entry, both revenues and net income are overstated by \$800 in the October income statement. Also, liabilities are understated by \$800, and owner's equity is overstated by \$800 on the October 31 balance sheet.

Illustration 3A-5 compares the entries and accounts for service revenue earned and unearned in the two adjustment approaches.

<sup>1</sup>This example focuses only on the alternative treatment of unearned revenues. For simplicity, we have ignored the entries to Service Revenue pertaining to the immediate earning of revenue (\$1,000) and the adjusting entry for accrued revenue (\$200).

#### Helpful Hint

The required adjusted balances here are Service Revenue \$400 and Unearned Service Revenue \$800.

|   |   |   |   |           |

|   |       |      |  | 10/31 | Bal.  | 400   |

**Illustration 3A-6**  
Comparison of accounts

Note that the balances in the accounts are the same under the two alternatives: Unearned Service Revenue \$800, and Service Revenue \$400.

### Summary of Additional Adjustment Relationships

Illustration 3A-7 provides a summary of basic relationships for deferrals.

**Illustration 3A-7**  
Summary of basic relationships  
for deferrals

| Type of Adjustment   | Reason for Adjustment   | Account Balances before Adjustment                           | Adjusting Entry                               |
|----------------------|---|--|---|
| 1. Prepaid expenses  | (a) Prepaid expenses initially recorded in asset accounts have been used.                 | Assets overstated<br>Expenses understated                    | Dr. Expenses<br>Cr. Assets                    |
|                      | (b) <b>Prepaid expenses initially recorded in expense accounts have not been used.</b>    | <b>Assets understated</b><br><b>Expenses overstated</b>      | <b>Dr. Assets</b><br><b>Cr. Expenses</b>      |
| 2. Unearned revenues | (a) Unearned revenues initially recorded in liability accounts have been earned.          | Liabilities overstated<br>Revenues understated               | Dr. Liabilities<br>Cr. Revenues               |
|                      | (b) <b>Unearned revenues initially recorded in revenue accounts have not been earned.</b> | <b>Liabilities understated</b><br><b>Revenues overstated</b> | <b>Dr. Revenues</b><br><b>Cr. Liabilities</b> |

Alternative adjusting entries **do not apply** to accrued revenues and accrued expenses because **no entries occur before companies make these types of adjusting entries.**

## Summary of Study Objective for Appendix 3A

**[8] Prepare adjusting entries for the alternative treatment of deferrals.** Companies may initially debit prepayments to an expense account. Likewise, they may credit unearned revenues to a revenue account. At the end of the period, these accounts may be overstated. The adjusting

entries for prepaid expenses are a debit to an asset account and a credit to an expense account. Adjusting entries for unearned revenues are a debit to a revenue account and a credit to a liability account.

Self-Test, Brief Exercises, Exercises, Problem Set A, and many more components are available for practice in WileyPLUS

\*Note: All asterisked Questions, Exercises, and Problems relate to material in the appendix to the chapter.

## Self-Test Questions

Answers are on page 148.

- (SO 1) 1. The time period assumption states that:
- revenue should be recognized in the accounting period in which it is earned.
  - expenses should be matched with revenues.
  - the economic life of a business can be divided into artificial time periods.
  - the fiscal year should correspond with the calendar year.
- (SO 1) 2. The time period assumption states that:
- companies must wait until the calendar year is completed to prepare financial statements.
  - companies use the fiscal year to report financial information.
  - the economic life of a business can be divided into artificial time periods.
  - companies record information in the time period in which the events occur.
- (SO 2) 3. Which of the following statements about the accrual basis of accounting is *false*?
- Events that change a company's financial statements are recorded in the periods in which the events occur.
  - Revenue is recognized in the period in which it is earned.
  - This basis is in accord with generally accepted accounting principles.
  - Revenue is recorded only when cash is received, and expense is recorded only when cash is paid.
- (SO 2) 4. The principle or assumption dictating that efforts (expenses) be matched with accomplishments (revenues) is the:
- expense recognition principle.
  - cost assumption.
  - time period principle.
  - revenue recognition principle.
- (SO 3) 5. Adjusting entries are made to ensure that:
- expenses are recognized in the period in which they are incurred.
  - revenues are recorded in the period in which they are earned.
  - balance sheet and income statement accounts have correct balances at the end of an accounting period.
  - All of the above.
- (SO 4) 6. Each of the following is a major type (or category) of adjusting entries *except*:
- prepaid expenses.
  - accrued revenues.
  - accrued expenses.
  - earned revenues.
- (SO 5) 7. The trial balance shows Supplies \$1,350 and Supplies Expense \$0. If \$600 of supplies are on hand at the end of the period, the adjusting entry is:
- |                     |     |     |
|---------------------|-----|-----|
| a. Supplies         | 600 |     |
| Supplies Expense    |     | 600 |
| b. Supplies         | 750 |     |
| Supplies Expense    |     | 750 |
| c. Supplies Expense | 750 |     |
| Supplies            |     | 750 |
| d. Supplies Expense | 600 |     |
| Supplies            |     | 600 |
8. Adjustments for prepaid expenses: (SO 5)
- decrease assets and increase revenues.
  - decrease expenses and increase assets.
  - decrease assets and increase expenses.
  - decrease revenues and increase assets.
9. Accumulated Depreciation is: (SO 5)
- a contra asset account.
  - an expense account.
  - an owner's equity account.
  - a liability account.
10. Queenan Company computes depreciation on delivery equipment at \$1,000 for the month of June. The adjusting entry to record this depreciation is as follows. (SO 5)
- |  |       |       |
|--|-------|-------|
| a. Depreciation Expense                  | 1,000 |       |
| Accumulated Depreciation—Queenan Company |       | 1,000 |
| b. Depreciation Expense                  | 1,000 |       |
| Equipment                                |       | 1,000 |
| c. Depreciation Expense                  | 1,000 |       |
| Accumulated Depreciation—Equipment       |       | 1,000 |
| d. Equipment Expense                     | 1,000 |       |
| Accumulated Depreciation—Equipment       |       | 1,000 |
11. Adjustments for unearned revenues: (SO 5)
- decrease liabilities and increase revenues.
  - have an assets and revenues account relationship.
  - increase assets and increase revenues.
  - decrease revenues and decrease assets.
12. Adjustments for accrued revenues: (SO 6)
- have a liabilities and revenues account relationship.
  - have an assets and revenues account relationship.
  - decrease assets and revenues.
  - decrease liabilities and increase revenues.
13. Kathy Siska earned a salary of \$400 for the last week of September. She will be paid on October 1. The adjusting entry for Kathy's employer at September 30 is: (SO 6)
- |                               |     |     |
|-------------------------------|-----|-----|
| a. No entry is required.      |     |     |
| b. Salaries and Wages Expense | 400 |     |
| Salaries and Wages Payable    |     | 400 |

|                               |     |     |
|-------------------------------|-----|-----|
| c. Salaries and Wages Expense | 400 | 400 |
| Cash                          |     |     |
| d. Salaries and Wages Payable | 400 | 400 |
| Cash                          |     |     |

- (SO 7) 14. Which of the following statements is *incorrect* concerning the adjusted trial balance?
- An adjusted trial balance proves the equality of the total debit balances and the total credit balances in the ledger after all adjustments are made.
  - The adjusted trial balance provides the primary basis for the preparation of financial statements.
  - The adjusted trial balance lists the account balances segregated by assets and liabilities.

d. The adjusted trial balance is prepared after the adjusting entries have been journalized and posted.

- \*15. The trial balance shows Supplies \$0 and Supplies Expense \$1,500. If \$800 of supplies are on hand at the end of the period, the adjusting entry is: (SO 8)
- Debit Supplies \$800 and credit Supplies Expense \$800.
  - Debit Supplies Expense \$800 and credit Supplies \$800.
  - Debit Supplies \$700 and credit Supplies Expense \$700.
  - Debit Supplies Expense \$700 and credit Supplies \$700.

Go to the book's companion website, [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), for additional Self-Test Questions.

## Questions

- How does the time period assumption affect an accountant's analysis of business transactions?
  - Explain the terms *fiscal year*, *calendar year*, and *interim periods*.
- State two generally accepted accounting principles that relate to adjusting the accounts.
- Chris Harris, a lawyer, accepts a legal engagement in March, performs the work in April, and is paid in May. If Harris's law firm prepares monthly financial statements, when should it recognize revenue from this engagement? Why?
- Why do accrual-basis financial statements provide more useful information than cash-basis statements?
- In completing the engagement in question 3, Harris pays no costs in March, \$2,000 in April, and \$2,500 in May (incurred in April). How much expense should the firm deduct from revenues in the month when it recognizes the revenue? Why?
- "Adjusting entries are required by the cost principle of accounting." Do you agree? Explain.
- Why may a trial balance not contain up-to-date and complete financial information?
- Distinguish between the two categories of adjusting entries, and identify the types of adjustments applicable to each category.
- What is the debit/credit effect of a prepaid expense adjusting entry?
- "Depreciation is a valuation process that results in the reporting of the fair value of the asset." Do you agree? Explain.
- Explain the differences between depreciation expense and accumulated depreciation.
- T. Harris Company purchased equipment for \$18,000. By the current balance sheet date, \$6,000 had been depreciated. Indicate the balance sheet presentation of the data.
- What is the debit/credit effect of an unearned revenue adjusting entry?
- A company fails to recognize revenue earned but not yet received. Which of the following accounts are involved in the adjusting entry: (a) asset, (b) liability, (c) revenue, or (d) expense? For the accounts selected, indicate whether they would be debited or credited in the entry.
- A company fails to recognize an expense incurred but not paid. Indicate which of the following accounts is debited and which is credited in the adjusting entry: (a) asset, (b) liability, (c) revenue, or (d) expense.
- A company makes an accrued revenue adjusting entry for \$900 and an accrued expense adjusting entry for \$700. How much was net income understated prior to these entries? Explain.
- On January 9, a company pays \$5,000 for salaries, of which \$2,000 was reported as Salaries and Wages Payable on December 31. Give the entry to record the payment.
- For each of the following items before adjustment, indicate the type of adjusting entry (prepaid expense, unearned revenue, accrued revenue, or accrued expense) that is needed to correct the misstatement. If an item could result in more than one type of adjusting entry, indicate each of the types.
  - Assets are understated.
  - Liabilities are overstated.
  - Liabilities are understated.
  - Expenses are understated.
  - Assets are overstated.
  - Revenue is understated.
- One-half of the adjusting entry is given below. Indicate the account title for the other half of the entry.
  - Salaries and Wages Expense is debited.
  - Depreciation Expense is debited.
  - Interest Payable is credited.
  - Supplies is credited.
  - Accounts Receivable is debited.
  - Unearned Service Revenue is debited.
- "An adjusting entry may affect more than one balance sheet or income statement account." Do you agree? Why or why not?

21. Why is it possible to prepare financial statements directly from an adjusted trial balance?
- \*22. M. Harrison Company debits Supplies Expense for all purchases of supplies and credits Rent Revenue for all advanced rentals. For each type of adjustment, give the adjusting entry.
23.  PEPSICO What was PepsiCo's depreciation and amortization expense for 2009 and 2008?

## Brief Exercises

Indicate why adjusting entries are needed.

(SO 3)

**BE3-1** The ledger of Levi Company includes the following accounts. Explain why each account may require adjustment.

- (a) Prepaid Insurance
- (b) Depreciation Expense
- (c) Unearned Service Revenue
- (d) Interest Payable

Identify the major types of adjusting entries.

(SO 4, 5, 6)

**BE3-2** Horn Company accumulates the following adjustment data at December 31. Indicate (a) the type of adjustment (prepaid expense, accrued revenues and so on), and (b) the status of accounts before adjustment (overstated or understated).

1. Supplies of \$100 are on hand.
2. Services provided but not recorded total \$900.
3. Interest of \$200 has accumulated on a note payable.
4. Rent collected in advance totaling \$650 has been earned.

Prepare adjusting entry for supplies.

(SO 5)

**BE3-3** Devin Advertising Company's trial balance at December 31 shows Supplies \$6,700 and Supplies Expense \$0. On December 31, there are \$2,500 of supplies on hand. Prepare the adjusting entry at December 31, and using T accounts, enter the balances in the accounts, post the adjusting entry, and indicate the adjusted balance in each account.

Prepare adjusting entry for depreciation.

(SO 5)

**BE3-4** At the end of its first year, the trial balance of Hester Company shows Equipment \$30,000 and zero balances in Accumulated Depreciation—Equipment and Depreciation Expense. Depreciation for the year is estimated to be \$4,000. Prepare the adjusting entry for depreciation at December 31, post the adjustments to T accounts, and indicate the balance sheet presentation of the equipment at December 31.

Prepare adjusting entry for prepaid expense.

(SO 5)

**BE3-5** On July 1, 2012, Israel Co. pays \$14,400 to Idonije Insurance Co. for a 3-year insurance contract. Both companies have fiscal years ending December 31. For Israel Co., journalize and post the entry on July 1 and the adjusting entry on December 31.

Prepare adjusting entry for unearned revenue.

(SO 5)

**BE3-6** Using the data in BE3-5, journalize and post the entry on July 1 and the adjusting entry on December 31 for Idonije Insurance Co. Idonije uses the accounts Unearned Service Revenue and Service Revenue.

Prepare adjusting entries for accruals.

(SO 6)

**BE3-7** The bookkeeper for Juaquin Company asks you to prepare the following accrued adjusting entries at December 31.

1. Interest on notes payable of \$400 is accrued.
2. Services provided but not recorded total \$1,900.
3. Salaries earned by employees of \$900 have not been recorded.

Use the following account titles: Service Revenue, Accounts Receivable, Interest Expense, Interest Payable, Salaries and Wages Expense, and Salaries and Wages Payable.

Analyze accounts in an unadjusted trial balance.

(SO 4, 5, 6)

**BE3-8** The trial balance of Iglesias Company includes the following balance sheet accounts, which may require adjustment. For each account that requires adjustment, indicate (a) the type of adjusting entry (prepaid expenses, unearned revenues, accrued revenues, and accrued expenses) and (b) the related account in the adjusting entry.

|                                    |                          |
|------------------------------------|--------------------------|
| Accounts Receivable                | Interest Payable         |
| Prepaid Insurance                  | Unearned Service Revenue |
| Accumulated Depreciation—Equipment |                          |

Prepare an income statement from an adjusted trial balance.

(SO 7)

**BE3-9** The adjusted trial balance of Iwuh Company at December 31, 2012, includes the following accounts: Owner's Capital \$15,600; Owner's Drawings \$7,000; Service Revenue \$37,000; Salaries and Wages Expense \$16,000; Insurance Expense \$2,000; Rent Expense \$4,000; Supplies Expense \$1,500; and Depreciation Expense \$1,300. Prepare an income statement for the year.

**BE3-10** Partial adjusted trial balance data for Iwuh Company is presented in BE3-9. The balance in Owner's Capital is the balance as of January 1. Prepare an owner's equity statement for the year assuming net income is \$12,200 for the year.

*Prepare an owner's equity statement from an adjusted trial balance.*

(SO 7)

**\*BE3-11** Jennings Company records all prepayments in income statement accounts. At April 30, the trial balance shows Supplies Expense \$2,800, Service Revenue \$9,200, and zero balances in related balance sheet accounts. Prepare the adjusting entries at April 30 assuming (a) \$700 of supplies on hand and (b) \$3,000 of service revenue should be reported as unearned.

*Prepare adjusting entries under alternative treatment of deferrals.*

(SO 8)

## Do it! Review

**Do it! 3-1** Numerous timing concepts are discussed on pages 100–102. A list of concepts is provided below in the left column, with a description of the concept in the right column. There are more descriptions provided than concepts. Match the description of the concept to the concept.

*Identify timing concepts.*

(SO 1, 2)

- |                                       |  |
|---------------------------------------|--|
| 1. ___ Cash-basis accounting.         | (a) Monthly and quarterly time periods.  |
| 2. ___ Fiscal year.                   | (b) Accountants divide the economic life of a business into artificial time periods.             |
| 3. ___ Revenue recognition principle. | (c) Efforts (expenses) should be matched with accomplishments (revenues).                        |
| 4. ___ Expense recognition principle. | (d) Companies record revenues when they receive cash and record expenses when they pay out cash. |
|                                       | (e) An accounting time period that is one year in length.  |
|                                       | (f) An accounting time period that starts on January 1 and ends on December 31.                  |
|                                       | (g) Companies record transactions in the period in which the events occur.                       |
|                                       | (h) Recognize revenue in the accounting period in which it is earned.                            |

**Do it! 3-2** The ledger of Lefevour, Inc. on March 31, 2012, includes the following selected accounts before adjusting entries.

*Prepare adjusting entries for deferrals.*

(SO 5)

|                          | <u>Debit</u> | <u>Credit</u> |
|--------------------------|--------------|---------------|
| Prepaid Insurance        | 2,400        |               |
| Supplies                 | 2,500        |               |
| Equipment                | 30,000       |               |
| Unearned Service Revenue |              | 9,000         |

An analysis of the accounts shows the following.

- Insurance expires at the rate of \$300 per month.
- Supplies on hand total \$1,100.
- The equipment depreciates \$500 per month.
- 2/5 of the unearned service revenue was earned in March.

Prepare the adjusting entries for the month of March.

**Do it! 3-3** Johnny Knox is the new owner of Swift Computer Services. At the end of July 2012, his first month of ownership, Johnny is trying to prepare monthly financial statements. He has the following information for the month.

*Prepare adjusting entries for accruals.*

(SO 6)

- At July 31, Knox owed employees \$1,300 in salaries that the company will pay in August.
- On July 1, Knox borrowed \$20,000 from a local bank on a 10-year note. The annual interest rate is 12%.
- Service revenue unrecorded in July totaled \$2,400.

Prepare the adjusting entries needed at July 31, 2012.

**Do it! 3-4** Kreutz Co. was organized on April 1, 2012. The company prepares quarterly financial statements. The adjusted trial balance amounts at June 30 are shown on the next page.

*Calculate amounts from trial balance.*

(SO 7)

| Debits                     |                 | Credits                              |                 |
|----------------------------|-----------------|--------------------------------------|-----------------|
| Cash                       | \$ 5,360        | Accumulated Depreciation — Equipment | \$ 700          |
| Accounts Receivable        | 480             | Notes Payable                        | 4,000           |
| Prepaid Rent               | 720             | Accounts Payable                     | 790             |
| Supplies                   | 920             | Salaries and Wages Payable           | 300             |
| Equipment                  | 12,000          | Interest Payable                     | 40              |
| Owner's Drawings           | 500             | Unearned Rent Revenue                | 400             |
| Salaries and Wages Expense | 7,400           | Owner's Capital                      | 11,200          |
| Rent Expense               | 1,200           | Service Revenue                      | 11,360          |
| Depreciation Expense       | 700             | Rent Revenue                         | 1,100           |
| Supplies Expense           | 160             | Total credits                        | <u>\$29,890</u> |
| Utilities Expense          | 410             |                                      |                 |
| Interest Expense           | 40              |                                      |                 |
| Total debits               | <u>\$29,890</u> |                                      |                 |

- Determine the net income for the quarter April 1 to June 30.
- Determine the total assets and total liabilities at June 30, 2012 for Kreutz Company.
- Determine the amount that appears for Owner's Capital at June 30, 2012.

## Exercises

Explain the time period assumption.

(SO 1)

**E3-1** Lance Louis has prepared the following list of statements about the time period assumption.

- Adjusting entries would not be necessary if a company's life were not divided into artificial time periods.
- The IRS requires companies to file annual tax returns.
- Accountants divide the economic life of a business into artificial time periods, but each transaction affects only one of these periods.
- Accounting time periods are generally a month, a quarter, or a year.
- A time period lasting one year is called an interim period.
- All fiscal years are calendar years, but not all calendar years are fiscal years.

### Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

Distinguish between cash and accrual basis of accounting.

(SO 2)

**E3-2** On numerous occasions, proposals have surfaced to put the federal government on the accrual basis of accounting. This is no small issue. If this basis were used, it would mean that billions in unrecorded liabilities would have to be booked, and the federal deficit would increase substantially.

### Instructions

- What is the difference between accrual-basis accounting and cash-basis accounting?
- Why would politicians prefer the cash basis over the accrual basis?
- Write a letter to your senator explaining why the federal government should adopt the accrual basis of accounting.

Compute cash and accrual accounting income.

(SO 2)

**E3-3** Malast Industries collected \$105,000 from customers in 2012. Of the amount collected, \$25,000 was from revenue earned on account in 2011. In addition, Malast earned \$40,000 of revenue in 2012, which will not be collected until 2013.

Malast Industries also paid \$72,000 for expenses in 2012. Of the amount paid, \$30,000 was for expenses incurred on account in 2011. In addition, Malast incurred \$42,000 of expenses in 2012, which will not be paid until 2013.

### Instructions

- Compute 2012 cash-basis net income.
- Compute 2012 accrual-basis net income.

Identify the type of adjusting entry needed.

(SO 4, 5, 6)

**E3-4** Mannelly Corporation encounters the following situations:

- Mannelly collects \$1,300 from a customer in 2012 for services to be performed in 2013.
- Mannelly incurs utility expense which is not yet paid in cash or recorded.

3. Mannelly's employees worked 3 days in 2012 but will not be paid until 2013.
4. Mannelly earned service revenue but has not yet received cash or recorded the transaction.
5. Mannelly paid \$2,400 rent on December 1 for the 4 months starting December 1.
6. Mannelly received cash for future services and recorded a liability until the revenue was earned.
7. Mannelly performed consulting services for a client in December 2012. On December 31, it had not billed the client for services provided of \$1,200.
8. Mannelly paid cash for an expense and recorded an asset until the item was used up.
9. Mannelly purchased \$900 of supplies in 2012; at year-end, \$400 of supplies remain unused.
10. Mannelly purchased equipment on January 1, 2012; the equipment will be used for 5 years.
11. Mannelly borrowed \$10,000 on October 1, 2012, signing an 8% one-year note payable.

### Instructions

Identify what type of adjusting entry (prepaid expense, unearned revenue, accrued expense, or accrued revenue) is needed in each situation, at December 31, 2012.

**E3-5** Garrett Wolfe Company has the following balances in selected accounts on December 31, 2012.

|                                    |        |
|------------------------------------|--------|
| Accounts Receivable                | \$ -0- |
| Accumulated Depreciation—Equipment | -0-    |
| Equipment                          | 7,000  |
| Interest Payable                   | -0-    |
| Notes Payable                      | 10,000 |
| Prepaid Insurance                  | 2,100  |
| Salaries and Wages Payable         | -0-    |
| Supplies                           | 2,450  |
| Unearned Service Revenue           | 30,000 |

*Prepare adjusting entries from selected data.*

(SO 5, 6)

All the accounts have normal balances. The information below has been gathered at December 31, 2012.

1. Garrett Wolfe Company borrowed \$10,000 by signing a 12%, one-year note on September 1, 2012.
2. A count of supplies on December 31, 2012, indicates that supplies of \$900 are on hand.
3. Depreciation on the equipment for 2012 is \$1,000.
4. Garrett Wolfe Company paid \$2,100 for 12 months of insurance coverage on June 1, 2012.
5. On December 1, 2012, Garrett Wolfe collected \$30,000 for consulting services to be performed from December 1, 2012, through March 31, 2013.
6. Garrett Wolfe performed consulting services for a client in December 2012. The client will be billed \$4,200.
7. Garrett Wolfe Company pays its employees total salaries of \$9,000 every Monday for the preceding 5-day week (Monday through Friday). On Monday, December 29, employees were paid for the week ending December 26. All employees worked the last 3 days of 2012.

### Instructions

Prepare adjusting entries for the seven items described above.

**E3-6** J. Marten Company accumulates the following adjustment data at December 31.

1. Services provided but not recorded total \$1,000.
2. Supplies of \$300 have been used.
3. Utility expenses of \$225 are unpaid.
4. Unearned service revenue of \$260 has been earned.
5. Salaries of \$800 are unpaid.
6. Prepaid insurance totaling \$350 has expired.

*Identify types of adjustments and account relationships.*

(SO 4, 5, 6)

### Instructions

For each of the above items indicate the following.

- (a) The type of adjustment (prepaid expense, unearned revenue, accrued revenue, or accrued expense).
- (b) The status of accounts before adjustment (overstatement or understatement).

**E3-7** The ledger of Danieal Rental Agency on March 31 of the current year includes the selected accounts, shown on the next page, before adjusting entries have been prepared.

*Prepare adjusting entries from selected account data.*

(SO 5, 6)

|                                       | <u>Debit</u> | <u>Credit</u> |
|---------------------------------------|--------------|---------------|
| Prepaid Insurance                     | \$ 3,600     |               |
| Supplies                              | 2,800        |               |
| Equipment                             | 25,000       |               |
| Accumulated<br>Depreciation—Equipment |              | \$ 8,400      |
| Notes Payable                         |              | 20,000        |
| Unearned Rent Revenue                 |              | 10,200        |
| Rent Revenue                          |              | 60,000        |
| Interest Expense                      | –0–          |               |
| Salaries and Wages Expense            | 14,000       |               |

An analysis of the accounts shows the following.

1. The equipment depreciates \$400 per month.
2. One-third of the unearned rent revenue was earned during the quarter.
3. Interest of \$500 is accrued on the notes payable.
4. Supplies on hand total \$900.
5. Insurance expires at the rate of \$200 per month.

#### Instructions

Prepare the adjusting entries at March 31, assuming that adjusting entries are made **quarterly**. Additional accounts are: Depreciation Expense, Insurance Expense, Interest Payable, and Supplies Expense.

Prepare adjusting entries.  
(SO 5, 6)

**E3-8** Danielle Manning, D.D.S., opened a dental practice on January 1, 2012. During the first month of operations, the following transactions occurred.

1. Performed services for patients who had dental plan insurance. At January 31, \$875 of such services was earned but not yet recorded.
2. Utility expenses incurred but not paid prior to January 31 totaled \$650.
3. Purchased dental equipment on January 1 for \$80,000, paying \$20,000 in cash and signing a \$60,000, 3-year note payable. The equipment depreciates \$400 per month. Interest is \$500 per month.
4. Purchased a one-year malpractice insurance policy on January 1 for \$24,000.
5. Purchased \$1,600 of dental supplies. On January 31, determined that \$400 of supplies were on hand.

#### Instructions

Prepare the adjusting entries on January 31. Account titles are: Accumulated Depreciation—Equipment, Depreciation Expense, Service Revenue, Accounts Receivable, Insurance Expense, Interest Expense, Interest Payable, Prepaid Insurance, Supplies, Supplies Expense, Utilities Expense, and Utilities Payable.

Prepare adjusting entries.  
(SO 5, 6)

**E3-9** The trial balance for Pioneer Advertising Agency is shown in Illustration 3-3, p. 104. In lieu of the adjusting entries shown in the text at October 31, assume the following adjustment data.

1. Supplies on hand at October 31 total \$500.
2. Expired insurance for the month is \$100.
3. Depreciation for the month is \$50.
4. Unearned service revenue earned in October totals \$600.
5. Services provided but not recorded at October 31 are \$300.
6. Interest accrued at October 31 is \$95.
7. Accrued salaries at October 31 are \$1,625.

#### Instructions

Prepare the adjusting entries for the items above.

Prepare correct income statement.  
(SO 2, 5, 6, 7)

**E3-10** The income statement of Brandon Co. for the month of July shows net income of \$1,400 based on Service Revenue \$5,500, Salaries and Wages Expense \$2,300, Supplies Expense \$1,200, and Utilities Expense \$600. In reviewing the statement, you discover the following.

1. Insurance expired during July of \$400 was omitted.
2. Supplies expense includes \$250 of supplies that are still on hand at July 31.

3. Depreciation on equipment of \$150 was omitted.
4. Accrued but unpaid salaries and wages at July 31 of \$300 were not included.
5. Services provided but unrecorded totaled \$650.

**Instructions**

Prepare a correct income statement for July 2012.

**E3-11** A partial adjusted trial balance of Manumaleuna Company at January 31, 2012, shows the following.

Analyze adjusted data.  
(SO 4, 5, 6, 7)

**MANUMALEUNA COMPANY**  
Adjusted Trial Balance  
January 31, 2012

|                            | <u>Debit</u> | <u>Credit</u> |
|----------------------------|--------------|---------------|
| Supplies                   | \$ 850       |               |
| Prepaid Insurance          | 2,400        |               |
| Salaries and Wages Payable |              | \$ 800        |
| Unearned Service Revenue   |              | 750           |
| Supplies Expense           | 950          |               |
| Insurance Expense          | 400          |               |
| Salaries and Wages Expense | 2,900        |               |
| Service Revenue            |              | 2,000         |

**Instructions**

Answer the following questions, assuming the year begins January 1.

- (a) If the amount in Supplies Expense is the January 31 adjusting entry, and \$1,000 of supplies was purchased in January, what was the balance in Supplies on January 1?
- (b) If the amount in Insurance Expense is the January 31 adjusting entry, and the original insurance premium was for one year, what was the total premium and when was the policy purchased?
- (c) If \$3,500 of salaries was paid in January, what was the balance in Salaries and Wages Payable at December 31, 2011?

**E3-12** Selected accounts of Tabor Company are shown below.

Journalize basic transactions  
and adjusting entries.  
(SO 5, 6, 7)

| <b>Supplies Expense</b> |     |
|-------------------------|-----|
| 7/31                    | 800 |

| <b>Supplies</b> |      |       |     |
|-----------------|------|-------|-----|
| 7/1             | Bal. | 1,100 | 800 |

|                                    | \$71,500             | \$71,500 | \$75,500            | \$75,500 |

**Instructions**

Prepare the adjusting entries that were made.

*Prepare financial statements from adjusted trial balance.*  
(SO 7)

**E3-14** The adjusted trial balance for Matthews Company is given in E3-13.

**Instructions**

Prepare the income and owner's equity statements for the year and the balance sheet at August 31.

*Record transactions on accrual basis; convert revenue to cash receipts.*  
(SO 5, 6)

**E3-15** The following data are taken from the comparative balance sheets of Mayberry Billiards Club, which prepares its financial statements using the accrual basis of accounting.

| December 31                      | 2012     | 2011     |
|----------------------------------|----------|----------|
| Accounts receivable from members | \$14,000 | \$ 9,000 |
| Unearned service revenue         | 17,000   | 25,000   |

Members are billed based upon their use of the club's facilities. Unearned service revenues arise from the sale of gift certificates, which members can apply to their future use of club facilities. The 2012 income statement for the club showed that service revenue of \$161,000 was earned during the year.

**Instructions**

(Hint: You will probably find it helpful to use T accounts to analyze these data.)

- (a) Prepare journal entries for each of the following events that took place during 2012.
- (1) Accounts receivable from 2011 were all collected.
  - (2) Gift certificates outstanding at the end of 2011 were all redeemed.
  - (3) An additional \$38,000 worth of gift certificates were sold during 2012. A portion of these was used by the recipients during the year; the remainder was still outstanding at the end of 2012.
  - (4) Services provided to members for 2012 were billed to members.
  - (5) Accounts receivable for 2012 (i.e., those billed in item [4] above) were partially collected.
- (b) Determine the amount of cash received by the club, with respect to member services, during 2012.

*Journalize adjusting entries.*  
(SO 8)

**\*E3-16** Brad Maynard Company has the following balances in selected accounts on December 31, 2012.

|                   |          |
|-------------------|----------|
| Service Revenue   | \$40,000 |
| Insurance Expense | 2,700    |
| Supplies Expense  | 2,450    |

All the accounts have normal balances. Brad Maynard Company debits prepayments to expense accounts when paid, and credits unearned revenues to revenue accounts when received. The following information below has been gathered at December 31, 2012.

1. Brad Maynard Company paid \$2,700 for 12 months of insurance coverage on June 1, 2012.
2. On December 1, 2012, Brad Maynard Company collected \$40,000 for consulting services to be performed from December 1, 2012, through March 31, 2013.
3. A count of supplies on December 31, 2012, indicates that supplies of \$900 are on hand.

### Instructions

Prepare the adjusting entries needed at December 31, 2012.

- \*E3-17** At Richmond Company, prepayments are debited to expense when paid, and unearned revenues are credited to revenue when received. During January of the current year, the following transactions occurred.

*Journalize transactions and adjusting entries.*  
(SO 8)

- Jan. 2 Paid \$1,920 for fire insurance protection for the year.  
10 Paid \$1,700 for supplies.  
15 Received \$6,100 for services to be performed in the future.

On January 31, it is determined that \$2,500 of the services are earned and that there are \$650 of supplies on hand.

### Instructions

- (a) Journalize and post the January transactions. (Use T accounts.)
- (b) Journalize and post the adjusting entries at January 31.
- (c) Determine the ending balance in each of the accounts.

## Exercises: Set B

Visit the book's companion website, at [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), and choose the Student Companion site to access Exercise Set B.

## Problems: Set A

- P3-1A** Tony Masasi started his own consulting firm, McGee Company, on June 1, 2012. The trial balance at June 30 is shown below.

*Prepare adjusting entries, post to ledger accounts, and prepare adjusted trial balance.*  
(SO 5, 6, 7)

| <b>McGEE COMPANY</b>  |                            |                 |                 |
|-----------------------|----------------------------|-----------------|-----------------|
| Trial Balance         |                            |                 |                 |
| June 30, 2012         |                            |                 |                 |
| <u>Account Number</u> |                            | <u>Debit</u>    | <u>Credit</u>   |
| 101                   | Cash                       | \$ 7,150        |                 |
| 112                   | Accounts Receivable        | 6,000           |                 |
| 126                   | Supplies                   | 2,000           |                 |
| 130                   | Prepaid Insurance          | 3,000           |                 |
| 157                   | Equipment                  | 15,000          |                 |
| 201                   | Accounts Payable           |                 | \$ 4,500        |
| 209                   | Unearned Service Revenue   |                 | 4,000           |
| 301                   | Owner's Capital            |                 | 21,750          |
| 400                   | Service Revenue            |                 | 7,900           |
| 726                   | Salaries and Wages Expense | 4,000           |                 |
| 729                   | Rent Expense               | 1,000           |                 |
|                       |                            | <u>\$38,150</u> | <u>\$38,150</u> |

In addition to those accounts listed on the trial balance, the chart of accounts for McGee Company also contains the following accounts and account numbers: No. 158 Accumulated Depreciation—Equipment, No. 212 Salaries and Wages Payable, No. 631 Supplies Expense, No. 711 Depreciation Expense, No. 722 Insurance Expense, and No. 732 Utilities Expense.

Other data:

1. Supplies on hand at June 30 are \$750.
2. A utility bill for \$150 has not been recorded and will not be paid until next month.
3. The insurance policy is for a year.
4. \$2,800 of unearned service revenue has been earned at the end of the month.
5. Salaries of \$1,900 are accrued at June 30.
6. The equipment has a 5-year life with no salvage value. It is being depreciated at \$250 per month for 60 months.
7. Invoices representing \$1,200 of services performed during the month have not been recorded as of June 30.

**Instructions**

- (a) Prepare the adjusting entries for the month of June. Use J3 as the page number for your journal.
- (b) Post the adjusting entries to the ledger accounts. Enter the totals from the trial balance as beginning account balances and place a check mark in the posting reference column.
- (c) Prepare an adjusted trial balance at June 30, 2012.

(c) Adj. trial balance \$41,650

*Prepare adjusting entries, post, and prepare adjusted trial balance, and financial statements.*

(SO 5, 6, 7)

**P3-2A** Melton River Resort opened for business on June 1 with eight air-conditioned units. Its trial balance before adjustment on August 31 is as follows.

**MELTON RIVER RESORT**  
Trial Balance  
August 31, 2012

| <u>Account Number</u> |                                 | <u>Debit</u>     | <u>Credit</u>    |

| 726                   | Salaries and Wages Expense      | 51,000           |                  |
| 732                   | Utilities Expense               | 9,400            |                  |
|                       |                                 | <u>\$273,900</u> | <u>\$273,900</u> |

In addition to those accounts listed on the trial balance, the chart of accounts for Melton River Resort also contains the following accounts and account numbers: No. 112 Accounts Receivable, No. 144 Accumulated Depreciation—Buildings, No. 150 Accumulated Depreciation—Equipment, No. 212 Salaries and Wages Payable, No. 230 Interest Payable, No. 620 Depreciation Expense, No. 631 Supplies Expense, No. 718 Interest Expense, and No. 722 Insurance Expense.

Other data:

1. Insurance expires at the rate of \$300 per month.
2. A count on August 31 shows \$800 of supplies on hand.

3. Annual depreciation is \$6,000 on buildings and \$2,400 on equipment.
4. Unearned rent revenue of \$4,800 was earned prior to August 31.
5. Salaries of \$400 were unpaid at August 31.
6. Rentals of \$4,000 were due from tenants at August 31. (Use Accounts Receivable.)
7. The mortgage interest rate is 9% per year. (The mortgage was taken out on August 1.)

**Instructions**

- (a) Journalize the adjusting entries on August 31 for the 3-month period June 1–August 31.
- (b) Prepare a ledger using the three-column form of account. Enter the trial balance amounts and post the adjusting entries. (Use J1 as the posting reference.)
- (c) Prepare an adjusted trial balance on August 31.
- (d) Prepare an income statement and an owner’s equity statement for the 3 months ending August 31 and a balance sheet as of August 31.

(c) Adj. trial balance  
\$281,000  
(d) Net income \$18,300  
Ending capital balance  
\$113,300  
Total assets \$203,400

**P3-3A** Minor Advertising Agency was founded by Brandon Minor in January of 2011. Presented below are both the adjusted and unadjusted trial balances as of December 31, 2012.

Prepare adjusting entries and financial statements.

**Instructions**

- (a) Journalize the annual adjusting entries that were made.
- (b) Prepare an income statement and an owner’s equity statement for the year ending December 31, 2012, and a balance sheet at December 31.
- (c) Answer the following questions.
  - (1) If the note has been outstanding 6 months, what is the annual interest rate on that note?
  - (2) If the company paid \$12,500 in salaries in 2012, what was the balance in Salaries and Wages Payable on December 31, 2011?

(b) Net income \$34,150  
Ending capital \$47,650  
Total assets \$65,800  
(c) (1) 6%  
(2) \$2,500

**P3-4A** A review of the ledger of D. J. Moore Company at December 31, 2012, produces the following data pertaining to the preparation of annual adjusting entries.

Preparing adjusting entries.  
(SO 5, 6)

1. Salaries and Wages Payable \$0. There are eight salaried employees. Salaries are paid every Friday for the current week. Five employees receive a salary of \$900 each per week, and three

1. Salaries and wages expense \$2,640

2. Rent revenue \$84,000

- employees earn \$700 each per week. Assume December 31 is a Tuesday. Employees do not work weekends. All employees worked the last 2 days of December.
2. Unearned Rent Revenue \$354,000. The company began subleasing office space in its new building on November 1. At December 31, the company had the following rental contracts that are paid in full for the entire term of the lease.

| <u>Date</u> | <u>Term<br/>(in months)</u> | <u>Monthly Rent</u> | <u>Number of<br/>Leases</u> |
|-------------|-----------------------------|---------------------|-----------------------------|
| Nov. 1      | 6                           | \$5,000             | 5                           |
| Dec. 1      | 6                           | \$8,500             | 4                           |

3. Advertising expense \$5,200

3. Prepaid Advertising \$15,600. This balance consists of payments on two advertising contracts. The contracts provide for monthly advertising in two trade magazines. The terms of the contracts are as follows.

| <u>Contract</u> | <u>Date</u> | <u>Amount</u> | <u>Number of<br/>Magazine<br/>Issues</u> |
|-----------------|-------------|---------------|--|
| A650            | May 1       | \$6,000       | 12                                       |
| B974            | Oct. 1      | 9,600         | 24                                       |

The first advertisement runs in the month in which the contract is signed.

4. Interest expense \$6,300

4. Notes Payable \$120,000. This balance consists of a note for one year at an annual interest rate of 9%, dated June 1.

**Instructions**

Prepare the adjusting entries at December 31, 2012. (Show all computations.)

*Journalize transactions and follow through accounting cycle to preparation of financial statements.*

(SO 5, 6, 7)

**P3-5A** On September 1, 2012, the account balances of Moore Equipment Repair were as follows.

| <u>No.</u> | <u>Debits</u>             | <u>No.</u> | <u>Credits</u>                              |
|------------|---------------------------|------------|---|
| 101        | Cash \$ 4,880             | 154        | Accumulated Depreciation—Equipment \$ 1,500 |
| 112        | Accounts Receivable 3,520 | 201        | Accounts Payable 3,400                      |
| 126        | Supplies 2,000            | 209        | Unearned Service Revenue 1,400              |
| 153        | Equipment 15,000          | 212        | Salaries and Wages Payable 500              |
|            |                           | 301        | Owner's Capital 18,600                      |
|            | <u>\$25,400</u>           |            | <u>\$25,400</u>                             |

During September, the following summary transactions were completed.

- Sept. 8 Paid \$1,400 for salaries due employees, of which \$900 is for September.
- 10 Received \$1,200 cash from customers on account.
- 12 Received \$3,400 cash for services performed in September.
- 15 Purchased store equipment on account \$3,000.
- 17 Purchased supplies on account \$1,200.
- 20 Paid creditors \$4,500 on account.
- 22 Paid September rent \$500.
- 25 Paid salaries \$1,250.
- 27 Performed services on account and billed customers for services provided \$2,100.
- 29 Received \$650 from customers for future service.

Adjustment data consist of:

- 1. Supplies on hand \$1,300.
- 2. Accrued salaries payable \$300.
- 3. Depreciation is \$100 per month.
- 4. Unearned service revenue of \$1,450 is earned.

**Instructions**

- (a) Enter the September 1 balances in the ledger accounts.
- (b) Journalize the September transactions.
- (c) Post to the ledger accounts. Use J1 for the posting reference. Use the following additional accounts: No. 407 Service Revenue, No. 615 Depreciation Expense, No. 631 Supplies Expense, No. 726 Salaries and Wages Expense, and No. 729 Rent Expense.

- (d) Prepare a trial balance at September 30.  
 (e) Journalize and post adjusting entries.  
 (f) Prepare an adjusted trial balance.  
 (g) Prepare an income statement and an owner's equity statement for September and a balance sheet at September 30.

(d) Trial balance \$30,750  
 (f) Adj. trial balance \$31,150  
 (g) Net income \$2,000  
 Ending capital \$20,600  
 Total assets \$24,600

**\*P3-6A** Olsen Graphics Company was organized on January 1, 2012, by Gwen Olsen. At the end of the first 6 months of operations, the trial balance contained the accounts shown below.

| Debits                     |                  | Credits          |                  |
|----------------------------|------------------|------------------|------------------|
| Cash                       | \$ 8,600         | Notes Payable    | \$ 20,000        |
| Accounts Receivable        | 14,000           | Accounts Payable | 9,000            |
| Equipment                  | 45,000           | Owner's Capital  | 22,000           |
| Insurance Expense          | 2,700            | Sales Revenue    | 52,100           |
| Salaries and Wages Expense | 30,000           | Service Revenue  | 6,000            |
| Supplies Expense           | 3,700            |                  |                  |
| Advertising Expense        | 1,900            |                  |                  |
| Rent Expense               | 1,500            |                  |                  |
| Utilities Expense          | 1,700            |                  |                  |
|                            | <u>\$109,100</u> |                  | <u>\$109,100</u> |

Prepare adjusting entries, adjusted trial balance, and financial statements using appendix.

(SO 5, 6, 7, 8)

Analysis reveals the following additional data.

- The \$3,700 balance in Supplies Expense represents supplies purchased in January. At June 30, \$1,500 of supplies was on hand.
- The note payable was issued on February 1. It is a 9%, 6-month note.
- The balance in Insurance Expense is the premium on a one-year policy, dated March 1, 2012.
- Service revenues are credited to revenue when received. At June 30, service revenue of \$1,300 is unearned.
- Sales revenue earned but unrecorded at June 30 totals \$2,000.
- Depreciation is \$2,250 per year.

#### Instructions

- (a) Journalize the adjusting entries at June 30. (Assume adjustments are recorded every 6 months.)  
 (b) Prepare an adjusted trial balance.  
 (c) Prepare an income statement and owner's equity statement for the 6 months ended June 30 and a balance sheet at June 30.

(b) Adj. trial balance \$112,975  
 (c) Net income \$18,725  
 Ending capital \$40,725  
 Total assets \$71,775

## Problems: Set B

**P3-1B** Fran Omiyale started her own consulting firm, Omiyale Consulting, on May 1, 2012. The trial balance at May 31 is as follows.

#### OMIYALE CONSULTING Trial Balance May 31, 2012

| Account Number |                            | Debit           | Credit          |

| 429                   | Rent Revenue               |                 | 10,300          |
| 610                   | Advertising Expense        | 600             |                 |
| 726                   | Salaries and Wages Expense | 3,300           |                 |
| 732                   | Utilities Expense          | 900             |                 |
|                       |                            | <u>\$99,780</u> | <u>\$99,780</u> |

In addition to those accounts listed on the trial balance, the chart of accounts for Bear Motel also contains the following accounts and account numbers: No. 142 Accumulated Depreciation—Buildings, No. 150 Accumulated Depreciation—Equipment, No. 212 Salaries and Wages Payable, No. 230 Interest Payable, No. 619 Depreciation Expense, No. 631 Supplies Expense, No. 718 Interest Expense, and No. 722 Insurance Expense.

Other data:

- Prepaid insurance is a 1-year policy starting May 1, 2012.
- A count of supplies shows \$750 of unused supplies on May 31.
- Annual depreciation is \$3,000 on the buildings and \$1,500 on equipment.
- The mortgage interest rate is 12%. (The mortgage was taken out on May 1.)
- Two-thirds of the unearned rent revenue has been earned.
- Salaries of \$750 are accrued and unpaid at May 31.

**Instructions**

- (a) Journalize the adjusting entries on May 31.  
 (b) Prepare a ledger using the three-column form of account. Enter the trial balance amounts and post the adjusting entries. (Use J1 as the posting reference.)  
 (c) Prepare an adjusted trial balance on May 31.  
 (d) Prepare an income statement and an owner's equity statement for the month of May and a balance sheet at May 31.

(c) Adj. trial balance  
 \$101,305  
 (d) Net income \$4,645  
 Ending capital balance  
 \$46,025  
 Total assets \$93,075

**P3-3B** Peterman Co. was organized on July 1, 2012. Quarterly financial statements are prepared. The unadjusted and adjusted trial balances as of September 30 are shown below.

Prepare adjusting entries and financial statements.  
 (SO 5, 6, 7)

**PETERMAN CO.**  
 Trial Balance  
 September 30, 2012

|                                    | Unadjusted |          | Adjusted |          |
|------------------------------------|------------|----------|----------|----------|
|                                    | Dr.        | Cr.      | Dr.      | Cr.      |
| Cash                               | \$ 8,700   |          | \$ 8,700 |          |
| Accounts Receivable                | 10,400     |          | 11,500   |          |
| Supplies                           | 1,500      |          | 650      |          |
| Prepaid Rent                       | 2,200      |          | 1,200    |          |
| Equipment                          | 18,000     |          | 18,000   |          |
| Accumulated Depreciation—Equipment |            | \$ -0-   |          | \$ 700   |
| Notes Payable                      |            | 10,000   |          | 10,000   |
| Accounts Payable                   |            | 2,500    |          | 2,500    |
| Salaries and Wages Payable         |            | -0-      |          | 725      |
| Interest Payable                   |            | -0-      |          | 100      |
| Unearned Rent Revenue              |            | 1,900    |          | 1,050    |
| Owner's Capital                    |            | 22,000   |          | 22,000   |
| Owner's Drawings                   | 1,600      |          | 1,600    |          |
| Service Revenue                    |            | 16,000   |          | 17,100   |
| Rent Revenue                       |            | 1,410    |          | 2,260    |
| Salaries and Wages Expense         | 8,000      |          | 8,725    |          |
| Rent Expense                       | 1,900      |          | 2,900    |          |
| Depreciation Expense               |            |          | 700      |          |
| Supplies Expense                   |            |          | 850      |          |
| Utilities Expense                  | 1,510      |          | 1,510    |          |
| Interest Expense                   |            |          | 100      |          |
|                                    | \$53,810   | \$53,810 | \$56,435 | \$56,435 |

**Instructions**

- (a) Journalize the adjusting entries that were made.  
 (b) Prepare an income statement and an owner's equity statement for the 3 months ending September 30 and a balance sheet at September 30.  
 (c) If the note bears interest at 12%, how many months has it been outstanding?

(b) Net income \$4,575  
 Ending capital \$24,975  
 Total assets \$39,350

**P3-4B** A review of the ledger of Roach Company at December 31, 2012, produces the following data pertaining to the preparation of annual adjusting entries.

Prepare adjusting entries  
 (SO 5, 6)

- Prepaid Insurance \$10,440. The company has separate insurance policies on its buildings and its motor vehicles. Policy B4564 on the building was purchased on April 1, 2011, for \$7,920. The policy has a term of 3 years. Policy A2958 on the vehicles was purchased on January 1, 2012, for \$4,500. This policy has a term of 2 years.
- Unearned Rent Revenue \$429,000. The company began subleasing office space in its new building on November 1. At December 31, the company had the following rental contracts that are paid in full for the entire term of the lease.

1. Insurance expense \$4,890

2. Rent revenue \$84,000

| Date   | Term<br>(in months) | Monthly Rent | Number of<br>Leases |
|--------|---------------------|--------------|---------------------|
| Nov. 1 | 9                   | \$5,000      | 5                   |
| Dec. 1 | 6                   | \$8,500      | 4                   |

## 144 3 Adjusting the Accounts

3. Interest expense \$1,800

4. Salaries and wages expense \$2,000

3. Notes Payable \$120,000. This balance consists of a note for 9 months at an annual interest rate of 9%, dated November 1.

4. Salaries and Wages Payable \$0. There are eight salaried employees. Salaries are paid every Friday for the current week. Five employees receive a salary of \$700 each per week, and three employees earn \$500 each per week. Assume December 31 is a Tuesday. Employees do not work weekends. All employees worked the last 2 days of December.

### Instructions

Prepare the adjusting entries at December 31, 2012.

*Journalize transactions and follow through accounting cycle to preparation of financial statements.*

(SO 5, 6, 7)

**P3-5B** On November 1, 2012, the account balances of Robinson Equipment Repair were as follows.

| No. | Debits                    | No. | Credits                                     |
|-----|---------------------------|-----|---|
| 101 | Cash \$ 2,400             | 154 | Accumulated Depreciation—Equipment \$ 2,000 |
| 112 | Accounts Receivable 4,250 | 201 | Accounts Payable 2,600                      |
| 126 | Supplies 1,800            | 209 | Unearned Service Revenue 1,200              |
| 153 | Equipment 12,000          | 212 | Salaries and Wages Payable 700              |
|     |                           | 301 | Owner's Capital 13,950                      |
|     | \$20,450                  |     | \$20,450                                    |

During November, the following summary transactions were completed.

- Nov. 8 Paid \$1,700 for salaries due employees, of which \$700 is for October salaries.  
 10 Received \$3,420 cash from customers on account.  
 12 Received \$3,100 cash for services performed in November.  
 15 Purchased equipment on account \$2,000.  
 17 Purchased supplies on account \$700.  
 20 Paid creditors on account \$2,700.  
 22 Paid November rent \$400.  
 25 Paid salaries \$1,700.  
 27 Performed services on account and billed customers for services provided \$1,900.  
 29 Received \$600 from customers for future service.

Adjustment data consist of:

- Supplies on hand \$1,400.
- Accrued salaries payable \$350.
- Depreciation for the month is \$200.
- Unearned service revenue of \$1,250 is earned.

### Instructions

- Enter the November 1 balances in the ledger accounts.
- Journalize the November transactions.
- Post to the ledger accounts. Use J1 for the posting reference. Use the following additional accounts: No. 407 Service Revenue, No. 615 Depreciation Expense, No. 631 Supplies Expense, No. 726 Salaries and Wages Expense, and No. 729 Rent Expense.
- Prepare a trial balance at November 30.
- Journalize and post adjusting entries.
- Prepare an adjusted trial balance.
- Prepare an income statement and an owner's equity statement for November and a balance sheet at November 30.

(d) Trial balance \$25,350

(f) Adj. trial balance \$25,900

(g) Net income \$1,500;  
Ending capital \$15,450  
Total assets \$18,950

## Problems: Set C

Visit the book's companion website, at [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), and choose the Student Companion site to access Problem Set C.

## Continuing Cookie Chronicle

(*Note:* This is a continuation of the Cookie Chronicle from Chapters 1 and 2. Use the information from the previous chapters and follow the instructions below using the general ledger accounts you have already prepared.)

**CCC3** It is the end of November and Natalie has been in touch with her grandmother. Her grandmother asked Natalie how well things went in her first month of business. Natalie, too, would like to know if she has been profitable or not during November. Natalie realizes that in order to determine Cookie Creations' income, she must first make adjustments.

Natalie puts together the following additional information.

1. A count reveals that \$35 of baking supplies were used during November.
2. Natalie estimates that all of her baking equipment will have a useful life of 5 years or 60 months. (Assume Natalie decides to record a full month's worth of depreciation, regardless of when the equipment was obtained by the business.)
3. Natalie's grandmother has decided to charge interest of 6% on the note payable extended on November 16. The loan plus interest is to be repaid in 24 months. (Assume that half a month of interest accrued during November.)
4. On November 30, a friend of Natalie's asks her to teach a class at the neighborhood school. Natalie agrees and teaches a group of 35 first-grade students how to make Santa Claus cookies. The next day, Natalie prepares an invoice for \$300 and leaves it with the school principal. The principal says that he will pass the invoice along to the head office, and it will be paid sometime in December.
5. Natalie receives a utilities bill for \$45. The bill is for utilities consumed by Natalie's business during November and is due December 15.

### Instructions

Using the information that you have gathered through Chapter 2, and based on the new information above, do the following.

- (a) Prepare and post the adjusting journal entries.
- (b) Prepare an adjusting trial balance.
- (c) Using the adjusted trial balance, calculate Cookie Creations' net income or net loss for the month of November. Do not prepare an income statement.

## BROADENING YOUR PERSPECTIVE

### Financial Reporting and Analysis

#### Financial Reporting Problem: PepsiCo, Inc.

**BYP3-1** The financial statements of **PepsiCo, Inc.** are presented in Appendix A at the end of this textbook.

### Instructions

- (a) Using the consolidated financial statements and related information, identify items that may result in adjusting entries for prepayments.
- (b) Using the consolidated financial statements and related information, identify items that may result in adjusting entries for accruals.
- (c) Using the Selected Financial Data and 5-Year Summary, what has been the trend since 2005 for net income?

#### Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

**BYP3-2** PepsiCo's financial statements are presented in Appendix A. Financial statements for The Coca-Cola Company are presented in Appendix B.

### Instructions

Based on information contained in these financial statements, determine the following for each company.

- (a) Net increase (decrease) in property, plant, and equipment (net) from 2008 to 2009.
- (b) Increase (decrease) in selling, general, and administrative expenses from 2008 to 2009.

- (c) Increase (decrease) in long-term debt (obligations) from 2008 to 2009.
- (d) Increase (decrease) in net income from 2008 to 2009.
- (e) Increase (decrease) in cash and cash equivalents from 2008 to 2009.

### On the Web

**BYP3-3** No financial decision maker should ever rely solely on the financial information reported in the annual report to make decisions. It is important to keep abreast of financial news. This activity demonstrates how to search for financial news on the Web.

**Address:** <http://biz.yahoo.com/i>, or go to [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt)

#### Steps:

1. Type in either Wal-Mart, Target Corp., or Kmart.
2. Choose **News**.
3. Select an article that sounds interesting to you and that would be relevant to an investor in these companies.

#### Instructions

- (a) What was the source of the article (e.g., Reuters, Businesswire, Prnewswire)?
- (b) Assume that you are a personal financial planner and that one of your clients owns stock in the company. Write a brief memo to your client summarizing the article and explaining the implications of the article for their investment.

## Critical Thinking

### Decision Making Across the Organization

**BYP3-4** Happy Camper Park was organized on April 1, 2011, by Amaya Berge. Amaya is a good manager but a poor accountant. From the trial balance prepared by a part-time bookkeeper, Amaya prepared the following income statement for the quarter that ended March 31, 2012.

| <b>HAPPY CAMPER PARK</b>             |          |                 |
|--------------------------------------|----------|-----------------|
| Income Statement                     |          |                 |
| For the Quarter Ended March 31, 2012 |          |                 |
| Revenues                             |          |                 |
| Rent revenue                         |          | \$90,000        |
| Operating expenses                   |          |                 |
| Advertising                          | \$ 5,200 |                 |
| Salaries and wages                   | 29,800   |                 |
| Utilities                            | 900      |                 |
| Depreciation                         | 800      |                 |
| Maintenance and repairs              | 4,000    |                 |
| Total operating expenses             |          | <u>40,700</u>   |
| Net income                           |          | <u>\$49,300</u> |

Amaya thought that something was wrong with the statement because net income had never exceeded \$20,000 in any one quarter. Knowing that you are an experienced accountant, she asks you to review the income statement and other data.

You first look at the trial balance. In addition to the account balances reported above in the income statement, the ledger contains the following additional selected balances at March 31, 2012.

|                   |          |
|-------------------|----------|
| Supplies          | \$ 6,200 |
| Prepaid Insurance | 7,200    |
| Notes Payable     | 12,000   |

You then make inquiries and discover the following.

1. Rent revenues include advanced rentals for summer occupancy \$15,000.
2. There were \$1,700 of supplies on hand at March 31.
3. Prepaid insurance resulted from the payment of a one-year policy on January 1, 2012.

4. The mail on April 1, 2012, brought the following bills: advertising for week of March 24, \$110; repairs made March 10, \$260; and utilities, \$180.
5. There are four employees, who receive wages totaling \$300 per day. At March 31, 2 days' salaries and wages have been incurred but not paid.
6. The note payable is a 3-month, 10% note dated January 1, 2012.

### Instructions

With the class divided into groups, answer the following.

- (a) Prepare a correct income statement for the quarter ended March 31, 2012.
- (b) Explain to Amaya the generally accepted accounting principles that she did not recognize in preparing her income statement and their effect on her results.

## Communication Activity

**BYP3-5** In reviewing the accounts of Keri Ann Co. at the end of the year, you discover that adjusting entries have not been made.

### Instructions

Write a memo to Keri Ann Nickels, the owner of Keri Ann Co., that explains the following: the nature and purpose of adjusting entries, why adjusting entries are needed, and the types of adjusting entries that may be made.

## Ethics Case

**BYP3-6** Bluestem Company is a pesticide manufacturer. Its sales declined greatly this year due to the passage of legislation outlawing the sale of several of Bluestem's chemical pesticides. In the coming year, Bluestem will have environmentally safe and competitive chemicals to replace these discontinued products. Sales in the next year are expected to greatly exceed any prior year's. The decline in sales and profits appears to be a one-year aberration. But even so, the company president fears a large dip in the current year's profits. He believes that such a dip could cause a significant drop in the market price of Bluestem's stock and make the company a takeover target.

To avoid this possibility, the company president calls in Cathi Bell, controller, to discuss this period's year-end adjusting entries. He urges her to accrue every possible revenue and to defer as many expenses as possible. He says to Cathi, "We need the revenues this year, and next year can easily absorb expenses deferred from this year. We can't let our stock price be hammered down!" Cathi didn't get around to recording the adjusting entries until January 17, but she dated the entries December 31 as if they were recorded then. Cathi also made every effort to comply with the president's request.

### Instructions

- (a) Who are the stakeholders in this situation?
- (b) What are the ethical considerations of (1) the president's request and (2) Cathi's dating the adjusting entries December 31?
- (c) Can Cathi accrue revenues and defer expenses and still be ethical?

## "All About You" Activity

**BYP3-7** Companies must report or disclose in their financial statements information about all liabilities, including potential liabilities related to environmental clean-up. There are many situations in which you will be asked to provide personal financial information about your assets, liabilities, revenue, and expenses. Sometimes you will face difficult decisions regarding what to disclose and how to disclose it.

### Instructions

Suppose that you are putting together a loan application to purchase a home. Based on your income and assets, you qualify for the mortgage loan, but just barely. How would you address each of the following situations in reporting your financial position for the loan application? Provide responses for each of the following situations.

- (a) You signed a guarantee for a bank loan that a friend took out for \$20,000. If your friend doesn't pay, you will have to pay. Your friend has made all of the payments so far, and it appears he will be able to pay in the future.

- (b) You were involved in an auto accident in which you were at fault. There is the possibility that you may have to pay as much as \$50,000 as part of a settlement. The issue will not be resolved before the bank processes your mortgage request.
- (c) The company at which you work isn't doing very well, and it has recently laid off employees. You are still employed, but it is quite possible that you will lose your job in the next few months.

## FASB Codification Activity

**BYP3-8** If your school has a subscription to the FASB Codification, go to <http://aaahq.org/asclogin.cfm> to log in and prepare responses to the following.

### Instructions

Access the glossary ("Master Glossary") to answer the following.

- (a) What is the definition of revenue?
- (b) What is the definition of compensation?

## Answers to Insight and Accounting Across the Organization Questions

**p. 102 Cooking the Books?** **Q:** What motivates sales executives and finance and accounting executives to participate in activities that result in inaccurate reporting of revenues? **A:** Sales executives typically receive bonuses based on their ability to meet quarterly sales targets. In addition, they often face the possibility of losing their jobs if they miss those targets. Executives in accounting and finance are very aware of the earnings targets of Wall Street analysts and investors. If they fail to meet these targets, the company's stock price will fall. As a result of these pressures, executives sometimes knowingly engage in unethical efforts to misstate revenues. As a result of the Sarbanes-Oxley Act of 2002, the penalties for such behavior are now much more severe.

**p. 110 Turning Gift Cards into Revenue** **Q:** Suppose that Robert Jones purchases a \$100 gift card at Best Buy on December 24, 2011, and gives it to his wife, Mary Jones, on December 25, 2011. On January 3, 2012, Mary uses the card to purchase \$100 worth of CDs. When do you think Best Buy should recognize revenue and why? **A:** According to the revenue recognition principle, companies should recognize revenue when earned. In this case, revenue is not earned until Best Buy provides the goods. Thus, when Best Buy receives cash in exchange for the gift card on December 24, 2011, it should recognize a liability, Unearned Revenue, for \$100. On January 3, 2012, when Mary Jones exchanges the card for merchandise, Best Buy should recognize revenue and eliminate \$100 from the balance in the Unearned Revenue account.

**p. 114 Cashing In on Accrual Accounting** **Q:** Accrual accounting is often considered superior to cash accounting. Why, then, were some people critical of China's use of accrual accounting in this instance? **A:** In this case, some people were critical because, in general, China uses cash accounting. By switching to accrual accounting for this transaction, China was not being consistent in its accounting practices. Lack of consistency reduces the transparency and usefulness of accounting information.

## IFRS A Look at IFRS

It is often difficult for companies to determine in what time period they should report particular revenues and expenses. Both the IASB and FASB are working on a joint project to develop a common conceptual framework, as well as a revenue recognition project, that will enable companies to better use the same principles to record transactions consistently over time.

## Key Points

- In this chapter, you learned accrual-basis accounting applied under GAAP. Companies applying IFRS also use accrual-basis accounting to ensure that they record transactions that change a company's financial statements in the period in which events occur.
- Similar to GAAP, cash-basis accounting is not in accordance with IFRS.
- IFRS also divides the economic life of companies into artificial time periods. Under both GAAP and IFRS, this is referred to as the *time period assumption*.
- IFRS requires that companies present a complete set of financial statements, including comparative information annually.
- GAAP has more than 100 rules dealing with revenue recognition. Many of these rules are industry-specific. In contrast, revenue recognition under IFRS is determined primarily by a single standard. Despite this large disparity in the amount of detailed guidance devoted to revenue recognition, the **general** revenue recognition principles required by GAAP that are used in this textbook are similar to those under IFRS.
- As the Feature Story illustrates, revenue recognition fraud is a major issue in U.S. financial reporting. The same situation occurs in other countries, as evidenced by revenue recognition breakdowns at Dutch software company **Baan NV**, Japanese electronics giant **NEC**, and Dutch grocer **Ahold NV**.
- A specific standard exists for revenue recognition under IFRS (*IAS 18*). In general, the standard is based on the **probability that the economic benefits associated with the transaction will flow to the company** selling the goods, providing the service, or receiving investment income. In addition, the revenues and costs **must be capable of being measured reliably**. GAAP uses concepts such as *realized*, *realizable* (that is, it is received, or expected to be received), and *earned* as a basis for revenue recognition.
- Under IFRS, revaluation of items such as land and buildings is permitted. IFRS allows depreciation based on revaluation of assets, which is not permitted under GAAP.
- The terminology used for revenues and gains, and expenses and losses, differs somewhat between IFRS and GAAP. For example, income is defined as:

Increases in economic benefits during the accounting period in the form of inflows or enhancements of assets or decreases of liabilities that result in increases in equity, other than those relating to contributions from shareholders.

Income includes *both* revenues, which arise during the normal course of operating activities, and gains, which arise from activities outside of the normal sales of goods and services. The term income is not used this way under GAAP. Instead, under GAAP income refers to the net difference between revenues and expenses. Expenses are defined as:

Decreases in economic benefits during the accounting period in the form of outflows or depletions of assets or incurrences of liabilities that result in decreases in equity other than those relating to distributions to shareholders.

Note that under IFRS, expenses include both those costs incurred in the normal course of operations, as well as losses that are not part of normal operations. This is in contrast to GAAP, which defines each separately.

## Looking to the Future

The IASB and FASB are now involved in a joint project on revenue recognition. The purpose of this project is to develop comprehensive guidance on when to recognize revenue. Presently, the Boards are considering an approach that focuses on changes in assets and liabilities (rather than on earned and realized) as the basis for revenue recognition. It is hoped that this approach

will lead to more consistent accounting in this area. For more on this topic, see [www.fasb.org/project/revenue\\_recognition.shtml](http://www.fasb.org/project/revenue_recognition.shtml).

## IFRS Self-Test Questions

1. GAAP:
  - (a) provides very detailed, industry-specific guidance on revenue recognition, compared to the general guidance provided by IFRS.
  - (b) provides only general guidance on revenue recognition, compared to the detailed guidance provided by IFRS.
  - (c) allows revenue to be recognized when a customer makes an order.
  - (d) requires that revenue not be recognized until cash is received.
2. Which of the following statements is *false*?
  - (a) IFRS employs the time period assumption.
  - (b) IFRS employs accrual accounting.
  - (c) IFRS requires that revenues and costs must be capable of being measured reliably.
  - (d) IFRS uses the cash basis of accounting.
3. As a result of the revenue recognition project being undertaken by the FASB and IASB:
  - (a) revenue recognition will place more emphasis on when revenue is earned.
  - (b) revenue recognition will place more emphasis on when revenue is realized.
  - (c) revenue recognition will place more emphasis on when changes occur in assets and liabilities.
  - (d) revenue will no longer be recorded unless cash has been received.
4. Which of the following is *false*?
  - (a) Under IFRS, the term *income* describes both revenues and gains.
  - (b) Under IFRS, the term *expenses* includes losses.
  - (c) Under IFRS, firms do not engage in the closing process.
  - (d) IFRS has fewer standards than GAAP that address revenue recognition.
5. Accrual-basis accounting:
  - (a) is optional under IFRS.
  - (b) results in companies recording transactions that change a company's financial statements in the period in which events occur.
  - (c) will likely be eliminated as a result of the IASB/FASB joint project on revenue recognition.
  - (d) is not consistent with the IASB conceptual framework.

## IFRS Concepts and Application

**IFRS3-1** Compare and contrast the rules regarding revenue recognition under IFRS versus GAAP.

**IFRS3-2** Under IFRS, do the definitions of revenues and expenses include gains and losses? Explain.

### *International Financial Reporting*

#### **Problem: Zetar plc**

**IFRS3-3** The financial statements of **Zetar plc** are presented in Appendix C. The company's complete annual report, including the notes to its financial statements, is available at [www.zetarplc.com](http://www.zetarplc.com).

**Instructions**

Visit Zetar's corporate website and answer the following questions from Zetar's 2009 annual report.

- (a) From the notes to the financial statements, how does the company determine the amount of revenue to record at the time of a sale?
- (b) From the notes to the financial statements, how does the company determine whether a sale has occurred?
- (c) Using the consolidated income statement and consolidated statement of financial position, identify items that may result in adjusting entries for deferrals.
- (d) Using the consolidated income statement, identify two items that may result in adjusting entries for accruals.

**Answers to IFRS Self-Test Questions**

1. a 2. d 3. c 4. c 5. b

# CHAPTER 4

## Completing the Accounting Cycle

### Study Objectives

After studying this chapter, you should be able to:

- 1 Prepare a worksheet.
- 2 Explain the process of closing the books.
- 3 Describe the content and purpose of a post-closing trial balance.
- 4 State the required steps in the accounting cycle.
- 5 Explain the approaches to preparing correcting entries.
- 6 Identify the sections of a classified balance sheet.

### Feature Story

#### EVERYONE LIKES TO WIN

When Ted Castle was a hockey coach at the University of Vermont, his players were self-motivated by their desire to win. Hockey was a game you either won or lost. But at **Rhino Foods, Inc.**, a bakery-foods company he founded in Burlington, Vermont, he discovered that manufacturing-line workers were not so self-motivated. Ted thought, what if he turned the food-making business into a game, with rules, strategies, and trophies?

Ted knew that in a game knowing the score is all-important. He felt that only if the employees know the score—know exactly how the business is doing daily, weekly, monthly—could he turn food-making into a game. But Rhino is a closely held, family-owned business, and its financial statements and profits were confidential. Ted wondered, should he open Rhino's books to the employees?

A consultant put Ted's concerns in perspective when he said, "Imagine you're playing touch football. You play for an hour or two, and the whole time I'm sitting there with a book, keeping score. All of a sudden I blow the whistle, and I say, 'OK, that's it. Everybody go home.' I close my book and walk away. How would you feel?" Ted opened his books and revealed the financial statements to his employees.

The next step was to teach employees the rules and strategies of how to "win" at making

food. The first lesson: "Your opponent at Rhino is expenses. You must cut and control expenses." Ted and his staff distilled those lessons into daily scorecards—production reports and income statements—that keep Rhino's employees up-to-date on the game. At noon each day, Ted posts the previous day's results at the entrance to the production room. Everyone checks whether they made or lost money on what they produced the day before. And it's not just an academic exercise: There's a bonus check for each employee at the end of every four-week "game" that meets profitability guidelines.

Rhino has flourished since the first game. Employment has increased from 20 to 130 people, while both revenues and profits have grown dramatically.

- *Accounting Across the Organization: Yale Express Loses Some Transportation Bills* (p. 170)
- *Accounting Across the Organization: Can a Company Be Too Liquid?* (p. 175)

## Preview of CHAPTER 4

At **Rhino Foods, Inc.**, financial statements help employees understand what is happening in the business. In Chapter 3, we prepared financial statements directly from the adjusted trial balance. However, with so many details involved in the end-of-period accounting procedures, it is easy to make errors. One way to minimize errors in the records and to simplify the end-of-period procedures is to use a worksheet.

In this chapter, we will explain the role of the worksheet in accounting. We also will study the remaining steps in the accounting cycle, especially the closing process, again using Pioneer Advertising Agency as an example. Then we will consider correcting entries and classified balance sheets. The content and organization of Chapter 4 are as follows.

| Completing the Accounting Cycle   |  |  |  |
|---|--|--|--|
| Using a Worksheet   | Closing the Books  | Summary of Accounting Cycle  | Classified Balance Sheet   |
| <ul style="list-style-type: none"> <li>• Steps in preparation</li> <li>• Preparing financial statements</li> <li>• Preparing adjusting entries</li> </ul> | <ul style="list-style-type: none"> <li>• Preparing closing entries</li> <li>• Posting closing entries</li> <li>• Preparing a post-closing trial balance</li> </ul> | <ul style="list-style-type: none"> <li>• Reversing entries—An optional step</li> <li>• Correcting entries—An avoidable step</li> </ul> | <ul style="list-style-type: none"> <li>• Current assets</li> <li>• Long-term investments</li> <li>• Property, plant, and equipment</li> <li>• Intangible assets</li> <li>• Current liabilities</li> <li>• Long-term liabilities</li> <li>• Owner's equity</li> </ul> |

## Using a Worksheet

**Study Objective [1]**  
Prepare a worksheet.

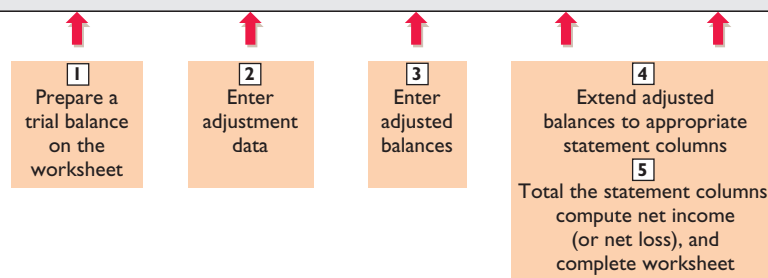

A **worksheet** is a multiple-column form used in the adjustment process and in preparing financial statements. As its name suggests, the worksheet is a working tool. **It is not a permanent accounting record**; it is neither a journal nor a part of the general ledger. The worksheet is merely a device used in preparing adjusting entries and the financial statements. Companies generally computerize worksheets using an electronic spreadsheet program such as Excel.

Illustration 4-1 shows the basic form of a worksheet and the five steps for preparing it. Each step is performed in sequence. **The use of a worksheet is optional.** When a company chooses to use one, it prepares financial statements from the worksheet. It enters the adjustments in the worksheet columns and then journalizes and posts the adjustments after it has prepared the financial statements. Thus, worksheets make it possible to provide the financial statements to management and other interested parties at an earlier date.

### *Steps in Preparing a Worksheet*

We will use the October 31 trial balance and adjustment data of Pioneer Advertising, from Chapter 3, to illustrate how to prepare a worksheet. We describe each step of the process and demonstrate these steps in Illustration 4-2 (page 156) and transparencies 4-3A, B, C, and D.

|    | A              | B                | C   | D           | E   | F                      | G   | H                | I   | J             | K   |
|----|----------------|------------------|-----|-------------|-----|------------------------|-----|------------------|-----|---------------|-----|
| 1  |                | <b>Worksheet</b> |     |             |     |                        |     |                  |     |               |     |
| 2  |                | Trial Balance    |     | Adjustments |     | Adjusted Trial Balance |     | Income Statement |     | Balance Sheet |     |
| 3  |                | Dr.              | Cr. | Dr.         | Cr. | Dr.                    | Cr. | Dr.              | Cr. | Dr.           | Cr. |
| 4  | Account Titles |                  |     |             |     |                        |     |                  |     |               |     |
| 5  |                |                  |     |             |     |                        |     |                  |     |               |     |
| 6  |                |                  |     |             |     |                        |     |                  |     |               |     |
| 7  |                |                  |     |             |     |                        |     |                  |     |               |     |
| 8  |                |                  |     |             |     |                        |     |                  |     |               |     |
| 9  |                |                  |     |             |     |                        |     |                  |     |               |     |
| 10 |                |                  |     |             |     |                        |     |                  |     |               |     |
| 11 |                |                  |     |             |     |                        |     |                  |     |               |     |
| 12 |                |                  |     |             |     |                        |     |                  |     |               |     |
| 13 |                |                  |     |             |     |                        |     |                  |     |               |     |
| 14 |                |                  |     |             |     |                        |     |                  |     |               |     |
| 15 |                |                  |     |             |     |                        |     |                  |     |               |     |
| 16 |                |                  |     |             |     |                        |     |                  |     |               |     |
| 17 |                |                  |     |             |     |                        |     |                  |     |               |     |
| 18 |                |                  |     |             |     |                        |     |                  |     |               |     |
| 19 |                |                  |     |             |     |                        |     |                  |     |               |     |
| 20 |                |                  |     |             |     |                        |     |                  |     |               |     |
| 21 |                |                  |     |             |     |                        |     |                  |     |               |     |
| 22 |                |                  |     |             |     |                        |     |                  |     |               |     |
| 23 |                |                  |     |             |     |                        |     |                  |     |               |     |
| 24 |                |                  |     |             |     |                        |     |                  |     |               |     |
| 25 |                |                  |     |             |     |                        |     |                  |     |               |     |

**Illustration 4-1**

Form and procedure for a worksheet

**STEP 1. PREPARE A TRIAL BALANCE ON THE WORKSHEET**

Enter all ledger accounts with balances in the account titles space. Enter debit and credit amounts from the ledger in the trial balance columns. Illustration 4-2 shows the worksheet trial balance for Pioneer Advertising Agency. This trial balance is the same one that appears in Illustration 2-31 (page 72) and Illustration 3-3 (page 104).

**STEP 2. ENTER THE ADJUSTMENTS IN THE ADJUSTMENTS COLUMNS**

**Turn over the first transparency, Illustration 4-3A.** When using a worksheet, enter all adjustments in the adjustments columns. In entering the adjustments, use applicable trial balance accounts. If additional accounts are needed, insert them on the lines immediately below the trial balance totals. A different letter identifies the debit and credit for each adjusting entry. The term used to describe this process is **keying**. **Companies do not journalize the adjustments until after they complete the worksheet and prepare the financial statements.**

(**Note:** Text continues on page 157, following acetate overlays.)

| Accounts Receivable               |  | (e) | 200          |       |              |
| Interest Expense                  |  | (f) | 50           |       |              |
| Interest Payable                  |  |     |              | (f)   | 50           |
| Salaries and Wages Payable        |  |     |              | (g)   | 1,200        |
| Totals                            |  |     | <u>3,440</u> |       | <u>3,440</u> |

Add additional accounts as needed to complete the adjustments:

- (a) Supplies Used.
- (b) Insurance Expired.
- (c) Depreciation Expensed.
- (d) Service Revenue Earned.
- (e) Service Revenue Accrued.
- (f) Interest Accrued.
- (g) Salaries Accrued.

Enter adjustment amounts in appropriate columns, and use letters to cross-reference the debit and credit adjustments.

Total adjustments columns and check for equality.

|        |        | 50     |
|        |        | 1,200  |

Extend all revenue and expense account balances to the income statement columns.

Extend all asset and liability account balances, as well as owner's capital and drawings account balances, to the balance sheet columns.

The adjustments for Pioneer Advertising Agency are the same as the adjustments illustrated on page 117. They are keyed in the adjustments columns of the worksheet as follows.

- (a) Pioneer debits an additional account, Supplies Expense, \$1,500 for the cost of supplies used, and credits Supplies \$1,500.
- (b) Pioneer debits an additional account, Insurance Expense, \$50 for the insurance that has expired, and credits Prepaid Insurance \$50.
- (c) The company needs two additional depreciation accounts. It debits Depreciation Expense \$40 for the month's depreciation, and credits Accumulated Depreciation—Equipment \$40.
- (d) Pioneer debits Unearned Service Revenue \$400 for services provided, and credits Service Revenue \$400.
- (e) Pioneer debits an additional account, Accounts Receivable, \$200 for services provided but not billed, and credits Service Revenue \$200.
- (f) The company needs two additional accounts relating to interest. It debits Interest Expense \$50 for accrued interest, and credits Interest Payable \$50.
- (g) Pioneer debits Salaries and Wages Expense \$1,200 for accrued salaries, and credits an additional account, Salaries and Wages Payable, \$1,200.

After Pioneer has entered all the adjustments, the adjustments columns are totaled to prove their equality.

### STEP 3. ENTER ADJUSTED BALANCES IN THE ADJUSTED TRIAL BALANCE COLUMNS

**Turn over the second transparency, Illustration 4-3B.** Pioneer determines the adjusted balance of an account by combining the amounts entered in the first four columns of the worksheet for each account. For example, the Prepaid Insurance account in the trial balance columns has a \$600 debit balance and a \$50 credit in the adjustments columns. The result is a \$550 debit balance recorded in the adjusted trial balance columns. **For each account, the amount in the adjusted trial balance columns is the balance that will appear in the ledger after journalizing and posting the adjusting entries.** The balances in these columns are the same as those in the adjusted trial balance in Illustration 3-25 (page 119).

After Pioneer has entered all account balances in the adjusted trial balance columns, the columns are totaled to prove their equality. If the column totals do not agree, the financial statement columns will not balance and the financial statements will be incorrect.

### STEP 4. EXTEND ADJUSTED TRIAL BALANCE AMOUNTS TO APPROPRIATE FINANCIAL STATEMENT COLUMNS

**Turn over the third transparency, Illustration 4-3C.** The fourth step is to extend adjusted trial balance amounts to the income statement and balance sheet columns of the worksheet. Pioneer enters balance sheet accounts in the appropriate balance sheet debit and credit columns. For instance, it enters Cash in the balance sheet debit column, and Notes Payable in the credit column. Pioneer extends Accumulated Depreciation—Equipment to the balance sheet credit column; the reason is that accumulated depreciation is a contra-asset account with a credit balance.

Because the worksheet does not have columns for the owner's equity statement, Pioneer extends the balance in owner's capital to the balance sheet credit column. In addition, it extends the balance in owner's drawings to the balance sheet debit column because it is an owner's equity account with a debit balance.

#### Helpful Hint

Every adjusted trial balance amount must be extended to one of the four statement columns.

The company enters the expense and revenue accounts such as Salaries and Wages Expense and Service Revenue in the appropriate income statement columns. Illustration 4-3C shows all of these extensions.

#### STEP 5. TOTAL THE STATEMENT COLUMNS, COMPUTE THE NET INCOME (OR NET LOSS), AND COMPLETE THE WORKSHEET

**Turn over the fourth transparency, Illustration 4-3D.** The company now must total each of the financial statement columns. The net income or loss for the period is the difference between the totals of the two income statement columns. If total credits exceed total debits, the result is net income. In such a case, as shown in Illustration 4-3D, the company inserts the words “Net Income” in the account titles space. It then enters the amount in the income statement debit column and the balance sheet credit column. **The debit amount balances the income statement columns; the credit amount balances the balance sheet columns.** In addition, the credit in the balance sheet column indicates the increase in owner’s equity resulting from net income.

What if total debits in the income statement columns exceed total credits? In that case, the company has a net loss. It enters the amount of the net loss in the income statement credit column and the balance sheet debit column.

After entering the net income or net loss, the company determines new column totals. The totals shown in the debit and credit income statement columns will match. So will the totals shown in the debit and credit balance sheet columns. If either the income statement columns or the balance sheet columns are not equal after the net income or net loss has been entered, there is an error in the worksheet. Illustration 4-3D shows the completed worksheet for Pioneer Advertising Agency.

### *Preparing Financial Statements from a Worksheet*

After a company has completed a worksheet, it has at hand all the data required for preparation of financial statements. The income statement is prepared from the income statement columns. The balance sheet and owner’s equity statement are prepared from the balance sheet columns. Illustration 4-4 (page 159) shows the financial statements prepared from Pioneer’s worksheet. At this point, the company has not journalized or posted adjusting entries. Therefore, ledger balances for some accounts are not the same as the financial statement amounts.

The amount shown for owner’s capital on the worksheet is the account balance **before considering drawings and net income (or loss)**. When the owner has made no additional investments of capital during the period, this worksheet amount for owner’s capital is the balance at the beginning of the period.

Using a worksheet, companies can prepare financial statements before they journalize and post adjusting entries. **However, the completed worksheet is not a substitute for formal financial statements.** The format of the data in the financial statement columns of the worksheet is not the same as the format of the financial statements. **A worksheet is essentially a working tool of the accountant;** companies do not distribute it to management and other parties.

Accounting Cycle Tutorial—  
Preparing Financial  
Statements and Closing the  
Books

#### Helpful Hint

Note that writing the explanation to the adjustment at the bottom of the worksheet is not required.

### *Preparing Adjusting Entries from a Worksheet*

**A worksheet is not a journal, and it cannot be used as a basis for posting to ledger accounts.** To adjust the accounts, the company must journalize the adjustments and

| Unearned service revenue                     | 800          |                 |
| Salaries and wages payable                   | <u>1,200</u> |                 |
| Total liabilities                            |              | \$ 9,550        |
| Owner's equity                               |              |                 |
| Owner's capital                              |              | 12,360          |
| Total liabilities and owner's equity         |              | <u>\$21,910</u> |

post them to the ledger. **The adjusting entries are prepared from the adjustments columns of the worksheet.** The reference letters in the adjustments columns and the explanations of the adjustments at the bottom of the worksheet help identify the adjusting entries. The journalizing and posting of adjusting entries **follows** the preparation of financial statements when a worksheet is used. The adjusting entries on October 31 for Pioneer Advertising Agency are the same as those shown in Illustration 3-23 (page 117).

## Do it!

### Worksheet

Susan Elbe is preparing a worksheet. Explain to Susan how she should extend the following adjusted trial balance accounts to the financial statement columns of the worksheet.

Cash  
Accumulated Depreciation  
Accounts Payable  
Owner's Drawings  
Service Revenue  
Salaries and Wages Expense

#### action plan

✓ Balance sheet: Extend assets to debit column. Extend liabilities to credit column. Extend contra assets to credit column. Extend drawings account to debit column.

✓ Income statement: Extend expenses to debit column. Extend revenues to credit column.

#### Solution

Income statement debit column—Salaries and Wages Expense  
Income statement credit column—Service Revenue  
Balance sheet debit column—Cash; Owner's Drawings  
Balance sheet credit column—Accumulated Depreciation; Accounts Payable

Related exercise material: BE4-1, BE4-2, BE4-3, E4-1, E4-2, E4-5, E4-6, and **Do it!** 4-1.

## Closing the Books

### Study Objective [2]

Explain the process of closing the books.

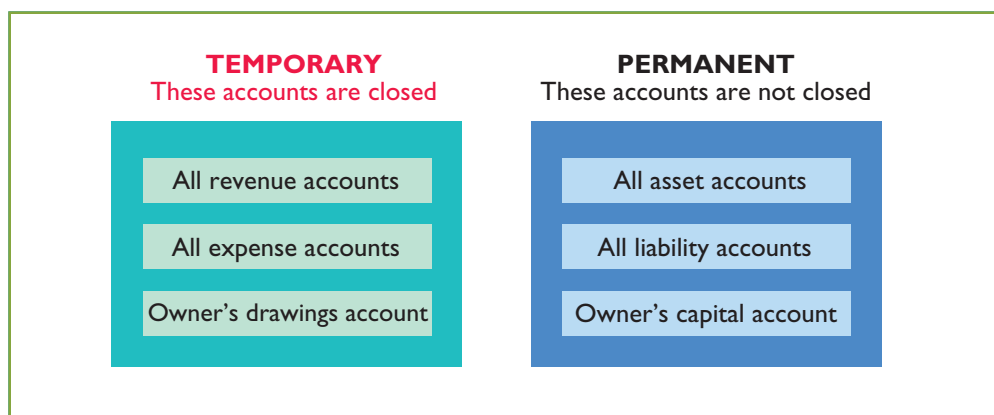

#### Alternative Terminology

Temporary accounts are sometimes called *nominal accounts*, and permanent accounts are sometimes called *real accounts*.

At the end of the accounting period, the company makes the accounts ready for the next period. This is called **closing the books**. In closing the books, the company distinguishes between temporary and permanent accounts.

**Temporary accounts** relate only to a given accounting period. They include all income statement accounts and the owner's drawings account. **The company closes all temporary accounts at the end of the period.**

In contrast, **permanent accounts** relate to one or more future accounting periods. They consist of all balance sheet accounts, including the owner's capital account. **Permanent accounts are not closed from period to period.** Instead, the company carries forward the balances of permanent accounts into the next accounting period. Illustration 4-5 identifies the accounts in each category.

**Illustration 4-5**  
Temporary versus permanent accounts

### Helpful Hint

A contra-asset account, such as accumulated depreciation, is a permanent account also.

## Preparing Closing Entries

At the end of the accounting period, the company transfers temporary account balances to the permanent owner's equity account, Owner's Capital, by means of closing entries.<sup>1</sup>

**Closing entries** formally recognize in the ledger the transfer of net income (or net loss) and owner's drawings to owner's capital. The owner's equity statement shows the results of these entries. **Closing entries also produce a zero balance in each temporary account.** The temporary accounts are then ready to accumulate data in the next accounting period separate from the data of prior periods. Permanent accounts are not closed.

**Journalizing and posting closing entries is a required step in the accounting cycle.** (See Illustration 4-12 on page 168.) The company performs this step after it has prepared financial statements. In contrast to the steps in the cycle that you have already studied, companies generally journalize and post closing entries **only at the end of the annual accounting period.** Thus, all temporary accounts will contain data for the entire year.

In preparing closing entries, companies could close each income statement account directly to owner's capital. However, to do so would result in excessive detail in the permanent Owner's Capital account. Instead, companies close the revenue and expense accounts to another temporary account, **Income Summary**, and they transfer the resulting net income or net loss from this account to owner's capital.

Companies **record closing entries in the general journal.** A center caption, Closing Entries, inserted in the journal between the last adjusting entry and the first closing entry, identifies these entries. Then the company posts the closing entries to the ledger accounts.

Companies generally prepare closing entries directly from the adjusted balances in the ledger. They could prepare separate closing entries for each nominal account, but the following four entries accomplish the desired result more efficiently:

1. Debit each revenue account for its balance, and credit Income Summary for total revenues.
2. Debit Income Summary for total expenses, and credit each expense account for its balance.

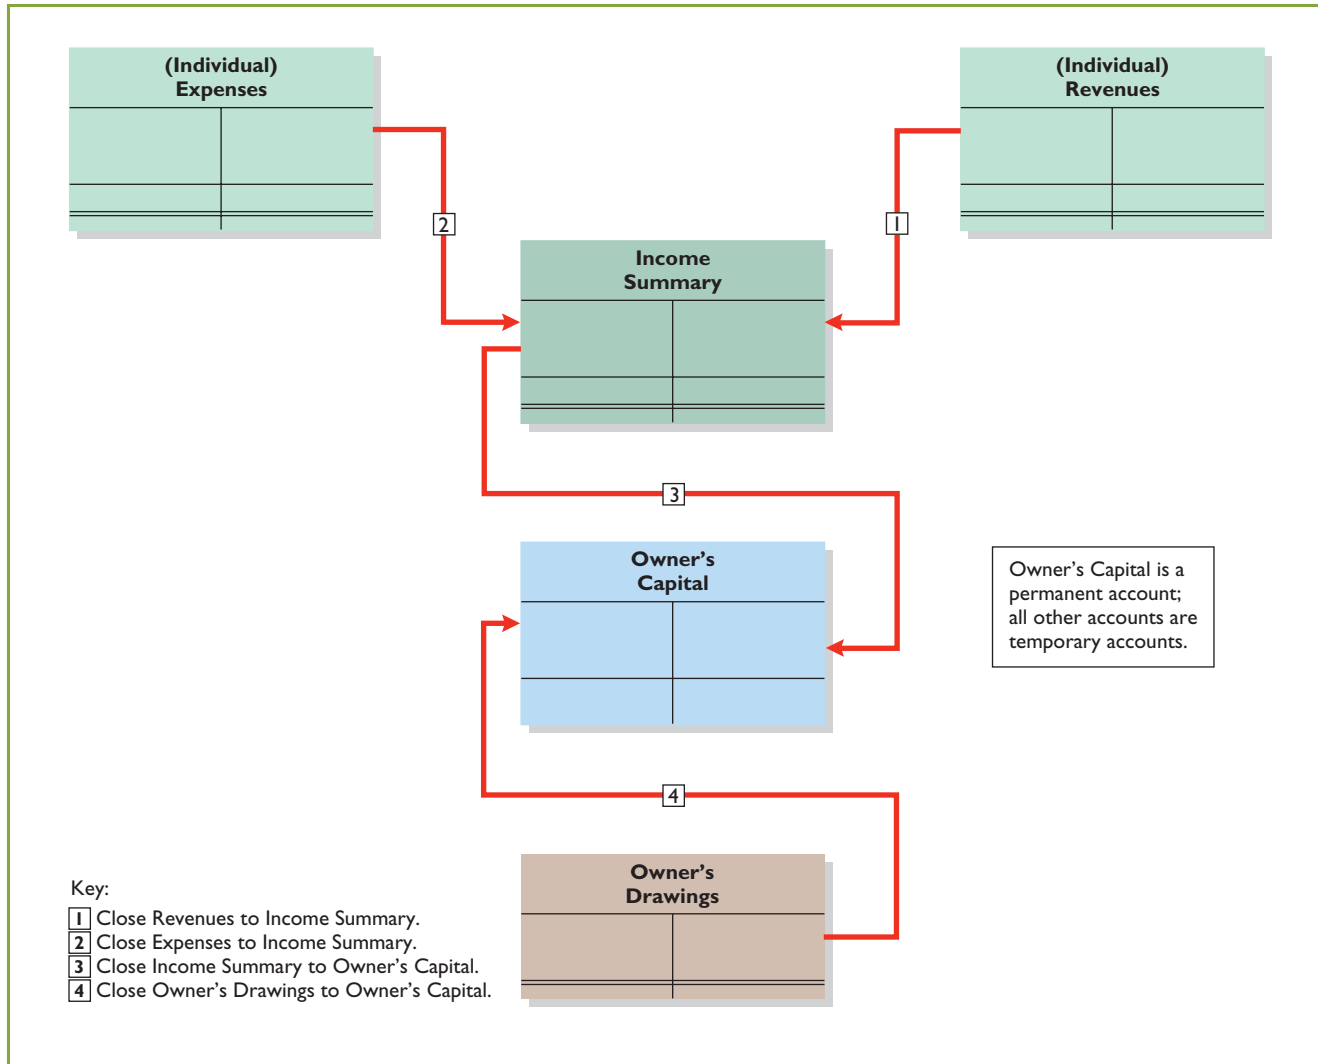

<sup>1</sup>We explain closing entries for a partnership and for a corporation in Chapters 12 and 13, respectively.

**Helpful Hint**

Owner's Drawings is closed directly to Owner's Capital and *not* to Income Summary; Owner's Drawings is not an expense.

3. Debit Income Summary and credit Owner's Capital for the amount of net income.
4. Debit Owner's Capital for the balance in the Owner's Drawings account, and credit Owner's Drawings for the same amount.

Illustration 4-6 presents a diagram of the closing process. In it, the boxed numbers refer to the four entries required in the closing process.

**Illustration 4-6**  
Diagram of closing process—  
proprietorship

If there were a net loss (because expenses exceeded revenues), entry 3 in Illustration 4-6 would be reversed: there would be a credit to Income Summary and a debit to Owner's Capital.

**CLOSING ENTRIES ILLUSTRATED**

In practice, companies generally prepare closing entries only at the end of the annual accounting period. However, to illustrate the journalizing and posting of closing entries, we will assume that Pioneer Advertising Agency closes its books monthly. Illustration 4-7 shows the closing entries at October 31. (The numbers in parentheses before each entry correspond to the four entries diagrammed in Illustration 4-6.)

|                        | (To close expense accounts)      |      |        |        |
|                        | (3)                              |      |        |        |
| 31                     | Income Summary                   | 350  | 2,860  |        |
|                        | Owner's Capital                  | 301  |        | 2,860  |
|                        | (To close net income to capital) |      |        |        |
|                        | (4)                              |      |        |        |
| 31                     | Owner's Capital                  | 301  | 500    |        |
|                        | Owner's Drawings                 | 306  |        | 500    |
|                        | (To close drawings to capital)   |      |        |        |

**Illustration 4-7**  
Closing entries journalized

Note that the amounts for Income Summary in entries (1) and (2) are the totals of the income statement credit and debit columns, respectively, in the worksheet.

A couple of cautions in preparing closing entries: (1) Avoid unintentionally doubling the revenue and expense balances rather than zeroing them. (2) Do not close Owner's Drawings through the Income Summary account. **Owner's Drawings is not an expense, and it is not a factor in determining net income.**

## Posting Closing Entries

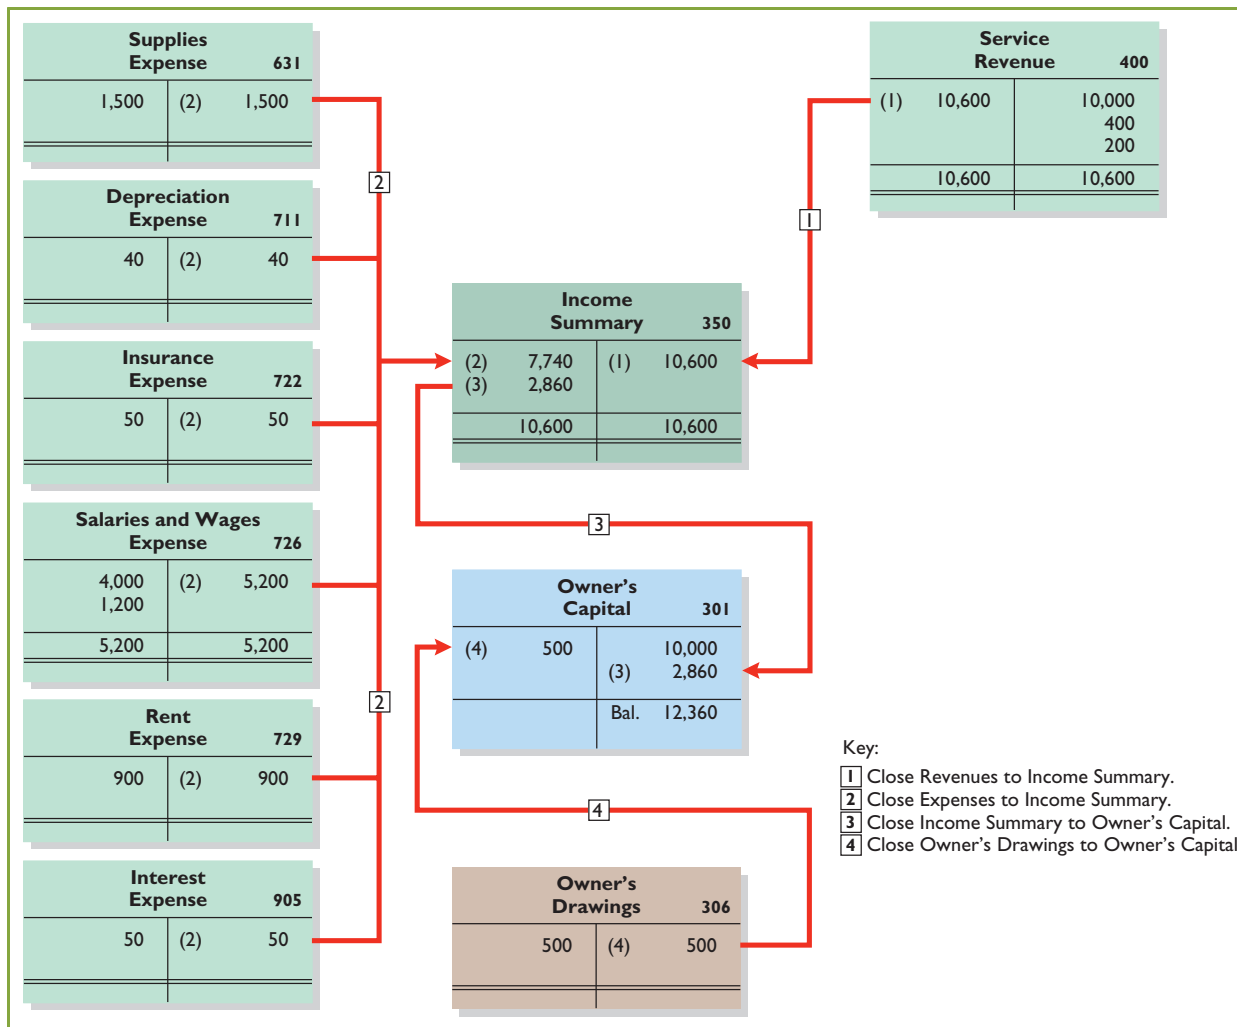

Illustration 4-8 (page 164) shows the posting of the closing entries and the ruling of the accounts. Note that all temporary accounts have zero balances after posting the closing entries. In addition, notice that the balance in owner's capital (Owner's Capital) represents the total equity of the owner at the end of the accounting period. This balance is shown on the balance sheet and is the ending capital reported on the owner's equity statement, as shown in Illustration 4-4 on page 159. Pioneer uses the Income Summary account only in closing. It does not journalize and post entries to this account during the year.

As part of the closing process, Pioneer totals, balances, and double-rules its temporary accounts—revenues, expenses, and owner's drawings, as shown in T account form in Illustration 4-8. It does not close its permanent accounts—assets, liabilities, and owner's capital. Instead, Pioneer draws a single rule beneath the current-period entries for the permanent accounts. The account balance is then entered below the single rule and is carried forward to the next period. (For example, see Owner's Capital.)

### Helpful Hint

The balance in Income Summary before it is closed must equal the net income or net loss for the period.

**Illustration 4-8**  
Posting of closing entries

## Do it!

### Closing Entries

The worksheet for Hancock Company shows the following in the financial statement columns:

Owner's drawings \$15,000

Owner's capital \$42,000

Net income \$18,000

Prepare the closing entries at December 31 that affect owner's capital.

#### action plan

- ✓ Close Income Summary to Owner's Capital.
- ✓ Close Owner's Drawings to Owner's Capital.

#### Solution

|         |                                  |        |        |
|---------|----------------------------------|--------|--------|
| Dec. 31 | Income Summary                   | 18,000 |        |
|         | Owner's Capital                  |        | 18,000 |
|         | (To close net income to capital) |        |        |
| 31      | Owner's Capital                  | 15,000 |        |
|         | Owner's Drawings                 |        | 15,000 |
|         | (To close drawings to capital)   |        |        |

## ACCOUNTING ACROSS THE ORGANIZATION

### Cisco Performs the Virtual Close

Technology has dramatically shortened the closing process. Recent surveys have reported that the average company now takes only six to seven days to close, rather than 20 days. But a few companies do much better. **Cisco Systems** can perform a “virtual close”—closing within 24 hours on any day in the quarter. The same is true at **Lockheed Martin Corp.**, which improved its closing time by 85% in just the last few years. Not very long ago it took 14 to 16 days. Managers at these companies emphasize that this increased speed has not reduced the accuracy and completeness of the data.

This is not just showing off. Knowing exactly where you are financially all of the time allows the company to respond faster than competitors. It also means that the hundreds of people who used to spend 10 to 20 days a quarter tracking transactions can now be more usefully employed on things such as mining data for business intelligence to find new business opportunities.

Source: “Reporting Practices: Few Do It All,” *Financial Executive* (November 2003), p. 11.

**?** Who else benefits from a shorter closing process? (See page 204.)

## Preparing a Post-Closing Trial Balance

After Pioneer has journalized and posted all closing entries, it prepares another trial balance, called a **post-closing trial balance**, from the ledger. The post-closing trial balance lists permanent accounts and their balances after journalizing and posting of closing entries. The purpose of the post-closing trial balance is **to prove the equality of the permanent account balances carried forward into the next accounting period**. Since all temporary accounts will have zero balances, **the post-closing trial balance will contain only permanent—balance sheet—accounts**.

Illustration 4-9 shows the post-closing trial balance for Pioneer Advertising Agency.

**Study Objective [3]**  
Describe the content and purpose of a post-closing trial balance.

**Pioneer Advertising Agency**  
Post-Closing Trial Balance

*Note:* The permanent accounts for Pioneer Advertising Agency are shown here; Illustration 4-11 shows the temporary accounts. Both permanent and temporary accounts are part of the general ledger; they are segregated here to aid in learning.

A post-closing trial balance provides evidence that the company has properly journalized and posted the closing entries. It also shows that the accounting equation is in balance at the end of the accounting period. However, like the trial balance, it does not prove that Pioneer has recorded all transactions or that the ledger is correct.

For example, the post-closing trial balance still will balance even if a transaction is not journalized and posted or if a transaction is journalized and posted twice.

The remaining accounts in the general ledger are temporary accounts, shown in Illustration 4-11. After Pioneer correctly posts the closing entries, each temporary account has a zero balance. These accounts are double-ruled to finalize the closing process.

## Summary of the Accounting Cycle

Illustration 4-12 (page 168) summarizes the steps in the accounting cycle. You can see that the cycle begins with the analysis of business transactions and ends with the preparation of a post-closing trial balance.

Steps 1–3 may occur daily during the accounting period, as explained in Chapter 2. Companies perform Steps 4–7 on a periodic basis, such as monthly, quarterly, or annually. Steps 8 and 9—closing entries, and a post-closing trial balance—usually take place only at the end of a company’s **annual** accounting period.

**Study Objective [4]**  
State the required steps in the accounting cycle.

**Illustration 4-12**  
Steps in the accounting cycle

There are also two **optional steps** in the accounting cycle. As you have seen, companies may use a worksheet in preparing adjusting entries and financial statements. In addition, they may use reversing entries, as explained below.

### **Reversing Entries—An Optional Step**

Some accountants prefer to reverse certain adjusting entries by making a **reversing entry** at the beginning of the next accounting period. A reversing entry is the exact opposite of the adjusting entry made in the previous period. **Use of reversing entries is an optional bookkeeping procedure; it is not a required step in the accounting cycle.** Accordingly, we have chosen to cover this topic in an appendix at the end of the chapter.

#### **Study Objective [5]**

Explain the approaches to preparing correcting entries.

### **Correcting Entries—An Avoidable Step**

Unfortunately, errors may occur in the recording process. Companies should correct errors, **as soon as they discover them**, by journalizing and posting **correcting entries**. If the accounting records are free of errors, no correcting entries are needed.

You should recognize several differences between correcting entries and adjusting entries. First, adjusting entries are an integral part of the accounting cycle. Correcting entries, on the other hand, are unnecessary if the records are error-free. Second, companies journalize and post adjustments **only at the end of an accounting period**. In contrast, companies make correcting entries **whenever they discover an error**. Finally, adjusting entries always affect at least one balance sheet account and one income statement account. In contrast, correcting entries may involve any combination of accounts in need of correction. **Correcting entries must be posted before closing entries.**

To determine the correcting entry, it is useful to compare the incorrect entry with the correct entry. Doing so helps identify the accounts and amounts that should—and should not—be corrected. After comparison, the accountant makes an entry to correct the accounts. The following two cases for Mercato Co. illustrate this approach.

**CASE 1**

On May 10, Mercato Co. journalized and posted a \$50 cash collection on account from a customer as a debit to Cash \$50 and a credit to Service Revenue \$50. The company discovered the error on May 20, when the customer paid the remaining balance in full.

| Incorrect Entry (May 10) |    |    | Correct Entry (May 10) |    |    |
|--------------------------|----|----|------------------------|----|----|
| Cash                     | 50 |    | Cash                   | 50 |    |
| Service Revenue          |    | 50 | Accounts Receivable    |    | 50 |

**Illustration 4-13**  
Comparison of entries

Comparison of the incorrect entry with the correct entry reveals that the debit to Cash \$50 is correct. However, the \$50 credit to Service Revenue should have been credited to Accounts Receivable. As a result, both Service Revenue and Accounts Receivable are overstated in the ledger. Mercato makes the following correcting entry.

| Correcting Entry |                              |  |    |    |  |
|------------------|------------------------------|--|----|----|--|
| May 20           | Service Revenue              |  | 50 |    |  |
|                  | Accounts Receivable          |  |    | 50 |  |
|                  | (To correct entry of May 10) |  |    |    |  |

**Illustration 4-14**  
Correcting entry

|   |   |   |   |    |   |         |
|---|---|---|---|----|---|---------|
| A | = | L | + | OE | = | -50 Rev |
|   |   |   |   |    |   | -50     |

**Cash Flows**  
no effect

**CASE 2**

On May 18, Mercato purchased on account equipment costing \$450. The transaction was journalized and posted as a debit to Equipment \$45 and a credit to Accounts Payable \$45. The error was discovered on June 3, when Mercato received the monthly statement for May from the creditor.

| Incorrect Entry (May 18) |    |    | Correct Entry (May 18) |     |     |
|--------------------------|----|----|------------------------|-----|-----|
| Equipment                | 45 |    | Equipment              | 450 |     |
| Accounts Payable         |    | 45 | Accounts Payable       |     | 450 |

**Illustration 4-15**  
Comparison of entries

Comparison of the two entries shows that two accounts are incorrect. Equipment is understated \$405, and Accounts Payable is understated \$405. Mercato makes the following correcting entry.

**Ethics Note**

When companies find errors in previously released income statements, they restate those numbers. Perhaps because of the increased scrutiny caused by Sarbanes-Oxley, in a recent year companies filed a record 1,195 restatements.

|      |   |      |   |    |
|------|---|------|---|----|
| A    | = | L    | + | OE |
| +405 |   | +405 |   |    |

**Cash Flows**  
no effect

**Illustration 4-16**  
Correcting entry

| Correcting Entry |   |     |     |
|------------------|---|-----|-----|
| June 3           | Equipment<br>Accounts Payable<br>(To correct entry of May 18) | 405 | 405 |

Instead of preparing a correcting entry, **it is possible to reverse the incorrect entry and then prepare the correct entry.** This approach will result in more entries and postings than a correcting entry, but it will accomplish the desired result.

## ACCOUNTING ACROSS THE ORGANIZATION

### Yale Express Loses Some Transportation Bills

**Yale Express**, a short-haul trucking firm, turned over much of its cargo to local truckers to complete deliveries. Yale collected the entire delivery charge; when billed by the local trucker, Yale sent payment for the final phase to the local trucker. Yale used a cutoff period of 20 days into the next accounting period in making its adjusting entries for accrued liabilities. That is, it waited 20 days to receive the local truckers' bills to determine the amount of the unpaid but incurred delivery charges as of the balance sheet date.

On the other hand, **Republic Carloading**, a nationwide, long-distance freight forwarder, frequently did not receive transportation bills from truckers to whom it passed on cargo until months after the year-end. In making its year-end adjusting entries, Republic waited for months in order to include all of these outstanding transportation bills.

When Yale Express merged with Republic Carloading, Yale's vice president employed the 20-day cutoff procedure for both firms. As a result, millions of dollars of Republic's accrued transportation bills went unrecorded. When the company detected the error and made correcting entries, these and other errors changed a reported profit of \$1.14 million into a loss of \$1.88 million!

**?** What might Yale Express's vice president have done to produce more accurate financial statements without waiting months for Republic's outstanding transportation bills? (See page 204.)

## The Classified Balance Sheet

**Study Objective [6]**  
Identify the sections of a classified balance sheet.

The balance sheet presents a snapshot of a company's financial position at a point in time. To improve users' understanding of a company's financial position, companies often use a classified balance sheet. A **classified balance sheet** groups together similar assets and similar liabilities, using a number of standard classifications and sections. This is useful because items within a group have similar economic characteristics. A classified balance sheet generally contains the standard classifications listed in Illustration 4-17.

**Illustration 4-17**  
Standard balance sheet classifications

| Assets                         | Liabilities and Owner's Equity |
|--------------------------------|--------------------------------|
| Current assets                 | Current liabilities            |
| Long-term investments          | Long-term liabilities          |
| Property, plant, and equipment | Owner's (Stockholders') equity |
| Intangible assets              |                                |

These groupings help readers determine such things as (1) whether the company has enough assets to pay its debts as they come due, and (2) the claims of short- and long-term creditors on the company's total assets. Many of these groupings can be seen in the balance sheet of Franklin Company shown in Illustration 4-18 below. In the sections that follow, we explain each of these groupings.

| Franklin Company                             |          |          |          |
|--|----------|----------|----------|
| Balance Sheet                                |          |          |          |
| October 31, 2012                             |          |          |          |
| <b><u>Assets</u></b>                         |          |          |          |
| <b>Current assets</b>                        |          |          |          |
| Cash   | \$       | 6,600    |          |
| Short-term investments                       |          | 2,000    |          |
| Accounts receivable                          |          | 7,000    |          |
| Notes receivable                             |          | 1,000    |          |
| Inventory                                    |          | 3,000    |          |
| Supplies                                     |          | 2,100    |          |
| Prepaid insurance                            |          | 400      |          |
| Total current assets                         |          |          | \$22,100 |
| <b>Long-term investments</b>                 |          |          |          |
| Investment in stock of Walters Corp.         |          | 5,200    |          |
| Investment in real estate                    |          | 2,000    | 7,200    |
| <b>Property, plant, and equipment</b>        |          |          |          |
| Land   |          | 10,000   |          |
| Equipment                                    | \$24,000 |          |          |
| Less: Accumulated depreciation—<br>equipment | 5,000    | 19,000   | 29,000   |
| <b>Intangible assets</b>                     |          |          |          |
| Patents                                      |          |          | 3,100    |
| Total assets                                 |          |          | \$61,400 |
| <b><u>Liabilities and Owner's Equity</u></b> |          |          |          |
| <b>Current liabilities</b>                   |          |          |          |
| Notes payable                                |          | \$11,000 |          |
| Accounts payable                             |          | 2,100    |          |
| Salaries and wages payable                   |          | 1,600    |          |
| Unearned service revenue                     |          | 900      |          |
| Interest payable                             |          | 450      |          |
| Total current liabilities                    |          |          | \$16,050 |
| <b>Long-term liabilities</b>                 |          |          |          |
| Mortgage payable                             |          | 10,000   |          |
| Notes payable                                |          | 1,300    |          |
| Total long-term liabilities                  |          |          | 11,300   |
| Total liabilities                            |          |          | 27,350   |
| <b>Owner's equity</b>                        |          |          |          |
| Owner's capital                              |          |          | 34,050   |
| Total liabilities and owner's equity         |          |          | \$61,400 |

**Illustration 4-18**  
Classified balance sheet

#### Helpful Hint

Recall that the basic accounting equation is  

$$\text{Assets} = \text{Liabilities} + \text{Owner's Equity}.$$

## Current Assets

**Current assets** are assets that a company expects to convert to cash or use up within one year or its operating cycle, whichever is longer. In Illustration 4-18, Franklin Company had current assets of \$22,100. For most businesses the cutoff for classification as current assets is one year from the balance sheet date. For example, accounts receivable are current assets because the company will collect them and convert them to cash within one year. Supplies is a current asset because the company expects to use it up in operations within one year.

Some companies use a period longer than one year to classify assets and liabilities as current because they have an operating cycle longer than one year. The **operating cycle** of a company is the average time that it takes to purchase inventory, sell it on account, and then collect cash from customers. For most businesses this cycle takes less than a year, so they use a one-year cutoff. But, for some businesses, such as vineyards or airplane manufacturers, this period may be longer than a year. **Except where noted, we will assume that companies use one year to determine whether an asset or liability is current or long-term.**

Common types of current assets are (1) cash, (2) short-term investments (such as short-term U.S. government securities), (3) receivables (notes receivable, accounts receivable, and interest receivable), (4) inventories, and (5) prepaid expenses (insurance and supplies). **On the balance sheet, companies usually list these items in the order in which they expect to convert them into cash.**

Illustration 4-19 presents the current assets of **Southwest Airlines Co.**

**Illustration 4-19**  
Current assets section

| <b>Southwest Airlines Co.</b>             |                |
|---|----------------|
| Balance Sheet (partial)                   |                |
| (in millions)                             |                |
| <b>Current assets</b>                     |                |
| Cash and cash equivalents                 | \$1,390        |
| Short-term investments                    | 369            |
| Accounts receivable                       | 241            |
| Inventories                               | 181            |
| Prepaid expenses and other current assets | 420            |
| Total current assets                      | <u>\$2,601</u> |

As explained later in the chapter, a company's current assets are important in assessing its short-term debt-paying ability.

## Long-Term Investments

**Long-term investments** are generally, (1) investments in stocks and bonds of other companies that are normally held for many years, and (2) long-term assets such as land or buildings that a company is not currently using in its operating activities. In Illustration 4-18, Franklin Company reported total long-term investments of \$7,200 on its balance sheet.

**Yahoo! Inc.** reported long-term investments in its balance sheet as shown in Illustration 4-20.

### Alternative Terminology

Long-term investments are often referred to simply as *investments*.

**Illustration 4-20**  
Long-term investments  
section

**Long-term investments**

|  |          |
|--|----------|
| Long-term investments in marketable securities | \$90,266 |
|--|----------|

## Property, Plant, and Equipment

**Property, plant, and equipment** are assets with relatively long useful lives that a company is currently using in operating the business. This category (sometimes called *fixed assets*) includes land, buildings, machinery and equipment, delivery equipment, and furniture. In Illustration 4-18, Franklin Company reported property, plant, and equipment of \$29,000.

**Depreciation** is the practice of allocating the cost of assets to a number of years. Companies do this by systematically assigning a portion of an asset's cost as an expense each year (rather than expensing the full purchase price in the year of purchase). The assets that the company depreciates are reported on the balance sheet at cost less accumulated depreciation. The **accumulated depreciation** account shows the total amount of depreciation that the company has expensed thus far in the asset's life. In Illustration 4-18, Franklin Company reported accumulated depreciation of \$5,000.

Illustration 4-21 presents the property, plant, and equipment of **Cooper Tire & Rubber Company**.

### International Note

In 2007 China adopted International Financial Reporting Standards (IFRS). This was done in an effort to reduce fraud and increase investor confidence in financial reports. Under these standards, many items, such as property, plant, and equipment, may be reported at current fair values, rather than historical cost.

equipment section

**Property, plant, and equipment**

|                                |                |                  |
|--------------------------------|----------------|------------------|
| Land and land improvements     | \$ 41,553      |                  |
| Buildings                      | 298,706        |                  |
| Machinery and equipment        | 1,636,091      |                  |
| Molds, cores, and rings        | <u>268,158</u> | \$2,244,508      |
| Less: Accumulated depreciation |                | <u>1,252,692</u> |
|                                |                | \$ 991,816       |

## Intangible Assets

Many companies have long-lived assets that do not have physical substance yet often are very valuable. We call these assets **intangible assets**. One common intangible asset is goodwill. Others include patents, copyrights, and trademarks or trade names that give the company **exclusive right** of use for a specified period of time. In Illustration 4-18, Franklin Company reported intangible assets of \$3,100.

### Helpful Hint

Sometimes intangible assets are reported under a broader heading called "Other assets."

Illustration 4-22 shows the intangible assets of media giant **Time Warner, Inc.**

**Illustration 4-22**  
Intangible assets section

| Sports franchises                               | 262             |
| Brands, trademarks, and other intangible assets | 8,313           |
|   | <u>\$92,806</u> |

## Do it!

### Asset Section of Balance Sheet

Baxter Hoffman recently received the following information related to Hoffman Company's December 31, 2012, balance sheet.

|                   |          |  |         |
|-------------------|----------|--|---------|
| Prepaid insurance | \$ 2,300 | Inventory                              | \$3,400 |
| Cash              | 800      | Accumulated depreciation—<br>equipment | 2,700   |
| Equipment         | 10,700   | Accounts receivable                    | 1,100   |

#### action plan

- ✓ Present current assets first. Current assets are cash and other resources that the company expects to convert to cash or use up within one year.
- ✓ Present current assets in the order in which the company expects to convert them into cash.
- ✓ Subtract accumulated depreciation—equipment from equipment to determine net equipment.

Prepare the asset section of Hoffman Company's balance sheet.

#### Solution

| <u>Assets</u>                            |              |                        |
|--|--------------|------------------------|
| Current assets                           |              |                        |
| Cash                                     | \$ 800       |                        |
| Accounts receivable                      | 1,100        |                        |
| Inventory                                | 3,400        |                        |
| Prepaid insurance                        | <u>2,300</u> |                        |
| Total current assets                     |              | \$ 7,600               |
| Equipment                                | 10,700       |                        |
| Less: Accumulated depreciation—equipment | <u>2,700</u> | <u>8,000</u>           |
| Total assets                             |              | <u><u>\$15,600</u></u> |

Related exercise material: BE4-10 and **Do it!** 4-3.

#### Ethics Note

A company that has more current assets than current liabilities can increase the ratio of current assets to current liabilities by using cash to pay off some current liabilities. This gives the appearance of being more liquid. Do you think this move is ethical?

## Current Liabilities

In the liabilities and owners' equity section of the balance sheet, the first grouping is current liabilities. **Current liabilities** are obligations that the company is to pay within the coming year or its operating cycle, whichever is longer. Common examples are accounts payable, wages payable, bank loans payable, interest payable, and taxes payable. Also included as current liabilities are current maturities of long-term obligations—payments to be made within the next year on long-term obligations. In Illustration 4-18, Franklin Company reported five different types of current liabilities, for a total of \$16,050.

Within the current liabilities section, companies usually list notes payable first, followed by accounts payable. Other items then follow in the order of their magnitude. *In your homework, you should present notes payable first, followed by accounts payable, and then other liabilities in order of magnitude.*

Illustration 4-23 shows the current liabilities section adapted from the balance sheet of **Marcus Corporation**.

|  <b>Marcus Corporation</b><br>Balance Sheet (partial)<br>(in thousands) |                  |
|--|------------------|
| <b>Current liabilities</b>   |                  |
| Notes payable  | \$ 239           |
| Accounts payable   | 24,242           |
| Current maturities of long-term debt   | 57,250           |
| Other current liabilities  | 27,477           |
| Taxes payable  | 11,215           |
| Accrued compensation payable   | 6,720            |
| <b>Total current liabilities</b>   | <b>\$127,143</b> |

**Illustration 4-23**  
Current liabilities section

Users of financial statements look closely at the relationship between current assets and current liabilities. This relationship is important in evaluating a company’s **liquidity**—its ability to pay obligations expected to be due within the next year. When current assets exceed current liabilities at the balance sheet date, the likelihood for paying the liabilities is favorable. When the reverse is true, short-term creditors may not be paid, and the company may ultimately be forced into bankruptcy.

## ACCOUNTING ACROSS THE ORGANIZATION

### Can a Company Be Too Liquid?

There actually is a point where a company can be too liquid—that is, it can have too much working capital (current assets less current liabilities). While it is important to be liquid enough to be able to pay short-term bills as they come due, a company does not want to tie up its cash in extra inventory or receivables that are not earning the company money.

By one estimate from the **REL Consultancy Group**, the thousand largest U.S. companies have on their books cumulative excess working capital of \$764 billion. Based on this figure, companies could have reduced debt by 36% or increased net income by 9%. Given that managers throughout a company are interested in improving profitability, it is clear that they should have an eye toward managing working capital. They need to aim for a “Goldilocks solution”—not too much, not too little, but just right.

Source: K. Richardson, “Companies Fall Behind in Cash Management,” *Wall Street Journal* (June 19, 2007).

**?** What can various company managers do to ensure that working capital is managed efficiently to maximize net income? (See page 204.)

## Long-Term Liabilities

**Long-term liabilities** are obligations that a company expects to pay **after** one year. Liabilities in this category include bonds payable, mortgages payable, long-term notes payable, lease liabilities, and pension liabilities. Many companies report long-term debt maturing after one year as a single amount in the balance sheet and show

the details of the debt in notes that accompany the financial statements. Others list the various types of long-term liabilities. In Illustration 4-18, Franklin Company reported long-term liabilities of \$11,300. *In your homework, list long-term liabilities in the order of their magnitude.*

Illustration 4-24 shows the long-term liabilities that **The Procter & Gamble Company** reported in its balance sheet.

**Illustration 4-24**

| (in millions)                           |              |
| <b>Long-term liabilities</b>            |              |
| Long-term debt                          | \$23,375     |
| Deferred income taxes                   | 12,015       |
| Other noncurrent liabilities            | <u>5,147</u> |
| Total long-term liabilities             | \$40,537     |

### Owner's Equity

#### Alternative Terminology

Common stock is sometimes called *capital stock*.

The content of the owner's equity section varies with the form of business organization. In a proprietorship, there is one capital account. In a partnership, there is a capital account for each partner. Corporations divide owners' equity into two accounts—Common Stock (sometimes referred to as Capital Stock) and Retained Earnings. Corporations record stockholders' investments in the company by debiting an asset account and crediting the Common Stock account. They record in the Retained Earnings account income retained for use in the business. Corporations combine the Common Stock and Retained Earnings accounts and report them on the balance sheet as **stockholders' equity**. (We'll learn more about these corporation accounts in later chapters.) **Nordstrom, Inc.** recently reported its stockholders' equity section as follows.

**Illustration 4-25**

| (\$ in thousands)            |                  |
| <b>Stockholders' equity</b>  |                  |
| Common stock, 271,331 shares | \$ 685,934       |
| Retained earnings            | <u>1,406,747</u> |
| Total stockholders' equity   | \$2,092,681      |

## Do it!

### Balance Sheet Classifications

The following accounts were taken from the financial statements of Callahan Company.

- |   |  |
|---|--|
| _____ Salaries and wages payable        | _____ Investment in real estate          |
| _____ Service revenue                   | _____ Equipment                          |
| _____ Interest payable                  | _____ Accumulated depreciation—equipment |
| _____ Goodwill                          | _____ Depreciation expense               |
| _____ Short-term investments            | _____ Owner's capital                    |
| _____ Mortgage payable (due in 3 years) | _____ Unearned service revenue           |

Match each of the following accounts to its proper balance sheet classification, shown below. If the item would not appear on a balance sheet, use “NA.”

- |                                      |                             |
|--------------------------------------|-----------------------------|
| Current assets (CA)                  | Current liabilities (CL)    |
| Long-term investments (LTI)          | Long-term liabilities (LTL) |
| Property, plant, and equipment (PPE) | Owner’s equity (OE)         |
| Intangible assets (IA)               |                             |

At the end of its first month of operations, Watson Answering Service has the following unadjusted trial balance.

**WATSON ANSWERING SERVICE**

August 31, 2012  
Trial Balance

|                            | <u>Debit</u>    | <u>Credit</u>   |
|----------------------------|-----------------|-----------------|
| Cash                       | \$ 5,400        |                 |
| Accounts Receivable        | 2,800           |                 |
| Supplies                   | 1,300           |                 |
| Prepaid Insurance          | 2,400           |                 |
| Equipment                  | 60,000          |                 |
| Notes Payable              |                 | \$40,000        |
| Accounts Payable           |                 | 2,400           |
| Owner’s Capital            |                 | 30,000          |
| Owner’s Drawings           | 1,000           |                 |
| Service Revenue            |                 | 4,900           |
| Salaries and Wages Expense | 3,200           |                 |
| Utilities Expense          | 800             |                 |
| Advertising Expense        | 400             |                 |
|                            | <u>\$77,300</u> | <u>\$77,300</u> |

**action plan**

- ✓ In completing the work-sheet, be sure to (a) key the adjustments; (b) start at the top of the adjusted trial balance columns and extend adjusted balances to the correct statement columns; and (c) enter net income (or net loss) in the proper columns.
- ✓ In preparing a classified balance sheet, know the contents of each of the sections.
- ✓ In journalizing closing entries, remember that there are only four entries and that owner’s drawings is closed to owner’s capital.

Other data:

1. Insurance expires at the rate of \$200 per month.
2. \$1,000 of supplies are on hand at August 31.
3. Monthly depreciation on the equipment is \$900.
4. Interest of \$500 on the notes payable has accrued during August.

**Instructions**

- (a) Prepare a worksheet.
- (b) Prepare a classified balance sheet assuming \$35,000 of the notes payable are long-term.
- (c) Journalize the closing entries.

|         | (To close drawings to capital) |       |       |

## Summary of Study Objectives

**[1] Prepare a worksheet.** The steps in preparing a worksheet are: (a) Prepare a trial balance on the worksheet. (b) Enter the adjustments in the adjustments columns. (c) Enter adjusted balances in the adjusted trial balance columns. (d) Extend adjusted trial balance amounts to appropriate financial statement columns. (e) Total the statement columns, compute net income (or net loss), and complete the worksheet.

**[2] Explain the process of closing the books.** Closing the books occurs at the end of an accounting period. The process is to journalize and post closing entries and then rule and balance all accounts. In closing the books, companies make separate entries to close revenues and expenses to Income Summary, Income Summary to Owner's Capital, and Owner's Drawings to Owner's Capital. Only temporary accounts are closed.

**[3] Describe the content and purpose of a post-closing trial balance.** A post-closing trial balance contains the balances in permanent accounts that are carried forward to the next accounting period. The purpose of this trial balance is to prove the equality of these balances.

**[4] State the required steps in the accounting cycle.** The required steps in the accounting cycle are: (1) analyze business transactions, (2) journalize the transactions, (3) post to ledger accounts, (4) prepare a trial balance, (5) journalize and post adjusting entries, (6) prepare an adjusted trial balance, (7) prepare financial statements, (8) journalize and post closing entries, and (9) prepare a post-closing trial balance.

**[5] Explain the approaches to preparing correcting entries.** One way to determine the correcting entry is to compare the incorrect entry with the correct entry. After comparison, the company makes a correcting entry to correct the accounts. An alternative to a correcting entry is to reverse the incorrect entry and then prepare the correct entry.

**[6] Identify the sections of a classified balance sheet.** A classified balance sheet categorizes assets as current assets; long-term investments; property, plant, and equipment; and intangibles. Liabilities are classified as either current or long-term. There is also an owner's (owners') equity section, which varies with the form of business organization.

## Glossary

**Classified balance sheet** A balance sheet that contains standard classifications or sections. (p. 170).

**Closing entries** Entries made at the end of an accounting period to transfer the balances of temporary accounts to a permanent owner's equity account, Owner's Capital. (p. 161).

**Correcting entries** Entries to correct errors made in recording transactions. (p. 168).

**Current assets** Assets that a company expects to convert to cash or use up within one year. (p. 172).

**Current liabilities** Obligations that a company expects to pay from existing current assets within the coming year. (p. 174).

**Income Summary** A temporary account used in closing revenue and expense accounts. (p. 161).

**Intangible assets** Noncurrent assets that do not have physical substance. (p. 173).

**Liquidity** The ability of a company to pay obligations expected to be due within the next year. (p. 175).

**Long-term investments** Generally, (1) investments in stocks and bonds of other companies that companies normally hold for many years, and (2) long-term assets, such as land and buildings, not currently being used in operations. (p. 172).

**Long-term liabilities** Obligations that a company expects to pay after one year. (p. 175).

**Operating cycle** The average time that it takes to go from cash to cash in producing revenues. (p. 172).

**Permanent (real) accounts** Accounts that relate to one or more accounting periods. Consist of all balance sheet accounts. Balances are carried forward to next accounting period. (p. 160).

**Post-closing trial balance** A list of permanent accounts and their balances after a company has journalized and posted closing entries. (p. 165).

**Property, plant, and equipment** Assets with relatively long useful lives and currently being used in operations. (p. 173).

**Reversing entry** An entry, made at the beginning of the next accounting period, that is the exact opposite of the adjusting entry made in the previous period. (p. 168).

**Stockholders' equity** The ownership claim of shareholders on total assets. It is to a corporation what owner's equity is to a proprietorship. (p. 176).

**Temporary (nominal) accounts** Accounts that relate only to a given accounting period. Consist of all income statement accounts and owner's drawings account. All temporary accounts are closed at end of the accounting period. (p. 160).

**Worksheet** A multiple-column form that may be used in making adjusting entries and in preparing financial statements. (p. 154).

# APPENDIX 4A

## Reversing Entries

After preparing the financial statements and closing the books, it is often helpful to reverse some of the adjusting entries before recording the regular transactions of the next period. Such entries are **reversing entries**. Companies make a **reversing entry at the beginning of the next accounting period**. Each reversing entry is the **exact opposite of the adjusting entry made in the previous period**. The recording of reversing entries is an **optional step** in the accounting cycle.

The purpose of reversing entries is to simplify the recording of a subsequent transaction related to an adjusting entry. For example, in Chapter 3 (page 116), the payment of salaries after an adjusting entry resulted in two debits: one to Salaries and Wages Payable and the other to Salaries and Wages Expense. With reversing entries, the company can debit the entire subsequent payment to Salaries and Wages Expense. **The use of reversing entries does not change the amounts reported in the financial statements.** What it does is simplify the recording of subsequent transactions.

### Study Objective [7]

Prepare reversing entries.

### Reversing Entries Example

Companies most often use reversing entries to reverse two types of adjusting entries: accrued revenues and accrued expenses. To illustrate the optional use of reversing entries for accrued expenses, we will use the salaries expense transactions for Pioneer Advertising Agency as illustrated in Chapters 2, 3, and 4. The transaction and adjustment data are as follows.

1. October 26 (initial salary entry): Pioneer pays \$4,000 of salaries and wages earned between October 15 and October 26.
2. October 31 (adjusting entry): Salaries and wages earned between October 29 and October 31 are \$1,200. The company will pay these in the November 9 payroll.
3. November 9 (subsequent salary entry): Salaries and wages paid are \$4,000. Of this amount, \$1,200 applied to accrued salaries and wages payable and \$2,800 was earned between November 1 and November 9.

Illustration 4A-1 (page 182) shows the entries with and without reversing entries.

The first three entries are the same whether or not Pioneer uses reversing entries. The last two entries are different. The November 1 **reversing entry** eliminates the \$1,200 balance in Salaries and Wages Payable created by the October 31 adjusting entry. The reversing entry also creates a \$1,200 credit balance in the Salaries and Wages Expense account. As you know, it is unusual for an expense account to have a credit balance. The balance is correct in this instance, though, because it anticipates that the entire amount of the first salaries and wages payment in the new accounting period will be debited to Salaries and Wages Expense. This debit will eliminate the credit balance. The resulting debit balance in the expense account will equal the salaries and wages expense incurred in the new accounting period (\$2,800 in this example).

If Pioneer makes reversing entries, it can debit all cash payments of expenses to the expense account. This means that on November 9 (and every payday) Pioneer can debit Salaries and Wages Expense for the amount paid, without regard to any accrued salaries and wages payable. Being able to make the **same entry each time**

| Without Reversing Entries<br>(per chapter) |                             |       |       |
|--|-----------------------------|-------|-------|
| <u>Initial Salary Entry</u>                |                             |       |       |

| Oct. 31                                  | (Same entry)               |       |       |
| <u>Closing Entry</u>                     |                            |       |       |
| Oct. 31                                  | (Same entry)               |       |       |
| <u>Reversing Entry</u>                   |                            |       |       |
| Nov. 1                                   | Salaries and Wages Payable | 1,200 |       |
|  | Salaries and Wages Expense |       | 1,200 |
| <u>Subsequent Salary Entry</u>           |                            |       |       |
| Nov. 9                                   | Salaries and Wages Expense | 4,000 |       |
|  | Cash                       |       | 4,000 |

**Illustration 4A-1**  
Comparative entries—not reversing vs. reversing

simplifies the recording process: The company can record subsequent transactions as if the related adjusting entry had never been made.

Illustration 4A-2 shows the posting of the entries with reversing entries.

| Salaries and Wages Expense |       |                |       | Salaries and Wages Payable |       |                 |       |
|----------------------------|-------|----------------|-------|----------------------------|-------|-----------------|-------|
| 10/26 Paid                 | 4,000 | 10/31 Closing  | 5,200 | 11/1 Reversing             | 1,200 | 10/31 Adjusting | 1,200 |
| 31 Adjusting               | 1,200 |                |       |                            |       |                 |       |
|                            | 5,200 |                | 5,200 |                            |       |                 |       |
| 11/9 Paid                  | 4,000 | 11/1 Reversing | 1,200 |                            |       |                 |       |

**Illustration 4A-2**  
Postings with reversing entries

A company can also use reversing entries for accrued revenue adjusting entries. For Pioneer Advertising, the adjusting entry was: Accounts Receivable (Dr.) \$200 and Service Revenue (Cr.) \$200. Thus, the reversing entry on November 1 is:

$$A = L + OE$$

-200 Rev

Cash Flows  
no effect

|        |   |     |     |
|--------|---|-----|-----|
| Nov. 1 | Service Revenue                         | 200 |     |
|        | Accounts Receivable                     |     | 200 |
|        | (To reverse October 31 adjusting entry) |     |     |

When Pioneer collects the accrued service revenue, it debits Cash and credits Service Revenue.

## Summary of Study Objective for Appendix 4A

**[7] Prepare reversing entries.** Reversing entries are the opposite of the adjusting entries made in the preceding period. Some companies choose to make reversing entries at the

beginning of a new accounting period to simplify the recording of later transactions related to the adjusting entries. In most cases, only accrued adjusting entries are reversed.

Self-Test, Brief Exercises, Exercises, Problem Set A, and many more components are available for practice in *WileyPLUS*

\*Note: All asterisked Questions, Exercises, and Problems relate to material in the appendix to the chapter.

## Self-Test Questions

Answers are on page 204.

- (SO 1) 1. Which of the following statements is *incorrect* concerning the worksheet?
- The worksheet is essentially a working tool of the accountant.
  - The worksheet is distributed to management and other interested parties.
  - The worksheet cannot be used as a basis for posting to ledger accounts.
  - Financial statements can be prepared directly from the worksheet before journalizing and posting the adjusting entries.
- (SO 1) 2. In a worksheet, net income is entered in the following columns:
- income statement (Dr) and balance sheet (Dr).
  - income statement (Cr) and balance sheet (Dr).
  - income statement (Dr) and balance sheet (Cr).
  - income statement (Cr) and balance sheet (Cr).
- (SO 1) 3. In the unadjusted trial balance of its worksheet for the year ended December 31, 2012, Taitum Company reported Equipment of \$120,000. The year-end adjusting entries require an adjustment of \$15,000 for depreciation expense for the equipment. After adjustment, the following adjusted amount should be reported:
- A debit of \$105,000 for Equipment in the balance sheet column.
  - A credit of \$15,000 for Depreciation Expense—Equipment in the income statement column.
  - A debit of \$120,000 for Equipment in the balance sheet column.
  - A debit of \$15,000 for Accumulated Depreciation—Equipment in the balance sheet column.
- (SO 2) 4. An account that will have a zero balance after closing entries have been journalized and posted is:
- Service Revenue.
  - Supplies.
  - Prepaid Insurance.
  - Accumulated Depreciation—Equipment.
- (SO 2) 5. When a net loss has occurred, Income Summary is:
- debited and Owner's Capital is credited.
  - credited and Owner's Capital is debited.
  - debited and Owner's Drawings is credited.
  - credited and Owner's Drawings is debited.
- (SO 2) 6. The closing process involves separate entries to close (1) expenses, (2) drawings, (3) revenues, and (4) income summary. The correct sequencing of the entries is:
- (4), (3), (2), (1)
  - (1), (2), (3), (4)
  - (3), (1), (4), (2)
  - (3), (2), (1), (4)
- (SO 3) 7. Which types of accounts will appear in the post-closing trial balance?
- Permanent (real) accounts.
  - Temporary (nominal) accounts.
  - Accounts shown in the income statement columns of a worksheet.
  - None of the above.
8. All of the following are required steps in the accounting cycle *except*:
- journalizing and posting closing entries.
  - preparing financial statements.
  - journalizing the transactions.
  - preparing a worksheet.
9. The proper order of the following steps in the accounting cycle is:
- prepare unadjusted trial balance, journalize transactions, post to ledger accounts, journalize and post adjusting entries.
  - journalize transactions, prepare unadjusted trial balance, post to ledger accounts, journalize and post adjusting entries.
  - journalize transactions, post to ledger accounts, prepare unadjusted trial balance, journalize and post adjusting entries.
  - prepare unadjusted trial balance, journalize and post adjusting entries, journalize transactions, post to ledger accounts.
10. When Alexander Company purchased supplies worth \$500, it incorrectly recorded a credit to Supplies for \$5,000 and a debit to Cash for \$5,000. Before correcting this error:
- Cash is overstated and Supplies is overstated.
  - Cash is understated and Supplies is understated.
  - Cash is understated and Supplies is overstated.
  - Cash is overstated and Supplies is understated.
11. Cash of \$100 received at the time the service was provided was journalized and posted as a debit to Cash \$100 and a credit to Accounts Receivable \$100. Assuming the incorrect entry is not reversed, the correcting entry is:
- debit Service Revenue \$100 and credit Accounts Receivable \$100.
  - debit Accounts Receivable \$100 and credit Service Revenue \$100.
  - debit Cash \$100 and credit Service Revenue \$100.
  - debit Accounts Receivable \$100 and credit Cash \$100.
12. The correct order of presentation in a classified balance sheet for the following current assets is:
- accounts receivable, cash, prepaid insurance, inventory.
  - cash, inventory, accounts receivable, prepaid insurance.
  - cash, accounts receivable, inventory, prepaid insurance.
  - inventory, cash, accounts receivable, prepaid insurance.

- (SO 6) 13. A company has purchased a tract of land. It expects to build a production plant on the land in approximately 5 years. During the 5 years before construction, the land will be idle. The land should be reported as:
- property, plant, and equipment.
  - land expense.
  - a long-term investment.
  - an intangible asset.
- (SO 6) 14. In a classified balance sheet, assets are usually classified using the following categories:
- current assets; long-term assets; property, plant, and equipment; and intangible assets.
  - current assets; long-term investments; property, plant, and equipment; and tangible assets.
  - current assets; long-term investments; tangible assets; and intangible assets.
  - current assets; long-term investments; property, plant, and equipment; and intangible assets.
- (SO 6) 15. Current assets are listed:
- by expected conversion to cash.
  - by importance.
  - by longevity.
  - alphabetically.
- \*16. On December 31, Frank Voris Company correctly made an adjusting entry to recognize \$2,000 of accrued salaries payable. On January 8 of the next year, total salaries of \$3,400 were paid. Assuming the correct reversing entry was made on January 1, the entry on January 8 will result in a credit to Cash \$3,400 and the following debit(s):
- Salaries and Wages Payable \$1,400, and Salaries and Wages Expense \$2,000.
  - Salaries and Wages Payable \$2,000 and Salaries and Wages Expense \$1,400.
  - Salaries and Wages Expense \$3,400.
  - Salaries and Wages Payable \$3,400.

 for additional Self-Test Questions.

## Questions

- "A worksheet is a permanent accounting record and its use is required in the accounting cycle." Do you agree? Explain.
- Explain the purpose of the worksheet.
- What is the relationship, if any, between the amount shown in the adjusted trial balance column for an account and that account's ledger balance?
- If a company's revenues are \$125,000 and its expenses are \$113,000, in which financial statement columns of the worksheet will the net income of \$12,000 appear? When expenses exceed revenues, in which columns will the difference appear?
- Why is it necessary to prepare formal financial statements if all of the data are in the statement columns of the worksheet?
- Identify the account(s) debited and credited in each of the four closing entries, assuming the company has net income for the year.
- Describe the nature of the Income Summary account and identify the types of summary data that may be posted to this account.
- What are the content and purpose of a post-closing trial balance?
- Which of the following accounts would not appear in the post-closing trial balance? Interest Payable; Equipment; Depreciation Expense; Owner's Drawings; Unearned Service Revenue; Accumulated Depreciation—Equipment; and Service Revenue.
- Distinguish between a reversing entry and an adjusting entry. Are reversing entries required?
- Indicate, in the sequence in which they are made, the three required steps in the accounting cycle that involve journalizing.
- Identify, in the sequence in which they are prepared, the three trial balances that are often used to report financial information about a company.
- How do correcting entries differ from adjusting entries?
- What standard classifications are used in preparing a classified balance sheet?
- What is meant by the term "operating cycle?"
- Define current assets. What basis is used for arranging individual items within the current assets section?
- Distinguish between long-term investments and property, plant, and equipment.
- (a) What is the term used to describe the owner's equity section of a corporation? (b) Identify the two owners' equity accounts in a corporation and indicate the purpose of each.
-  **PEPSICO** Using PepsiCo's annual report, determine its current liabilities at December 26, 2009, and December 27, 2008. Were current liabilities higher or lower than current assets in these two years?
- \*20. Sanchez Company prepares reversing entries. If the adjusting entry for interest payable is reversed, what type of an account balance, if any, will there be in Interest Payable and Interest Expense after the reversing entry is posted?
- \*21. At December 31, accrued salaries payable totaled \$3,500. On January 10, total salaries of \$8,000 are paid. (a) Assume that reversing entries are made at January 1. Give the January 10 entry, and indicate the Salaries and Wages Expense account balance after the entry is posted. (b) Repeat part (a) assuming reversing entries are not made.

## Brief Exercises

**BE4-1** The steps in using a worksheet are presented in random order below. List the steps in the proper order by placing numbers 1–5 in the blank spaces.

- (a) \_\_\_\_ Prepare a trial balance on the worksheet.
- (b) \_\_\_\_ Enter adjusted balances.
- (c) \_\_\_\_ Extend adjusted balances to appropriate statement columns.
- (d) \_\_\_\_ Total the statement columns, compute net income (loss), and complete the worksheet.
- (e) \_\_\_\_ Enter adjustment data.

*List the steps in preparing a worksheet.*

(SO 1)

**BE4-2** The ledger of Saddler Company includes the following unadjusted balances: Prepaid Insurance \$3,000, Service Revenue \$58,000, and Salaries and Wages Expense \$25,000. Adjusting entries are required for (a) expired insurance \$1,800; (b) services provided \$1,100, but unbilled and uncollected; and (c) accrued salaries payable \$800. Enter the unadjusted balances and adjustments into a worksheet and complete the worksheet for all accounts. *Note:* You will need to add the following accounts: Accounts Receivable, Salaries and Wages Payable, and Insurance Expense.

*Prepare partial worksheet.*

(SO 1)

**BE4-3** The following selected accounts appear in the adjusted trial balance columns of the worksheet for McQueen Company: Accumulated Depreciation; Depreciation Expense; Owner's Capital; Owner's Drawings; Service Revenue; Supplies; and Accounts Payable. Indicate the financial statement column (income statement Dr., balance sheet Cr., etc.) to which each balance should be extended.

*Identify worksheet columns for selected accounts.*

(SO 1)

**BE4-4** The ledger of Quentin Company contains the following balances: Owner's Capital \$30,000; Owner's Drawings \$2,000; Service Revenue \$50,000; Salaries and Wages Expense \$27,000; and Supplies Expense \$7,000. Prepare the closing entries at December 31.

*Prepare closing entries from ledger balances.*

(SO 2)

**BE4-5** Using the data in BE4-4, enter the balances in T accounts, post the closing entries, and rule and balance the accounts.

*Post closing entries; rule and balance T accounts.*

(SO 2)

**BE4-6** The income statement for Evergreen Golf Club for the month ending July 31 shows Service Revenue \$16,400, Salaries and Wages Expense \$8,200, Maintenance and Repairs Expense \$2,500, and Net Income \$5,700. Prepare the entries to close the revenue and expense accounts. Post the entries to the revenue and expense accounts, and complete the closing process for these accounts using the three-column form of account.

*Journalize and post closing entries using the three-column form of account.*

(SO 2)

**BE4-7** Using the data in BE4-3, identify the accounts that would be included in a post-closing trial balance.

*Identify post-closing trial balance accounts.*

(SO 3)

**BE4-8** The steps in the accounting cycle are listed in random order below. List the steps in proper sequence, assuming no worksheet is prepared, by placing numbers 1–9 in the blank spaces.

- (a) \_\_\_\_ Prepare a trial balance.
- (b) \_\_\_\_ Journalize the transactions.
- (c) \_\_\_\_ Journalize and post closing entries.
- (d) \_\_\_\_ Prepare financial statements.
- (e) \_\_\_\_ Journalize and post adjusting entries.
- (f) \_\_\_\_ Post to ledger accounts.
- (g) \_\_\_\_ Prepare a post-closing trial balance.
- (h) \_\_\_\_ Prepare an adjusted trial balance.
- (i) \_\_\_\_ Analyze business transactions.

*List the required steps in the accounting cycle in sequence.*

(SO 4)

**BE4-9** At Shaffer Company, the following errors were discovered after the transactions had been journalized and posted. Prepare the correcting entries.

*Prepare correcting entries.*

(SO 5)

1. A collection on account from a customer for \$870 was recorded as a debit to Cash \$870 and a credit to Service Revenue \$870.
2. The purchase of store supplies on account for \$1,570 was recorded as a debit to Supplies \$1,750 and a credit to Accounts Payable \$1,750.

**BE4-10** The balance sheet debit column of the worksheet for Shaw Company includes the following accounts: Accounts Receivable \$12,500; Prepaid Insurance \$3,600; Cash \$4,100; Supplies \$5,200, and Short-term Investments \$6,700. Prepare the current assets section of the balance sheet, listing the accounts in proper sequence.

*Prepare the current assets section of a balance sheet.*

(SO 6)

## 186 4 Completing the Accounting Cycle

Classify accounts on balance sheet.

(SO 6)

**BE4-11** The following are the major balance sheet classifications:

|                                      |                             |
|--------------------------------------|-----------------------------|
| Current assets (CA)                  | Current liabilities (CL)    |
| Long-term investments (LTI)          | Long-term liabilities (LTL) |
| Property, plant, and equipment (PPE) | Owner's equity (OE)         |
| Intangible assets (IA)               |                             |

Match each of the following accounts to its proper balance sheet classification.

|  |                                   |
|--|-----------------------------------|
| _____ Accounts payable                   | _____ Income taxes payable        |
| _____ Accounts receivable                | _____ Debt investment (long-term) |
| _____ Accumulated depreciation—buildings | _____ Land                        |
| _____ Buildings                          | _____ Inventory                   |
| _____ Cash                               | _____ Patents                     |
| _____ Copyrights                         | _____ Supplies                    |

Prepare reversing entries.

(SO 7)

**\*BE4-12** At October 31, Steltz Company made an accrued expense adjusting entry of \$2,100 for salaries. Prepare the reversing entry on November 1, and indicate the balances in Salaries and Wages Payable and Salaries and Wages Expense after posting the reversing entry.

## Do it! Review

Prepare a worksheet.

(SO 1)

**Do it! 4-1** Averell Spicer is preparing a worksheet. Explain to Averell how he should extend the following adjusted trial balance accounts to the financial statement columns of the worksheet.

|                 |                          |
|-----------------|--------------------------|
| Service Revenue | Accounts Receivable      |
| Notes Payable   | Accumulated Depreciation |
| Owner's Capital | Utilities Expense        |

Prepare closing entries.

(SO 5)

**Do it! 4-2** The worksheet for Ta'ufou Company shows the following in the financial statement columns.

|                  |          |
|------------------|----------|
| Owner's drawings | \$22,000 |
| Owner's capital  | 70,000   |
| Net income       | 41,000   |

Prepare the closing entries at December 31 that affect owner's capital.

Prepare assets section of the balance sheet.

(SO 6)

**Do it! 4-3** Chester Taylor recently received the following information related to Taylor Company's December 31, 2012, balance sheet.

|                                  |          |                          |         |
|----------------------------------|----------|--------------------------|---------|
| Inventory                        | \$ 2,900 | Short-term investments   | \$1,200 |
| Cash                             | 4,300    | Accumulated depreciation | 5,700   |
| Equipment                        | 21,700   | Accounts receivable      | 4,300   |
| Investments in stock (long-term) | 6,500    |                          |         |

Prepare the assets section of Taylor Company's classified balance sheet.

Match accounts to balance sheet classifications.

(SO 6)

**Do it! 4-4** The following accounts were taken from the financial statements of Tillman Company.

|                         |                                  |
|-------------------------|----------------------------------|
| _____ Interest revenue  | _____ Owner's capital            |
| _____ Utilities payable | _____ Accumulated depreciation   |
| _____ Accounts payable  | _____ Equipment                  |
| _____ Supplies          | _____ Salaries and wages expense |
| _____ Bonds payable     | _____ Investment in real estate  |
| _____ Trademarks        | _____ Unearned rent revenue      |

Match each of the accounts to its proper balance sheet classification, as shown below. If the item would not appear on a balance sheet, use "NA."

|                                      |                             |
|--------------------------------------|-----------------------------|
| Current assets (CA)                  | Current liabilities (CL)    |
| Long-term investments (LTI)          | Long-term liabilities (LTL) |
| Property, plant, and equipment (PPE) | Owner's equity (OE)         |
| Intangible assets (IA)               |                             |

## Exercises

**E4-1** The trial balance columns of the worksheet for Tinoisamoa Company at June 30, 2012, are as follows. *Complete the worksheet.* (SO 1)

**TINOISAMOA COMPANY**  
Worksheet  
For the Month Ended June 30, 2012

| Account Titles             | Trial Balance |         |
|----------------------------|---------------|---------|
|                            | Dr.           | Cr.     |
| Cash                       | \$2,320       |         |
| Accounts Receivable        | 2,440         |         |
| Supplies                   | 1,880         |         |
| Accounts Payable           |               | \$1,120 |
| Unearned Service Revenue   |               | 240     |
| Owner's Capital            |               | 3,600   |
| Service Revenue            |               | 2,400   |
| Salaries and Wages Expense | 560           |         |
| Miscellaneous Expense      | 160           |         |
|                            | \$7,360       | \$7,360 |

Other data:

1. A physical count reveals \$500 of supplies on hand.
2. \$100 of the unearned revenue is still unearned at month-end.
3. Accrued salaries are \$210.

**Instructions**

Enter the trial balance on a worksheet and complete the worksheet.

**E4-2** The adjusted trial balance columns of the worksheet for Pisa Company are as follows. *Complete the worksheet.* (SO 1)

**PISA COMPANY**  
Worksheet (partial)  
For the Month Ended April 30, 2012

| Account Titles                  | Adjusted Trial Balance |        | Income Statement |     | Balance Sheet |     |
|---------------------------------|------------------------|--------|------------------|-----|---------------|-----|
|                                 | Dr.                    | Cr.    | Dr.              | Cr. | Dr.           | Cr. |
| Cash                            | 10,000                 |        |                  |     |               |     |
| Accounts Receivable             | 7,840                  |        |                  |     |               |     |
| Prepaid Rent                    | 2,280                  |        |                  |     |               |     |
| Equipment                       | 23,050                 |        |                  |     |               |     |
| Accumulated Depreciation—Equip. |                        | 4,921  |                  |     |               |     |
| Notes Payable                   |                        | 5,700  |                  |     |               |     |
| Accounts Payable                |                        | 4,920  |                  |     |               |     |
| Owner's Capital                 |                        | 27,960 |                  |     |               |     |
| Owner's Drawings                | 3,650                  |        |                  |     |               |     |
| Service Revenue                 |                        | 15,590 |                  |     |               |     |
| Salaries and Wages Expense      | 10,840                 |        |                  |     |               |     |
| Rent Expense                    | 760                    |        |                  |     |               |     |
| Depreciation Expense            | 671                    |        |                  |     |               |     |
| Interest Expense                | 57                     |        |                  |     |               |     |
| Interest Payable                |                        | 57     |                  |     |               |     |
| Totals                          | 59,148                 | 59,148 |                  |     |               |     |

**Instructions**

Complete the worksheet.

## 188 4 Completing the Accounting Cycle

Prepare financial statements from worksheet.

(SO 1, 6)

**E4-3** Worksheet data for Pisa Company are presented in E4-2. The owner did not make any additional investments in the business in April.

### Instructions

Prepare an income statement, an owner's equity statement, and a classified balance sheet.

Journalize and post closing entries and prepare a post-closing trial balance.

(SO 2, 3)

**E4-4** Worksheet data for Pisa Company are presented in E4-2.

### Instructions

- Journalize the closing entries at April 30.
- Post the closing entries to Income Summary and Owner's Capital. Use T accounts.
- Prepare a post-closing trial balance at April 30.

Prepare adjusting entries from a worksheet, and extend balances to worksheet columns.

(SO 1)

**E4-5** The adjustments columns of the worksheet for Toeaina Company are shown below.

| Account Titles                     | Adjustments  |              |
|------------------------------------|--------------|--------------|
|                                    | Debit        | Credit       |
| Accounts Receivable                | 1,100        |              |
| Prepaid Insurance                  |              | 300          |
| Accumulated Depreciation—Equipment |              | 900          |
| Salaries and Wages Payable         |              | 500          |
| Service Revenue                    |              | 1,100        |
| Salaries and Wages Expense         | 500          |              |
| Insurance Expense                  | 300          |              |
| Depreciation Expense               | 900          |              |
|                                    | <u>2,800</u> | <u>2,800</u> |

### Instructions

- Prepare the adjusting entries.
- Assuming the adjusted trial balance amount for each account is normal, indicate the financial statement column to which each balance should be extended.

Derive adjusting entries from worksheet data.

(SO 1)

**E4-6** Selected worksheet data for Woodny Company are presented below.

| Account Titles                     | Trial Balance |        | Adjusted Trial Balance |        |
|------------------------------------|---------------|--------|------------------------|--------|
|                                    | Dr.           | Cr.    | Dr.                    | Cr.    |
| Accounts Receivable                | ?             |        | 34,000                 |        |
| Prepaid Insurance                  | 26,000        |        | 20,000                 |        |
| Supplies                           | 7,000         |        | ?                      |        |
| Accumulated Depreciation—Equipment |               | 12,000 |                        | ?      |
| Salaries and Wages Payable         |               | ?      |                        | 5,600  |
| Service Revenue                    |               | 88,000 |                        | 97,000 |
| Insurance Expense                  |               |        | ?                      |        |
| Depreciation Expense               |               |        | 10,000                 |        |
| Supplies Expense                   |               |        | 4,500                  |        |
| Salaries and Wages Expense         | ?             |        | 49,000                 |        |

### Instructions

- Fill in the missing amounts.
- Prepare the adjusting entries that were made.

Prepare closing entries, and prepare a post-closing trial balance.

(SO 2, 3)

**E4-7** Willow Turenne Company had the following adjusted trial balance.

**WILLOW TURENNE COMPANY**  
Adjusted Trial Balance  
For the Month Ended June 30, 2012

| Account Titles             | Adjusted Trial Balance |          |
|----------------------------|------------------------|----------|
|                            | Debits                 | Credits  |
| Cash                       | \$ 3,712               |          |
| Accounts Receivable        | 3,904                  |          |
| Supplies                   | 480                    |          |
| Accounts Payable           |                        | \$ 1,556 |
| Unearned Service Revenue   |                        | 160      |
| Owner's Capital            |                        | 5,760    |
| Owner's Drawings           | 628                    |          |
| Service Revenue            |                        | 4,300    |
| Salaries and Wages Expense | 1,344                  |          |
| Miscellaneous Expense      | 256                    |          |
| Supplies Expense           | 1,900                  |          |
| Salaries and Wages Payable |                        | 448      |
|                            | \$12,224               | \$12,224 |

**Instructions**

- (a) Prepare closing entries at June 30, 2012.  
(b) Prepare a post-closing trial balance.

**E4-8** Turner Company ended its fiscal year on July 31, 2012. The company's adjusted trial balance as of the end of its fiscal year is as shown below.

*Journalize and post closing entries, and prepare a post-closing trial balance.*

(SO 2, 3)

**TURNER COMPANY**  
Adjusted Trial Balance  
July 31, 2012

| No. | Account Titles                  | Debits    | Credits   |
|-----|---------------------------------|-----------|-----------|
| 101 | Cash                            | \$ 9,840  |           |
| 112 | Accounts Receivable             | 8,780     |           |
| 157 | Equipment                       | 15,900    |           |
| 167 | Accumulated Depreciation—Equip. |           | \$ 7,400  |
| 201 | Accounts Payable                |           | 4,220     |
| 208 | Unearned Rent Revenue           |           | 1,800     |
| 301 | Owner's Capital                 |           | 45,200    |
| 306 | Owner's Drawings                | 16,000    |           |
| 404 | Service Revenue                 |           | 64,000    |
| 429 | Rent Revenue                    |           | 6,500     |
| 711 | Depreciation Expense            | 8,000     |           |
| 720 | Salaries and Wages Expense      | 55,700    |           |
| 732 | Utilities Expense               | 14,900    |           |
|     |                                 | \$129,120 | \$129,120 |

**Instructions**

- (a) Prepare the closing entries using page J15.  
(b) Post to Owner's Capital and No. 350 Income Summary accounts. (Use the three-column form.)  
(c) Prepare a post-closing trial balance at July 31.

**E4-9** The adjusted trial balance for Turner Company is presented in E4-8.

*Prepare financial statements.*

(SO 6)

**Instructions**

- (a) Prepare an income statement and an owner's equity statement for the year. Turner did not make any capital investments during the year.  
(b) Prepare a classified balance sheet at July 31.

190 **4** Completing the Accounting Cycle

Answer questions related to the accounting cycle.

(SO 4)

**E4-10** Vince Vance has prepared the following list of statements about the accounting cycle.

1. “Journalize the transactions” is the first step in the accounting cycle.
2. Reversing entries are a required step in the accounting cycle.
3. Correcting entries do not have to be part of the accounting cycle.
4. If a worksheet is prepared, some steps of the accounting cycle are incorporated into the worksheet.
5. The accounting cycle begins with the analysis of business transactions and ends with the preparation of a post-closing trial balance.
6. All steps of the accounting cycle occur daily during the accounting period.
7. The step of “post to the ledger accounts” occurs before the step of “journalize the transactions.”
8. Closing entries must be prepared before financial statements can be prepared.

**Instructions**

Identify each statement as true or false. If false, indicate how to correct the statement.

Prepare closing entries.

(SO 2)

**E4-11** Selected accounts for Brianna’s Salon are presented below. All June 30 postings are from closing entries.

|                                   |       |      |       |                        |        |      |       |                         |       |      |        |
|-----------------------------------|-------|------|-------|------------------------|--------|------|-------|-------------------------|-------|------|--------|
| <b>Salaries and Wages Expense</b> |       |      |       | <b>Service Revenue</b> |        |      |       | <b>Owner’s Capital</b>  |       |      |        |
| 6/10                              | 3,200 | 6/30 | 8,800 | 6/30                   | 18,100 | 6/15 | 9,700 | 6/30                    | 2,500 | 6/1  | 12,000 |

|                                   |       |      |       |                        |        |      |       | Bal. 14,500             |       |      |        |
| <b>Supplies Expense</b>           |       |      |       | <b>Rent Expense</b>    |        |      |       | <b>Owner’s Drawings</b> |       |      |        |
| 6/12                              | 600   | 6/30 | 1,300 | 6/1                    | 3,000  | 6/30 | 3,000 | 6/13                    | 1,000 | 6/30 | 2,500  |
| 6/24                              | 700   |      |       |                        |        |      |       | 6/25                    | 1,500 |      |        |
|                                   |       |      |       |                        |        |      |       |                         |       |      |        |

**Instructions**

- (a) Prepare the closing entries that were made.
- (b) Post the closing entries to Income Summary.

Prepare correcting entries.

(SO 5)

**E4-12** J’Morcus Webb Company discovered the following errors made in January 2012.

1. A payment of Salaries and Wages Expense of \$700 was debited to Equipment and credited to Cash, both for \$700.
2. A collection of \$1,000 from a client on account was debited to Cash \$100 and credited to Service Revenue \$100.
3. The purchase of equipment on account for \$760 was debited to Equipment \$670 and credited to Accounts Payable \$670.

**Instructions**

- (a) Correct the errors by reversing the incorrect entry and preparing the correct entry.
- (b) Correct the errors without reversing the incorrect entry.

Prepare correcting entries.

(SO 5)

**E4-13** Williams Company has an inexperienced accountant. During the first 2 weeks on the job, the accountant made the following errors in journalizing transactions. All entries were posted as made.

1. A payment on account of \$840 to a creditor was debited to Accounts Payable \$480 and credited to Cash \$480.
2. The purchase of supplies on account for \$560 was debited to Equipment \$56 and credited to Accounts Payable \$56.
3. A \$500 withdrawal of cash for C. Williams’ personal use was debited to Salaries and Wages Expense \$500 and credited to Cash \$500.

**Instructions**

Prepare the correcting entries.

Prepare a classified balance sheet.

(SO 6)

**E4-14** The adjusted trial balance for Wootton Bowling Alley at December 31, 2012, contains the following accounts.

| Debits               |                  | Credits                            |                  |
|----------------------|------------------|------------------------------------|------------------|
| Buildings            | \$128,800        | Owner's Capital                    | \$115,000        |
| Accounts Receivable  | 14,520           | Accumulated Depreciation—Buildings | 42,600           |
| Prepaid Insurance    | 4,680            | Accounts Payable                   | 12,300           |
| Cash                 | 18,040           | Notes Payable                      | 97,780           |
| Equipment            | 62,400           | Accumulated Depreciation—Equipment | 18,720           |
| Land                 | 67,000           | Interest Payable                   | 2,600            |
| Insurance Expense    | 780              | Service Revenue                    | 17,180           |
| Depreciation Expense | 7,360            |                                    | <u>\$306,180</u> |
| Interest Expense     | 2,600            |                                    |                  |
|                      | <u>\$306,180</u> |                                    |                  |

**Instructions**

- (a) Prepare a classified balance sheet; assume that \$22,000 of the note payable will be paid in 2013.  
 (b)  Comment on the liquidity of the company.

**E4-15** The following are the major balance sheet classifications.

|                                      |                             |
|--------------------------------------|-----------------------------|
| Current assets (CA)                  | Current liabilities (CL)    |
| Long-term investments (LTI)          | Long-term liabilities (LTL) |
| Property, plant, and equipment (PPE) | Owner's equity (OE)         |
| Intangible assets (IA)               |                             |

*Classify accounts on balance sheet.*

(SO 6)

**Instructions**

Classify each of the following accounts taken from E. Williams Company's balance sheet.

|                                  |                                |
|----------------------------------|--------------------------------|
| _____ Accounts payable           | _____ Accumulated depreciation |
| _____ Accounts receivable        | _____ Buildings                |
| _____ Cash                       | _____ Land                     |
| _____ Owner's capital            | _____ Long-term debt           |
| _____ Patents                    | _____ Supplies                 |
| _____ Salaries and wages payable | _____ Equipment                |
| _____ Inventory                  | _____ Prepaid expenses         |
| _____ Investments                |                                |

**E4-16** The following items were taken from the financial statements of M. Wright Company. (All dollars are in thousands.)

|                             |          |                                |        |
|-----------------------------|----------|--------------------------------|--------|
| Long-term debt              | \$ 1,000 | Accumulated depreciation       | 5,655  |
| Prepaid insurance           | 880      | Accounts payable               | 1,444  |
| Equipment                   | 11,500   | Notes payable (due after 2013) | 400    |
| Long-term investments       | 264      | Owner's capital                | 12,955 |
| Short-term investments      | 3,690    | Accounts receivable            | 1,696  |
| Notes payable (due in 2013) | 500      | Inventory                      | 1,256  |
| Cash                        | \$ 2,668 |                                |        |

*Prepare a classified balance sheet.*

(SO 6)

**Instructions**

Prepare a classified balance sheet in good form as of December 31, 2012.

**E4-17** These financial statement items are for Major Company at year-end, July 31, 2012.

|                            |          |   |          |
|----------------------------|----------|---|----------|
| Salaries and wages payable | \$ 2,080 | Notes payable (long-term)               | \$ 1,800 |
| Salaries and wages expense | 51,700   | Cash                                    | 14,200   |
| Utilities expense          | 22,600   | Accounts receivable                     | 9,780    |
| Equipment                  | 30,400   | Accumulated depreciation—equip.         | 6,000    |
| Accounts payable           | 4,100    | Owner's drawings                        | 3,000    |
| Service revenue            | 62,000   | Depreciation expense                    | 4,000    |
| Rent revenue               | 8,500    | Owner's Capital (beginning of the year) | 51,200   |

*Prepare financial statements.*

(SO 1, 6)

**Instructions**

- (a) Prepare an income statement and an owner's equity statement for the year. The owner did not make any new investments during the year.  
 (b) Prepare a classified balance sheet at July 31.

## 192 4 Completing the Accounting Cycle

Use reversing entries.  
(SO 7)

**\*E4-18** Alexander Company pays salaries of \$12,000 every Monday for the preceding 5-day week (Monday through Friday). Assume December 31 falls on a Tuesday, so Alexander's employees have worked 2 days without being paid.

### Instructions

- Assume the company does not use reversing entries. Prepare the December 31 adjusting entry and the entry on Monday, January 6, when Alexander pays the payroll.
- Assume the company does use reversing entries. Prepare the December 31 adjusting entry, the January 1 reversing entry, and the entry on Monday, January 6, when Alexander pays the payroll.

Prepare closing and reversing entries.  
(SO 2, 4, 7)

**\*E4-19** On December 31, the adjusted trial balance of Johnson Employment Agency shows the following selected data.

|                     |          |                  |          |
|---------------------|----------|------------------|----------|
| Accounts Receivable | \$24,500 | Service Revenue  | \$92,500 |
| Interest Expense    | 8,300    | Interest Payable | 2,000    |

Analysis shows that adjusting entries were made to (1) accrue \$5,000 of service revenue and (2) accrue \$2,000 interest expense.

### Instructions

- Prepare the closing entries for the temporary accounts shown above at December 31.
- Prepare the reversing entries on January 1.
- Post the entries in (a) and (b). Rule and balance the accounts. (Use T accounts.)
- Prepare the entries to record (1) the collection of the accrued revenue on January 10 and (2) the payment of all interest due (\$3,000) on January 15.
- Post the entries in (d) to the temporary accounts.

## Exercises: Set B

Visit the book's companion website, at [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), and choose the Student Companion site to access Exercise Set B.

## Problems: Set A

Prepare worksheet, financial statements, and adjusting and closing entries.  
(SO 1, 2, 3, 6)

**P4-1A** Omer Asik began operations as a private investigator on January 1, 2012. The trial balance columns of the worksheet for Omer Asik, P.I. at March 31 are as follows.

### OMER ASIK, P.I. Worksheet For the Quarter Ended March 31, 2012

| Account Titles             | Trial Balance |               |
|----------------------------|---------------|---------------|
|                            | Dr.           | Cr.           |
| Cash                       | 11,400        |               |
| Accounts Receivable        | 5,620         |               |
| Supplies                   | 1,050         |               |
| Prepaid Insurance          | 2,400         |               |
| Equipment                  | 30,000        |               |
| Notes Payable              |               | 10,000        |
| Accounts Payable           |               | 12,350        |
| Owner's Capital            |               | 20,000        |
| Owner's Drawings           | 600           |               |
| Service Revenue            |               | 13,620        |
| Salaries and Wages Expense | 2,200         |               |
| Travel Expense             | 1,300         |               |
| Rent Expense               | 1,200         |               |
| Miscellaneous Expense      | 200           |               |
|                            | <u>55,970</u> | <u>55,970</u> |

Other data:

1. Supplies on hand total \$480.
2. Depreciation is \$800 per quarter.
3. Interest accrued on 6-month note payable, issued January 1, \$300.
4. Insurance expires at the rate of \$200 per month.
5. Services provided but unbilled at March 31 total \$1,030.

**Instructions**

- (a) Enter the trial balance on a worksheet and complete the worksheet.
- (b) Prepare an income statement and owner’s equity statement for the quarter and a classified balance sheet at March 31. O. Asik did not make any additional investments in the business during the quarter ended March 31, 2012.
- (c) Journalize the adjusting entries from the adjustments columns of the worksheet.
- (d) Journalize the closing entries from the financial statement columns of the worksheet.

(a) Adjusted trial balance \$58,100  
 (b) Net income \$7,480  
 Total assets \$49,530

**P4-2A** The adjusted trial balance columns of the worksheet for Boozer Company are as follows.

*Complete worksheet; prepare financial statements, closing entries, and post-closing trial balance.*

(SO 1, 2, 3, 6)

**BOOZER COMPANY**  
 Worksheet  
 For the Year Ended December 31, 2012

| Account No. | Account Titles                     | Adjusted Trial Balance |                |
|-------------|------------------------------------|------------------------|----------------|
|             |                                    | Dr.                    | Cr.            |

| 726         | Salaries and Wages Expense         | 39,000                 |                |
| 905         | Interest Expense                   | 1,000                  |                |
|             | Totals                             | <u>165,400</u>         | <u>165,400</u> |

**Instructions**

- (a) Complete the worksheet by extending the balances to the financial statement columns.
- (b) Prepare an income statement, owner’s equity statement, and a classified balance sheet. \$5,000 of the notes payable become due in 2013. C. Boozer did not make any additional investments in the business during 2012.
- (c) Prepare the closing entries. Use J14 for the journal page.
- (d) Post the closing entries. Use the three-column form of account. Income Summary is account No. 350.
- (e) Prepare a post-closing trial balance.

(a) Net income \$22,100  
 (b) Current assets \$41,700  
 Current liabilities \$16,600

(e) Post-closing trial balance \$87,700

*Prepare financial statements, closing entries, and post-closing trial balance.*

(SO 1, 2, 3, 6)

**P4-3A** The completed financial statement columns of the worksheet for Carlos Company are shown on the next page.

**CARLOS COMPANY**

**Instructions**

- Prepare a complete worksheet.
- Prepare a classified balance sheet. (*Note:* \$15,000 of the mortgage note payable is due for payment in the next fiscal year.)
- Journalize the adjusting entries using the worksheet as a basis.
- Journalize the closing entries using the worksheet as a basis.
- Prepare a post-closing trial balance.

(a) Net income \$44,000

(b) Total current assets \$54,500

(e) Post-closing trial balance \$254,500

**P4-5A** Devine Brown opened Devine's Carpet Cleaners on March 1. During March, the following transactions were completed.

- Mar. 1 Invested \$10,000 cash in the business.
- Purchased used truck for \$6,000, paying \$3,000 cash and the balance on account.
  - Purchased cleaning supplies for \$1,200 on account.
  - Paid \$1,200 cash on one-year insurance policy effective March 1.
  - Billed customers \$4,800 for cleaning services.
  - Paid \$1,500 cash on amount owed on truck and \$500 on amount owed on cleaning supplies.
  - Paid \$1,800 cash for employee salaries.
  - Collected \$1,400 cash from customers billed on March 14.
  - Billed customers \$2,500 for cleaning services.
  - Paid gasoline for month on truck \$200.
  - Withdrew \$700 cash for personal use.

Complete all steps in accounting cycle.

(SO 1, 2, 3, 4, 6)

The chart of accounts for Devine's Carpet Cleaners contains the following accounts: No. 101 Cash, No. 112 Accounts Receivable, No. 128 Supplies, No. 130 Prepaid Insurance, No. 157 Equipment, No. 158 Accumulated Depreciation—Equipment, No. 201 Accounts Payable, No. 212 Salaries and Wages Payable, No. 301 Owner's Capital, No. 306 Owner's Drawings, No. 350 Income Summary, No. 400 Service Revenue, No. 633 Gasoline Expense, No. 634 Supplies Expense, No. 711 Depreciation Expense, No. 722 Insurance Expense, and No. 726 Salaries and Wages Expense.

**Instructions**

- Journalize and post the March transactions. Use page J1 for the journal and the three-column form of account.
- Prepare a trial balance at March 31 on a worksheet.
- Enter the following adjustments on the worksheet and complete the worksheet.
  - Earned but unbilled revenue at March 31 was \$500.
  - Depreciation on equipment for the month was \$300.
  - One-twelfth of the insurance expired.
  - An inventory count shows \$250 of cleaning supplies on hand at March 31.
  - Accrued but unpaid employee salaries were \$550.
- Prepare the income statement and owner's equity statement for March and a classified balance sheet at March 31.
- Journalize and post adjusting entries. Use page J2 for the journal.
- Journalize and post closing entries and complete the closing process. Use page J3 for the journal.
- Prepare a post-closing trial balance at March 31.

(b) Trial balance \$19,500

(c) Adjusted trial balance \$20,850

(d) Net income \$3,900

Total assets \$15,950

(g) Post-closing trial balance \$16,250

Analyze errors and prepare correcting entries and trial balance.

(SO 5)

**P4-6A** Luol Deng CPA, was retained by Acie Cable to prepare financial statements for April 2012. Deng accumulated all the ledger balances per Acie's records and found the following.

**ACIE CABLE**  
Trial Balance  
April 30, 2012

|                                 | <b>Debit</b> | <b>Credit</b> |
|---------------------------------|--------------|---------------|
| Cash                            | \$ 4,100     |               |
| Accounts Receivable             | 3,200        |               |
| Supplies                        | 800          |               |
| Equipment                       | 10,600       |               |
| Accumulated Depreciation—Equip. |              | \$ 1,350      |
| Accounts Payable                |              | 2,100         |
| Salaries and Wages Payable      |              | 700           |
| Unearned Service Revenue        |              | 890           |
| Owner's Capital                 |              | 12,900        |
| Service Revenue                 |              | 5,450         |
| Salaries and Wages Expense      | 3,300        |               |
| Advertising Expense             | 600          |               |
| Miscellaneous Expense           | 290          |               |
| Depreciation Expense            | 500          |               |
|                                 | \$23,390     | \$23,390      |

Luol Deng reviewed the records and found the following errors.

1. Cash received from a customer on account was recorded as \$950 instead of \$590.
2. A payment of \$75 for advertising expense was entered as a debit to Miscellaneous Expense \$75 and a credit to Cash \$75.
3. The first salary payment this month was for \$1,900, which included \$700 of salaries payable on March 31. The payment was recorded as a debit to Salaries and Wages Expense \$1,900 and a credit to Cash \$1,900. (No reversing entries were made on April 1.)
4. The purchase on account of a printer costing \$310 was recorded as a debit to Supplies and a credit to Accounts Payable for \$310.
5. A cash payment of repair expense on equipment for \$96 was recorded as a debit to Equipment \$69 and a credit to Cash \$69.

**Instructions**

- (a) Prepare an analysis of each error showing (1) the incorrect entry, (2) the correct entry, and (3) the correcting entry. Items 4 and 5 occurred on April 30, 2012.
- (b) Prepare a correct trial balance.

Trial balance \$22,690

## Problems: Set B

Prepare a worksheet, financial statements, and adjusting and closing entries.

(SO 1, 2, 3, 6)

**P4-1B** The trial balance columns of the worksheet for Gibson Roofing at March 31, 2012, are as follows.

**GIBSON ROOFING**  
Worksheet  
For the Month Ended March 31, 2012

| Account Titles                     | Trial Balance |        |
|------------------------------------|---------------|--------|
|                                    | Dr.           | Cr.    |
| Cash                               | 4,500         |        |
| Accounts Receivable                | 3,200         |        |
| Supplies                           | 2,000         |        |
| Equipment                          | 11,000        |        |
| Accumulated Depreciation—Equipment |               | 1,250  |
| Accounts Payable                   |               | 2,500  |
| Unearned Service Revenue           |               | 550    |
| Owner's Capital                    |               | 12,900 |
| Owner's Drawings                   | 1,100         |        |
| Service Revenue                    |               | 6,300  |
| Salaries and Wages Expense         | 1,300         |        |
| Miscellaneous Expense              | 400           |        |
|                                    | 23,500        | 23,500 |

Other data:

1. A physical count reveals only \$550 of roofing supplies on hand.
2. Depreciation for March is \$250.
3. Unearned revenue amounted to \$210 at March 31.
4. Accrued salaries are \$700.

**Instructions**

- (a) Enter the trial balance on a worksheet and complete the worksheet.
- (b) Prepare an income statement and owner’s equity statement for the month of March and a classified balance sheet at March 31. T. Gibson did not make any additional investments in the business in March.
- (c) Journalize the adjusting entries from the adjustments columns of the worksheet.
- (d) Journalize the closing entries from the financial statement columns of the worksheet.

(a) Adjusted trial balance \$24,450  
 (b) Net income \$2,540  
 Total assets \$17,750

**P4-2B** The adjusted trial balance columns of the worksheet for Taj Company, owned by Gabby Taj, are as follows.

Complete worksheet; prepare financial statements, closing entries, and post-closing trial balance.

(SO 1, 2, 3, 6)

**TAJ COMPANY**

| 722         | Insurance Expense                  | 3,500                  |                |
| 726         | Salaries and Wages Expense         | 28,000                 |                |
| 905         | Interest Expense                   | 600                    |                |
|             | Totals                             | <u>103,700</u>         | <u>103,700</u> |

**Instructions**

- (a) Complete the worksheet by extending the balances to the financial statement columns.
- (b) Prepare an income statement, owner’s equity statement, and a classified balance sheet. (Note: \$5,000 of the notes payable become due in 2013.) Gabby Taj did not make any additional investments in the business during the year.
- (c) Prepare the closing entries. Use J14 for the journal page.
- (d) Post the closing entries. Use the three-column form of account. Income Summary is No. 350.
- (e) Prepare a post-closing trial balance.

(a) Net income \$10,900  
 (b) Current assets \$19,600;  
 Current liabilities \$14,100

(e) Post-closing trial balance \$46,600

Prepare financial statements, closing entries, and post-closing trial balance.

(SO 1, 2, 3, 6)

**P4-3B** The completed financial statement columns of the worksheet for Korver Company are shown on the next page.

**KORVER COMPANY**

| Totals                             | <u>418,800</u> | <u>418,800</u> |

**Instructions**

- Prepare a complete worksheet.
- Prepare a classified balance sheet. (*Note:* \$30,000 of the mortgage note payable is due for payment next year.)
- Journalize the adjusting entries.
- Journalize the closing entries.
- Prepare a post-closing trial balance.

(a) Net income \$24,900  
 (b) Total current assets \$44,500

(e) Post-closing trial balance \$297,500

**P4-5B** Jannero Pargo opened Pargo's Cleaning Service on July 1, 2012. During July the following transactions were completed.

- July 1 Pargo invested \$20,000 cash in the business.  
 1 Purchased used truck for \$9,000, paying \$4,000 cash and the balance on account.  
 3 Purchased cleaning supplies for \$2,100 on account.  
 5 Paid \$1,800 cash on one-year insurance policy effective July 1.  
 12 Billed customers \$4,500 for cleaning services.  
 18 Paid \$1,500 cash on amount owed on truck and \$1,400 on amount owed on cleaning supplies.  
 20 Paid \$2,500 cash for employee salaries.  
 21 Collected \$3,400 cash from customers billed on July 12.  
 25 Billed customers \$6,000 for cleaning services.  
 31 Paid gasoline for month on truck \$350.  
 31 Withdraw \$5,600 cash for personal use.

Complete all steps in accounting cycle.

(SO 1, 2, 3, 4, 6)

The chart of accounts for Pargo's Cleaning Service contains the following accounts: No. 101 Cash, No. 112 Accounts Receivable, No. 128 Supplies, No. 130 Prepaid Insurance, No. 157 Equipment, No. 158 Accumulated Depreciation—Equipment, No. 201 Accounts Payable, No. 212 Salaries and Wages Payable, No. 301 Owner's Capital, No. 306 Owner's Drawings, No. 350 Income Summary, No. 400 Service Revenue, No. 633 Gasoline Expense, No. 634 Supplies Expense, No. 711 Depreciation Expense, No. 722 Insurance Expense, and No. 726 Salaries and Wages Expense.

**Instructions**

- Journalize and post the July transactions. Use page J1 for the journal and the three-column form of account.
- Prepare a trial balance at July 31 on a worksheet.
- Enter the following adjustments on the worksheet and complete the worksheet.
  - Services provided but unbilled and uncollected at July 31 were \$2,700.
  - Depreciation on equipment for the month was \$500.
  - One-twelfth of the insurance expired.
  - An inventory count shows \$600 of cleaning supplies on hand at July 31.
  - Accrued but unpaid employee salaries were \$1,000.
- Prepare the income statement and owner's equity statement for July and a classified balance sheet at July 31.
- Journalize and post adjusting entries. Use page J2 for the journal.
- Journalize and post closing entries and complete the closing process. Use page J3 for the journal.
- Prepare a post-closing trial balance at July 31.

(b) Trial balance \$34,700  
 (c) Adjusted trial balance \$38,900

(d) Net income \$7,200;  
 Total assets \$26,800

(g) Post-closing trial balance \$27,300

## Problems: Set C

## Comprehensive Problem: Chapters 2 to 4

**CP4** Julie Molony opened Julie’s Maids Cleaning Service on July 1, 2012. During July, the company completed the following transactions.

- July 1 Invested \$14,000 cash in the business.

- 5 Paid \$1,800 on a one-year insurance policy, effective July 1.
- 12 Billed customers \$3,800 for cleaning services.
- 18 Paid \$1,000 of amount owed on truck, and \$400 of amount owed on cleaning supplies.
- 20 Paid \$1,600 for employee salaries.
- 21 Collected \$1,400 from customers billed on July 12.
- 25 Billed customers \$1,500 for cleaning services.
- 31 Paid gasoline for the month on the truck, \$400.
- 31 Withdrew \$600 cash for personal use.

The chart of accounts for Julie’s Maids Cleaning Service contains the following accounts: No. 101 Cash, No. 112 Accounts Receivable, No. 128 Supplies, No. 130 Prepaid Insurance, No. 157 Equipment, No. 158 Accumulated Depreciation—Equipment, No. 201 Accounts Payable, No. 212 Salaries and Wages Payable, No. 301 Owner’s Capital, No. 306 Owner’s Drawings, No. 350 Income Summary, No. 400 Service Revenue, No. 633 Gasoline Expense, No. 634 Supplies Expense, No. 711 Depreciation Expense, No. 722 Insurance Expense, and No. 726 Salaries and Wages Expense.

### Instructions

(b) Trial balance totals  
\$25,700

- (a) Journalize and post the July transactions. Use page J1 for the journal.
- (b) Prepare a trial balance at July 31 on a worksheet.
- (c) Enter the following adjustments on the worksheet, and complete the worksheet.
  - (1) Earned but unbilled fees at July 31 were \$1,300.
  - (2) Depreciation on equipment for the month was \$200.
  - (3) One-twelfth of the insurance expired.
  - (4) An inventory count shows \$100 of cleaning supplies on hand at July 31.
  - (5) Accrued but unpaid employee salaries were \$500.
- (d) Prepare the income statement and owner’s equity statement for July, and a classified balance sheet at July 31, 2012.
- (e) Journalize and post the adjusting entries. Use page J2 for the journal.
- (f) Journalize and post the closing entries, and complete the closing process. Use page J3 for the journal.
- (g) Prepare a post-closing trial balance at July 31.

(d) Net income \$3,050  
Total assets \$23,350

(g) Trial balance totals  
\$23,550

## Continuing Cookie Chronicle

(Note: This is a continuation of the Cookie Chronicle from Chapters 1 through 3.)

**CCC4** Natalie had a very busy December. At the end of the month, after journalizing and posting the December transactions and adjusting entries, Natalie prepared the following adjusted trial balance.

### COOKIE CREATIONS Adjusted Trial Balance December 31, 2011

|                                    | <u>Debit</u> | <u>Credit</u> |
|------------------------------------|--------------|---------------|
| Cash                               | \$1,180      |               |
| Accounts Receivable                | 875          |               |
| Supplies                           | 350          |               |
| Prepaid Insurance                  | 1,210        |               |
| Equipment                          | 1,200        |               |
| Accumulated Depreciation—Equipment |              | \$ 40         |
| Accounts Payable                   |              | 75            |
| Salaries and Wages Payable         |              | 56            |

|                            |                |                |
|----------------------------|----------------|----------------|
| Interest Payable           |                | 15             |
| Unearned Service Revenue   |                | 300            |
| Notes Payable              |                | 2,000          |
| Owner's Capital            |                | 800            |
| Owner's Drawings           | 500            |                |
| Service Revenue            |                | 4,515          |
| Salaries and Wages Expense | 1,006          |                |
| Utilities Expense          | 125            |                |
| Advertising Expense        | 165            |                |
| Supplies Expense           | 1,025          |                |
| Depreciation Expense       | 40             |                |
| Insurance Expense          | 110            |                |
| Interest Expense           | 15             |                |
|                            | <u>\$7,801</u> | <u>\$7,801</u> |

**Instructions**

Using the information in the adjusted trial balance, do the following.

- Prepare an income statement and an owner's equity statement for the 2 months ended December 31, 2011, and a classified balance sheet as at December 31, 2011. The note payable has a stated interest rate of 6%, and the principal and interest are due on November 16, 2013.
- Natalie has decided that her year-end will be December 31, 2011. Prepare and post closing entries as of December 31, 2011.
- Prepare a post-closing trial balance.

## BROADENING YOUR PERSPECTIVE

### Financial Reporting and Analysis

#### *Financial Reporting Problem: PepsiCo, Inc.*

**BYP4-1** The financial statements of **PepsiCo, Inc.** are presented in Appendix A at the end of this textbook.

**Instructions**

Answer the questions on the following page using the Consolidated Balance Sheet and the Notes to Consolidated Financial Statements section.

- What were PepsiCo's total current assets at December 26, 2009, and December 27, 2008?
- Are assets that PepsiCo included under current assets listed in proper order? Explain.
- How are PepsiCo's assets classified?
- What are "cash equivalents"?
- What were PepsiCo's total current liabilities at December 26, 2009, and December 27, 2008?

#### *Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company*

**BYP4-2** PepsiCo's financial statements are presented in Appendix A. Financial statements for **The Coca-Cola Company** are presented in Appendix B.

**Instructions**

- Based on the information contained in these financial statements, determine each of the following for PepsiCo at December 26, 2009, and for Coca-Cola at December 31, 2009.
  - Total current assets.
  - Net amount of property, plant, and equipment (land, buildings, and equipment).
  - Total current liabilities.
  - Total equity.
- What conclusions concerning the companies' respective financial positions can be drawn?

## On the Web

**BYP4-3** Numerous companies have established home pages on the Internet, e.g., **Capt'n Eli Root Beer Company** ([www.captneli.com/rootbeer.php](http://www.captneli.com/rootbeer.php)) and **Kodak** ([www.kodak.com](http://www.kodak.com)).

### Instructions

Examine the home pages of any two companies and answer the following questions.

- What type of information is available?
- Is any accounting-related information presented?
- Would you describe the home page as informative, promotional, or both? Why?

## Critical Thinking

### Decision Making Across the Organization

**BYP4-4** Whitegloves Janitorial Service was started 2 years ago by Nancy Kohl. Because business has been exceptionally good, Nancy decided on July 1, 2012, to expand operations by acquiring an additional truck and hiring two more assistants. To finance the expansion, Nancy obtained on July 1, 2012, a \$25,000, 10% bank loan, payable \$10,000 on July 1, 2013, and the balance on July 1, 2014. The terms of the loan require the borrower to have \$10,000 more current assets than current liabilities at December 31, 2012. If these terms are not met, the bank loan will be refinanced at 15% interest. At December 31, 2012, the accountant for Whitegloves Janitorial Service Inc. prepared the balance sheet shown below.

Nancy presented the balance sheet to the bank's loan officer on January 2, 2013, confident that the company had met the terms of the loan. The loan officer was not impressed. She said, "We need financial statements audited by a CPA." A CPA was hired and immediately realized that the balance sheet had been prepared from a trial balance and not from an adjusted trial balance. The adjustment data at the balance sheet date consisted of the following.

- Earned but unbilled janitorial services were \$3,700.
- Janitorial supplies on hand were \$2,500.
- Prepaid insurance was a 3-year policy dated January 1, 2012.
- December expenses incurred but unpaid at December 31, \$500.
- Interest on the bank loan was not recorded.
- The amounts for property, plant, and equipment presented in the balance sheet were reported net of accumulated depreciation (cost less accumulated depreciation). These amounts were \$4,000 for cleaning equipment and \$5,000 for delivery trucks as of January 1, 2012. Depreciation for 2012 was \$2,000 for cleaning equipment and \$5,000 for delivery trucks.

#### WHITEGLOVES JANITORIAL SERVICE

Balance Sheet  
December 31, 2012

| <u>Assets</u>                        |                 | <u>Liabilities and Owner's Equity</u> |                 |
|--------------------------------------|-----------------|---------------------------------------|-----------------|
| Current assets                       |                 | Current liabilities                   |                 |
| Cash                                 | \$ 6,500        | Notes payable                         | \$10,000        |
| Accounts receivable                  | 9,000           | Accounts payable                      | 2,500           |
| Janitorial supplies                  | 5,200           | Total current liabilities             | 12,500          |
| Prepaid insurance                    | 4,800           | Long-term liability                   |                 |
| Total current assets                 | <u>25,500</u>   | Notes payable                         | 15,000          |
| Property, plant, and equipment       |                 | Total liabilities                     | 27,500          |
| Cleaning equipment (net)             | 22,000          | Owner's equity                        |                 |
| Delivery trucks (net)                | 34,000          | Owner's capital                       | 54,000          |
| Total property, plant, and equipment | <u>56,000</u>   |                                       |                 |
| Total assets                         | <u>\$81,500</u> | Total liabilities and owner's equity  | <u>\$81,500</u> |

### Instructions

With the class divided into groups, answer the following.

- Prepare a correct balance sheet.
- Were the terms of the bank loan met? Explain.

## Communication Activity

**BYP4-5** The accounting cycle is important in understanding the accounting process.

### Instructions

Write a memo to your instructor that lists the steps of the accounting cycle in the order they should be completed. End with a paragraph that explains the optional steps in the cycle.

## Ethics Case

**BYP4-6** As the controller of Breathless Perfume Company, you discover a misstatement that overstated net income in the prior year's financial statements. The misleading financial statements appear in the company's annual report which was issued to banks and other creditors less than a month ago. After much thought about the consequences of telling the president, Jerry McNabb, about this misstatement, you gather your courage to inform him. Jerry says, "Hey! What they don't know won't hurt them. But, just so we set the record straight, we'll adjust this year's financial statements for last year's misstatement. We can absorb that misstatement better in this year than in last year anyway! Just don't make such a mistake again."

### Instructions

- (a) Who are the stakeholders in this situation?
- (b) What are the ethical issues in this situation?
- (c) What would you do as a controller in this situation?

## "All About You" Activity

**BYP4-7** Companies prepare balance sheets in order to know their financial position at a specific point in time. This enables them to make a comparison to their position at previous points in time, and gives them a basis for planning for the future. As discussed in the **All About You** feature (available on the book's companion website), in order to evaluate your financial position you need to prepare a personal balance sheet. Assume that you have compiled the following information regarding your finances. (*Hint: Some of the items might not be used in your personal balance sheet.*)

|   |          |
|---|----------|
| Amount owed on student loan balance (long-term) | \$ 5,000 |
| Balance in checking account                     | 1,200    |
| Certificate of deposit (6-month)                | 3,000    |
| Annual earnings from part-time job              | 11,300   |
| Automobile                                      | 7,000    |
| Balance on automobile loan (current portion)    | 1,500    |
| Balance on automobile loan (long-term portion)  | 4,000    |
| Home computer                                   | 800      |
| Amount owed to you by younger brother           | 300      |
| Balance in money market account                 | 1,800    |
| Annual tuition                                  | 6,400    |
| Video and stereo equipment                      | 1,250    |
| Balance owed on credit card (current portion)   | 150      |
| Balance owed on credit card (long-term portion) | 1,650    |

### Instructions

Prepare a personal balance sheet using the format you have learned for a classified balance sheet for a company. For the capital account, use Owner's Capital.

## FASB Codification Activity

**BYP4-8** If your school has a subscription to the FASB Codification, go to <http://aaahq.org/ascLogin.cfm> to log in and prepare responses to the following.

### Instructions

- (a) Access the glossary ("Master Glossary") at the FASB Codification website to answer the following.
  - (1) What is the definition of current assets?
  - (2) What is the definition of current liabilities?
- (b) A company wants to offset its accounts payable against its cash account and show a cash amount net of accounts payable on its balance sheet. Identify the criteria (found in the FASB Codification) under which a company has the right of set off. Does the company have the right to offset accounts payable against the cash account?

**Answers to Insight and Accounting Across the Organization Questions**

**p. 165 Cisco Performs the Virtual Close** **Q:** Who else benefits from a shorter closing process? **A:** Investors benefit from a shorter closing process. The shorter the closing, the sooner the company can report its financial results. This means that the financial information is more timely and therefore more relevant to investors.

**p. 170 Yale Express Loses Some Transportation Bills** **Q:** What might Yale Express's vice president have done to produce more accurate financial statements without waiting months for Republic's outstanding transportation bills? **A:** Yale's vice president could have engaged his accountants and auditors to prepare an adjusting entry based on an estimate of the outstanding transportation bills. (The estimate could have been made using past experience and the current volume of business.)

**p. 175 Can a Company Be Too Liquid?** **Q:** What can various company managers do to ensure that working capital is managed efficiently to maximize net income? **A:** Marketing and sales managers must understand that by extending generous repayment terms, they are expanding the company's receivables balance and slowing the company's cash flow. Production managers must strive to minimize the amount of excess inventory on hand. Managers must coordinate efforts to speed up the collection of receivables, while also ensuring that the company pays its payables on time but never too early.

## IFRS A Look at IFRS

The classified balance sheet, although generally required internationally, contains certain variations in format when reporting under IFRS.

### Key Points

- The procedures of the closing process are applicable to all companies, whether they are using IFRS or GAAP.
- IFRS recommends but does not require the use of the title “statement of financial position” rather than balance sheet.
- The format of statement of financial position information is often presented differently under IFRS. Although no specific format is required, most companies that follow IFRS present statement of financial position information in this order:
  - ◆ Noncurrent assets
  - ◆ Current assets
  - ◆ Equity
  - ◆ Noncurrent liabilities
  - ◆ Current liabilities
- IFRS requires a classified statement of financial position except in very limited situations. IFRS follows the same guidelines as this textbook for distinguishing between current and noncurrent assets and liabilities.
- Under IFRS, current assets are usually listed in the reverse order of liquidity. For example, under GAAP cash is listed first, but under IFRS it is listed last.
- Some companies report the subtotal *net assets*, which equals total assets minus total liabilities. See, for example, the statement of financial position of **Zetar plc** in Appendix C.
- IFRS has many differences in terminology that you will notice in this textbook. For example, in the sample statement of financial position illustrated on the next page, notice in the investment category that stock is called shares.

| Notes payable                         |              | 11,000        |                        |
| Accounts payable                      |              | 2,100         |                        |
| Salaries payable                      |              | 1,600         |                        |
| Unearned service revenue              |              | 900           |                        |
| Interest payable                      |              | <u>450</u>    | <u>16,050</u>          |
| Total equity and liabilities          |              |               | <u><u>\$61,400</u></u> |

- Both IFRS and GAAP require disclosures about (1) accounting policies followed, (2) judgments that management has made in the process of applying the entity's accounting policies, and (3) the key assumptions and estimation uncertainty that could result in a material adjustment to the carrying amounts of assets and liabilities within the next financial year.
- Comparative prior-period information must be presented and financial statements must be prepared annually.
- Both GAAP and IFRS are increasing the use of fair value to report assets. However, at this point IFRS has adopted it more broadly. As examples, under IFRS companies can apply fair value to property, plant, and equipment; natural resources; and in some cases intangible assets.

## Looking to the Future

The IASB and the FASB are working on a project to converge their standards related to financial statement presentation. A key feature of the proposed framework is that each of the statements will be organized in the same format, to separate an entity's financing activities from its

operating and investing activities and, further, to separate financing activities into transactions with owners and creditors. Thus, the same classifications used in the statement of financial position would also be used in the income statement and the statement of cash flows. The project has three phases. You can follow the joint financial presentation project at the following link: [http://www.fasb.org/project/financial\\_statement\\_presentation.shtml](http://www.fasb.org/project/financial_statement_presentation.shtml).

The IASB and the FASB face a difficult task in attempting to update, modify, and complete a converged conceptual framework. For example, how do companies choose between information that is highly relevant but difficult to verify versus information that is less relevant but easy to verify? How do companies define control when developing a definition of an asset? Is a liability the future sacrifice itself or the obligation to make the sacrifice? Should a single measurement method, such as historical cost or fair value, be used, or does it depend on whether it is an asset or liability that is being measured? It appears that the new document will be a significant improvement over its predecessors and will lead to principles-based standards, which will help financial statement users make better decisions.

## IFRS Self-Test Questions

- Which of the following statements is *false*?
  - Assets equals liabilities plus equity.
  - Under IFRS, companies sometimes net liabilities against assets to report “net assets.”
  - The FASB and IASB are working on a joint conceptual framework project.
  - Under IFRS, the statement of financial position is usually referred to as the statement of assets and equity.
- A company has purchased a tract of land and expects to build a production plant on the land in approximately 5 years. During the 5 years before construction, the land will be idle. Under IFRS, the land should be reported as:
  - land expense.
  - property, plant, and equipment.
  - an intangible asset.
  - a long-term investment.
- Current assets under IFRS are listed generally:
  - by importance.
  - in the reverse order of their expected conversion to cash.
  - by longevity.
  - alphabetically.
- Companies that use IFRS:
  - may report all their assets on the statement of financial position at fair value.
  - may offset assets against liabilities and show net assets and net liabilities on their statement of financial positions, rather than the underlying detailed line items.
  - may report noncurrent assets before current assets on the statement of financial position.
  - do not have any guidelines as to what should be reported on the statement of financial position.
- Companies that follow IFRS to prepare a statement of financial position generally use the following order of classification:
  - current assets, current liabilities, noncurrent assets, noncurrent liabilities, equity.
  - noncurrent assets, noncurrent liabilities, current assets, current liabilities, equity.
  - noncurrent assets, current assets, equity, noncurrent liabilities, current liabilities.
  - equity, noncurrent assets, current assets, noncurrent liabilities, current liabilities.

## IFRS Concepts and Application

**IFRS4-1** In what ways does the format of a statement of financial of position under IFRS often differ from a balance sheet presented under GAAP?

**IFRS4-2** What term is commonly used under IFRS in reference to the balance sheet?

**IFRS4-3** The statement of financial position for Diaz Company includes the following accounts: Accounts Receivable £12,500; Prepaid Insurance £3,600; Cash £15,400; Supplies £5,200; and Short-Term Investments £6,700. Prepare the current assets section of the statement of financial position, listing the accounts in proper sequence.

**IFRS4-4** Zurich Company recently received the following information related to the company's December 31, 2012, statement of financial position.

|                                      |           |  |         |
|--------------------------------------|-----------|--|---------|
| Inventories                          | CHF 2,900 | Short-term investments                 | CHF 120 |
| Cash                                 | 13,400    | Accumulated depreciation—<br>equipment | 5,700   |
| Equipment                            | 21,700    | Accounts receivable                    | 4,300   |
| Investments in shares<br>(long-term) | 6,500     |  |         |

Prepare the assets section of the company's classified statement of financial position.

**IFRS4-5** The following information is available for Karr Bowling Alley at December 31, 2012.

|                      |           |                                    |           |
|----------------------|-----------|------------------------------------|-----------|
| Buildings            | \$128,800 | Owner's Capital                    | \$115,000 |
| Accounts Receivable  | 14,520    | Accumulated Depreciation—Buildings | 42,600    |
| Prepaid Insurance    | 4,680     | Accounts Payable                   | 12,300    |
| Cash                 | 18,040    | Notes Payable                      | 97,780    |
| Equipment            | 62,400    | Accumulated Depreciation—Equipment | 18,720    |
| Land                 | 64,000    | Interest Payable                   | 2,600     |
| Insurance Expense    | 780       | Bowling Revenues                   | 14,180    |
| Depreciation Expense | 7,360     |                                    |           |
| Interest Expense     | 2,600     |                                    |           |

Prepare a classified statement of financial position; assume that \$13,900 of the notes payable will be paid in 2013.

**IFRS4-6** Brian Hopkins is interested in comparing the liquidity and solvency of a U.S. software company with a Chinese competitor. Is this possible if the two companies report using different currencies?

## International Comparative Analysis

### Problem: PepsiCo vs. Zetar plc

**IFRS4-7** The financial statements of Zetar plc are presented in Appendix C. The company's complete annual report, including the notes to its financial statements, is available at [www.zetarplc.com](http://www.zetarplc.com).

#### Instructions

Identify five differences in the format of the statement of financial position used by Zetar plc compared to a company, such as PepsiCo, that follows GAAP. (PepsiCo's financial statements are available in Appendix A.)

# CHAPTER 5

## Accounting for Merchandising Operations

### Study Objectives

After studying this chapter, you should be able to:

- 1 Identify the differences between service and merchandising companies.
- 2 Explain the recording of purchases under a perpetual inventory system.
- 3 Explain the recording of sales revenues under a perpetual inventory system.
- 4 Explain the steps in the accounting cycle for a merchandising company.
- 5 Distinguish between a multiple-step and a single-step income statement.
- 6 Explain the computation and importance of gross profit.

### Feature Story

#### WHO DOESN'T SHOP AT WAL-MART?

In his book *The End of Work*, Jeremy Rifkin notes that until the 20th century the word *consumption* evoked negative images. To be labeled a “consumer” was an insult. (In fact, one of the deadliest diseases in history, tuberculosis, was often referred to as “consumption.”) Twentieth-century merchants realized, however, that in order to prosper, they had to convince people of the need for things not previously needed. For example, **General Motors** made annual changes in its cars so that people would be discontented with the cars they already owned. Thus began consumerism.

Today, consumption describes the U.S. lifestyle in a nutshell. We consume twice as much today per person as we did at the end of World War II. The amount of U.S. retail space per person is vastly greater than that of any other country. It appears that we live to shop.

The first great retail giant was **Sears Roebuck**. It started as a catalog company enabling people in rural areas to buy things by mail. For decades, it was the uncontested merchandising leader.

Today, **Wal-Mart Stores, Inc.** is the undisputed champion provider of basic (and perhaps

not-so-basic) human needs. Wal-Mart opened its first store in 1962, and it now has more than 8,000 stores, serving more than 100 million customers every week. A key cause of Wal-Mart's incredible growth is its amazing system of inventory control and distribution. Wal-Mart has a management information system that employs six satellite channels, from which company computers receive 8.4 million updates every minute on what items customers buy and the relationship among items sold to each person.

Measured by sales revenues, Wal-Mart is the largest company in the world. In six years, it went from selling almost no groceries to being America's largest grocery retailer.

It would appear that things have never looked better at Wal-Mart. On the other hand, a *Wall Street Journal* article entitled "How to Sell More to Those Who Think It's Cool to Be Frugal" suggests that consumerism as a way of life might be dying. Don't bet your high-definition 3D TV on it though.

# Preview of CHAPTER 5

Merchandising is one of the largest and most influential industries in the United States. It is likely that a number of you will work for a merchandiser. Therefore, understanding the financial statements of merchandising companies is important. In this chapter, you will learn the basics about reporting merchandising transactions. In addition, you will learn how to prepare and analyze a commonly used form of the income statement—the multiple-step income statement. The content and organization of the chapter are as follows.

| Accounting for Merchandising Operations  |  |   |  |  |
|--|--|---|--|--|
| Merchandising Operations   | Recording Purchases of Merchandise   | Recording Sales of Merchandise  | Completing the Accounting Cycle  | Forms of Financial Statements  |
| <ul style="list-style-type: none"> <li>Operating cycles</li> <li>Flow of costs—perpetual and periodic inventory systems</li> </ul> | <ul style="list-style-type: none"> <li>Freight costs</li> <li>Purchase returns and allowances</li> <li>Purchase discounts</li> <li>Summary of purchasing transactions</li> </ul> | <ul style="list-style-type: none"> <li>Sales returns and allowances</li> <li>Sales discounts</li> </ul> | <ul style="list-style-type: none"> <li>Adjusting entries</li> <li>Closing entries</li> <li>Summary of merchandising entries</li> </ul> | <ul style="list-style-type: none"> <li>Multiple-step income statement</li> <li>Single-step income statement</li> <li>Classified balance sheet</li> </ul> |

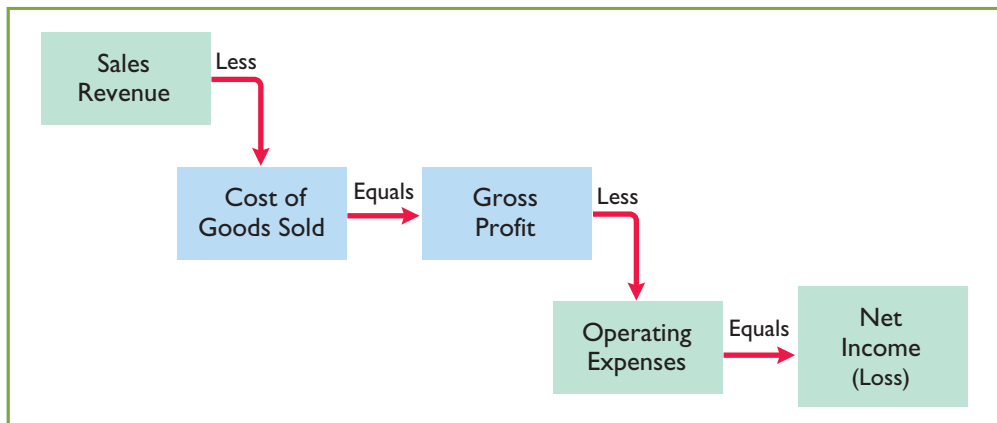

## Merchandising Operations

**Study Objective [1]**  
Identify the differences between service and merchandising companies.

Wal-Mart, Kmart, and Target are called merchandising companies because they buy and sell merchandise rather than perform services as their primary source of revenue. Merchandising companies that purchase and sell directly to consumers are called **retailers**. Merchandising companies that sell to retailers are known as **wholesalers**. For example, retailer Walgreens might buy goods from wholesaler McKesson; retailer Office Depot might buy office supplies from wholesaler United Stationers. The primary source of revenues for merchandising companies is the sale of merchandise, often referred to simply as **sales revenue** or **sales**. A merchandising company has two categories of expenses: cost of goods sold and operating expenses.

**Cost of goods sold** is the total cost of merchandise sold during the period. This expense is directly related to the revenue recognized from the sale of goods. Illustration 5-1 shows the income measurement process for a merchandising

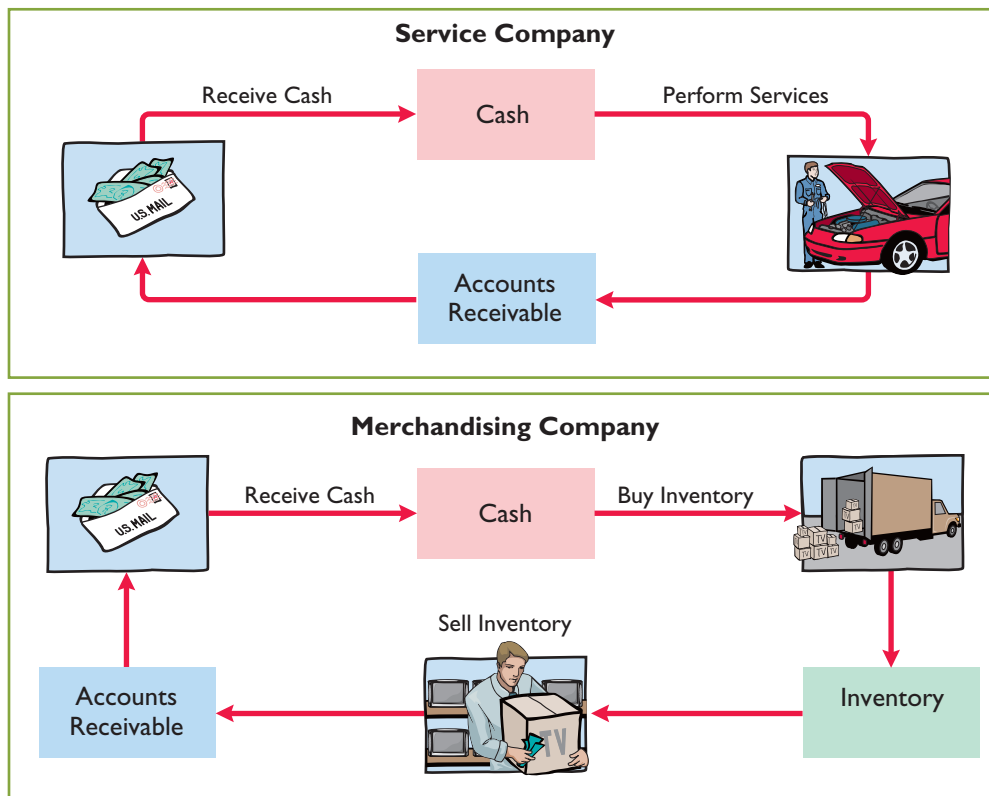

**Illustration 5-1**  
Income measurement process for a merchandising company

company. The items in the two blue boxes are unique to a merchandising company; they are not used by a service company.

## Operating Cycles

The operating cycle of a merchandising company ordinarily is longer than that of a service company. The purchase of merchandise inventory and its eventual sale lengthen the cycle. Illustration 5-2 contrasts the operating cycles of service and merchandising companies. Note that the added asset account for a merchandising company is the Inventory account. Companies report inventory as a current asset on the balance sheet.

**Illustration 5-2**

Operating cycles for a service company and a merchandising company

## Flow of Costs

The flow of costs for a merchandising company is as follows: Beginning inventory plus the cost of goods purchased is the cost of goods available for sale. As goods are sold, they are assigned to cost of goods sold. Those goods that are not sold by the end of the accounting period represent ending inventory. Illustration 5-3 (page 212) describes these relationships. Companies use one of two systems to account for inventory: a **perpetual inventory system** or a **periodic inventory system**.

### PERPETUAL SYSTEM

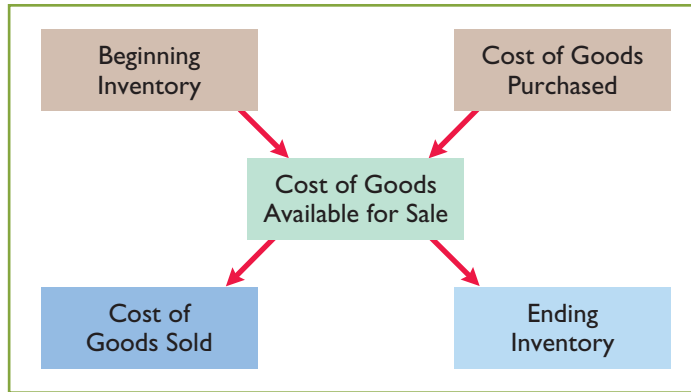

In a **perpetual inventory system**, companies keep detailed records of the cost of each inventory purchase and sale. These records continuously—perpetually—show the inventory that should be on hand for every item. For example, a **Ford** dealership has separate inventory records for each automobile, truck, and van on its lot and showroom floor. Similarly, a **Kroger** grocery store uses bar codes and optical

### Helpful Hint

For control purposes, companies take a physical inventory count under the perpetual system, even though it is not needed to determine cost of goods sold.

**Illustration 5-3**  
Flow of costs

scanners to keep a daily running record of every box of cereal and every jar of jelly that it buys and sells. Under a perpetual inventory system, a company determines the cost of goods sold **each time a sale occurs**.

**PERIODIC SYSTEM**

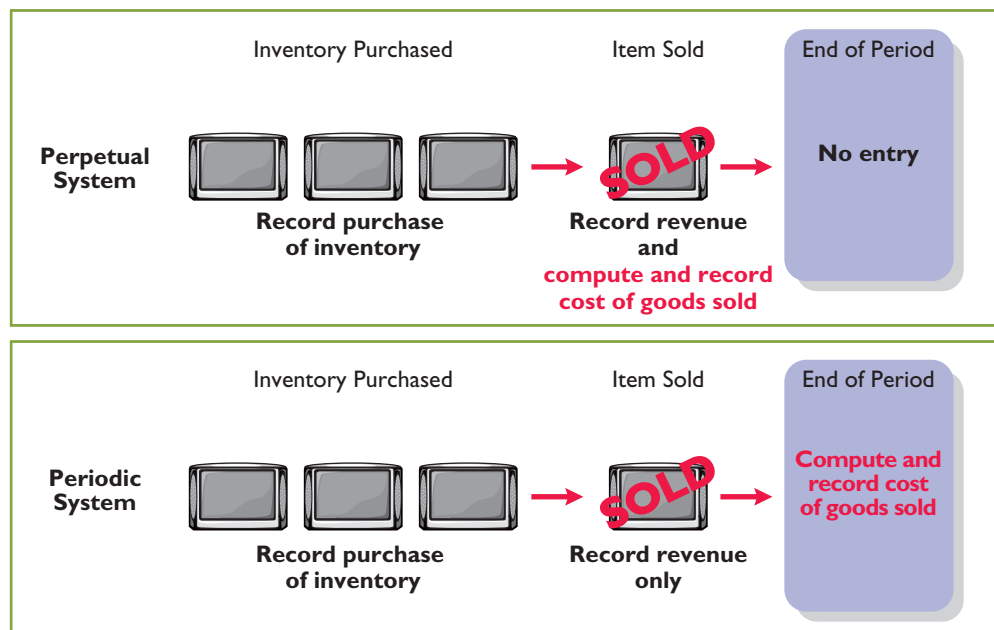

In a **periodic inventory system**, companies do not keep detailed inventory records of the goods on hand throughout the period. Instead, they determine the cost of goods sold **only at the end of the accounting period**—that is, periodically. At that point, the company takes a physical inventory count to determine the cost of goods on hand.

To determine the cost of goods sold under a periodic inventory system, the following steps are necessary:

1. Determine the cost of goods on hand at the beginning of the accounting period.
2. Add to it the cost of goods purchased.
3. Subtract the cost of goods on hand at the end of the accounting period.

Illustration 5-4 graphically compares the sequence of activities and the timing of the cost of goods sold computation under the two inventory systems.

**Illustration 5-4**  
Comparing perpetual and periodic inventory systems

### ADDITIONAL CONSIDERATIONS

Companies that sell merchandise with high unit values, such as automobiles, furniture, and major home appliances, have traditionally used perpetual systems. The growing use of computers and electronic scanners has enabled many more companies to install perpetual inventory systems. The perpetual inventory system is so named because the accounting records continuously—perpetually—show the quantity and cost of the inventory that should be on hand at any time.

A perpetual inventory system provides better control over inventories than a periodic system. Since the inventory records show the quantities that should be on hand, the company can count the goods at any time to see whether the amount of goods actually on hand agrees with the inventory records. If shortages are uncovered, the company can investigate immediately. Although a perpetual inventory system requires additional clerical work and additional cost to maintain the subsidiary records, a computerized system can minimize this cost. As noted in the Feature Story, much of **Wal-Mart**'s success is attributed to its sophisticated inventory system.

Some businesses find it either unnecessary or uneconomical to invest in a computerized perpetual inventory system. Many small merchandising businesses, in particular, find that a perpetual inventory system costs more than it is worth. Managers of these businesses can control their merchandise and manage day-to-day operations using a periodic inventory system.

Because the perpetual inventory system is growing in popularity and use, we illustrate it in this chapter. Appendix 5A describes the journal entries for the periodic system.

### INVESTOR INSIGHT

#### Morrow Snowboards Improves Its Stock Appeal

Investors are often eager to invest in a company that has a hot new product. However, when snowboard maker **Morrow Snowboards, Inc.**, issued shares of stock to the public for the first time, some investors expressed reluctance to invest in Morrow because of a number of accounting control problems. To reduce investor concerns, Morrow implemented a perpetual inventory system to improve its control over inventory. In addition, it stated that it would perform a physical inventory count every quarter until it felt that the perpetual inventory system was reliable.

**?** If a perpetual system keeps track of inventory on a daily basis, why do companies ever need to do a physical count? (See page 257.)

## Recording Purchases of Merchandise

Companies purchase inventory using cash or credit (on account). They normally record purchases when they receive the goods from the seller. Business documents provide written evidence of the transaction. A canceled check or a cash register receipt, for example, indicates the items purchased and amounts paid for each cash purchase. Companies record cash purchases by an increase in Inventory and a decrease in Cash.

A **purchase invoice** should support each credit purchase. This invoice indicates the total purchase price and other relevant information. However, the purchaser does not prepare a separate purchase invoice. Instead, the purchaser uses as a

### Study Objective [2]

Explain the recording of purchases under a perpetual inventory system.

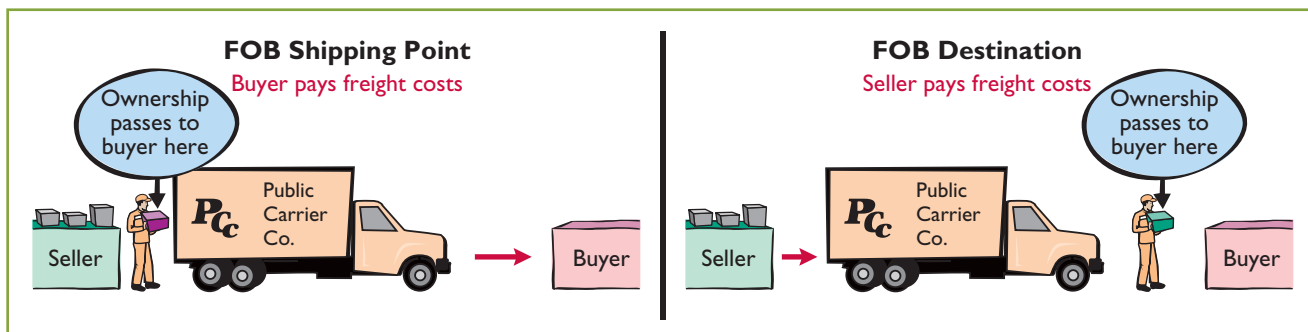

## Freight Costs

The sales agreement should indicate who—the seller or the buyer—is to pay for transporting the goods to the buyer’s place of business. When a common carrier such as a railroad, trucking company, or airline transports the goods, the carrier prepares a freight bill in accord with the sales agreement.

Freight terms are expressed as either FOB shipping point or FOB destination. The letters FOB mean **free on board**. Thus, **FOB shipping point** means that the seller places the goods free on board the carrier, and the buyer pays the freight costs. Conversely, **FOB destination** means that the seller places the goods free on board to the buyer’s place of business, and the seller pays the freight. For example, the sales invoice in Illustration 5-5 indicates FOB shipping point. Thus, the buyer (Sauk Stereo) pays the freight charges. Illustration 5-6 illustrates these shipping terms.

**Illustration 5-6**  
Shipping terms

### FREIGHT COSTS INCURRED BY THE BUYER

When the buyer incurs the transportation costs, these costs are considered part of the cost of purchasing inventory. Therefore, the buyer debits (increases) the account Inventory. For example, if upon delivery of the goods on May 6, Sauk Stereo (the buyer) pays Acme Freight Company \$150 for freight charges, the entry on Sauk Stereo’s books is:

|       |   |     |  |     |
|-------|---|-----|--|-----|
| May 6 | Inventory   | 150 |  |     |
|       | Cash  |     |  | 150 |
|       | (To record payment of freight on goods purchased) |     |  |     |

|                   |   |   |   |    |
|-------------------|---|---|---|----|
| A                 | = | L | + | OE |
| +150              |   |   |   |    |
| -150              |   |   |   |    |
|                   |   |   |   |    |
| <b>Cash Flows</b> |   |   |   |    |
| -150              |   |   |   |    |

Thus, any freight costs incurred by the buyer are part of the cost of merchandise purchased. The reason: Inventory cost should include any freight charges necessary to deliver the goods to the buyer.

### FREIGHT COSTS INCURRED BY THE SELLER

In contrast, **freight costs incurred by the seller on outgoing merchandise are an operating expense to the seller**. These costs increase an expense account titled Freight-out or Delivery Expense. If the freight terms on the invoice had required PW Audio Supply (the seller) to pay the freight charges, the entry by PW Audio Supply would be:

|       |  |     |  |     |
|-------|--|-----|--|-----|
| May 4 | Freight-out (or Delivery Expense)            | 150 |  |     |
|       | Cash   |     |  | 150 |
|       | (To record payment of freight on goods sold) |     |  |     |

|                   |   |   |   |          |
|-------------------|---|---|---|----------|
| A                 | = | L | + | OE       |
|                   |   |   |   | -150 Exp |
| -150              |   |   |   |          |
|                   |   |   |   |          |
| <b>Cash Flows</b> |   |   |   |          |
| -150              |   |   |   |          |

When the seller pays the freight charges, it will usually establish a higher invoice price for the goods to cover the shipping expense.

### Purchase Returns and Allowances

A purchaser may be dissatisfied with the merchandise received because the goods are damaged or defective, of inferior quality, or do not meet the purchaser’s specifications. In such cases, the purchaser may return the goods to the seller for credit if the sale was made on credit, or for a cash refund if the purchase was for cash. This transaction is known as a **purchase return**. Alternatively, the purchaser may choose to keep the merchandise if the seller is willing to grant an allowance (deduction) from the purchase price. This transaction is known as a **purchase allowance**.

Assume that on May 8 Sauk Stereo returned goods costing \$300 to PW Audio Supply. The following entry by Sauk Stereo for the returned merchandise decreases (debits) Accounts Payable and decreases (credits) Inventory.

|                   |   |      |   |    |
|-------------------|---|------|---|----|
| A                 | = | L    | + | OE |
|                   |   | -300 |   |    |
| -300              |   |      |   |    |
| <b>Cash Flows</b> |   |      |   |    |
| no effect         |   |      |   |    |

|       |  |     |     |
|-------|--|-----|-----|
| May 8 | Accounts Payable   | 300 |     |
|       | Inventory  |     | 300 |
|       | (To record return of goods purchased from PW Audio Supply) |     |     |

Because Sauk Stereo increased Inventory when the goods were received, Inventory is decreased when Sauk Stereo returns the goods (or when it is granted an allowance).

Suppose instead that Sauk Stereo chose to keep the goods after being granted a \$50 allowance (reduction in price). It would reduce (debit) Accounts Payable and reduce (credit) Inventory for \$50.

### Purchase Discounts

The credit terms of a purchase on account may permit the buyer to claim a cash discount for prompt payment. The buyer calls this cash discount a **purchase discount**. This incentive offers advantages to both parties: The purchaser saves money, and the seller shortens the operating cycle by more quickly converting the accounts receivable into cash.

**Credit terms** specify the amount of the cash discount and time period in which it is offered. They also indicate the time period in which the purchaser is expected to pay the full invoice price. In the sales invoice in Illustration 5-5 (page 214), credit terms are 2/10, n/30, which is read “two-ten, net thirty.” This means that the buyer may take a 2% cash discount on the invoice price less (“net of”) any returns or allowances, if payment is made within 10 days of the invoice date (the **discount period**). Otherwise, the invoice price, less any returns or allowances, is due 30 days from the invoice date.

Alternatively, the discount period may extend to a specified number of days following the month in which the sale occurs. For example, 1/10 EOM (end of month) means that a 1% discount is available if the invoice is paid within the first 10 days of the next month.

When the seller elects not to offer a cash discount for prompt payment, credit terms will specify only the maximum time period for paying the balance due. For example, the invoice may state the time period as n/30, n/60, or n/10 EOM. This means, respectively, that the buyer must pay the net amount in 30 days, 60 days, or within the first 10 days of the next month.

When the buyer pays an invoice within the discount period, the amount of the discount decreases Inventory. Why? Because companies record inventory at cost and, by paying within the discount period, the merchandiser has reduced that cost. To illustrate, assume Sauk Stereo pays the balance due of \$3,500 (gross invoice price of \$3,800 less purchase returns and allowances of \$300) on May 14, the last

#### Helpful Hint

The term *net* in “net 30” means the remaining amount due after subtracting any sales returns and allowances and partial payments.

day of the discount period. The cash discount is \$70 ( $\$3,500 \times 2\%$ ), and Sauk Stereo pays \$3,430 ( $\$3,500 - \$70$ ). The entry Sauk Stereo makes to record its May 14 payment decreases (debits) Accounts Payable by the amount of the gross invoice price, reduces (credits) Inventory by the \$70 discount, and reduces (credits) Cash by the net amount owed.

|        |  |       |       |
|--------|--|-------|-------|
| May 14 | Accounts Payable                           | 3,500 |       |
|        | Cash                                       |       | 3,430 |
|        | Inventory                                  |       | 70    |
|        | (To record payment within discount period) |       |       |

|                   |   |          |   |   |
|-------------------|---|----------|---|---|
| <b>A</b>          | = | <b>L</b> | + | <b>OE</b>   |
|                   |   | -3,500   |   |   |
| -3,430            |   |          |   |   |
| -70               |   |          |   |   |
| <hr/>             |   |          |   |   |
| <b>Cash Flows</b> |   |          |   |   |
| -3,430            |   |          |   |  |

If Sauk Stereo failed to take the discount, and instead made full payment of \$3,500 on June 3, it would debit Accounts Payable and credit Cash for \$3,500 each.

|        |  |       |       |
|--------|--|-------|-------|
| June 3 | Accounts Payable                           | 3,500 |       |
|        | Cash                                       |       | 3,500 |
|        | (To record payment with no discount taken) |       |       |

|                   |   |          |   |   |
|-------------------|---|----------|---|---|
| <b>A</b>          | = | <b>L</b> | + | <b>OE</b>   |
|                   |   | -3,500   |   |   |
| -3,500            |   |          |   |   |
| <hr/>             |   |          |   |   |
| <b>Cash Flows</b> |   |          |   |   |
| -3,500            |   |          |   |  |

A merchandising company usually should take all available discounts. Passing up the discount may be viewed as **paying interest** for use of the money. For example, passing up the discount offered by PW Audio Supply would be comparable to Sauk Stereo paying an interest rate of 2% for the use of \$3,500 for 20 days. This is the equivalent of an annual interest rate of approximately 36.5% ( $2\% \times 365/20$ ). Obviously, it would be better for Sauk Stereo to borrow at prevailing bank interest rates of 6% to 10% than to lose the discount.

## Summary of Purchasing Transactions

The following T account (with transaction descriptions in blue) provides a summary of the effect of the previous transactions on Inventory. Sauk Stereo originally purchased \$3,800 worth of inventory for resale. It then returned \$300 of goods. It paid \$150 in freight charges, and finally, it received a \$70 discount off the balance owed because it paid within the discount period. This results in a balance in Inventory of \$3,580.

|                   |       | Inventory |       |     |                          |  |  |
|-------------------|-------|-----------|-------|-----|--------------------------|--|--|
| <b>Purchase</b>   | May 4 | 3,800     | May 8 | 300 | <b>Purchase return</b>   |  |  |
| <b>Freight-in</b> | 6     | 150       | 14    | 70  | <b>Purchase discount</b> |  |  |
|                   |       | 3,580     |       |     |                          |  |  |

## Do it!

On September 5, De La Hoya Company buys merchandise on account from Junot Diaz Company. The selling price of the goods is \$1,500, and the cost to Diaz Company was \$800. On September 8, De La Hoya returns defective goods with a selling price of \$200. Record the transactions on the books of De La Hoya Company.

## Purchase Transactions

**action plan**

- ✓ Purchaser records goods at cost.
- ✓ When goods are returned, purchaser reduces Inventory.

**Solution**

|         |  |       |       |
|---------|--|-------|-------|
| Sept. 5 | Inventory                              | 1,500 |       |

## Recording Sales of Merchandise

**Study Objective [3]**

Explain the recording of sales revenues under a perpetual inventory system.

Companies record sales revenues, like service revenues, when earned, in compliance with the revenue recognition principle. Typically, companies earn sales revenues when the goods transfer from the seller to the buyer. At this point, the sales transaction is complete and the sales price established.

Sales may be made on credit or for cash. A **business document** should support every sales transaction, to provide written evidence of the sale. **Cash register tapes** provide evidence of cash sales. A **sales invoice**, like the one shown in Illustration 5-5 (page 214), provides support for a credit sale. The original copy of the invoice goes to the customer, and the seller keeps a copy for use in recording the sale. The invoice shows the date of sale, customer name, total sales price, and other relevant information.

The seller makes two entries for each sale. **The first entry records the sale:** The seller increases (debits) Cash (or Accounts Receivable, if a credit sale), and also increases (credits) Sales Revenue. **The second entry records the cost of the merchandise sold:** The seller increases (debits) Cost of Goods Sold, and also decreases (credits) Inventory for the cost of those goods. As a result, the Inventory account will show at all times the amount of inventory that should be on hand.

To illustrate a credit sales transaction, PW Audio Supply records its May 4 sale of \$3,800 to Sauk Stereo (see Illustration 5-5) as follows (assume the merchandise cost PW Audio Supply \$2,400).

|                   |   |   |   |            |
|-------------------|---|---|---|------------|
| A                 | = | L | + | OE         |
| +3,800            |   |   |   | +3,800 Rev |
| <b>Cash Flows</b> |   |   |   |            |
| no effect         |   |   |   |            |

|       |   |       |       |
|-------|---|-------|-------|
| May 4 | Accounts Receivable                                     | 3,800 |       |
|       | Sales Revenue   |       | 3,800 |
|       | (To record credit sale to Sauk Stereo per invoice #731) |       |       |

|                   |   |   |   |            |
|-------------------|---|---|---|------------|
| A                 | = | L | + | OE         |
| -2,400            |   |   |   | -2,400 Exp |
| <b>Cash Flows</b> |   |   |   |            |
| no effect         |   |   |   |            |

|   |   |       |       |
|---|---|-------|-------|
| 4 | Cost of Goods Sold  | 2,400 |       |
|   | Inventory   |       | 2,400 |
|   | (To record cost of merchandise sold on invoice #731 to Sauk Stereo) |       |       |

For internal decision-making purposes, merchandising companies may use more than one sales account. For example, PW Audio Supply may decide to keep separate sales accounts for its sales of TV sets, DVD recorders, and microwave ovens. **Wal-Mart** might use separate accounts for sporting goods, children’s clothing, and hardware—or it might have even more narrowly defined accounts. By using separate sales accounts for major product lines, rather than a single combined sales

account, company management can more closely monitor sales trends and respond more strategically to changes in sales patterns. For example, if TV sales are increasing while microwave oven sales are decreasing, PW Audio Supply might reevaluate both its advertising and pricing policies on these items to ensure they are optimal.

On its income statement presented to outside investors, a merchandising company normally would provide only a single sales figure—the sum of all of its individual sales accounts. This is done for two reasons. First, providing detail on all of its individual sales accounts would add considerable length to its income statement. Second, companies do not want their competitors to know the details of their operating results. However, **Microsoft** recently expanded its disclosure of revenue from three to five types. The reason: The additional categories will better enable financial statement users to evaluate the growth of the company’s consumer and Internet businesses.

### Ethics Note

Many companies are trying to improve the quality of their financial reporting. For example, **General Electric** now provides more detail on its revenues and operating profits.

### ANATOMY OF A FRAUD<sup>1</sup>

Holly Harmon was a cashier at a national superstore for only a short while when she began stealing merchandise using three methods. First, her husband or friends took UPC labels from cheaper items and put them on more expensive items. Holly then scanned the goods at the register. Second, Holly rang an item up but then voided the sale and left the merchandise in the shopping cart. A third approach was to put goods into large plastic containers. She rang up the plastic containers but not the goods within them. One day, Holly did not call in sick or show up for work. In such instances, the company reviews past surveillance tapes to look for suspicious activity by employees. This enabled the store to observe the thefts and to identify the participants.

Total take: \$12,000

#### THE MISSING CONTROLS

**Human resource controls.** A background check would have revealed Holly’s previous criminal record. She would not have been hired as a cashier.

**Physical controls.** Software can flag high numbers of voided transactions or a high number of sales of low-priced goods. Random comparisons of video records with cash register records can ensure that the goods reported as sold on the register are the same goods that are shown being purchased on the video recording. Finally, employees should be aware that they are being monitored.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 251–259.

*At the end of “Anatomy of a Fraud” stories, which describe some recent real-world frauds, we discuss the missing control activity that would likely have prevented or uncovered the fraud.*

## Sales Returns and Allowances

We now look at the “flipside” of purchase returns and allowances, which the seller records as **sales returns and allowances**. These are transactions where the seller either accepts goods back from the buyer (a return) or grants a reduction in the purchase price (an allowance) so the buyer will keep the goods. PW Audio Supply’s entries to record credit for returned goods involve (1) an increase (debit) in Sales Returns and Allowances (a contra account to Sales Revenue) and a decrease (credit) in Accounts Receivable at the \$300 selling price, and (2) an increase (debit) in

<sup>1</sup>The “Anatomy of a Fraud” stories in this textbook are adapted from *Fraud Casebook: Lessons from the Bad Side of Business*, edited by Joseph T. Wells (Hoboken, NJ: John Wiley & Sons, Inc., 2007). Used by permission. The names of some of the people and organizations in the stories are fictitious, but the facts in the stories are true.

|      |   |   |   |          |
|------|---|---|---|----------|
| A    | = | L | + | OE       |
|      |   |   |   | -300 Rev |
| -300 |   |   |   |          |

Cash Flows  
no effect

|      |   |   |   |          |
|------|---|---|---|----------|
| A    | = | L | + | OE       |
|      |   |   |   | +140 Exp |
| +140 |   |   |   |          |

Cash Flows  
no effect

Inventory (assume a \$140 cost) and a decrease (credit) in Cost of Goods Sold, as shown below (assuming that the goods were not defective).

|       |  |     |  |     |
|-------|--|-----|--|-----|
| May 8 | Sales Returns and Allowances<br>Accounts Receivable<br>(To record credit granted to Sauk Stereo<br>for returned goods) | 300 |  | 300 |
| 8     | Inventory<br>Cost of Goods Sold<br>(To record cost of goods returned)  | 140 |  | 140 |

If Sauk Stereo returns goods because they are damaged or defective, then PW Audio Supply’s entry to Inventory and Cost of Goods Sold should be for the fair value of the returned goods, rather than their cost. For example, if the returned goods were defective and had a fair value of \$50, PW Audio Supply would debit Inventory for \$50, and would credit Cost of Goods Sold for \$50.

What happens if the goods are not returned but the seller grants the buyer an allowance by reducing the purchase price? In this case, the seller debits Sales Returns and Allowances and credits Accounts Receivable for the amount of the allowance.

As mentioned above, Sales Returns and Allowances is a **contra-revenue account** to Sales Revenue. The normal balance of Sales Returns and Allowances is a debit. Companies use a contra account, instead of debiting Sales Revenue, to disclose in the accounts and in the income statement the amount of sales returns and allowances. Disclosure of this information is important to management: Excessive returns and allowances may suggest problems— inferior merchandise, inefficiencies in filling orders, errors in billing customers, or delivery or shipment mistakes. Moreover, a decrease (debit) recorded directly to Sales Revenue would obscure the relative importance of sales returns and allowances as a percentage of sales. It also could distort comparisons between total sales in different accounting periods.

## ACCOUNTING ACROSS THE ORGANIZATION

### Should Costco Change Its Return Policy?

In most industries, sales returns are relatively minor. But returns of consumer electronics can really take a bite out of profits. Recently, the marketing executives at **Costco Wholesale Corp.** faced a difficult decision. Costco has always prided itself on its generous return policy. Most goods have had an unlimited grace period for returns. A new policy will require that certain electronics must be returned within 90 days of their purchase. The reason? The cost of returned products such as high-definition TVs, computers, and iPods cut an estimated 8¢ per share off Costco’s earnings per share, which was \$2.30.

Source: Kris Hudson, “Costco Tightens Policy on Returning Electronics,” *Wall Street Journal* (February 27, 2007), p. B4.

**?** If a company expects significant returns, what are the implications for revenue recognition? (See page 257.)

## Sales Discounts

As mentioned in our discussion of purchase transactions, the seller may offer the customer a cash discount—called by the seller a **sales discount**—for the prompt payment of the balance due. Like a purchase discount, a sales discount is based on the invoice price less returns and allowances, if any. The seller increases (debits) the Sales Discounts account for discounts that are taken. For example, PW Audio

Supply makes the following entry to record the cash receipt on May 14 from Sauk Stereo within the discount period.

|        |   |       |       |
|--------|---|-------|-------|
| May 14 | Cash  | 3,430 | 3,500 |
|        | Sales Discounts   | 70    |       |
|        | Accounts Receivable   |       |       |
|        | (To record collection within 2/10, n/30 discount period from Sauk Stereo) |       |       |

|                   |   |   |   |         |
|-------------------|---|---|---|---------|
| A                 | = | L | + | OE      |
| +3,430            |   |   |   | -70 Rev |
| -3,500            |   |   |   |         |
| <b>Cash Flows</b> |   |   |   |         |
| +3,430            |   |   |   |         |

Like Sales Returns and Allowances, Sales Discounts is a **contra-revenue account** to Sales Revenue. Its normal balance is a debit. PW Audio Supply uses this account, instead of debiting Sales Revenue, to disclose the amount of cash discounts taken by customers. If Sauk Stereo does not take the discount, PW Audio Supply increases (debits) Cash for \$3,500 and decreases (credits) Accounts Receivable for the same amount at the date of collection.

The following T accounts summarize the three sales-related transactions and show their combined effect on net sales.

|   |                              |                 |
|---|------------------------------|-----------------|
| Sales Revenue   | Sales Returns and Allowances | Sales Discounts |
| 3,800   | 300                          | 70              |
| <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: left;">↘</div> <div style="text-align: center;">             Net Sales<br/>\$3,430           </div> <div style="text-align: right;">↙</div> </div> |                              |                 |

## Do it!

On September 5, De La Hoya Company buys merchandise on account from Junot Diaz Company. The selling price of the goods is \$1,500, and the cost to Diaz Company was \$800. On September 8, De La Hoya returns defective goods with a selling price of \$200 and a fair value of \$30. Record the transactions on the books of Junot Diaz Company.

### Solution

|         |   |       |       |
|---------|---|-------|-------|
| Sept. 5 | Accounts Receivable   | 1,500 | 1,500 |
|         | Sales Revenue<br>(To record credit sale)  |       |       |
| 5       | Cost of Goods Sold  | 800   | 800   |
|         | Inventory<br>(To record cost of goods sold on account)                          |       |       |
| 8       | Sales Returns and Allowances  | 200   | 200   |
|         | Accounts Receivable<br>(To record credit granted for receipt of returned goods) |       |       |
| 8       | Inventory   | 30    | 30    |
|         | Cost of Goods Sold<br>(To record fair value of goods returned)                  |       |       |

## Sales Transactions

### action plan

- ✓ Seller records both the sale and the cost of goods sold at the time of the sale.
- ✓ When goods are returned, the seller records the return in a contra account, Sales Returns and Allowances, and reduces Accounts Receivable. Any goods returned increase Inventory and reduce Cost of Goods Sold.
- ✓ Defective or damaged inventory is recorded at fair value (scrap value).

Related exercise material: BE5-2, BE5-3, E5-3, E5-4, E5-5, and **Do it!** 5-2.

## Completing the Accounting Cycle

### Study Objective [4]

Explain the steps in the accounting cycle for a merchandising company.

Up to this point, we have illustrated the basic entries for transactions relating to purchases and sales in a perpetual inventory system. Now we consider the remaining steps in the accounting cycle for a merchandising company. Each of the required steps described in Chapter 4 for service companies apply to merchandising companies. Appendix 5B to this chapter shows use of a worksheet by a merchandiser (an optional step).

### Adjusting Entries

A merchandising company generally has the same types of adjusting entries as a service company. However, a merchandiser using a perpetual system will require one additional adjustment to make the records agree with the actual inventory on hand. Here's why: At the end of each period, for control purposes, a merchandising company that uses a perpetual system will take a physical count of its goods on hand. The company's unadjusted balance in Inventory usually does not agree with the actual amount of inventory on hand. The perpetual inventory records may be incorrect due to recording errors, theft, or waste. Thus, the company needs to adjust the perpetual records to make the recorded inventory amount agree with the inventory on hand. **This involves adjusting Inventory and Cost of Goods Sold.**

For example, suppose that PW Audio Supply has an unadjusted balance of \$40,500 in Inventory. Through a physical count, PW Audio Supply determines that its actual merchandise inventory at year-end is \$40,000. The company would make an adjusting entry as follows.

|   |     |     |
|---|-----|-----|
| Cost of Goods Sold                      | 500 |     |
| Inventory                               |     | 500 |
| (To adjust inventory to physical count) |     |     |

### Closing Entries

A merchandising company, like a service company, closes to Income Summary all accounts that affect net income. In journalizing, the company credits all temporary accounts with debit balances, and debits all temporary accounts with credit balances, as shown below for PW Audio Supply. Note that PW Audio Supply closes Cost of Goods Sold to Income Summary.

#### Helpful Hint

The easiest way to prepare the first two closing entries is to identify the temporary accounts by their balances and then prepare one entry for the credits and one for the debits.

|         |   |         |         |
|---------|---|---------|---------|
| Dec. 31 | Sales Revenue   | 480,000 |         |
|         | Income Summary  |         | 480,000 |
|         | (To close income statement accounts with credit balances) |         |         |
| 31      | Income Summary  | 450,000 |         |
|         | Sales Returns and Allowances                              |         | 12,000  |
|         | Sales Discounts   |         | 8,000   |
|         | Cost of Goods Sold  |         | 316,000 |
|         | Salaries and Wages Expense                                |         | 64,000  |
|         | Freight-out   |         | 7,000   |
|         | Advertising Expense                                       |         | 16,000  |
|         | Utilities Expense   |         | 17,000  |
|         | Depreciation Expense                                      |         | 8,000   |
|         | Insurance Expense   |         | 2,000   |
|         | (To close income statement accounts with debit balances)  |         |         |

|    |   |        |        |
|----|---|--------|--------|
| 31 | Income Summary<br>Owner's Capital<br>(To close net income to capital) | 30,000 | 30,000 |
| 31 | Owner's Capital<br>Owner's Drawings<br>(To close drawings to capital) | 15,000 | 15,000 |

After PW Audio Supply has posted the closing entries, all temporary accounts have zero balances. Also, Owner's Capital has a balance that is carried over to the next period.

### Summary of Merchandising Entries

Illustration 5-7 summarizes the entries for the merchandising accounts using a perpetual inventory system.

## Do it!

### Closing Entries

#### action plan

✓ Close all temporary accounts with credit balances to Income Summary by debiting these accounts.

✓ Close all temporary accounts with debit balances, except drawings, to Income Summary by crediting these accounts.

The trial balance of Celine's Sports Wear Shop at December 31 shows Inventory \$25,000, Sales Revenue \$162,400, Sales Returns and Allowances \$4,800, Sales Discounts \$3,600, Cost of Goods Sold \$110,000, Rent Revenue \$6,000, Freight-out \$1,800, Rent Expense \$8,800, and Salaries and Wages Expense \$22,000. Prepare the closing entries for the above accounts.

#### Solution

The two closing entries are:

|         |  |         |         |
|---------|--|---------|---------|
| Dec. 31 | Sales Revenue                            | 162,400 |         |
|         | Rent Revenue                             | 6,000   |         |
|         | Income Summary                           |         | 168,400 |
|         | (To close accounts with credit balances) |         |         |
| 31      | Income Summary                           | 151,000 |         |
|         | Cost of Goods Sold                       |         | 110,000 |
|         | Sales Returns and Allowances             |         | 4,800   |
|         | Sales Discounts                          |         | 3,600   |
|         | Freight-out                              |         | 1,800   |
|         | Rent Expense                             |         | 8,800   |
|         | Salaries and Wages Expense               |         | 22,000  |
|         | (To close accounts with debit balances)  |         |         |

## Forms of Financial Statements

### Study Objective [5]

Distinguish between a multiple-step and a single-step income statement.

Merchandising companies widely use the classified balance sheet introduced in Chapter 4 and one of two forms for the income statement. This section explains the use of these financial statements by merchandisers.

### Multiple-Step Income Statement

The **multiple-step income statement** is so named because it shows several steps in determining net income. Two of these steps relate to the company's principal operating activities. A multiple-step statement also distinguishes between **operating** and **nonoperating activities**. Finally, the statement also highlights intermediate components of income and shows subgroupings of expenses.

#### INCOME STATEMENT PRESENTATION OF SALES

The multiple-step income statement begins by presenting **sales revenue**. It then deducts contra-revenue accounts—sales returns and allowances, and sales discounts—to arrive at **net sales**. Illustration 5-8 presents the sales revenues section for PW Audio Supply, using assumed data.

This presentation discloses the key data about the company's principal revenue-producing activities.

| <b>PW Audio Supply</b><br>Income Statement (partial) |              |                  |
|--|--------------|------------------|
| <b>Sales revenues</b>                                |              |                  |
| Sales revenue  |              | \$480,000        |
| Less: Sales returns and allowances                   | \$12,000     |                  |
| Sales discounts                                      | <u>8,000</u> | <u>20,000</u>    |
| <b>Net sales</b>                                     |              | <b>\$460,000</b> |

**Illustration 5-8**  
Computation of net sales

## GROSS PROFIT

From Illustration 5-1, you learned that companies deduct cost of goods sold from sales revenue in order to determine **gross profit**. For this computation, companies use **net sales** (which takes into consideration Sales Returns and Allowances and Sales Discounts) as the amount of sales revenue. On the basis of the sales data in Illustration 5-8 (net sales of \$460,000) and cost of goods sold under the perpetual inventory system (assume \$316,000), PW Audio Supply's gross profit is \$144,000, computed as follows.

|                     |                  |
|---------------------|------------------|
| Net sales           | \$460,000        |
| Cost of goods sold  | <u>316,000</u>   |
| <b>Gross profit</b> | <b>\$144,000</b> |

**Illustration 5-9**  
Computation of gross profit

We also can express a company's gross profit as a percentage, called the **gross profit rate**. To do so, we divide the amount of gross profit by net sales. For PW Audio Supply, the **gross profit rate** is 31.3%, computed as follows.

|                     |   |                  |   |                          |
|---------------------|---|------------------|---|--------------------------|
| <b>Gross Profit</b> | ÷ | <b>Net Sales</b> | = | <b>Gross Profit Rate</b> |
| \$144,000           | ÷ | \$460,000        | = | 31.3%                    |

**Illustration 5-10**  
Gross profit rate formula and computation

Analysts generally consider the gross profit **rate** to be more useful than the gross profit **amount**. The rate expresses a more meaningful (qualitative) relationship between net sales and gross profit. For example, a gross profit of \$1,000,000 may sound impressive. But if it is the result of a gross profit rate of only 7%, it is not so impressive. The gross profit rate tells how many cents of each sales dollar go to gross profit.

Gross profit represents the **merchandising profit** of a company. It is not a measure of the overall profitability, because operating expenses are not yet deducted. But managers and other interested parties closely watch the amount and trend of gross profit. They compare current gross profit with amounts reported in past periods. They also compare the company's gross profit rate with rates of competitors and with industry averages. Such comparisons provide information about the effectiveness of a company's purchasing function and the soundness of its pricing policies.

## OPERATING EXPENSES AND NET INCOME

**Operating expenses** are the next component in measuring net income for a merchandising company. They are the expenses incurred in the process of earning sales revenue. These expenses are similar in merchandising and service companies. At PW Audio Supply, operating expenses were \$114,000. The company determines its net income by subtracting operating expenses from gross profit. Thus, net income is \$30,000, as shown below.

|                           |                       |
|---------------------------|-----------------------|
| Gross profit              | \$144,000             |
| <b>Operating expenses</b> | <b><u>114,000</u></b> |
| Net income                | <u>\$ 30,000</u>      |

**Illustration 5-11**  
Operating expenses in computing net income

## Study Objective [6]

Explain the computation and importance of gross profit.

The net income amount is the so-called “bottom line” of a company’s income statement.

**Ethics Note**

Companies manage earnings in various ways. **ConAgra Foods** recorded a nonrecurring gain for \$186 million from the sale of **Pilgrim’s Pride** stock to help meet an earnings projection for the quarter.

**NONOPERATING ACTIVITIES**

**Nonoperating activities** consist of various revenues and expenses and gains and losses that are unrelated to the company’s main line of operations. When nonoperating items are included, the label “**Income from operations**” (or “Operating income”) precedes them. This label clearly identifies the results of the company’s normal operations, an amount determined by subtracting cost of goods sold and operating expenses from net sales. The results of nonoperating activities are shown in the categories “**Other revenues and gains**” and “**Other expenses and losses.**” Illustration 5-12 lists examples of each.

**Illustration 5-12**

Other items of nonoperating activities

| Other Revenues and Gains   |
|--|
| <b>Interest revenue</b> from notes receivable and marketable securities.       |
| <b>Dividend revenue</b> from investments in common stock.                      |
| <b>Rent revenue</b> from subleasing a portion of the store.                    |
| <b>Gain</b> from the sale of property, plant, and equipment.                   |
| Other Expenses and Losses  |
| <b>Interest expense</b> on notes and loans payable.                            |
| <b>Casualty losses</b> from recurring causes, such as vandalism and accidents. |
| <b>Loss</b> from the sale or abandonment of property, plant, and equipment.    |
| <b>Loss</b> from strikes by employees and suppliers.                           |

Merchandising companies report the nonoperating activities in the income statement immediately after the company’s operating activities. Illustration 5-13 shows these sections for PW Audio Supply, Inc., using assumed data.

The distinction between operating and nonoperating activities is crucial to many external users of financial data. These users view operating income as sustainable and many nonoperating activities as nonrecurring. Therefore, when forecasting next year’s income, analysts put the most weight on this year’s operating income, and less weight on this year’s nonoperating activities.

**ETHICS INSIGHT**

**Disclosing More Details**

After **Enron**, increased investor criticism and regulator scrutiny forced many companies to improve the clarity of their financial disclosures. For example, **IBM** announced that it would begin providing more detail regarding its “Other gains and losses.” It had previously included these items in its selling, general, and administrative expenses, with little disclosure.

Disclosing other gains and losses in a separate line item on the income statement will not have any effect on bottom-line income. However, analysts complained that burying these details in the selling, general, and administrative expense line reduced their ability to fully understand how well IBM was performing. For example previously if IBM sold off one of its buildings at a gain, it would include this gain in the selling, general and administrative expense line item, thus reducing that expense. This made it appear that the company had done a better job of controlling operating expenses than it actually had.

Other companies that also recently announced changes to increase the informativeness of their income statements included **PepsiCo** and **General Electric**.

**?** Why have investors and analysts demanded more accuracy in isolating “Other gains and losses” from operating items? (See page 257.)

**Illustration 5-13**  
Multiple-step income statement

## Single-Step Income Statement

Another income statement format is the **single-step income statement**. The statement is so named because only one step—subtracting total expenses from total revenues—is required in determining net income.

In a single-step statement, all data are classified into two categories: (1) **revenues**, which include both operating revenues and other revenues and gains; and (2) **expenses**, which include cost of goods sold, operating expenses, and other expenses and losses. Illustration 5-14 (page 228) shows a single-step statement for PW Audio Supply.

There are two primary reasons for using the single-step format: (1) A company does not realize any type of profit or income until total revenues exceed total expenses, so it makes sense to divide the statement into these two categories. (2) The format is simpler and easier to read. *For homework problems, however, you should use the single-step format only when specifically instructed to do so.*

## Classified Balance Sheet

In the balance sheet, merchandising companies report inventory as a current asset immediately below accounts receivable. Recall from Chapter 4 that companies generally list current asset items in the order of their closeness to cash

**Illustration 5-14**  
Single-step income  
statement

| Prepaid insurance  |               | <u>1,800</u>     |
| Total current assets   |               | 67,400           |
| Property, plant, and equipment   |               |                  |
| Equipment  | \$80,000      |                  |
| Less: Accumulated depreciation—equipment                                     | <u>24,000</u> | <u>56,000</u>    |
| Total assets   |               | <u>\$123,400</u> |

### Helpful Hint

The \$40,000 is the cost of the inventory on hand, not its expected selling price.

### Financial Statement Classifications

You are presented with the following list of accounts from the adjusted trial balance for merchandiser Gorman Company. Indicate in which financial statement and under what classification each of the following would be reported.

|                                    |                                    |
|------------------------------------|------------------------------------|
| Accounts Payable                   | Accumulated Depreciation—Equipment |
| Accounts Receivable                | Advertising Expense                |
| Accumulated Depreciation—Buildings | Buildings                          |

|                                  |                                     |
|----------------------------------|-------------------------------------|
| Cash                             | Notes Payable (due in 3 years)      |
| Depreciation Expense             | Owner's Capital (beginning balance) |
| Equipment                        | Owner's Drawings                    |
| Freight-out                      | Property Taxes Payable              |
| Gain on Disposal of Plant Assets | Salaries and Wages Expense          |
| Insurance Expense                | Salaries and Wages Payable          |
| Interest Expense                 | Sales Returns and Allowances        |
| Interest Payable                 | Sales Revenue                       |
| Inventory                        | Utilities Expense                   |
| Land                             |                                     |

| Utilities Expense                    | Income statement           | Operating expenses             |

**action plan**

- ✓ Review the major sections of the income statement, sales revenues, cost of goods sold, operating expenses, other revenues and gains, and other expenses and losses.
- ✓ Add net income and investments to beginning capital and deduct drawings to arrive at ending capital in the owner's equity statement.
- ✓ Review the major sections of the balance sheet, income statement, and owner's equity statement.

**Instructions**

Prepare a multiple-step income statement for Falcetto Company.

**action plan**

✓ Remember that the key components of the income statement are net sales, cost of goods sold, gross profit, total operating expenses, and net income (loss). Report these components in the right-hand column of the income statement.

✓ Put nonoperating items after income from operations.

## Summary of Study Objectives

**[1] Identify the differences between service and merchandising companies.** Because of inventory, a merchandising company has sales revenue, cost of goods sold, and gross profit. To account for inventory, a merchandising company must choose between a perpetual and a periodic inventory system.

**[2] Explain the recording of purchases under a perpetual inventory system.** The company debits the Inventory account for all purchases of merchandise and freight-in, and credits it for purchase discounts and purchase returns and allowances.

**[3] Explain the recording of sales revenues under a perpetual inventory system.** When a merchandising company sells inventory, it debits Accounts Receivable (or Cash), and credits Sales Revenue for the **selling price** of the merchandise. At the same time, it debits Cost of Goods Sold, and credits Inventory for the **cost** of the inventory items sold.

**[4] Explain the steps in the accounting cycle for a merchandising company.** Each of the required steps in

the accounting cycle for a service company applies to a merchandising company. A worksheet is again an optional step. Under a perpetual inventory system, the company must adjust the Inventory account to agree with the physical count.

**[5] Distinguish between a multiple-step and a single-step income statement.** A multiple-step income statement shows numerous steps in determining net income, including nonoperating activities sections. A single-step income statement classifies all data under two categories, revenues or expenses, and determines net income in one step.

**[6] Explain the computation and importance of gross profit.** Merchandising companies compute gross profit by subtracting cost of goods sold from net sales. Gross profit represents the merchandising profit of a company. Managers and other interested parties closely watch the amount and trend of gross profit and of the gross profit rate.

## Glossary

**Contra-revenue account** An account that is offset against a revenue account on the income statement. (p. 220).

**Cost of goods sold** The total cost of merchandise sold during the period. (p. 210).

**FOB destination** Freight terms indicating that the seller places the goods free on board to the buyer's place of business, and the seller pays the freight. (p. 215).

**FOB shipping point** Freight terms indicating that the seller places goods free on board the carrier, and the buyer pays the freight costs. (p. 215).

**Gross profit** The excess of net sales over the cost of goods sold. (p. 225).

**Gross profit rate** Gross profit expressed as a percentage, by dividing the amount of gross profit by net sales. (p. 225).

**Income from operations** Income from a company's principal operating activity; determined by subtracting cost of goods sold and operating expenses from net sales. (p. 226).

**Multiple-step income statement** An income statement that shows several steps in determining net income. (p. 224).

**Net sales** Sales less sales returns and allowances and less sales discounts. (p. 224).

**Nonoperating activities** Various revenues, expenses, gains, and losses that are unrelated to a company's main line of operations. (p. 226).

**Operating expenses** Expenses incurred in the process of earning sales revenues. (p. 225).

**Other expenses and losses** A nonoperating-activities section of the income statement that shows expenses and losses unrelated to the company's main line of operations. (p. 226).

**Other revenues and gains** A nonoperating-activities section of the income statement that shows revenues and gains unrelated to the company's main line of operations. (p. 226).

**Periodic inventory system** An inventory system under which the company does not keep detailed inventory records throughout the accounting period but determines the cost of goods sold only at the end of an accounting period. (p. 212).

**Perpetual inventory system** An inventory system under which the company keeps detailed records of the cost of each inventory purchase and sale, and the records continuously show the inventory that should be on hand. (p. 211).

**Purchase allowance** A deduction made to the selling price of merchandise, granted by the seller so that the buyer will keep the merchandise. (p. 216).

**Purchase discount** A cash discount claimed by a buyer for prompt payment of a balance due. (p. 216).

**Purchase invoice** A document that supports each credit purchase. (p. 213).

**Purchase return** A return of goods from the buyer to the seller for a cash or credit refund. (p. 216).

**Sales discount** A reduction given by a seller for prompt payment of a credit sale. (p. 220).

**Sales invoice** A document that supports each credit sale. (p. 218).

**Sales returns and allowances** Purchase returns and allowances from the seller's perspective. See *Purchase return* and *Purchase allowance*, above. (p. 219).

**Sales revenue (Sales)** The primary source of revenue in a merchandising company. (p. 210).

**Single-step income statement** An income statement that shows only one step in determining net income. (p. 227).

## APPENDIX 5A

### Periodic Inventory System

#### Study Objective [7]

Explain the recording of purchases and sales of inventory under a periodic inventory system.

As described in this chapter, companies may use one of two basic systems of accounting for inventories: (1) the perpetual inventory system or (2) the periodic inventory system. In the chapter, we focused on the characteristics of the perpetual inventory system. In this appendix, we discuss and illustrate the **periodic inventory system**. One key difference between the two systems is the point at which the company computes cost of goods sold. For a visual reminder of this difference, refer back to Illustration 5-4 (on page 212).

#### Determining Cost of Goods Sold Under a Periodic System

Determining cost of goods sold is different when a periodic inventory system is used rather than a perpetual system. As you have seen, a company using a **perpetual system** makes an entry to record cost of goods sold and to reduce inventory *each time a sale is made*. A company using a **periodic system** does not determine cost of goods sold *until the end of the period*. At the end of the period the company performs a count to determine the ending balance of inventory. It then **calculates cost of goods sold by subtracting ending inventory from the goods available for sale**. Goods available for sale is the sum of beginning inventory plus purchases, as shown in Illustration 5A-1.

#### Illustration 5A-1

Basic formula for cost of goods sold using the periodic system

|                           |                                  |
|---------------------------|----------------------------------|
| Beginning Inventory       |                                  |
| + Cost of Goods Purchased |                                  |
|                           | Cost of Goods Available for Sale |
| – Ending Inventory        |                                  |
|                           | Cost of Goods Sold               |

Another difference between the two approaches is that the perpetual system directly adjusts the Inventory account for any transaction that affects inventory (such as freight costs, returns, and discounts). The periodic system does not do this. Instead, it creates different accounts for purchases, freight costs, returns, and discounts. These various accounts are shown in Illustration 5A-2, which presents the calculation of cost of goods sold for PW Audio Supply using the periodic approach.

Note that the basic elements from Illustration 5A-1 are highlighted in Illustration 5A-2. You will learn more in Chapter 6 about how to determine cost of goods sold using the periodic system.

The use of the periodic inventory system does not affect the form of presentation in the balance sheet. As under the perpetual system, a company reports inventory in the current assets section.

| PW Audio Supply, Inc.                 |          |           |                  |
|---------------------------------------|----------|-----------|------------------|
| Cost of Goods Sold                    |          |           |                  |
| For the Year Ended December 31, 2012  |          |           |                  |
| Cost of goods sold                    |          |           |                  |
| <b>Inventory, January 1</b>           |          |           | <b>\$ 36,000</b> |
| Purchases                             |          | \$325,000 |                  |
| Less: Purchase returns and allowances | \$10,400 |           |                  |
| Purchase discounts                    | 6,800    | 17,200    |                  |
| Net purchases                         |          | 307,800   |                  |
| Add: Freight-in                       |          | 12,200    |                  |
| <b>Cost of goods purchased</b>        |          |           | <b>320,000</b>   |
| Cost of goods available for sale      |          |           | 356,000          |
| <b>Inventory, December 31</b>         |          |           | <b>40,000</b>    |
| <b>Cost of goods sold</b>             |          |           | <b>\$316,000</b> |

**Illustration 5A-2**

Cost of goods sold for a merchandiser using a periodic inventory system

**Helpful Hint**

The far right column identifies the primary items that make up cost of goods sold of \$316,000. The middle column explains cost of goods purchased of \$320,000. The left column reports contra purchase items of \$17,200.

## Recording Merchandise Transactions

In a **periodic inventory system**, companies record revenues from the sale of merchandise when sales are made, just as in a perpetual system. Unlike the perpetual system, however, companies **do not attempt on the date of sale to record the cost of the merchandise sold**. Instead, they take a physical inventory count at the **end of the period** to determine (1) the cost of the merchandise then on hand and (2) the cost of the goods sold during the period. And, **under a periodic system, companies record purchases of merchandise in the Purchases account rather than the Inventory account**. Also, in a periodic system, purchase returns and allowances, purchase discounts, and freight costs on purchases are recorded in separate accounts.

To illustrate the recording of merchandise transactions under a periodic inventory system, we will use purchase/sale transactions between PW Audio Supply, Inc. and Sauk Stereo, as illustrated for the perpetual inventory system in this chapter.

## Recording Purchases of Merchandise

On the basis of the sales invoice (Illustration 5-5, shown on page 214) and receipt of the merchandise ordered from PW Audio Supply, Sauk Stereo records the \$3,800 purchase as follows.

|       |   |       |       |
|-------|---|-------|-------|
| May 4 | Purchases   | 3,800 |       |
|       | Accounts Payable  |       | 3,800 |
|       | (To record goods purchased on account from PW Audio Supply) |       |       |

Purchases is a temporary account whose normal balance is a debit.

### FREIGHT COSTS

When the purchaser directly incurs the freight costs, it debits the account Freight-in (or Transportation-in). For example, if Sauk Stereo pays Acme Freight Company \$150 for freight charges on its purchase from PW Audio Supply on May 6, the entry on Sauk Stereo's books is:

|       |   |     |     |
|-------|---|-----|-----|
| May 6 | Freight-in (Transportation-in)                    | 150 |     |
|       | Cash  |     | 150 |
|       | (To record payment of freight on goods purchased) |     |     |

**Helpful Hint**

Be careful not to debit purchases of equipment or supplies to a Purchases account.

**Alternative Terminology**

Freight-in is also called *transportation-in*.

Like Purchases, Freight-in is a temporary account whose normal balance is a debit. **Freight-in is part of cost of goods purchased.** The reason is that cost of goods purchased should include any freight charges necessary to bring the goods to the purchaser. Freight costs are not subject to a purchase discount. Purchase discounts apply only to the invoice cost of the merchandise.

**PURCHASE RETURNS AND ALLOWANCES**

Sauk Stereo returns \$300 of goods to PW Audio Supply and prepares the following entry to recognize the return.

|       |  |  |     |     |
|-------|--|--|-----|-----|
| May 8 | Accounts Payable   |  | 300 |     |
|       | Purchase Returns and Allowances                            |  |     | 300 |
|       | (To record return of goods purchased from PW Audio Supply) |  |     |     |

Purchase Returns and Allowances is a temporary account whose normal balance is a credit.

**PURCHASE DISCOUNTS**

On May 14, Sauk Stereo pays the balance due on account to PW Audio Supply, taking the 2% cash discount allowed by PW Audio Supply for payment within 10 days. Sauk Stereo records the payment and discount as follows.

|        |  |  |       |       |
|--------|--|--|-------|-------|
| May 14 | Accounts Payable (\$3,800 – \$300)             |  | 3,500 |       |
|        | Purchase Discounts (\$3,500 × .02)             |  |       | 70    |
|        | Cash   |  |       | 3,430 |
|        | (To record payment within the discount period) |  |       |       |

Purchase Discounts is a temporary account whose normal balance is a credit.

**Recording Sales of Merchandise**

The seller, PW Audio Supply, records the sale of \$3,800 of merchandise to Sauk Stereo on May 4 (sales invoice No. 731, Illustration 5-5, page 214) as follows.

|       |  |  |       |       |
|-------|--|--|-------|-------|
| May 4 | Accounts Receivable                                      |  | 3,800 |       |
|       | Sales Revenue  |  |       | 3,800 |
|       | (To record credit sales per invoice #731 to Sauk Stereo) |  |       |       |

**SALES RETURNS AND ALLOWANCES**

To record the returned goods received from Sauk Stereo on May 8, PW Audio Supply records the \$300 sales return as follows.

|       |  |  |     |     |
|-------|--|--|-----|-----|
| May 8 | Sales Returns and Allowances                                 |  | 300 |     |
|       | Accounts Receivable  |  |     | 300 |
|       | (To record credit granted to Sauk Stereo for returned goods) |  |     |     |

**SALES DISCOUNTS**

On May 14, PW Audio Supply receives payment of \$3,430 on account from Sauk Stereo. PW Audio Supply honors the 2% cash discount and records the payment of Sauk Stereo’s account receivable in full as follows.

|        |   |       |       |
|--------|---|-------|-------|
| May 14 | Cash  | 3,430 |       |
|        | Sales Discounts (\$3,500 × .02)   | 70    |       |
|        | Accounts Receivable (\$3,800 – \$300)                                     |       | 3,500 |
|        | (To record collection within 2/10, n/30 discount period from Sauk Stereo) |       |       |

**COMPARISON OF ENTRIES—PERPETUAL VS. PERIODIC**

Illustration 5A-3 summarizes the periodic inventory entries shown in this appendix and compares them to the perpetual-system entries from the chapter. Entries that differ in the two systems are shown in color.

**Illustration 5A-3**  
Comparison of entries for perpetual and periodic inventory systems

## Summary of Study Objective for Appendix 5A

**[7] Explain the recording of purchases and sales of inventory under a periodic inventory system.** In recording purchases under a periodic system, companies must make entries for (a) cash and credit purchases, (b) purchase

returns and allowances, (c) purchase discounts, and (d) freight costs. In recording sales, companies must make entries for (a) cash and credit sales, (b) sales returns and allowances, and (c) sales discounts.

# APPENDIX 5B

## Worksheet for a Merchandising Company

### Using a Worksheet

**Study Objective [8]**

Prepare a worksheet for a merchandising company.

As indicated in Chapter 4, a worksheet enables companies to prepare financial statements before they journalize and post adjusting entries. The steps in preparing a worksheet for a merchandising company are the same as for a service company (see pages 154–158). Illustration 5B-1 shows the worksheet for PW Audio Supply (excluding nonoperating items). The unique accounts for a merchandiser using a perpetual inventory system are in boldface letters and in red.

| PW AUDIO SUPPLY<br>Worksheet<br>For the Year Ended December 31, 2012 |                |                |             |           |                        |                |                  |         |               |         |

| Net Income   |                |                |             |           |                        |                | 30,000           |         |               | 30,000  |
| Totals   |                |                |             |           |                        |                | 480,000          | 480,000 | 162,400       | 162,400 |

Key: (a) Adjustment to inventory on hand. (b) Insurance expired. (c) Depreciation expense. (d) Salaries accrued.

**Illustration 5B-1**  
Worksheet for merchandising company

#### TRIAL BALANCE COLUMNS

Data for the trial balance come from the ledger balances of PW Audio Supply at December 31. The amount shown for Inventory, \$40,500, is the year-end inventory amount from the perpetual inventory system.

#### ADJUSTMENTS COLUMNS

A merchandising company generally has the same types of adjustments as a service company. As you see in the worksheet, adjustments (b), (c), and (d) are for insurance,

depreciation, and salaries. Pioneer Advertising Agency, as illustrated in Chapters 3 and 4, also had these adjustments. Adjustment (a) was required to adjust the perpetual inventory carrying amount to the actual count.

After PW Audio Supply enters all adjustments data on the worksheet, it establishes the equality of the adjustments column totals. It then extends the balances in all accounts to the adjusted trial balance columns.

### ADJUSTED TRIAL BALANCE

The adjusted trial balance shows the balance of all accounts after adjustment at the end of the accounting period.

### INCOME STATEMENT COLUMNS

Next, the merchandising company transfers the accounts and balances that affect the income statement from the adjusted trial balance columns to the income statement columns. PW Audio Supply shows sales of \$480,000 in the credit column. It shows the contra-revenue accounts Sales Returns and Allowances \$12,000 and Sales Discounts \$8,000 in the debit column. The difference of \$460,000 is the net sales shown on the income statement (Illustration 5-13, page 227).

Finally, the company totals all the credits in the income statement column and compares those totals to the total of the debits in the income statement column. If the credits exceed the debits, the company has net income. PW Audio Supply has net income of \$30,000. If the debits exceed the credits, the company would report a net loss.

### BALANCE SHEET COLUMNS

The major difference between the balance sheets of a service company and a merchandiser is inventory. PW Audio Supply shows the ending inventory amount of \$40,000 in the balance sheet debit column. The information to prepare the owner's equity statement is also found in these columns. That is, the Owner's Capital account is \$83,000. Owner's Drawings are \$15,000. Net income results when the total of the debit column exceeds the total of the credit column in the balance sheet columns. A net loss results when the total of the credits exceeds the total of the debit balances.

## Summary of Study Objective for Appendix 5B

**[8] Prepare a worksheet for a merchandising company.** The steps in preparing a worksheet for a merchandising company are the same as for a service company. The

unique accounts for a merchandiser are Inventory, Sales Revenue, Sales Returns and Allowances, Sales Discounts, and Cost of Goods Sold.

Self-Test, Brief Exercises, Exercises, Problem Set A, and many more components are available for practice in *WileyPLUS*

\***Note:** All **asterisked** Questions, Exercises, and Problems relate to material in the appendices to the chapter.

## Self-Test Questions

Answers are on page 257

(SO 1)

1. Gross profit will result if:
  - a. operating expenses are less than net income.
  - b. sales revenues are greater than operating expenses.
  - c. sales revenues are greater than cost of goods sold.
  - d. operating expenses are greater than cost of goods sold.

2. Under a perpetual inventory system, when goods are purchased for resale by a company: (SO 2)
  - a. purchases on account are debited to Inventory.
  - b. purchases on account are debited to Purchases.
  - c. purchase returns are debited to Purchase Returns and Allowances.
  - d. freight costs are debited to Freight-out.

- (SO 3) 3. The sales accounts that normally have a debit balance are:
- Sales Discounts.
  - Sales Returns and Allowances.
  - Both (a) and (b).
  - Neither (a) nor (b).
- (SO 3) 4. A credit sale of \$750 is made on June 13, terms 2/10, net/30. A return of \$50 is granted on June 16. The amount received as payment in full on June 23 is:
- \$700.
  - \$686.
  - \$685.
  - \$650.
- (SO 2) 5. Which of the following accounts will normally appear in the ledger of a merchandising company that uses a perpetual inventory system?
- Purchases.
  - Freight-in.
  - Cost of Goods Sold.
  - Purchase Discounts.
- (SO 3) 6. To record the sale of goods for cash in a perpetual inventory system:
- only one journal entry is necessary to record cost of goods sold and reduction of inventory.
  - only one journal entry is necessary to record the receipt of cash and the sales revenue.
  - two journal entries are necessary: one to record the receipt of cash and sales revenue, and one to record the cost of goods sold and reduction of inventory.
  - two journal entries are necessary: one to record the receipt of cash and reduction of inventory, and one to record the cost of goods sold and sales revenue.
- (SO 4) 7. The steps in the accounting cycle for a merchandising company are the same as those in a service company *except*:
- an additional adjusting journal entry for inventory may be needed in a merchandising company.
  - closing journal entries are not required for a merchandising company.
  - a post-closing trial balance is not required for a merchandising company.
  - a multiple-step income statement is required for a merchandising company.
- (SO 5) 8. The multiple-step income statement for a merchandising company shows each of the following features *except*:
- gross profit.
  - cost of goods sold.
  - a sales revenue section.
  - investing activities section.
9. If sales revenues are \$400,000, cost of goods sold is \$310,000, and operating expenses are \$60,000, the gross profit is:
- \$30,000.
  - \$90,000.
  - \$340,000.
  - \$400,000.
10. A single-step income statement:
- reports gross profit.
  - does not report cost of goods sold.
  - reports sales revenues and “Other revenues and gains” in the revenues section of the income statement.
  - reports operating income separately.
11. Which of the following appears on both a single-step and a multiple-step income statement?
- inventory.
  - gross profit.
  - income from operations.
  - cost of goods sold.
- \*12. In determining cost of goods sold:
- purchase discounts are deducted from net purchases.
  - freight-out is added to net purchases.
  - purchase returns and allowances are deducted from net purchases.
  - freight-in is added to net purchases.
- \*13. If beginning inventory is \$60,000, cost of goods purchased is \$380,000, and ending inventory is \$50,000, cost of goods sold is:
- \$390,000.
  - \$370,000.
  - \$330,000.
  - \$420,000.
- \*14. When goods are purchased for resale by a company using a periodic inventory system:
- purchases on account are debited to Inventory.
  - purchases on account are debited to Purchases.
  - purchase returns are debited to Purchase Returns and Allowances.
  - freight costs are debited to Purchases.
- \*15. In a worksheet, Inventory is shown in the following columns:
- Adjusted trial balance debit and balance sheet debit.
  - Income statement debit and balance sheet debit.
  - Income statement credit and balance sheet debit.
  - Income statement credit and adjusted trial balance debit.

 for additional Self-Test Questions.

## Questions

- (a) “The steps in the accounting cycle for a merchandising company are different from the accounting cycle for a service company.” Do you agree or disagree? (b) Is the measurement of net income for a merchandising company conceptually the same as for a service company? Explain.
- Why is the normal operating cycle for a merchandising company likely to be longer than for a service company?
- (a) How do the components of revenues and expenses differ between merchandising and service companies? (b) Explain the income measurement process in a merchandising company.
- How does income measurement differ between a merchandising and a service company?
- When is cost of goods sold determined in a perpetual inventory system?
- Distinguish between FOB shipping point and FOB destination. Identify the freight terms that will result in a debit to Inventory by the buyer and a debit to Freight-out by the seller.

7. Explain the meaning of the credit terms 2/10, n/30.
8. Goods costing \$2,000 are purchased on account on July 15 with credit terms of 2/10, n/30. On July 18, a \$200 credit memo is received from the supplier for damaged goods. Give the journal entry on July 24 to record payment of the balance due within the discount period using a perpetual inventory system.
9. Joan Roland believes revenues from credit sales may be earned before they are collected in cash. Do you agree? Explain.
10. (a) What is the primary source document for recording (1) cash sales, (2) credit sales. (b) Using XXs for amounts, give the journal entry for each of the transactions in part (a).
11. A credit sale is made on July 10 for \$900, terms 2/10, n/30. On July 12, \$100 of goods are returned for credit. Give the journal entry on July 19 to record the receipt of the balance due within the discount period.
12. Explain why the Inventory account will usually require adjustment at year-end.
13. Prepare the closing entries for the Sales Revenue account, assuming a balance of \$200,000 and the Cost of Goods Sold account with a \$145,000 balance.
14. What merchandising account(s) will appear in the post-closing trial balance?
15. Reese Co. has sales revenue of \$105,000, cost of goods sold of \$70,000, and operating expenses of \$20,000. What is its gross profit and its gross profit rate?
16. Ann Fort Company reports net sales of \$800,000, gross profit of \$370,000, and net income of \$240,000. What are its operating expenses?
17. Identify the distinguishing features of an income statement for a merchandising company.
18. Identify the sections of a multiple-step income statement that relate to (a) operating activities, and (b) nonoperating activities.
19. How does the single-step form of income statement differ from the multiple-step form?
20.  **PEPSICO** Determine PepsiCo's gross profit rate for 2009 and 2008. Indicate whether it increased or decreased from 2008 to 2009.
- \*21. Identify the accounts that are added to or deducted from Purchases to determine the cost of goods purchased. For each account, indicate whether it is added or deducted.
- \*22. Goods costing \$3,000 are purchased on account on July 15 with credit terms of 2/10, n/30. On July 18, a \$200 credit was received from the supplier for damaged goods. Give the journal entry on July 24 to record payment of the balance due within the discount period, assuming a periodic inventory system.
- \*23. Indicate the columns of the worksheet in which (a) inventory and (b) cost of goods sold will be shown.

## Brief Exercises

**BE5-1** Presented below are the components in Miller Company's income statement. Determine the missing amounts.

|     | <u>Sales Revenue</u> | <u>Cost of Goods Sold</u> | <u>Gross Profit</u> | <u>Operating Expenses</u> | <u>Net Income</u> |
|-----|----------------------|---------------------------|---------------------|---------------------------|-------------------|
| (a) | \$75,000             | ?                         | \$30,000            | ?                         | \$10,800          |
| (b) | \$108,000            | \$70,000                  | ?                   | ?                         | \$29,500          |
| (c) | ?                    | \$83,900                  | \$79,600            | \$39,500                  | ?                 |

Compute missing amounts in determining net income.

(SO 1)

**BE5-2** Brad Company buys merchandise on account from Murray Company. The selling price of the goods is \$780, and the cost of the goods is \$470. Both companies use perpetual inventory systems. Journalize the transaction on the books of both companies.

Journalize perpetual inventory entries.

(SO 2, 3)

**BE5-3** Prepare the journal entries to record the following transactions on Derrick Company's books using a perpetual inventory system.

Journalize sales transactions.

(SO 3)

(a) On March 2, Derrick Company sold \$900,000 of merchandise to Rose Company, terms 2/10, n/30. The cost of the merchandise sold was \$620,000.

(b) On March 6, Rose Company returned \$90,000 of the merchandise purchased on March 2. The cost of the returned merchandise was \$62,000.

(c) On March 12, Derrick Company received the balance due from Rose Company.

**BE5-4** From the information in BE5-3, prepare the journal entries to record these transactions on Rose Company's books under a perpetual inventory system.

Journalize purchase transactions.

(SO 2)

**BE5-5** At year-end, the perpetual inventory records of Brewer Company showed merchandise inventory of \$98,000. The company determined, however, that its actual inventory on hand was \$95,700. Record the necessary adjusting entry.

Prepare adjusting entry for merchandise inventory.

(SO 4)

**BE5-6** Thibodeau Company has the following merchandise account balances: Sales Revenue \$195,000, Sales Discounts \$2,000, Cost of Goods Sold \$117,000, and Inventory \$40,000. Prepare the entries to record the closing of these items to Income Summary.

Prepare closing entries for merchandise accounts.

(SO 4)

Prepare sales revenues section of income statement.

(SO 5)

Contrast presentation in multiple-step and single-step income statements.

(SO 5)

Compute net sales, gross profit, income from operations, and gross profit rate.

(SO 5, 6)

Compute net purchases and cost of goods purchased.

(SO 7)

Compute cost of goods sold and gross profit.

(SO 6, 7)

Journalize purchase transactions.

(SO 7)

Identify worksheet columns for selected accounts.

(SO 8)

**BE5-7** Myers Company provides the following information for the month ended October 31, 2012: sales on credit \$280,000, cash sales \$100,000, sales discounts \$5,000, sales returns and allowances \$11,000. Prepare the sales revenues section of the income statement based on this information.

**BE5-8**  Explain where each of the following items would appear on (1) a multiple-step income statement, and on (2) a single-step income statement: (a) gain on sale of equipment, (b) interest expense, (c) casualty loss from vandalism, and (d) cost of goods sold.

**BE5-9** Assume Adams Company has the following reported amounts: Sales revenue \$510,000, Sales returns and allowances \$15,000, Cost of goods sold \$330,000, Operating expenses \$110,000. Compute the following: (a) net sales, (b) gross profit, (c) income from operations, and (d) gross profit rate. (Round to one decimal place.)

**\*BE5-10** Assume that Byars Company uses a periodic inventory system and has these account balances: Purchases \$450,000; Purchase Returns and Allowances \$13,000; Purchase Discounts \$8,000; and Freight-in \$16,000. Determine net purchases and cost of goods purchased.

**\*BE5-11** Assume the same information as in BE5-10 and also that Byars Company has beginning inventory of \$60,000, ending inventory of \$90,000, and net sales of \$730,000. Determine the amounts to be reported for cost of goods sold and gross profit.

**\*BE5-12** Prepare the journal entries to record these transactions on Jerel Company's books using a periodic inventory system.

(a) On March 2, Jerel Company purchased \$900,000 of merchandise from McNeal Company, terms 2/10, n/30.

(b) On March 6, Jerel Company returned \$130,000 of the merchandise purchased on March 2.

(c) On March 12, Jerel Company paid the balance due to McNeal Company.

**\*BE5-13** Presented below is the format of the worksheet presented in the chapter.

| Trial Balance |     | Adjustments |     | Adjusted Trial Balance |     | Income Statement |     | Balance Sheet |     |
|---------------|-----|-------------|-----|------------------------|-----|------------------|-----|---------------|-----|
| Dr.           | Cr. | Dr.         | Cr. | Dr.                    | Cr. | Dr.              | Cr. | Dr.           | Cr. |

Indicate where the following items will appear on the worksheet: (a) Cash, (b) Inventory, (c) Sales revenue, and (d) Cost of goods sold.

*Example:*

Cash: Trial balance debit column; Adjusted trial balance debit column; and Balance sheet debit column.

## Do it! Review

Record transactions of purchasing company.

(SO 2)

**Do it! 5-1** On October 5, Bouldin Company buys merchandise on account from McClinton Company. The selling price of the goods is \$5,000, and the cost to McClinton Company is \$3,100. On October 8, Bouldin returns defective goods with a selling price of \$650 and a fair value of \$100. Record the transactions on the books of Bouldin Company.

Record transactions of selling company.

(SO 3)

**Do it! 5-2** Assume information similar to that in **Do it! 5-1**. That is: On October 5, Bouldin Company buys merchandise on account from McClinton Company. The selling price of the goods is \$5,000, and the cost to McClinton Company is \$3,100. On October 8, Bouldin returns defective goods with a selling price of \$650 and a fair value of \$100. Record the transactions on the books of McClinton Company.

Prepare closing entries for a merchandising company.

(SO 4)

**Do it! 5-3** The trial balance of Ogilvy's Boutique at December 31 shows Inventory \$21,000, Sales Revenue \$156,000, Sales Returns and Allowances \$4,000, Sales Discounts \$3,000, Cost of Goods Sold \$92,400, Interest Revenue \$5,000, Freight-out \$1,500, Utilities Expense \$7,400, and Salaries and Wages Expense \$19,500. Prepare the closing entries for Ogilvy.

Classify financial statement accounts.

(SO 5)

**Do it! 5-4** Richard Company is preparing its multiple-step income statement, owner's equity statement, and classified balance sheet. Using the column heads *Account*, *Financial Statement*, and

*Classification*, indicate in which financial statement and under what classification each of the following would be reported.

| <u>Account</u>                         | <u>Financial Statement</u> | <u>Classification</u> |
|--|----------------------------|-----------------------|
| Accounts Payable                       |                            |                       |
| Accounts Receivable                    |                            |                       |
| Accumulated Depreciation—<br>Buildings |                            |                       |
| Cash                                   |                            |                       |
| Casualty Loss from Vandalism           |                            |                       |
| Cost of Goods Sold                     |                            |                       |
| Depreciation Expense                   |                            |                       |
| Equipment                              |                            |                       |
| Freight-out                            |                            |                       |
| Insurance Expense                      |                            |                       |
| Interest Payable                       |                            |                       |
| Inventory                              |                            |                       |
| Land                                   |                            |                       |
| Notes Payable (due in 5 years)         |                            |                       |
| Owner's Capital (beginning balance)    |                            |                       |
| Owner's Drawings                       |                            |                       |
| Property Taxes Payable                 |                            |                       |
| Salaries and Wages Expense             |                            |                       |
| Salaries and Wages Payable             |                            |                       |
| Sales Returns and Allowances           |                            |                       |
| Sales Revenue                          |                            |                       |
| Unearned Rent Revenue                  |                            |                       |
| Utilities Expense                      |                            |                       |

## Exercises

**E5-1** Mr. Lucas has prepared the following list of statements about service companies and merchandisers.

- Measuring net income for a merchandiser is conceptually the same as for a service company.
- For a merchandiser, sales less operating expenses is called gross profit.
- For a merchandiser, the primary source of revenues is the sale of inventory.
- Sales salaries and wages is an example of an operating expense.
- The operating cycle of a merchandiser is the same as that of a service company.
- In a perpetual inventory system, no detailed inventory records of goods on hand are maintained.
- In a periodic inventory system, the cost of goods sold is determined only at the end of the accounting period.
- A periodic inventory system provides better control over inventories than a perpetual system.

*Answer general questions about merchandisers.*

(SO 1)

### Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

**E5-2** Information related to Almond Co. is presented below.

- On April 5, purchased merchandise from Morris Company for \$23,000, terms 2/10, net/30, FOB shipping point.
- On April 6, paid freight costs of \$900 on merchandise purchased from Morris.
- On April 7, purchased equipment on account for \$26,000.
- On April 8, returned damaged merchandise to Morris Company and was granted a \$3,000 credit for returned merchandise.
- On April 15, paid the amount due to Morris Company in full.

*Journalize purchases transactions.*

(SO 2)

### Instructions

- Prepare the journal entries to record these transactions on the books of Almond Co. under a perpetual inventory system.
- Assume that Almond Co. paid the balance due to Morris Company on May 4 instead of April 15. Prepare the journal entry to record this payment.

## 242 5 Accounting for Merchandising Operations

Journalize perpetual inventory entries.

(SO 2, 3)

**E5-3** On September 1, Samardo Office Supply had an inventory of 30 calculators at a cost of \$18 each. The company uses a perpetual inventory system. During September, the following transactions occurred.

- Sept. 6 Purchased 80 calculators at \$20 each from Samuels Co. for cash.
- 9 Paid freight of \$80 on calculators purchased from Samuels Co.
- 10 Returned 3 calculators to Samuels Co. for \$63 credit (including freight) because they did not meet specifications.
- 12 Sold 26 calculators costing \$21 (including freight) for \$31 each to Trent Book Store, terms n/30.
- 14 Granted credit of \$31 to Trent Book Store for the return of one calculator that was not ordered.
- 20 Sold 30 calculators costing \$21 for \$32 each to Plaisted's Card Shop, terms n/30.

### Instructions

Journalize the September transactions.

Prepare purchase and sale entries.

(SO 2, 3)

**E5-4** On June 10, Naveen Company purchased \$8,000 of merchandise from Jarrah Company, FOB shipping point, terms 2/10, n/30. Naveen pays the freight costs of \$400 on June 11. Damaged goods totaling \$300 are returned to Jarrah for credit on June 12. The fair value of these goods is \$70. On June 19, Naveen pays Jarrah Company in full, less the purchase discount. Both companies use a perpetual inventory system.

### Instructions

- (a) Prepare separate entries for each transaction on the books of Naveen Company.
- (b) Prepare separate entries for each transaction for Jarrah Company. The merchandise purchased by Naveen on June 10 had cost Jarrah \$4,800.

Journalize sales transactions.

(SO 3)

**E5-5** Presented below are transactions related to Sayid Company.

1. On December 3, Sayid Company sold \$570,000 of merchandise to Shephard Co., terms 2/10, n/30, FOB shipping point. The cost of the merchandise sold was \$350,000.
2. On December 8, Shephard Co. was granted an allowance of \$20,000 for merchandise purchased on December 3.
3. On December 13, Sayid Company received the balance due from Shephard Co.

### Instructions

- (a) Prepare the journal entries to record these transactions on the books of Sayid Company using a perpetual inventory system.
- (b) Assume that Sayid Company received the balance due from Shephard Co. on January 2 of the following year instead of December 13. Prepare the journal entry to record the receipt of payment on January 2.

Prepare sales revenues section and closing entries.

(SO 4, 5)

**E5-6** The adjusted trial balance of Garcia Company shows the following data pertaining to sales at the end of its fiscal year October 31, 2012: Sales Revenue \$820,000, Freight-out \$16,000, Sales Returns and Allowances \$25,000, and Sales Discounts \$13,000.

### Instructions

- (a) Prepare the sales revenues section of the income statement.
- (b) Prepare separate closing entries for (1) sales, and (2) the contra accounts to sales.

Prepare adjusting and closing entries.

(SO 4)

**E5-7** Hugo Reyes Company had the following account balances at year-end: Cost of Goods Sold \$60,000; Inventory \$15,000; Operating Expenses \$29,000; Sales Revenue \$115,000; Sales Discounts \$1,200; and Sales Returns and Allowances \$1,700. A physical count of inventory determines that merchandise inventory on hand is \$13,900.

### Instructions

- (a) Prepare the adjusting entry necessary as a result of the physical count.
- (b) Prepare closing entries.

Prepare adjusting and closing entries.

(SO 4)

**E5-8** Presented below is information related to Hurley Co. for the month of January 2012.

|  |           |                              |           |
|--|-----------|------------------------------|-----------|
| Ending inventory per perpetual records | \$ 21,600 | Insurance expense            | \$ 12,000 |
| Ending inventory actually on hand      | 21,000    | Rent expense                 | 20,000    |
| Cost of goods sold                     | 218,000   | Salaries and wages expense   | 55,000    |
| Freight-out                            | 7,000     | Sales discounts              | 10,000    |
|  |           | Sales returns and allowances | 13,000    |
|  |           | Sales revenue                | 380,000   |

**Instructions**

- (a) Prepare the necessary adjusting entry for inventory.
- (b) Prepare the necessary closing entries.

**E5-9** Presented below is information for Jorge Company for the month of March 2012.

|                            |           |                              |           |
|----------------------------|-----------|------------------------------|-----------|
| Cost of goods sold         | \$212,000 | Rent expense                 | \$ 32,000 |
| Freight-out                | 7,000     | Sales discounts              | 8,000     |
| Insurance expense          | 6,000     | Sales returns and allowances | 13,000    |
| Salaries and wages expense | 58,000    | Sales revenue                | 380,000   |

*Prepare multiple-step income statement.*  
(SO 5, 6)

**Instructions**

- (a) Prepare a multiple-step income statement.
- (b) Compute the gross profit rate.

**E5-10** In its income statement for the year ended December 31, 2012, Fox Company reported the following condensed data.

|                    |            |                                  |           |
|--------------------|------------|----------------------------------|-----------|
| Operating expenses | \$ 725,000 | Interest revenue                 | \$ 28,000 |
| Cost of goods sold | 1,289,000  | Loss on disposal of plant assets | 17,000    |
| Interest expense   | 70,000     | Net sales                        | 2,200,000 |

*Prepare multiple-step and single-step income statements.*  
(SO 5)

**Instructions**

- (a) Prepare a multiple-step income statement.
- (b) Prepare a single-step income statement.

**E5-11** An inexperienced accountant for Sawyer Company made the following errors in recording merchandising transactions.

1. A \$195 refund to a customer for faulty merchandise was debited to Sales Revenue \$195 and credited to Cash \$195.
2. A \$180 credit purchase of supplies was debited to Inventory \$180 and credited to Cash \$180.
3. A \$215 sales discount was debited to Sales Revenue.
4. A cash payment of \$20 for freight on merchandise purchases was debited to Freight-out \$200 and credited to Cash \$200.

*Prepare correcting entries for sales and purchases.*  
(SO 2, 3)

**Instructions**

Prepare separate correcting entries for each error, assuming that the incorrect entry is not reversed. (Omit explanations.)

**E5-12** In 2012, James Ford Company had net sales of \$900,000 and cost of goods sold of \$522,000. Operating expenses were \$225,000, and interest expense was \$11,000. Ford prepares a multiple-step income statement.

*Compute various income measures.*  
(SO 5, 6)

**Instructions**

- (a) Compute Ford's gross profit.
- (b) Compute the gross profit rate. Why is this rate computed by financial statement users?
- (c) What is Ford's income from operations and net income?
- (d) If Ford prepared a single-step income statement, what amount would it report for net income?
- (e) In what section of its classified balance sheet should Ford report merchandise inventory?

**E5-13** Presented below is financial information for two different companies.

|                    | <u>Dae Company</u> | <u>Kim Company</u> |
|--------------------|--------------------|--------------------|
| Sales revenue      | \$90,000           | (d)                |
| Sales returns      | (a)                | \$ 5,000           |
| Net sales          | 87,000             | 102,000            |
| Cost of goods sold | 56,000             | (e)                |
| Gross profit       | (b)                | 41,500             |
| Operating expenses | 15,000             | (f)                |
| Net income         | (c)                | 15,000             |

*Compute missing amounts and compute gross profit rate.*  
(SO 5, 6)

**Instructions**

- (a) Determine the missing amounts.
- (b) Determine the gross profit rates. (Round to one decimal place.)

Compute missing amounts.  
(SO 5)

**E5-14** Financial information is presented below for three different companies.

|                              | <b>Holloway<br/>Cosmetics</b> | <b>Jin<br/>Grocery</b> | <b>Kwon<br/>Wholesalers</b> |
|------------------------------|-------------------------------|------------------------|-----------------------------|
| Sales revenue                | \$90,000                      | \$ (e)                 | \$122,000                   |
| Sales returns and allowances | (a)                           | 5,000                  | 12,000                      |
| Net sales                    | 86,000                        | 95,000                 | (i)                         |
| Cost of goods sold           | 56,000                        | (f)                    | (j)                         |
| Gross profit                 | (b)                           | 38,000                 | 24,000                      |
| Operating expenses           | 15,000                        | (g)                    | 18,000                      |
| Income from operations       | (c)                           | (h)                    | (k)                         |
| Other expenses and losses    | 4,000                         | 7,000                  | (l)                         |
| Net income                   | (d)                           | 11,000                 | 5,000                       |

#### Instructions

Determine the missing amounts.

Prepare cost of goods sold section.  
(SO 7)

**\*E5-15** The trial balance of S. Yunjin Company at the end of its fiscal year, August 31, 2012, includes these accounts: Inventory \$17,200; Purchases \$149,000; Sales Revenue \$190,000; Freight-in \$5,000; Sales Returns and Allowances \$3,000; Freight-out \$1,000; and Purchase Returns and Allowances \$2,000. The ending merchandise inventory is \$23,000.

#### Instructions

Prepare a cost of goods sold section for the year ending August 31 (periodic inventory).

Compute various income statement items.  
(SO 7)

**\*E5-16** On January 1, 2012, Evangeline Lilly Corporation had merchandise inventory of \$50,000. At December 31, 2012, Evangeline Lilly had the following account balances.

|                                 |          |
|---------------------------------|----------|
| Freight-in                      | \$ 4,000 |
| Purchases                       | 509,000  |
| Purchase discounts              | 6,000    |
| Purchase returns and allowances | 2,000    |
| Sales revenue                   | 840,000  |
| Sales discounts                 | 5,000    |
| Sales returns and allowances    | 10,000   |

At December 31, 2012, Evangeline Lilly determines that its ending inventory is \$60,000.

#### Instructions

- Compute Evangeline Lilly's 2012 gross profit.
- Compute Evangeline Lilly's 2012 operating expenses if net income is \$130,000 and there are no nonoperating activities.

Prepare cost of goods sold section.  
(SO 7)

**\*E5-17** Below is a series of cost of goods sold sections for companies B, F, L, and R.

|                                  | <b>B</b> | <b>F</b> | <b>L</b> | <b>R</b> |
|----------------------------------|----------|----------|----------|----------|
| Beginning inventory              | \$ 150   | \$ 70    | \$1,000  | \$ (j)   |
| Purchases                        | 1,620    | 1,060    | (g)      | 43,590   |
| Purchase returns and allowances  | 40       | (d)      | 290      | (k)      |
| Net purchases                    | (a)      | 1,030    | 6,210    | 41,090   |
| Freight-in                       | 110      | (e)      | (h)      | 2,240    |
| Cost of goods purchased          | (b)      | 1,280    | 7,940    | (l)      |
| Cost of goods available for sale | 1,840    | 1,350    | (i)      | 49,530   |
| Ending inventory                 | 310      | (f)      | 1,450    | 6,230    |
| Cost of goods sold               | (c)      | 1,230    | 7,490    | 43,300   |

#### Instructions

Fill in the lettered blanks to complete the cost of goods sold sections.

Journalize purchase transactions.  
(SO 7)

**\*E5-18** This information relates to Locke Co.

- On April 5, purchased merchandise from K. Austen Company for \$25,000, terms 2/10, net/30, FOB shipping point.
- On April 6, paid freight costs of \$900 on merchandise purchased from K. Austen Company.
- On April 7, purchased equipment on account for \$30,000.
- On April 8, returned some of April 5 merchandise, which cost \$2,800, to K. Austen Company.
- On April 15, paid the amount due to K. Austen Company in full.

**Instructions**

- (a) Prepare the journal entries to record these transactions on the books of Locke Co. using a periodic inventory system.
- (b) Assume that Locke Co. paid the balance due to K. Austen Company on May 4 instead of April 15. Prepare the journal entry to record this payment.

**\*E5-19** Presented below is information related to Emilie Co.

- 1. On April 5, purchased merchandise from De Ravin Company for \$19,000, terms 2/10, net/30, FOB shipping point.
- 2. On April 6, paid freight costs of \$800 on merchandise purchased from De Ravin.
- 3. On April 7, purchased equipment on account from Claire Littleton Mfg. Co. for \$23,000.
- 4. On April 8, returned merchandise, which cost \$4,000, to De Ravin Company.
- 5. On April 15, paid the amount due to De Ravin Company in full.

*Journalize purchase transactions.*

(SO 7)

**Instructions**

- (a) Prepare the journal entries to record these transactions on the books of Emilie Co. using a periodic inventory system.
- (b) Assume that Emilie Co. paid the balance due to De Ravin Company on May 4 instead of April 15. Prepare the journal entry to record this payment.

**\*E5-20** Presented below are selected accounts for Dawson Company as reported in the worksheet at the end of May 2012.

*Complete worksheet.*

(SO 8)

| Accounts                     | Adjusted Trial Balance |         | Income Statement |     | Balance Sheet |     |
|------------------------------|------------------------|---------|------------------|-----|---------------|-----|
|                              | Dr.                    | Cr.     | Dr.              | Cr. | Dr.           | Cr. |
| Cash                         | 11,000                 |         |                  |     |               |     |
| Inventory                    | 76,000                 |         |                  |     |               |     |
| Sales Revenue                |                        | 480,000 |                  |     |               |     |
| Sales Returns and Allowances | 10,000                 |         |                  |     |               |     |
| Sales Discounts              | 9,000                  |         |                  |     |               |     |
| Cost of Goods Sold           | 300,000                |         |                  |     |               |     |

**Instructions**

Complete the worksheet by extending amounts reported in the adjusted trial balance to the appropriate columns in the worksheet. Do not total individual columns.

**\*E5-21** The trial balance columns of the worksheet for Linus Company at June 30, 2012, are as follows.

*Prepare a worksheet.*

(SO 8)

**LINUS COMPANY**  
Worksheet  
For the Month Ended June 30, 2012

| Account Titles      | Trial Balance   |                 |
|---------------------|-----------------|-----------------|
|                     | Debit           | Credit          |
| Cash                | \$ 1,920        |                 |
| Accounts Receivable | 2,440           |                 |
| Inventory           | 11,640          |                 |
| Accounts Payable    |                 | \$ 1,120        |
| Owner's Capital     |                 | 3,500           |
| Sales Revenue       |                 | 42,500          |
| Cost of Goods Sold  | 20,560          |                 |
| Operating Expenses  | 10,560          |                 |
|                     | <u>\$47,120</u> | <u>\$47,120</u> |

Other data:

Operating expenses incurred on account, but not yet recorded, total \$1,500.

**Instructions**

Enter the trial balance on a worksheet and complete the worksheet.

## Exercises: Set B

Visit the book's companion website, at [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), and choose the Student Companion site to access Exercise Set B.

## Problems: Set A

*Journalize purchase and sales transactions under a perpetual inventory system.*

(SO 2, 3)

- 15 Received cash refund of \$50 from Leung Sports for damaged merchandise that was returned.
- 17 Paid freight on Cyrena’s Sportswear purchase \$30.
- 18 Sold merchandise to members \$900, terms n/30. The cost of the merchandise sold was \$540.
- 20 Received \$600 in cash from members in settlement of their accounts.
- 21 Paid Cyrena’s Sportswear in full.
- 27 Granted an allowance of \$40 to members for tennis clothing that did not fit properly.
- 30 Received cash payments on account from members, \$710.

The chart of accounts for the tennis shop includes the following: No. 101 Cash, No. 112 Accounts Receivable, No. 120 Inventory, No. 201 Accounts Payable, No. 301 Owner’s Capital, No. 401 Sales Revenue, No. 412 Sales Returns and Allowances, and No. 505 Cost of Goods Sold.

**Instructions**

- (a) Journalize the April transactions using a perpetual inventory system.
- (b) Enter the beginning balances in the ledger accounts and post the April transactions. (Use J1 for the journal reference.)
- (c) Prepare a trial balance on April 30, 2012.

(c) Total debits \$6,250

Determine cost of goods sold and gross profit under periodic approach.

(SO 6, 7)

**\*P5-5A** At the end of Rutherford Department Store’s fiscal year on December 31, 2012, these accounts appeared in its adjusted trial balance.

|                                 |          |
|---------------------------------|----------|
| Freight-in                      | \$ 5,600 |
| Inventory                       | 40,500   |
| Purchases                       | 447,000  |
| Purchase Discounts              | 12,000   |
| Purchase Returns and Allowances | 6,400    |
| Sales Revenue                   | 725,000  |
| Sales Returns and Allowances    | 11,000   |

Additional facts:

- 1. Merchandise inventory on December 31, 2012, is \$65,000.
- 2. Rutherford Department Store uses a periodic system.

**Instructions**

Prepare an income statement through gross profit for the year ended December 31, 2012.

Gross profit \$304,300

Calculate missing amounts and assess profitability.

(SO 6, 7)

**\*P5-6A** Ana Lucia operates a retail clothing operation. She purchases all merchandise inventory on credit and uses a periodic inventory system. The Accounts Payable account is used for recording inventory purchases only; all other current liabilities are accrued in separate accounts. You are provided with the following selected information for the fiscal years 2009–2012.

|   | <u>2009</u> | <u>2010</u> | <u>2011</u> | <u>2012</u> |
|---|-------------|-------------|-------------|-------------|
| Inventory (ending)                            | \$13,000    | \$ 11,300   | \$ 14,700   | \$ 12,200   |
| Accounts payable (ending)                     | 20,000      |             |             |             |
| Sales revenue                                 |             | 239,000     | 237,000     | 235,000     |
| Purchases of merchandise inventory on account |             | 146,000     | 145,000     | 129,000     |
| Cash payments to suppliers                    |             | 135,000     | 161,000     | 127,000     |

**Instructions**

- (a) Calculate cost of goods sold for each of the 2010, 2011, and 2012 fiscal years.
- (b) Calculate the gross profit for each of the 2010, 2011, and 2012 fiscal years.
- (c) Calculate the ending balance of accounts payable for each of the 2010, 2011, and 2012 fiscal years.
- (d) Sales declined in fiscal 2012. Does that mean that profitability, as measured by the gross profit rate, necessarily also declined? Explain, calculating the gross profit rate for each fiscal year to help support your answer. (Round to one decimal place.)

(a) 2011 \$141,600

(c) 2011 Ending accts payable \$15,000

Journalize, post, and prepare trial balance and partial income statement using periodic approach.

(SO 7)

**\*P5-7A** At the beginning of the current season, the ledger of Alpert Tennis Shop showed Cash \$2,500; Inventory \$1,700; and Owner’s Capital \$4,200. The following transactions were completed during April.

- Apr. 4 Purchased racquets and balls from Nestor Co. \$740, terms 3/10, n/30.
- 6 Paid freight on Nestor Co. purchase \$60.
- 8 Sold merchandise to members \$900, terms n/30.
- 10 Received credit of \$40 from Nestor Co. for a racquet that was returned.
- 11 Purchased tennis shoes from Carbonell Sports for cash \$300.
- 13 Paid Nestor Co. in full.
- 14 Purchased tennis shirts and shorts from Faraday Sportswear \$700, terms 2/10, n/60.
- 15 Received cash refund of \$50 from Carbonell Sports for damaged merchandise that was returned.
- 17 Paid freight on Faraday Sportswear purchase \$30.

- 18 Sold merchandise to members \$1,000, terms n/30.
- 20 Received \$500 in cash from members in settlement of their accounts.
- 21 Paid Faraday Sportswear in full.
- 27 Granted an allowance of \$25 to members for tennis clothing that did not fit properly.
- 30 Received cash payments on account from members \$550.

The chart of accounts for the tennis shop includes Cash, Accounts Receivable, Inventory, Accounts Payable, Owner’s Capital, Sales Revenue, Sales Returns and Allowances, Purchases, Purchase Returns and Allowances, Purchase Discounts, and Freight-in.

**Instructions**

- (a) Journalize the April transactions using a periodic inventory system.
- (b) Using T accounts, enter the beginning balances in the ledger accounts and post the April transactions.
- (c) Prepare a trial balance on April 30, 2012.
- (d) Prepare an income statement through gross profit, assuming inventory on hand at April 30 is \$2,296.

(c) Tot. trial balance \$6,225  
 (d) Gross profit \$766

| Interest Expense         | 6,400             | 6,400           | Sales Commissions Expense    | 6,500             | 11,000          |
| Interest Revenue         | 8,000             | 8,000           | Sales Commissions Payable    |                   | 4,500           |
| Inventory                | 29,000            | 29,000          | Sales Returns and Allowances | 8,000             | 8,000           |
|                          |                   |                 | Utilities Expense            | 8,500             | 8,500           |

**Instructions**

- (a) Prepare a multiple-step income statement, an owner's equity statement, and a classified balance sheet. Notes payable are due in 2015.  
 (b) Journalize the adjusting entries that were made.  
 (c) Journalize the closing entries that are necessary.

(a) Net income \$29,100  
 Owner's capital \$120,800  
 Total assets \$190,000

**P5-4B** Ben Borke, a former disc golf star, operates Ben's Discorama. At the beginning of the current season on April 1, the ledger of Ben's Discorama showed Cash \$1,800, Inventory \$2,500, and Owner's Capital \$4,300. The following transactions were completed during April.

Journalize, post, and prepare a trial balance.

(SO 2, 3, 4)

- Apr. 5 Purchased golf discs, bags, and other inventory on account from Innova Co. \$1,200, FOB shipping point, terms 2/10, n/60.  
 7 Paid freight on the Innova purchase \$50.  
 9 Received credit from Innova Co. for merchandise returned \$100.  
 10 Sold merchandise on account for \$900, terms n/30. The merchandise sold had a cost of \$540.  
 12 Purchased disc golf shirts and other accessories on account from Lightning Sportswear \$670, terms 1/10, n/30.  
 14 Paid Innova Co. in full, less discount.  
 17 Received credit from Lightning Sportswear for merchandise returned \$70.  
 20 Made sales on account for \$610, terms n/30. The cost of the merchandise sold was \$370.  
 21 Paid Lightning Sportswear in full, less discount.  
 27 Granted an allowance to members for clothing that was flawed \$20.  
 30 Received payments on account from customers \$900.

The chart of accounts for the store includes the following: No. 101 Cash, No. 112 Accounts Receivable, No. 120 Inventory, No. 201 Accounts Payable, No. 301 Owner's Capital, No. 401 Sales Revenue, No. 412 Sales Returns and Allowances, and No. 505 Cost of Goods Sold.

**Instructions**

- (a) Journalize the April transactions using a perpetual inventory system.  
 (b) Enter the beginning balances in the ledger accounts and post the April transactions. (Use J1 for the journal reference.)  
 (c) Prepare a trial balance on April 30, 2012.

(c) Total debits \$5,810

252 **5** Accounting for Merchandising Operations

Determine cost of goods sold and gross profit under periodic approach.

(SO 6, 7)

**\*P5-5B** At the end of Cortez Department Store’s fiscal year on November 30, 2012, these accounts appeared in its adjusted trial balance.

|                                 |           |
|---------------------------------|-----------|
| Freight-in                      | \$ 7,500  |
| Inventory                       | 40,000    |
| Purchases                       | 585,000   |
| Purchase Discounts              | 6,300     |
| Purchase Returns and Allowances | 2,700     |
| Sales Revenue                   | 1,000,000 |
| Sales Returns and Allowances    | 20,000    |

Additional facts:

1. Merchandise inventory on November 30, 2012, is \$52,600.
2. Cortez Department Store uses a periodic system.

**Instructions**

Prepare an income statement through gross profit for the year ended November 30, 2012.

Gross profit \$409,100

Calculate missing amounts and assess profitability.

(SO 6, 7)

**\*P5-6B** Rodriguez Inc. operates a retail operation that purchases and sells home entertainment products. The company purchases all merchandise inventory on credit and uses a periodic inventory system. The Accounts Payable account is used for recording inventory purchases only; all other current liabilities are accrued in separate accounts. You are provided with the following selected information for the fiscal years 2009 through 2012, inclusive.

|   | <u>2009</u> | <u>2010</u>   | <u>2011</u>     | <u>2012</u>   |
|---|-------------|---------------|-----------------|---------------|
| <b>Income Statement Data</b>                  |             |               |                 |               |
| Sales revenue                                 |             | \$55,000      | \$ (e)          | \$47,000      |
| Cost of goods sold                            |             | (a)           | 13,800          | 14,300        |
| Gross profit                                  |             | 38,300        | 35,200          | (i)           |
| Operating expenses                            |             | 34,900        | (f)             | 28,600        |
| Net income                                    |             | <u>\$ (b)</u> | <u>\$ 2,500</u> | <u>\$ (j)</u> |
| <b>Balance Sheet Data</b>                     |             |               |                 |               |
| Inventory                                     | \$7,200     | \$ (c)        | \$ 8,100        | \$ (k)        |
| Accounts payable                              | 3,200       | 3,600         | 2,500           | (l)           |
| <b>Additional Information</b>                 |             |               |                 |               |
| Purchases of merchandise inventory on account |             | \$14,200      | \$ (g)          | \$13,200      |
| Cash payments to suppliers                    |             | (d)           | (h)             | 13,600        |

**Instructions**

- (a) Calculate the missing amounts.
- (b) Sales declined over the 3-year fiscal period, 2010–2012. Does that mean that profitability necessarily also declined? Explain, computing the gross profit rate and the profit margin ratio for each fiscal year to help support your answer. (Round to one decimal place.)

(c) \$4,700  
(g) \$17,200  
(i) \$32,700

Journalize, post, and prepare trial balance and partial income statement using periodic approach.

(SO 7)

**\*P5-7B** At the beginning of the current season on April 1, the ledger of Ilana Pro Shop showed Cash \$3,000; Inventory \$4,000; and Owner’s Capital \$7,000. These transactions occurred during April 2012.

- Apr. 5 Purchased golf bags, clubs, and balls on account from Zuleikha Co. \$1,200, FOB shipping point, terms 2/10, n/60.
- 7 Paid freight on Zuleikha Co. purchases \$50.
- 9 Received credit from Zuleikha Co. for merchandise returned \$100.
- 10 Sold merchandise on account to members \$600, terms n/30.
- 12 Purchased golf shoes, sweaters, and other accessories on account from Libby Sportswear \$450, terms 1/10, n/30.
- 14 Paid Zuleikha Co. in full.
- 17 Received credit from Libby Sportswear for merchandise returned \$50.
- 20 Made sales on account to members \$600, terms n/30.

- 21 Paid Libby Sportswear in full.
- 27 Granted credit to members for clothing that had flaws \$35.
- 30 Received payments on account from members \$600.

The chart of accounts for the pro shop includes Cash, Accounts Receivable, Inventory, Accounts Payable, Owner's Capital, Sales Revenue, Sales Returns and Allowances, Purchases, Purchase Returns and Allowances, Purchase Discounts, and Freight-in.

#### Instructions

- (a) Journalize the April transactions using a periodic inventory system.
- (b) Using T accounts, enter the beginning balances in the ledger accounts and post the April transactions.
- (c) Prepare a trial balance on April 30, 2012.
- (d) Prepare an income statement through gross profit, assuming merchandise inventory on hand at April 30 is \$4,824.

(c) Tot. trial balance \$8,376  
Gross profit \$465

## Problems: Set C

Visit the book's companion website, at [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), and choose the Student Companion site to access Problem Set C.

## Comprehensive Problem

**CP5** On December 1, 2012, Shiras Distributing Company had the following account balances.

|                     | <u>Debits</u>   |                            | <u>Credits</u>  |
|---------------------|-----------------|----------------------------|-----------------|
| Cash                | \$ 7,200        | Accumulated Depreciation—  |                 |
| Accounts Receivable | 4,600           | Equipment                  | \$ 2,200        |
| Inventory           | 12,000          | Accounts Payable           | 4,500           |
| Supplies            | 1,200           | Salaries and Wages Payable | 1,000           |
| Equipment           | 22,000          | Owner's Capital            | 39,300          |
|                     | <u>\$47,000</u> |                            | <u>\$47,000</u> |

During December, the company completed the following summary transactions.

- Dec. 6 Paid \$1,600 for salaries and wages due employees, of which \$600 is for December and \$1,000 is for November salaries and wages payable.
- 8 Received \$1,900 cash from customers in payment of account (no discount allowed).
- 10 Sold merchandise for cash \$6,300. The cost of the merchandise sold was \$4,100.
- 13 Purchased merchandise on account from Gong Co. \$9,000, terms 2/10, n/30.
- 15 Purchased supplies for cash \$2,000.
- 18 Sold merchandise on account \$12,000, terms 3/10, n/30. The cost of the merchandise sold was \$8,000.
- 20 Paid salaries \$1,800.
- 23 Paid Gong Co. in full, less discount.
- 27 Received collections in full, less discounts, from customers billed on December 18.

Adjustment data:

- 1. Accrued salaries payable \$800.
- 2. Depreciation \$200 per month.
- 3. Supplies on hand \$1,500.

#### Instructions

- (a) Journalize the December transactions using a perpetual inventory system.
- (b) Enter the December 1 balances in the ledger T accounts and post the December transactions. Use Cost of Goods Sold, Depreciation Expense, Salaries and Wages Expense, Sales Revenue, Sales Discounts, and Supplies Expense.
- (c) Journalize and post adjusting entries.
- (d) Prepare an adjusted trial balance.
- (e) Prepare an income statement and an owner's equity statement for December and a classified balance sheet at December 31.

(d) Totals \$65,300  
(e) Net income \$740

## Continuing Cookie Chronicle

(Note: This is a continuation of the Cookie Chronicle from Chapters 1 through 4.)

**CCC5** Because Natalie has had such a successful first few months, she is considering other opportunities to develop her business. One opportunity is the sale of fine European mixers. The owner of Kzinski Supply Company has approached Natalie to become the exclusive U.S. distributor of these fine mixers in her state. The current cost of a mixer is approximately \$525 (U.S.), and Natalie would sell each one for \$1,050. Natalie comes to you for advice on how to account for these mixers.

Go to the book's companion website, [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), to see the completion of this problem.

# BROADENING YOUR PERSPECTIVE

## Financial Reporting and Analysis

### Financial Reporting Problem: PepsiCo, Inc.

**PEPSICO**

**BYP5-1** The financial statements of **PepsiCo, Inc.** are presented in Appendix A at the end of this textbook.

#### Instructions

Answer the following questions using PepsiCo's Consolidated Statement of Income.

- What was the percentage change in (1) sales and in (2) net income from 2007 to 2008 and from 2008 to 2009?
- What was the company's gross profit rate in 2007, 2008, and 2009?
- What was the company's percentage of net income to net sales in 2007, 2008, and 2009? Comment on any trend in this percentage.

### Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

**PEPSICO**

**BYP5-2** PepsiCo's financial statements are presented in Appendix A. Financial statements of **The Coca-Cola Company** are presented in Appendix B.

#### Instructions

- Based on the information contained in these financial statements, determine each of the following for each company.
  - Gross profit for 2009.
  - Gross profit rate for 2009.
  - Operating income for 2009.
  - Percent change in operating income from 2008 to 2009.
- What conclusions concerning the relative profitability of the two companies can you draw from these data?

### On the Web

**BYP5-3** No financial decision maker should ever rely solely on the financial information reported in the annual report to make decisions. It is important to keep abreast of financial news. This activity demonstrates how to search for financial news on the Web.

**Address:** [biz.yahoo.com/i](http://biz.yahoo.com/i), or go to [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt)

#### Steps:

- Type in either PepsiCo or Coca-Cola.
- Choose **News**.
- Select an article that sounds interesting to you.

**Instructions**

- (a) What was the source of the article (e.g., Reuters, Businesswire, PR Newswire)?
- (b) Assume that you are a personal financial planner and that one of your clients owns stock in the company. Write a brief memo to your client, summarizing the article and explaining the implications of the article for their investment.

## Critical Thinking

### Decision Making Across the Organization

**BYP5-4** Three years ago, Carrie Dungy and her brother-in-law Luke Barber opened FedCo Department Store. For the first two years, business was good, but the following condensed income results for 2011 were disappointing.

| <b>FEDCO DEPARTMENT STORE</b>        |           |           |
|--------------------------------------|-----------|-----------|
| Income Statement                     |           |           |
| For the Year Ended December 31, 2011 |           |           |
| Net sales                            |           | \$700,000 |
| Cost of goods sold                   |           | 553,000   |
| Gross profit                         |           | 147,000   |
| Operating expenses                   |           |           |
| Selling expenses                     | \$100,000 |           |
| Administrative expenses              | 20,000    | 120,000   |
| Net income                           |           | \$ 27,000 |

Carrie believes the problem lies in the relatively low gross profit rate (gross profit divided by net sales) of 21%. Luke believes the problem is that operating expenses are too high.

Carrie thinks the gross profit rate can be improved by making both of the following changes. She does not anticipate that these changes will have any effect on operating expenses.

1. Increase average selling prices by 17%. This increase is expected to lower sales volume so that total sales will increase only 6%.
2. Buy merchandise in larger quantities and take all purchase discounts. These changes are expected to increase the gross profit rate by 3 percentage points.

Luke thinks expenses can be cut by making both of the following changes. He feels that these changes will not have any effect on net sales.

1. Cut 2011 sales salaries of \$60,000 in half and give sales personnel a commission of 2% of net sales.
2. Reduce store deliveries to one day per week rather than twice a week; this change will reduce 2011 delivery expenses of \$30,000 by 40%.

Carrie and Luke come to you for help in deciding the best way to improve net income.

**Instructions**

With the class divided into groups, answer the following.

- (a) Prepare a condensed income statement for 2012, assuming (1) Carrie's changes are implemented and (2) Luke's ideas are adopted.
- (b) What is your recommendation to Carrie and Luke?
- (c) Prepare a condensed income statement for 2012, assuming both sets of proposed changes are made.

### Communication Activity

**BYP5-5** The following situation is in chronological order.

1. Flutie decides to buy a surfboard.
2. He calls Surfing USA Co. to inquire about their surfboards.
3. Two days later, he requests Surfing USA Co. to make him a surfboard.
4. Three days later, Surfing USA Co. sends him a purchase order to fill out.
5. He sends back the purchase order.
6. Surfing USA Co. receives the completed purchase order.

7. Surfing USA Co. completes the surfboard.
8. Flutie picks up the surfboard.
9. Surfing USA Co. bills Flutie.
10. Surfing USA Co. receives payment from Flutie.

**Instructions**

In a memo to the president of Surfing USA Co., answer the following.

- (a) When should Surfing USA Co. record the sale?
- (b) Suppose that with his purchase order, Flutie is required to make a down payment. Would that change your answer?

**Ethics Case**

**BYP5-6** Laura McAntee was just hired as the assistant treasurer of Dorchester Stores. The company is a specialty chain store with nine retail stores concentrated in one metropolitan area. Among other things, the payment of all invoices is centralized in one of the departments Laura will manage. Her primary responsibility is to maintain the company's high credit rating by paying all bills when due and to take advantage of all cash discounts.

Danny Feeney, the former assistant treasurer who has been promoted to treasurer, is training Laura in her new duties. He instructs Laura that she is to continue the practice of preparing all checks "net of discount" and dating the checks the last day of the discount period. "But," Danny continues, "we always hold the checks at least 4 days beyond the discount period before mailing them. That way, we get another 4 days of interest on our money. Most of our creditors need our business and don't complain. And, if they scream about our missing the discount period, we blame it on the mail room or the post office. We've only lost one discount out of every hundred we take that way. I think everybody does it. By the way, welcome to our team!"

**Instructions**

- (a) What are the ethical considerations in this case?
- (b) Who are the stakeholders that are harmed or benefitted in this situation?
- (c) Should Laura continue the practice started by Danny? Does she have any choice?

**"All About You" Activity**

**BYP5-7** There are many situations in business where it is difficult to determine the proper period in which to record revenue. Suppose that after graduation with a degree in finance, you take a job as a manager at a consumer electronics store called Atlantis Electronics. The company has expanded rapidly in order to compete with **Best Buy**. Atlantis has also begun selling gift cards for its electronic products. The cards are available in any dollar amount and allow the holder of the card to purchase an item for up to 2 years from the time the card is purchased. If the card is not used during that 2 years, it expires.

**Instructions**

Answer the following questions.

At what point should the revenue from the gift cards be recognized? Should the revenue be recognized at the time the card is sold, or should it be recorded when the card is redeemed? Explain the reasoning to support your answers.

**FASB Codification Activity**

**BYP5-8** If your school has a subscription to the FASB Codification, go to <http://aaahq.org/ascLogin.cfm> to log in and prepare responses to the following

- (a) Access the glossary ("Master Glossary") to answer the following.
  - (1) What is the definition provided for inventory?
  - (2) What is a customer?
- (b) What guidance does the Codification provide concerning reporting inventories above cost?

### Answers to Insight and Accounting Across the Organization Questions

**p. 213 Morrow Snowboards Improves Its Stock Appeal** **Q:** If a perpetual system keeps track of inventory on a daily basis, why do companies ever need to do a physical count? **A:** A perpetual system keeps track of all sales and purchases on a continuous basis. This provides a constant record of the number of units in the inventory. However, if employees make errors in recording sales or purchases, or if there is theft, the inventory value will not be correct. As a consequence, all companies do a physical count of inventory at least once a year.

**p. 220 Should Costco Change Its Return Policy?** **Q:** If a company expects significant returns, what are the implications for revenue recognition? **A:** If a company expects significant returns, it should make an adjusting entry at the end of the year reducing sales by the estimated amount of sales returns. This is necessary so as not to overstate the amount of revenue recognized in the period.

**p. 226 Disclosing More Details** **Q:** Why have investors and analysts demanded more accuracy in isolating “Other gains and losses” from operating items? **A:** Greater accuracy in the classification of operating versus nonoperating (“Other gains and losses”) items permits investors and analysts to judge the real operating margin, the results of continuing operations, and management’s ability to control operating expenses.

## IFRS A Look at IFRS

The basic accounting entries for merchandising are the same under both GAAP and IFRS. The income statement is a required statement under both sets of standards. The basic format is similar although some differences do exist.

### Key Points

- Under both GAAP and IFRS, a company can choose to use either a perpetual or a periodic system.
- Inventories are defined by IFRS as held-for-sale in the ordinary course of business, in the process of production for such sale, or in the form of materials or supplies to be consumed in the production process or in the providing of services.
- Under GAAP, companies generally classify income statement items by function. Classification by function leads to descriptions like administration, distribution, and manufacturing. Under IFRS, companies must classify expenses by either nature or function. Classification by nature leads to descriptions such as the following: salaries, depreciation expense, and utilities expense. If a company uses the functional-expense method on the income statement, disclosure by nature is required in the notes to the financial statements.
- Presentation of the income statement under GAAP follows either a single-step or multiple-step format. IFRS does not mention a single-step or multiple-step approach.
- Under IFRS, revaluation of land, buildings, and intangible assets is permitted. The initial gains and losses resulting from this revaluation are reported as adjustments to equity, often referred to as *other comprehensive income*. The effect of this difference is that the use of IFRS results in more transactions affecting equity (other comprehensive income) but not net income.
- *IAS 1*, “Presentation of Financial Statements,” provides general guidelines for the reporting of income statement information. Subsequently, a number of international standards have been issued that provide additional guidance to issues related to income statement presentation.

- Similar to GAAP, comprehensive income under IFRS includes unrealized gains and losses (such as those on so-called “available-for-sale securities”) that are not included in the calculation of net income.
- IFRS requires that two years of income statement information be presented, whereas GAAP requires three years.

## Looking to the Future

The IASB and FASB are working on a project that would rework the structure of financial statements. Specifically, this project will address the issue of how to classify various items in the income statement. A main goal of this new approach is to provide information that better represents how businesses are run. In addition, this approach draws attention away from just one number—net income. It will adopt major groupings similar to those currently used by the statement of cash flows (operating, investing, and financing), so that numbers can be more readily traced across statements. For example, the amount of income that is generated by operations would be traceable to the assets and liabilities used to generate the income. Finally, this approach would also provide detail, beyond that currently seen in most statements (either GAAP or IFRS), by requiring that line items be presented both by function and by nature. The new financial statement format was heavily influenced by suggestions from financial statement analysts.

## IFRS Self-Test Questions

1. Which of the following would *not* be included in the definition of inventory under IFRS?
  - (a) Photocopy paper held for sale by an office-supply store.
  - (b) Stereo equipment held for sale by an electronics store.
  - (c) Used office equipment held for sale by the human relations department of a plastics company.
  - (d) All of the above would meet the definition.
2. Which of the following would *not* be a line item of a company reporting costs by nature?
  - (a) Depreciation expense.
  - (b) Salaries expense.
  - (c) Interest expense.
  - (d) Manufacturing expense.
3. Which of the following would *not* be a line item of a company reporting costs by function?
  - (a) Administration.
  - (b) Manufacturing.
  - (c) Utilities expense.
  - (d) Distribution.
4. Which of the following statements is *false*?
  - (a) IFRS specifically requires use of a multiple-step income statement.
  - (b) Under IFRS, companies can use either a perpetual or periodic system.
  - (c) The proposed new format for financial statements was heavily influenced by the suggestions of financial statement analysts.
  - (d) The new income statement format will try to de-emphasize the focus on the “net income” line item.
5. Under the new format for financial statements being proposed under a joint IASB/FASB project:
  - (a) all financial statements would adopt headings similar to the current format of the balance sheet.
  - (b) financial statements would be presented consistent with the way management usually run companies.

- (c) companies would be required to report income statement line items by function only.
- (d) the amount of detail shown in the income statement would decrease compared to current presentations.

## IFRS Concepts and Application

**IFRS5-1** Explain the difference between the “nature-of-expense” and “function-of-expense” classifications.

**IFRS5-2** For each of the following income statement line items, state whether the item is a “by nature” expense item or a “by function” expense item.

- \_\_\_\_\_ Cost of goods sold
- \_\_\_\_\_ Depreciation expense
- \_\_\_\_\_ Salaries and wages expense
- \_\_\_\_\_ Selling expenses
- \_\_\_\_\_ Utilities expense
- \_\_\_\_\_ Delivery expense
- \_\_\_\_\_ General and administrative expenses

**IFRS5-3** Gribble Company reported the following amounts in 2012: Net income, €150,000; Unrealized gain related to revaluation of buildings, €10,000; and Unrealized loss on available-for-sale securities, €(35,000). Determine Gribble’s total comprehensive income for 2012.

### International Financial Reporting

#### Problem: Zetar plc

**IFRS5-4** The financial statements of Zetar plc are presented in Appendix C. The company’s complete annual report, including the notes to its financial statements, is available at [www.zetarplc.com](http://www.zetarplc.com).

#### Instructions

- (a) Is Zetar using a multiple-step or a single-step income statement format? Explain how you made your determination.
- (b) Instead of “interest expense,” what label does Zetar use for interest costs that it incurs?
- (c) Using the notes to the company’s financial statements, explain what each of the following are:
  - (1) Adjusted results.
  - (2) One-off items.

# CHAPTER 6

## Inventories

### Study Objectives

After studying this chapter, you should be able to:

- 1 Describe the steps in determining inventory quantities.
- 2 Explain the accounting for inventories and apply the inventory cost flow methods.
- 3 Explain the financial effects of the inventory cost flow assumptions.
- 4 Explain the lower-of-cost-or-market basis of accounting for inventories.
- 5 Indicate the effects of inventory errors on the financial statements.
- 6 Compute and interpret the inventory turnover ratio.

### Feature Story

#### "WHERE IS THAT SPARE BULLDOZER BLADE?"

Let's talk inventory—big, bulldozer-size inventory. **Caterpillar Inc.** is the world's largest manufacturer of construction and mining equipment, diesel and natural gas engines, and industrial gas turbines. It sells its products in over 200 countries, making it one of the most successful U.S. exporters. More than 70% of its productive assets are located domestically, and nearly 50% of its sales are foreign.

During the 1980s, Caterpillar's profitability suffered, but today it is very successful. A big part of this turnaround can be attributed to effective management of its inventory. Imagine what it costs Caterpillar to have too many bulldozers sitting around in inventory—a situation the company definitely wants to avoid. Conversely, Caterpillar must make sure it has enough inventory to meet demand.

At one time during a 7-year period, Caterpillar's sales increased by 100%, while its inventory increased by only 50%. To achieve this dramatic reduction in the amount of resources tied up in inventory, while continuing to meet

customers' needs, Caterpillar used a two-pronged approach. First, it completed a factory modernization program, which dramatically increased its production efficiency. The program reduced by 60% the amount of inventory the company processed at any one time. It also reduced by an incredible 75% the time it takes to manufacture a part.

Second, Caterpillar dramatically improved its parts distribution system. It ships more than 100,000 items daily from its 23 distribution centers strategically located around the world (10 *million* square feet of warehouse space—remember, we're talking bulldozers). The company can virtually guarantee that it can get any part to anywhere in the world within 24 hours.

After these changes, Caterpillar had record exports, profits, and revenues. It would seem that things couldn't be better. But industry analysts, as well as the company's managers, thought otherwise. In order to maintain Caterpillar's position as the industry leader, management began another major overhaul of inventory production and inventory management processes. The goal: to cut the number of repairs in half, increase productivity by 20%, and increase inventory turnover by 40%.

In short, Caterpillar's ability to manage its inventory has been a key reason for its past success, and inventory management will very likely play a huge part in its ability to succeed in the future.

## Preview of CHAPTER 6

In the previous chapter, we discussed the accounting for merchandise inventory using a perpetual inventory system. In this chapter, we explain the methods used to calculate the cost of inventory on hand at the balance sheet date and the cost of goods sold.

The content and organization of this chapter are as follows.

| Inventories  |   |  |   |  |

## Classifying Inventory

How a company classifies its inventory depends on whether the firm is a merchandiser or a manufacturer. In a *merchandising* company, such as those described in Chapter 5, inventory consists of many different items. For example, in a grocery store, canned goods, dairy products, meats, and produce are just a few of the inventory items on hand. These items have two common characteristics: (1) They are owned by the company, and (2) they are in a form ready for sale to customers in the ordinary course of business. Thus, merchandisers need only one inventory classification, **merchandise inventory**, to describe the many different items that make up the total inventory.

In a *manufacturing* company, some inventory may not yet be ready for sale. As a result, manufacturers usually classify inventory into three categories: finished goods, work in process, and raw materials. **Finished goods inventory** is manufactured items that are completed and ready for sale. **Work in process** is that portion of manufactured inventory that has been placed into the production process but is not yet complete. **Raw materials** are the basic goods that will be used in production but have not yet been placed into production.

For example, **Caterpillar** classifies earth-moving tractors completed and ready for sale as **finished goods**. It classifies the tractors on the assembly line in various stages of production as **work in process**. The steel, glass, tires, and other components that are on hand waiting to be used in the production of tractors are identified as **raw materials**.

**By observing the levels and changes in the levels of these three inventory types, financial statement users can gain insight into management's production plans.** For example, low levels of raw materials and high levels of finished goods suggest that management believes it has enough inventory on hand, and production will be slowing down—perhaps in anticipation of a recession. On the other hand, high levels of raw materials and low levels of finished goods probably indicate that management is planning to step up production.

Many companies have significantly lowered inventory levels and costs using **just-in-time (JIT) inventory** methods. Under a just-in-time method, companies

### Helpful Hint

Regardless of the classification, companies report all inventories under Current Assets on the balance sheet.

manufacture or purchase goods just in time for use. **Dell** is famous for having developed a system for making computers in response to individual customer requests. Even though it makes each computer to meet each customer's particular specifications, Dell is able to assemble the computer and put it on a truck in less than 48 hours. The success of the JIT system depends on reliable suppliers. By integrating its information systems with those of its suppliers, Dell reduced its inventories to nearly zero. This is a huge advantage in an industry where products become obsolete nearly overnight.

The accounting concepts discussed in this chapter apply to the inventory classifications of both merchandising and manufacturing companies. Our focus here is on merchandise inventory.

## ACCOUNTING ACROSS THE ORGANIZATION

### A Big Hiccup

JIT can save a company a lot of money, but it isn't without risk. An unexpected disruption in the supply chain can cost a company a lot of money. Japanese automakers experienced just such a disruption when a 6.8-magnitude earthquake caused major damage to the company that produces 50% of their piston rings. The rings themselves cost only \$1.50, but without them you cannot make a car. No other supplier could quickly begin producing sufficient quantities of the rings to match the desired specifications. As a result, the automakers were forced to shut down production for a few days—a loss of tens of thousands of cars.

Source: Amy Chozick, "A Key Strategy of Japan's Car Makers Backfires," *Wall Street Journal* (July 20, 2007).

**?** What steps might the companies take to avoid such a serious disruption in the future? (See page 310.)

## Determining Inventory Quantities

No matter whether they are using a periodic or perpetual inventory system, all companies need to determine inventory quantities at the end of the accounting period. If using a perpetual system, companies take a physical inventory for two reasons:

1. To check the accuracy of their perpetual inventory records.
2. To determine the amount of inventory lost due to wasted raw materials, shoplifting, or employee theft.

Companies using a periodic inventory system take a physical inventory to determine the inventory on hand at the balance sheet date, and to determine the cost of goods sold for the period.

Determining inventory quantities involves two steps: (1) taking a physical inventory of goods on hand and (2) determining the ownership of goods.

### Taking a Physical Inventory

Companies take a physical inventory at the end of the accounting period. Taking a physical inventory involves actually counting, weighing, or measuring each kind of inventory on hand. In many companies, taking an inventory is a formidable task. Retailers such as **Target**, **True Value**

### Study Objective [1]

Describe the steps in determining inventory quantities.

### Ethics Note

In a famous fraud, a salad oil company filled its storage tanks mostly with water. The oil rose to the top, so auditors thought the tanks were full of oil. The company also said it had more tanks than it really did: It repainted numbers on the tanks to confuse auditors.

**Hardware**, or **Home Depot** have thousands of different inventory items. An inventory count is generally more accurate when goods are not being sold or received during the counting. Consequently, companies often “take inventory” when the business is closed or when business is slow. Many retailers close early on a chosen day in January—after the holiday sales and returns, when inventories are at their lowest level—to count inventory. Recall from Chapter 5 that **Wal-Mart** has a year-end of January 31.

## ETHICS INSIGHT

### Falsifying Inventory to Boost Income

Managers at women’s apparel maker **Leslie Fay** were convicted of falsifying inventory records to boost net income—and consequently to boost management bonuses. In another case, executives at **Craig Consumer Electronics** were accused of defrauding lenders by manipulating inventory records. The indictment said the company classified “defective goods as new or refurbished” and claimed that it owned certain shipments “from overseas suppliers” when, in fact, Craig either did not own the shipments or the shipments did not exist.

? What effect does an overstatement of inventory have on a company’s financial statements? (See page 310.)

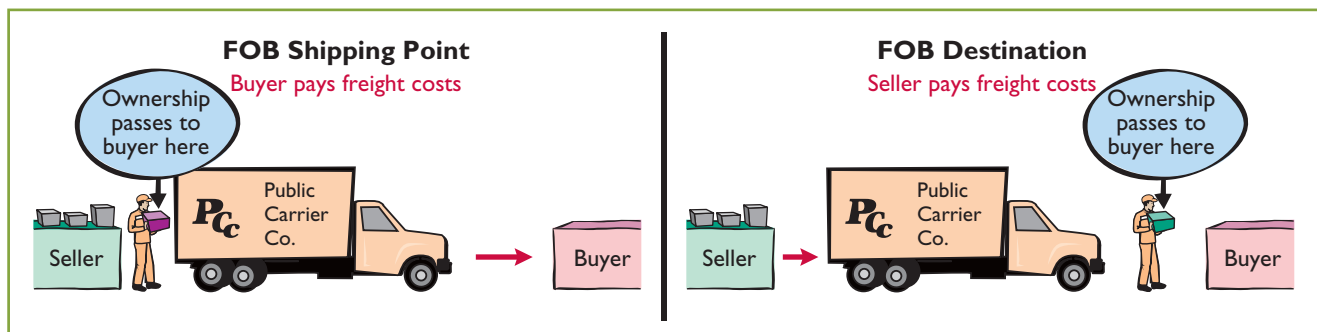

## Determining Ownership of Goods

One challenge in computing inventory quantities is determining what inventory a company owns. To determine ownership of goods, two questions must be answered: Do all of the goods included in the count belong to the company? Does the company own any goods that were not included in the count?

### GOODS IN TRANSIT

A complication in determining ownership is **goods in transit** (on board a truck, train, ship, or plane) at the end of the period. The company may have purchased goods that have not yet been received, or it may have sold goods that have not yet been delivered. To arrive at an accurate count, the company must determine ownership of these goods.

Goods in transit should be included in the inventory of the company that has legal title to the goods. Legal title is determined by the terms of the sale, as shown in Illustration 6-1 and described below.

**Illustration 6-1**  
Terms of sale

1. When the terms are **FOB (free on board) shipping point**, ownership of the goods passes to the buyer when the public carrier accepts the goods from the seller.
2. When the terms are **FOB destination**, ownership of the goods remains with the seller until the goods reach the buyer.

If goods in transit at the statement date are ignored, inventory quantities may be seriously miscounted. Assume, for example, that Hargrove Company has 20,000 units of inventory on hand on December 31. It also has the following goods in transit:

1. Sales of 1,500 units shipped December 31 FOB destination.
2. Purchases of 2,500 units shipped FOB shipping point by the seller on December 31.

Hargrove has legal title to both the 1,500 units sold and the 2,500 units purchased. If the company ignores the units in transit, it would understate inventory quantities by 4,000 units (1,500 + 2,500).

As we will see later in the chapter, inaccurate inventory counts affect not only the inventory amount shown on the balance sheet but also the cost of goods sold calculation on the income statement.

### CONSIGNED GOODS

In some lines of business, it is common to hold the goods of other parties and try to sell the goods for them for a fee, but without taking ownership of the goods. These are called **consigned goods**.

For example, you might have a used car that you would like to sell. If you take the item to a dealer, the dealer might be willing to put the car on its lot and charge you a commission if it is sold. Under this agreement, the dealer **would not take ownership** of the car, which would still belong to you. Therefore, if an inventory count were taken, the car would not be included in the dealer's inventory.

Many car, boat, and antique dealers sell goods on consignment to keep their inventory costs down and to avoid the risk of purchasing an item that they won't be able to sell. Today even some manufacturers are making consignment agreements with their suppliers in order to keep their inventory levels low.

## Do it!

Hasbeen Company completed its inventory count. It arrived at a total inventory value of \$200,000. As a new member of Hasbeen's accounting department, you have been given the information listed below. Discuss how this information affects the reported cost of inventory.

1. Hasbeen included in the inventory goods held on consignment for Falls Co., costing \$15,000.
2. The company did not include in the count purchased goods of \$10,000 which were in transit (terms: FOB shipping point).
3. The company did not include in the count sold inventory with a cost of \$12,000 which was in transit (terms: FOB shipping point).

### Solution

The goods of \$15,000 held on consignment should be deducted from the inventory count. The goods of \$10,000 purchased FOB shipping point should be added to the inventory count. Sold goods of \$12,000 which were in transit FOB shipping point should not be included in the ending inventory. Thus, inventory should be carried at \$195,000 ( $\$200,000 - \$15,000 + \$10,000$ ).

Related exercise material: BE6-1, E6-1, E6-2, and **Do it!** 6-1.

## Rules of Ownership

### action plan

- ✓ Apply the rules of ownership to goods held on consignment.
- ✓ Apply the rules of ownership to goods in transit.

## ANATOMY OF A FRAUD

Ted Nickerson, CEO of clock manufacturer Dally Industries, was feared by all of his employees. Ted had expensive tastes. To support his expensive tastes, Ted took out large loans, which he collateralized with his shares of Dally Industries stock. If the price of Dally's stock fell, he was required to provide the bank with more shares of stock. To achieve target net income figures and thus maintain the stock price, Ted coerced employees in the company to alter inventory figures. Inventory quantities were manipulated by changing the amounts on inventory control tags after the year-end physical inventory count. For example, if a tag said there were 20 units of a particular item, the tag was changed to 220. Similarly, the unit costs that were used to determine the value of ending inventory were increased from, for example, \$125 per unit to \$1,250. Both of these fraudulent changes had the effect of increasing the amount of reported ending inventory. This reduced cost of goods sold and increased net income.

Total take: \$245,000

## THE MISSING CONTROL

**Independent internal verification.** The company should have spot-checked its inventory records periodically, verifying that the number of units in the records agreed with the amount on hand and that the unit costs agreed with vendor price sheets.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 502–509.

## Inventory Costing

### Study Objective [2]

Explain the accounting for inventories and apply the inventory cost flow methods.

Inventory is accounted for at cost. Cost includes all expenditures necessary to acquire goods and place them in a condition ready for sale. For example, freight costs incurred to acquire inventory are added to the cost of inventory, but the cost of shipping goods to a customer are a selling expense.

After a company has determined the quantity of units of inventory, it applies unit costs to the quantities to compute the total cost of the inventory and the cost of goods sold. This process can be complicated if a company has purchased inventory items at different times and at different prices.

For example, assume that Crivitz TV Company purchases three identical 50-inch TVs on different dates at costs of \$700, \$750, and \$800. During the year, Crivitz sold two sets at \$1,200 each. These facts are summarized in Illustration 6-2.

### Illustration 6-2

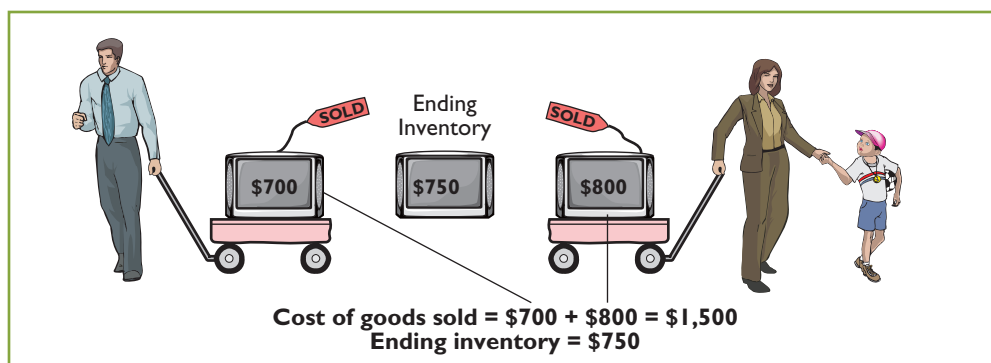

Data for inventory costing example

|                  |       |     |                                |
|------------------|-------|-----|--------------------------------|
| <b>Purchases</b> |       |     |                                |
| February 3       | 1 TV  | at  | \$700                          |
| March 5          | 1 TV  | at  | \$750                          |
| May 22           | 1 TV  | at  | \$800                          |
| <b>Sales</b>     |       |     |                                |
| June 1           | 2 TVs | for | \$2,400 ( $\$1,200 \times 2$ ) |

Cost of goods sold will differ depending on which two TVs the company sold. For example, it might be \$1,450 ( $\$700 + \$750$ ), or \$1,500 ( $\$700 + \$800$ ), or \$1,550 ( $\$750 + \$800$ ). In this section, we discuss alternative costing methods available to Crivitz.

## Specific Identification

If Crivitz can positively identify which particular units it sold and which are still in ending inventory, it can use the **specific identification method** of inventory costing. For example, if Crivitz sold the TVs it purchased on February 3 and May 22, then its cost of goods sold is \$1,500 (\$700 + \$800), and its ending inventory is \$750 (see Illustration 6-3). Using this method, companies can accurately determine ending inventory and cost of goods sold.

**Illustration 6-3**  
Specific identification method

Specific identification requires that companies keep records of the original cost of each individual inventory item. Historically, specific identification was possible only when a company sold a limited variety of high-unit-cost items that could be identified clearly from the time of purchase through the time of sale. Examples of such products are cars, pianos, or expensive antiques.

Today, bar coding, electronic product codes, and radio frequency identification make it theoretically possible to do specific identification with nearly any type of product. The reality is, however, that this practice is still relatively rare. Instead, rather than keep track of the cost of each particular item sold, most companies make assumptions, called **cost flow assumptions**, about which units were sold.

## Cost Flow Assumptions

Because specific identification is often impractical, other cost flow methods are permitted. These differ from specific identification in that they **assume** flows of costs that may be unrelated to the physical flow of goods. There are three assumed cost flow methods:

1. First-in, first-out (FIFO)
2. Last-in, first-out (LIFO)
3. Average-cost

**There is no accounting requirement that the cost flow assumption be consistent with the physical movement of the goods.** Company management selects the appropriate cost flow method.

To demonstrate the three cost flow methods, we will use a **periodic** inventory system. We assume a periodic system for two main reasons. First, many small companies use periodic rather than perpetual systems. Second, **very few companies use perpetual LIFO, FIFO, or average-cost** to cost their inventory and related cost of goods sold. Instead, companies that use perpetual systems often use an assumed cost (called a standard cost) to record cost of goods sold at the time of sale. Then, at the end of the period when they count their inventory, they **recalculate cost of**

### Ethics Note

A major disadvantage of the specific identification method is that management may be able to manipulate net income. For example, it can boost net income by selling units purchased at a low cost, or reduce net income by selling units purchased at a high cost.

**goods sold using periodic FIFO, LIFO, or average-cost** and adjust cost of goods sold to this recalculated number.<sup>1</sup>

To illustrate the three inventory cost flow methods, we will use the data for Houston Electronics' Astro condensers, shown in Illustration 6-4.

**Illustration 6-4**  
Data for Houston Electronics

| Houston Electronics<br>Astro Condensers |                                |            |           |                 |
|---|--------------------------------|------------|-----------|-----------------|
| Date                                    | Explanation                    | Units      | Unit Cost | Total Cost      |

| Apr. 15                                 | Purchase                       | 200        | 11        | 2,200           |
| Aug. 24                                 | Purchase                       | 300        | 12        | 3,600           |
| Nov. 27                                 | Purchase                       | 400        | 13        | 5,200           |
|   | Total units available for sale | 1,000      |           | <u>\$12,000</u> |
|   | Units in ending inventory      | 450        |           |                 |
|   | Units sold                     | <u>550</u> |           |                 |

The cost of goods sold formula in a periodic system is:

$$\text{(Beginning Inventory + Purchases) - Ending Inventory = Cost of Goods Sold}$$

Houston Electronics had a total of 1,000 units available to sell during the period (beginning inventory plus purchases). The total cost of these 1,000 units is \$12,000, referred to as *cost of goods available for sale*. A physical inventory taken at December 31 determined that there were 450 units in ending inventory. Therefore, Houston sold 550 units (1,000 – 450) during the period. To determine the cost of the 550 units that were sold (the cost of goods sold), we assign a cost to the ending inventory and subtract that value from the cost of goods available for sale. The value assigned to the ending inventory **will depend on which cost flow method we use**. No matter which cost flow assumption we use, though, the sum of cost of goods sold plus the cost of the ending inventory must equal the cost of goods available for sale—in this case, \$12,000.

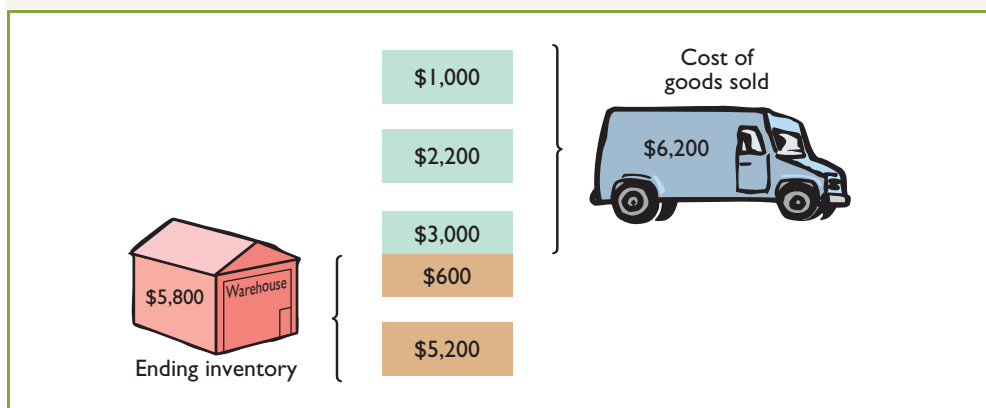

### FIRST-IN, FIRST-OUT (FIFO)

The **first-in, first-out (FIFO) method** assumes that the **earliest goods** purchased are the first to be sold. FIFO often parallels the actual physical flow of merchandise; it generally is good business practice to sell the oldest units first. Under the FIFO method, therefore, the **costs** of the earliest goods purchased are the first to be recognized in determining cost of goods sold. (This does not necessarily mean that the oldest units *are* sold first, but that the costs of the oldest units are *recognized* first. In a bin of picture hangers at the hardware store, for example, no one really knows, nor would it matter, which hangers are sold first.) Illustration 6-5 shows the allocation of the cost of goods available for sale at Houston Electronics under FIFO.

<sup>1</sup>Also, some companies use a perpetual system to keep track of units, but they do not make an entry for perpetual cost of goods sold. In addition, firms that employ LIFO tend to use *dollar-value LIFO*, a method discussed in upper-level courses. FIFO periodic and FIFO perpetual give the same result; therefore firms should not incur the additional cost to use FIFO perpetual. Few firms use perpetual average-cost because of the added cost of record-keeping. Finally, for instructional purposes, we believe it is easier to demonstrate the cost flow assumptions under the periodic system, which makes it more pedagogically appropriate.

| Cost of Goods Available for Sale |                     |       |           |                 |
|----------------------------------|---------------------|-------|-----------|-----------------|
| Date                             | Explanation         | Units | Unit Cost | Total Cost      |
| Jan. 1                           | Beginning inventory | 100   | \$10      | \$ 1,000        |
| Apr. 15                          | Purchase            | 200   | 11        | 2,200           |
| Aug. 24                          | Purchase            | 300   | 12        | 3,600           |
| Nov. 27                          | Purchase            | 400   | 13        | 5,200           |
|                                  | Total               | 1,000 |           | <b>\$12,000</b> |

| Step 1: Ending Inventory |       |           |                | Step 2: Cost of Goods Sold       |                 |
|--------------------------|-------|-----------|----------------|----------------------------------|-----------------|
| Date                     | Units | Unit Cost | Total Cost     |                                  |                 |
| Nov. 27                  | 400   | \$13      | \$5,200        | Cost of goods available for sale | \$12,000        |
| Aug. 24                  | 50    | 12        | 600            | Less: Ending inventory           | 5,800           |
| Total                    | 450   |           | <b>\$5,800</b> | Cost of goods sold               | <b>\$ 6,200</b> |

Under FIFO, since it is assumed that the first goods purchased were the first goods sold, ending inventory is based on the prices of the most recent units purchased. That is, **under FIFO, companies obtain the cost of the ending inventory by taking the unit cost of the most recent purchase and working backward until all units of inventory have been costed.** In this example, Houston Electronics prices the 450 units of ending inventory using the *most recent* prices. The last purchase was 400 units at \$13 on November 27. The remaining 50 units are priced using the unit cost of the second most recent purchase, \$12, on August 24. Next, Houston Electronics calculates cost of goods sold by subtracting the cost of the units **not sold** (ending inventory) from the cost of all goods available for sale.

Illustration 6-6 demonstrates that companies also can calculate cost of goods sold by pricing the 550 units sold using the prices of the first 550 units acquired. Note that of the 300 units purchased on August 24, only 250 units are assumed sold. This agrees with our calculation of the cost of ending inventory, where 50 of these units were assumed unsold and thus included in ending inventory.

| Date    | Units | Unit Cost | Total Cost     |
|---------|-------|-----------|----------------|
| Jan. 1  | 100   | \$10      | \$1,000        |
| Apr. 15 | 200   | 11        | 2,200          |
| Aug. 24 | 250   | 12        | 3,000          |
| Total   | 550   |           | <b>\$6,200</b> |

**Illustration 6-5**  
Allocation of costs—FIFO method

**Helpful Hint**

Note the sequencing of the allocation:  
(1) Compute ending inventory, and  
(2) determine cost of goods sold

**Helpful Hint**

Another way of thinking about the calculation of FIFO ending inventory is the *LISH assumption*—last in still here.

**Illustration 6-6**  
Proof of cost of goods sold

**LAST-IN, FIRST-OUT (LIFO)**

The **last-in, first-out (LIFO) method** assumes that the **latest goods** purchased are the first to be sold. LIFO seldom coincides with the actual physical flow of inventory. (Exceptions include goods stored in piles, such as coal or hay, where goods are removed from the top of the pile as they are sold.) Under the LIFO method, the **costs** of the latest goods purchased are the first to be recognized in determining cost of goods sold. Illustration 6-7 shows the allocation of the cost of goods available for sale at Houston Electronics under LIFO.

**Illustration 6-7**  
Allocation of costs—LIFO method

| Cost of Goods Available for Sale |                     |              |           |                 |
|----------------------------------|---------------------|--------------|-----------|-----------------|
| Date                             | Explanation         | Units        | Unit Cost | Total Cost      |
| Jan. 1                           | Beginning inventory | 100          | \$10      | \$ 1,000        |
| Apr. 15                          | Purchase            | 200          | 11        | 2,200           |
| Aug. 24                          | Purchase            | 300          | 12        | 3,600           |
| Nov. 27                          | Purchase            | 400          | 13        | 5,200           |
|                                  | Total               | <u>1,000</u> |           | <u>\$12,000</u> |

| Step 1: Ending Inventory |            |           |                | Step 2: Cost of Goods Sold       |                 |
|--------------------------|------------|-----------|----------------|----------------------------------|-----------------|
| Date                     | Units      | Unit Cost | Total Cost     |                                  |                 |
| Jan. 1                   | 100        | \$10      | \$1,000        | Cost of goods available for sale | \$12,000        |
| Apr. 15                  | 200        | 11        | 2,200          | Less: Ending inventory           | <u>5,000</u>    |
| Aug. 24                  | 150        | 12        | 1,800          | Cost of goods sold               | <u>\$ 7,000</u> |
| Total                    | <u>450</u> |           | <u>\$5,000</u> |                                  |                 |

**Helpful Hint**

Another way of thinking about the calculation of LIFO ending inventory is the *FISH assumption*—first in still here.

Under LIFO, since it is assumed that the first goods sold were those that were most recently purchased, ending inventory is based on the prices of the oldest units purchased. That is, **under LIFO, companies obtain the cost of the ending inventory by taking the unit cost of the earliest goods available for sale and working forward until all units of inventory have been costed.** In this example, Houston Electronics prices the 450 units of ending inventory using the *earliest* prices. The first purchase was 100 units at \$10 in the January 1 beginning inventory. Then 200 units were purchased at \$11. The remaining 150 units needed are priced at \$12 per unit (August 24 purchase). Next, Houston Electronics calculates cost of goods sold by subtracting the cost of the units **not sold** (ending inventory) from the cost of all goods available for sale.

Illustration 6-8 demonstrates that companies also can calculate cost of goods sold by pricing the 550 units sold using the prices of the last 550 units acquired. Note that of the 300 units purchased on August 24, only 150 units are assumed sold. This agrees with our calculation of the cost of ending inventory, where 150 of these units were assumed unsold and thus included in ending inventory.

| <u>Date</u> | <u>Units</u> | <u>Unit Cost</u> | <u>Total Cost</u> |
|-------------|--------------|------------------|-------------------|
| Nov. 27     | 400          | \$13             | \$5,200           |
| Aug. 24     | 150          | 12               | 1,800             |
| Total       | 550          |                  | <b>\$7,000</b>    |

**Illustration 6-8**  
Proof of cost of goods sold

Under a periodic inventory system, which we are using here, **all goods purchased during the period are assumed to be available for the first sale, regardless of the date of purchase.**

### AVERAGE-COST

The **average-cost method** allocates the cost of goods available for sale on the basis of the **weighted-average unit cost** incurred. The average-cost method assumes that goods are similar in nature. Illustration 6-9 presents the formula and a sample computation of the weighted-average unit cost.

|   |   |                                       |   |                                   |
|---|---|---------------------------------------|---|-----------------------------------|
| <b>Cost of Goods Available for Sale</b> | ÷ | <b>Total Units Available for Sale</b> | = | <b>Weighted-Average Unit Cost</b> |
| \$12,000                                | ÷ | 1,000                                 | = | <b>\$12.00</b>                    |

**Illustration 6-9**  
Formula for weighted-average unit cost

The company then applies the weighted-average unit cost to the units on hand to determine the cost of the ending inventory. Illustration 6-10 (page 272) shows the allocation of the cost of goods available for sale at Houston Electronics using average-cost.

We can verify the cost of goods sold under this method by multiplying the units sold times the weighted-average unit cost ( $550 \times \$12 = \$6,600$ ). Note that this method does not use the average of the unit costs. That average is  $\$11.50$  ( $\$10 + \$11 + \$12 + \$13 = \$46$ ;  $\$46 \div 4$ ). The average-cost method instead uses the average **weighted by** the quantities purchased at each unit cost.

## Do it!

The accounting records of Shumway Ag Implement show the following data.

|                     |                     |
|---------------------|---------------------|
| Beginning inventory | 4,000 units at \$ 3 |
| Purchases           | 6,000 units at \$ 4 |
| Sales               | 7,000 units at \$12 |

Determine the cost of goods sold during the period under a periodic inventory system using (a) the FIFO method, (b) the LIFO method, and (c) the average-cost method.

### Solution

$$\text{Cost of goods available for sale} = (4,000 \times \$3) + (6,000 \times \$4) = \$36,000$$

$$\text{Ending inventory} = 10,000 - 7,000 = 3,000 \text{ units}$$

$$(a) \text{ FIFO: } \$36,000 - (3,000 \times \$4) = \$24,000$$

$$(b) \text{ LIFO: } \$36,000 - (3,000 \times \$3) = \$27,000$$

$$(c) \text{ Average cost per unit: } [(4,000 @ \$3) + (6,000 @ \$4)] \div 10,000 = \$3.60$$

$$\text{Average-cost: } \$36,000 - (3,000 \times \$3.60) = \$25,200$$

## Cost Flow Methods

### action plan

- ✓ Understand the periodic inventory system.
- ✓ Allocate costs between goods sold and goods on hand (ending inventory) for each cost flow method.
- ✓ Compute cost of goods sold for each method.

### Financial Statement and Tax Effects of Cost Flow Methods

#### Study Objective [3]

Explain the financial effects of the inventory cost flow assumptions.

**Illustration 6-11**  
Use of cost flow methods in major U.S. companies

Each of the three assumed cost flow methods is acceptable for use. For example, **Reebok International Ltd.** and **Wendy’s International** currently use the FIFO method of inventory costing. **Campbell Soup Company**, **Krogers**, and **Walgreen Drugs** use LIFO for part or all of their inventory. **Bristol-Myers Squibb**, **Starbucks**, and **Motorola** use the average-cost method. In fact, a company may also use more than one cost flow method at the same time. **Stanley Black & Decker Manufacturing Company**, for example, uses LIFO for domestic inventories and FIFO for foreign inventories. Illustration 6-11 (in the margin) shows the use of the three cost flow methods in the 500 largest U.S. companies.

The reasons companies adopt different inventory cost flow methods are varied, but they usually involve one of three factors: (1) income statement effects, (2) balance sheet effects, or (3) tax effects.

#### INCOME STATEMENT EFFECTS

To understand why companies might choose a particular cost flow method, let’s examine the effects of the different cost flow assumptions on the financial statements of Houston Electronics. The condensed income statements in Illustration 6-12 assume that Houston sold its 550 units for \$11,500, had operating expenses of \$2,000, and is subject to an income tax rate of 30%.

**Houston Electronics**  
Condensed Income Statements

|   | <u>FIFO</u>            | <u>LIFO</u>            | <u>Average-Cost</u>    |
|---|------------------------|------------------------|------------------------|
| Sales revenue                           | \$11,500               | \$11,500               | \$11,500               |

| Income tax expense (30%)                | <u>990</u>             | <u>750</u>             | <u>870</u>             |
| Net income                              | <b><u>\$ 2,310</u></b> | <b><u>\$ 1,750</u></b> | <b><u>\$ 2,303</u></b> |

**Illustration 6-12**

Comparative effects of cost flow methods

Note the cost of goods available for sale (\$12,000) is the same under each of the three inventory cost flow methods. However, the ending inventories and the costs of goods sold are different. This difference is due to the unit costs that the company allocated to cost of goods sold and to ending inventory. Each dollar of difference in ending inventory results in a corresponding dollar difference in income before income taxes. For Houston, an \$800 difference exists between FIFO and LIFO cost of goods sold.

In periods of changing prices, the cost flow assumption can have a significant impact on income and on evaluations based on income. In most instances, prices are rising (inflation). In a period of inflation, FIFO produces a higher net income because the lower unit costs of the first units purchased are matched against revenues. In a period of rising prices (as is the case in the Houston example), FIFO reports the highest net income (\$2,310) and LIFO the lowest (\$1,750); average-cost falls in the middle (\$2,030). If prices are falling, the results from the use of FIFO and LIFO are reversed: FIFO will report the lowest net income and LIFO the highest.

To management, higher net income is an advantage: It causes external users to view the company more favorably. In addition, management bonuses, if based on net income, will be higher. Therefore, when prices are rising (which is usually the case), companies tend to prefer FIFO because it results in higher net income.

Some argue that the use of LIFO in a period of inflation enables the company to avoid reporting **paper** (or **phantom**) **profit** as economic gain. To illustrate, assume that Kralik Company buys 200 units of a product at \$20 per unit on January 10 and 200 more on December 31 at \$24 each. During the year, Kralik sells 200 units at \$30 each. Illustration 6-13 shows the results under FIFO and LIFO.

|                           | <u>FIFO</u>               | <u>LIFO</u>               |
|---------------------------|---------------------------|---------------------------|
| Sales (200 × \$30)        | \$6,000                   | \$6,000                   |
| <b>Cost of goods sold</b> | <b>4,000 (200 × \$20)</b> | <b>4,800 (200 × \$24)</b> |
| Gross profit              | <u>\$2,000</u>            | <u>\$1,200</u>            |

**Illustration 6-13**

Income statement effects compared

<sup>2</sup>We are assuming that Houston Electronics is a corporation, and corporations are required to pay income taxes.

Under LIFO, Kralik Company has recovered the current replacement cost (\$4,800) of the units sold. Thus, the gross profit in economic terms is real. However, under FIFO, the company has recovered only the January 10 cost (\$4,000). To replace the units sold, it must reinvest \$800 ( $200 \times \$4$ ) of the gross profit. Thus, \$800 of the gross profit is said to be phantom or illusory. As a result, reported net income is also overstated in real terms.

### BALANCE SHEET EFFECTS

A major advantage of the FIFO method is that in a period of inflation, the costs allocated to ending inventory will approximate their current cost. For example, for Houston Electronics, 400 of the 450 units in the ending inventory are costed under FIFO at the higher November 27 unit cost of \$13.

Conversely, a major shortcoming of the LIFO method is that in a period of inflation, the costs allocated to ending inventory may be significantly understated in terms of current cost. The understatement becomes greater over prolonged periods of inflation if the inventory includes goods purchased in one or more prior accounting periods. For example, **Caterpillar** has used LIFO for 50 years. Its balance sheet shows ending inventory of \$6,360 million. But the inventory's actual current cost if FIFO had been used is \$9,363 million.

### TAX EFFECTS

We have seen that both inventory on the balance sheet and net income on the income statement are higher when companies use FIFO in a period of inflation. Yet, many companies have selected LIFO. Why? The reason is that LIFO results in the lowest income taxes (because of lower net income) during times of rising prices. For example, at Houston Electronics, income taxes are \$750 under LIFO, compared to \$990 under FIFO. The tax savings of \$240 makes more cash available for use in the business.

### Helpful Hint

A tax rule, often referred to as the *LIFO conformity rule*, requires that if companies use LIFO for tax purposes they must also use it for financial reporting purposes. This means that if a company chooses the LIFO method to reduce its tax bills, it will also have to report lower net income in its financial statements.

## Using Inventory Cost Flow Methods Consistently

Whatever cost flow method a company chooses, it should use that method consistently from one accounting period to another. This approach is often referred to as the **consistency principle**, which means that a company uses the same accounting principles and methods from year to year. Consistent application enhances the comparability of financial statements over successive time periods. In contrast, using the FIFO method one year and the LIFO method the next year would make it difficult to compare the net incomes of the two years.

Although consistent application is preferred, it does not mean that a company may *never* change its inventory costing method. When a company adopts a different method, it should disclose in the financial statements the change and its effects on net income. Illustration 6-14 shows a typical disclosure, using information from financial statements of **Quaker Oats** (now a unit of **PepsiCo**).

### Illustration 6-14

Disclosure of change in cost flow method

### Quaker Oats Notes to the Financial Statements

**Note 1:** Effective July 1, the Company adopted the LIFO cost flow assumption for valuing the majority of U.S. Grocery Products inventories. The Company believes that the use of the LIFO method better matches current costs with current revenues. The effect of this change on the current year was to decrease net income by \$16.0 million.

## INTERNATIONAL INSIGHT

**Is LIFO Fair?**

**ExxonMobil Corporation**, like many U.S. companies, uses LIFO to value its inventory for financial reporting and tax purposes. In one recent year, this resulted in a cost of goods sold figure that was \$5.6 billion higher than under FIFO. By increasing cost of goods sold, ExxonMobil reduces net income, which reduces taxes. Critics say that LIFO provides an unfair “tax dodge.” As Congress looks for more sources of tax revenue, some lawmakers favor the elimination of LIFO. Supporters of LIFO argue that the method is conceptually sound because it matches current costs with current revenues. In addition, they point out that this matching provides protection against inflation.

International accounting standards do not allow the use of LIFO. Because of this, the net income of foreign oil companies such as **BP** and **Royal Dutch Shell** are not directly comparable to U.S. companies, which makes analysis difficult.

Source: David Reilly, “Big Oil’s Accounting Methods Fuel Criticism,” *Wall Street Journal* (August 8, 2006), p. C1.

**?** What are the arguments for and against the use of LIFO? (See page 310.)

## Lower-of-Cost-or-Market

The value of inventory for companies selling high-technology or fashion goods can drop very quickly due to changes in technology or fashions. These circumstances sometimes call for inventory valuation methods other than those presented so far. For example, at one time purchasing managers at **Ford** decided to make a large purchase of palladium, a precious metal used in vehicle emission devices. They made this purchase because they feared a future shortage. The shortage did not materialize, and by the end of the year the price of palladium had plummeted. Ford’s inventory was then worth \$1 billion less than its original cost. Do you think Ford’s inventory should have been stated at cost, in accordance with the cost principle, or at its lower replacement cost?

As you probably reasoned, this situation requires a departure from the cost basis of accounting. When the value of inventory is lower than its cost, companies can “write down” the inventory to its market value. This is done by valuing the inventory at the **lower-of-cost-or-market (LCM)** in the period in which the price decline occurs. LCM is an example of the accounting concept of **conservatism**, which means that the best choice among accounting alternatives is the method that is least likely to overstate assets and net income.

Companies apply LCM to the items in inventory after they have used one of the cost flow methods (specific identification, FIFO, LIFO, or average-cost) to determine cost. Under the LCM basis, market is defined as **current replacement cost**, not selling price. For a merchandising company, market is the cost of purchasing the same goods at the present time from the usual suppliers in the usual quantities. Current replacement cost is used because a decline in the replacement cost of an item usually leads to a decline in the selling price of the item.

To illustrate the application of LCM, assume that Ken Tuckie TV has the following lines of merchandise with costs and market values as indicated. LCM produces the results shown in Illustration 6-15 (page 276). Note that the amounts shown in the final column are the lower-of-cost-or-market amounts for each item.

### Study Objective [4]

Explain the lower-of-cost-or-market basis of accounting for inventories.

#### International Note

Under U.S. GAAP, companies cannot reverse inventory write-downs if inventory increases in value in subsequent periods. IFRS permits companies to reverse write-downs in some circumstances.

**Illustration 6-15**

Computation of lower-of-cost-or-market

|                  | <u>Cost</u> | <u>Market</u> | <u>Lower-of-<br/>Cost-or-Market</u> |
|------------------|-------------|---------------|-------------------------------------|
| Flatscreen TVs   | \$ 60,000   | \$ 55,000     | \$ 55,000                           |
| Satellite radios | 45,000      | 52,000        | 45,000                              |
| DVD recorders    | 48,000      | 45,000        | 45,000                              |
| DVDs             | 15,000      | 14,000        | 14,000                              |
| Total inventory  |             |               | <u><u>\$159,000</u></u>             |

## Inventory Errors

### Study Objective [5]

Indicate the effects of inventory errors on the financial statements.

Unfortunately, errors occasionally occur in accounting for inventory. In some cases, errors are caused by failure to count or price the inventory correctly. In other cases, errors occur because companies do not properly recognize the transfer of legal title to goods that are in transit. When errors occur, they affect both the income statement and the balance sheet.

### Income Statement Effects

Under a periodic inventory system, both the beginning and ending inventories appear in the income statement. The ending inventory of one period automatically becomes the beginning inventory of the next period. Thus, inventory errors affect the computation of cost of goods sold and net income in two periods.

The effects on cost of goods sold can be computed by entering incorrect data in the formula in Illustration 6-16 and then substituting the correct data.

**Illustration 6-16**

Formula for cost of goods sold

|                                |   |  |   |                             |   |                                   |
|--------------------------------|---|--|---|-----------------------------|---|-----------------------------------|
| <b>Beginning<br/>Inventory</b> | + | <b>Cost of<br/>Goods<br/>Purchased</b> | - | <b>Ending<br/>Inventory</b> | = | <b>Cost of<br/>Goods<br/>Sold</b> |
|--------------------------------|---|--|---|-----------------------------|---|-----------------------------------|

If the error understates *beginning* inventory, cost of goods sold will be understated. If the error understates *ending* inventory, cost of goods sold will be overstated. Illustration 6-17 shows the effects of inventory errors on the current year's income statement.

**Illustration 6-17**

Effects of inventory errors on current year's income statement

| <u>When Inventory Error:</u>    | <u>Cost of<br/>Goods Sold Is:</u> | <u>Net Income Is:</u> |
|---------------------------------|-----------------------------------|-----------------------|
| Understates beginning inventory | Understated                       | Overstated            |
| Overstates beginning inventory  | Overstated                        | Understated           |
| Understates ending inventory    | Overstated                        | Understated           |
| Overstates ending inventory     | Understated                       | Overstated            |

### Ethics Note

Inventory fraud increases during recessions. Such fraud includes pricing inventory at amounts in excess of its actual value, or claiming to have inventory when no inventory exists. Inventory fraud usually overstates ending inventory, thereby understating cost of goods sold and creating higher income.

So far, the effects of inventory errors are fairly straightforward. Now, though, comes the (at first) surprising part: An error in the ending inventory of the current period will have a **reverse effect on net income of the next accounting period**. Illustration 6-18 shows this effect. As you study the illustration, you will see that the reverse effect comes from the fact that understating ending inventory in 2011 results in understating beginning inventory in 2012 and overstating net income in 2012.

Over the two years, though, total net income is correct because the errors **offset each other**. Notice that total income using incorrect data is \$35,000 (\$22,000 + \$13,000), which is the same as the total income of

| <b>Sample Company</b><br>Condensed Income Statements |  |                 |                       |                 |
|--|--|-----------------|-----------------------|-----------------|
|  | <b>2011</b>  |                 | <b>2012</b>           |                 |
|  | <b>Incorrect</b>   | <b>Correct</b>  | <b>Incorrect</b>      | <b>Correct</b>  |
| Sales revenue  | \$80,000   | \$80,000        | \$90,000              | \$90,000        |
| Beginning inventory                                  | \$20,000   | \$20,000        | <b>\$12,000</b>       | <b>\$15,000</b> |
| Cost of goods purchased                              | 40,000   | 40,000          | 68,000                | 68,000          |
| Cost of goods available for sale                     | 60,000   | 60,000          | 80,000                | 83,000          |
| Ending inventory                                     | <b>12,000</b>  | <b>15,000</b>   | 23,000                | 23,000          |
| Cost of goods sold                                   | 48,000   | 45,000          | 57,000                | 60,000          |
| Gross profit   | 32,000   | 35,000          | 33,000                | 30,000          |
| Operating expenses                                   | 10,000   | 10,000          | 20,000                | 20,000          |
| Net income   | <u>\$22,000</u>  | <u>\$25,000</u> | <u>\$13,000</u>       | <u>\$10,000</u> |
|  | <b>\$(3,000)</b>   |                 | <b>\$3,000</b>        |                 |
|  | Net income understated   |                 | Net income overstated |                 |
|  | <b>The errors cancel. Thus the combined total income for the 2-year period is correct.</b> |                 |                       |                 |

\$35,000 (\$25,000 + \$10,000) using correct data. Also note in this example that an error in the beginning inventory does not result in a corresponding error in the ending inventory for that period. The correctness of the ending inventory depends entirely on the accuracy of taking and costing the inventory at the balance sheet date under the periodic inventory system.

### Balance Sheet Effects

Companies can determine the effect of ending inventory errors on the balance sheet by using the basic accounting equation: Assets = Liabilities + Owner's Equity. Errors in the ending inventory have the effects shown in Illustration 6-19.

| <b>Ending<br/>Inventory Error</b> | <b>Assets</b> | <b>Liabilities</b> | <b>Owner's Equity</b> |
|-----------------------------------|---------------|--------------------|-----------------------|
| Overstated                        | Overstated    | No effect          | Overstated            |
| Understated                       | Understated   | No effect          | Understated           |

The effect of an error in ending inventory on the subsequent period was shown in Illustration 6-18. Recall that if the error is not corrected, the combined total net income for the two periods would be correct. Thus, total owner's equity reported on the balance sheet at the end of 2012 will also be correct.

**Illustration 6-18**  
Effects of inventory errors on two years' income statements

Effects of ending inventory errors on balance sheet

## Do it!

(a) Tracy Company sells three different types of home heating stoves (wood, gas, and pellet). The cost and market value of its inventory of stoves are as follows.

|        | <b>Cost</b> | <b>Market</b> |
|--------|-------------|---------------|
| Gas    | \$ 84,000   | \$ 79,000     |
| Wood   | 250,000     | 280,000       |
| Pellet | 112,000     | 101,000       |

### LCM Basis; Inventory Errors

**action plan**

✓ Determine whether cost or market value is lower for each inventory type.

✓ Sum the lowest value of each inventory type to determine the total value of inventory.

**action plan**

✓ An ending inventory error in one period will have an equal and opposite effect on cost of goods sold and net income in the next period.

✓ After two years, the errors have offset each other.

Determine the value of the company's inventory under the lower-of-cost-or-market approach.

**Solution**

The lowest value for each inventory type is: gas \$79,000, wood \$250,000, and pellet \$101,000. The total inventory value is the sum of these amounts, \$430,000.

(b) Visual Company overstated its 2011 ending inventory by \$22,000. Determine the impact this error has on ending inventory, cost of goods sold, and owner's equity in 2011 and 2012.

**Solution**

|                    | 2011                 | 2012                |
|--------------------|----------------------|---------------------|
| Ending inventory   | \$22,000 overstated  | No effect           |
| Cost of goods sold | \$22,000 understated | \$22,000 overstated |
| Owner's equity     | \$22,000 overstated  | No effect           |

## Statement Presentation and Analysis

### Presentation

As indicated in Chapter 5, inventory is classified in the balance sheet as a current asset immediately below receivables. In a multiple-step income statement, cost of goods sold is subtracted from sales. There also should be disclosure of (1) the major inventory classifications, (2) the basis of accounting (cost, or lower-of-cost-or-market), and (3) the cost method (FIFO, LIFO, or average).

Wal-Mart Stores, Inc., for example, in its January 31, 2010, balance sheet reported inventories of \$33,160 million under current assets. The accompanying notes to the financial statements, as shown in Illustration 6-20, disclosed the following information.

**Illustration 6-20**

Inventory disclosures by Wal-Mart

Wal-Mart Stores, Inc.  
Notes to the Financial Statements

**Note 1. Summary of Significant Accounting Policies****Inventories**

The Company values inventories at the lower of cost or market as determined primarily by the retail method of accounting, using the last-in, first-out ("LIFO") method for substantially all of the Wal-Mart Stores segments' merchandise inventories. SAM'S CLUB merchandise and merchandise in our distribution warehouses are valued based on the weighted average cost using the LIFO method. Inventories of international operations are primarily valued by the retail method of accounting, using the first-in, first-out ("FIFO") method. At January 31, 2010 and 2009, our inventories valued at LIFO approximate those inventories as if they were valued at FIFO.

As indicated in this note, Wal-Mart values its inventories at the lower-of-cost-or-market using LIFO and FIFO.

## Analysis

The amount of inventory carried by a company has significant economic consequences. And inventory management is a double-edged sword that requires constant attention. On the one hand, management wants to have a great variety and quantity on hand so that customers have a wide selection and items are always in stock. But such a policy may incur high carrying costs (e.g., investment, storage, insurance, obsolescence, and damage). On the other hand, low inventory levels lead to stockouts and lost sales. Common ratios used to manage and evaluate inventory levels are inventory turnover and a related measure, days in inventory.

**Inventory turnover** measures the number of times on average the inventory is sold during the period. Its purpose is to measure the liquidity of the inventory. The inventory turnover is computed by dividing cost of goods sold by the average inventory during the period. Unless seasonal factors are significant, average inventory can be computed from the beginning and ending inventory balances. For example, **Wal-Mart** reported in its 2010 annual report a beginning inventory of \$34,511 million, an ending inventory of \$33,160 million, and cost of goods sold for the year ended January 31, 2010, of \$304,657 million. The inventory turnover formula and computation for Wal-Mart are shown below.

|                           |   |                                 |   |                           |
|---------------------------|---|---------------------------------|---|---------------------------|
| <b>Cost of Goods Sold</b> | ÷ | <b>Average Inventory</b>        | = | <b>Inventory Turnover</b> |
| \$304,657                 | ÷ | $\frac{\$33,160 + \$34,511}{2}$ | = | <b>9 times</b>            |

A variant of the inventory turnover ratio is **days in inventory**. This measures the average number of days inventory is held. It is calculated as 365 divided by the inventory turnover ratio. For example, Wal-Mart's inventory turnover of 9 times divided into 365 is approximately 40.6 days. This is the approximate time that it takes a company to sell the inventory once it arrives at the store.

There are typical levels of inventory in every industry. Companies that are able to keep their inventory at lower levels and higher turnovers and still satisfy customer needs are the most successful.

### Study Objective [6]

Compute and interpret the inventory turnover ratio.

### Illustration 6-21

Inventory turnover formula and computation for Wal-Mart

## ACCOUNTING ACROSS THE ORGANIZATION

### Improving Inventory Control with RFID

**Wal-Mart** improved its inventory control with the introduction of radio frequency identification (RFID). Much like bar codes, which tell a retailer the number of boxes of a specific product it has, RFID goes a step farther, helping to distinguish one box of a specific product from another. RFID uses technology similar to that used by keyless remotes that unlock car doors.

Companies currently use RFID to track shipments from supplier to distribution center to store. Other potential uses include monitoring product expiration dates and acting quickly on product recalls. Wal-Mart also anticipates faster returns and warranty processing using RFID. This technology will further assist Wal-Mart managers in their efforts to ensure that their store has just the right type of inventory, in just the right amount, in just the right place. Other companies are also interested in RFID. **Best Buy** has spent millions researching possible applications in its stores.

**?** Why is inventory control important to managers such as those at Wal-Mart and Best Buy? (See page 310.)

**Do it!****Inventory Turnover**

Early in 2012, Westmoreland Company switched to a just-in-time inventory system. Its sales, cost of goods sold, and inventory amounts for 2011 and 2012 are shown below.

|                     | <u>2011</u> | <u>2012</u> |
|---------------------|-------------|-------------|
| Sales revenue       | \$2,000,000 | \$1,800,000 |
| Cost of goods sold  | 1,000,000   | 910,000     |
| Beginning inventory | 290,000     | 210,000     |
| Ending inventory    | 210,000     | 50,000      |

Determine the inventory turnover and days in inventory for 2011 and 2012. Discuss the changes in the amount of inventory, the inventory turnover and days in inventory, and the amount of sales across the two years.

**action plan**

- ✓ To find the inventory turnover ratio, divide cost of goods sold by average inventory.
- ✓ To determine days in inventory, divide 365 days by the inventory turnover ratio.
- ✓ Just-in-time inventory reduces the amount of inventory on hand, which reduces carrying costs. Reducing inventory levels by too much has potential negative implications for sales.

**Solution**

|                          |   |   |  |
|--------------------------|---|---|--|
|                          | <u>2011</u>   |   | <u>2012</u>                                      |
| Inventory turnover ratio | $\frac{\$1,000,000}{(\$290,000 + \$210,000)/2} = 4$ | = | $\frac{\$910,000}{(\$210,000 + \$50,000)/2} = 7$ |
| Days in inventory        | $365 \div 4 = 91.3 \text{ days}$                    |   | $365 \div 7 = 52.1 \text{ days}$                 |

The company experienced a very significant decline in its ending inventory as a result of the just-in-time inventory. This decline improved its inventory turnover ratio and its days in inventory. However, its sales declined by 10%. It is possible that this decline was caused by the dramatic reduction in the amount of inventory that was on hand, which increased the likelihood of “stock-outs.” To determine the optimal inventory level, management must weigh the benefits of reduced inventory against the potential lost sales caused by stock-outs.

**COMPREHENSIVE****Do it! 1**

Gerald D. Englehart Company has the following inventory, purchases, and sales data for the month of March.

|            |          |                    |        |
|------------|----------|--------------------|--------|
| Inventory: | March 1  | 200 units @ \$4.00 | \$ 800 |
| Purchases: | March 10 | 500 units @ \$4.50 | 2,250  |
|            | March 20 | 400 units @ \$4.75 | 1,900  |
|            | March 30 | 300 units @ \$5.00 | 1,500  |
| Sales:     | March 15 | 500 units          |        |
|            | March 25 | 400 units          |        |

The physical inventory count on March 31 shows 500 units on hand.

**Instructions**

Under a **periodic inventory system**, determine the cost of inventory on hand at March 31 and the cost of goods sold for March under (a) (FIFO), (b) (LIFO), and (c) average-cost.

**Solution to Comprehensive Do it! 1**

The cost of goods available for sale is \$6,450, as follows.

|            |                    |                |
|------------|--------------------|----------------|
| Inventory: | 200 units @ \$4.00 | \$ 800         |
| Purchases: |                    |                |
| March 10   | 500 units @ \$4.50 | 2,250          |
| March 20   | 400 units @ \$4.75 | 1,900          |
| March 30   | 300 units @ \$5.00 | 1,500          |
| Total:     | <u>1,400</u>       | <u>\$6,450</u> |

Under a **periodic inventory system**, the cost of goods sold under each cost flow method is as follows.

**FIFO Method**

Ending inventory:

| <u>Date</u> | <u>Units</u> | <u>Unit Cost</u> | <u>Total Cost</u> |         |
|-------------|--------------|------------------|-------------------|---------|
| March 30    | 300          | \$5.00           | \$1,500           |         |
| March 20    | 200          | 4.75             | 950               | \$2,450 |

$$\text{Cost of goods sold: } \$6,450 - \$2,450 = \underline{\underline{\$4,000}}$$

**LIFO Method**

Ending inventory:

| <u>Date</u> | <u>Units</u> | <u>Unit Cost</u> | <u>Total Cost</u> |         |
|-------------|--------------|------------------|-------------------|---------|
| March 1     | 200          | \$4.00           | \$ 800            |         |
| March 10    | 300          | 4.50             | 1,350             | \$2,150 |

$$\text{Cost of goods sold: } \$6,450 - \$2,150 = \underline{\underline{\$4,300}}$$

**Average-Cost Method**

$$\text{Average unit cost: } \$6,450 \div 1,400 = \$4.607$$

$$\text{Ending inventory: } 500 \times \$4.607 = \underline{\underline{\$2,303.50}}$$

$$\text{Cost of goods sold: } \$6,450 - \$2,303.50 = \underline{\underline{\$4,146.50}}$$

**action plan**

- ✓ Compute the total goods available for sale, in both units and dollars.
- ✓ Compute the cost of ending inventory under the periodic FIFO method by allocating to the units on hand the **latest costs**.
- ✓ Compute the cost of ending inventory under the periodic LIFO method by allocating to the units on hand the **earliest costs**.
- ✓ Compute the cost of ending inventory under the periodic average-cost method by allocating to the units on hand a **weighted-average cost**.

## Summary of Study Objectives

**[1] Describe the steps in determining inventory quantities.** The steps are (1) take a physical inventory of goods on hand and (2) determine the ownership of goods in transit or on consignment.

**[2] Explain the accounting for inventories and apply the inventory cost flow methods.** The primary basis of accounting for inventories is cost. Cost of goods available for sale includes (a) cost of beginning inventory and (b) cost of

goods purchased. The inventory cost flow methods are: specific identification and three assumed cost flow methods—FIFO, LIFO, and average-cost.

**[3] Explain the financial effects of the inventory cost flow assumptions.** Companies may allocate the cost of goods available for sale to cost of goods sold and ending inventory by specific identification or by a method based on an assumed cost flow. When prices are rising, the first-in, first-out (FIFO) method results in lower cost of goods sold and higher net income than the other methods. The reverse is true when prices are falling. In the balance sheet, FIFO results in an ending inventory that is closest to current value; inventory under LIFO is the farthest from current value. LIFO results in the lowest income taxes.

**[4] Explain the lower-of-cost-or-market basis of accounting for inventories.** Companies may use the lower-of-cost-or-market (LCM) basis when the current replacement cost (market) is less than cost. Under LCM,

companies recognize the loss in the period in which the price decline occurs.

**[5] Indicate the effects of inventory errors on the financial statements.** *In the income statement of the current year:* (a) An error in beginning inventory will have a reverse effect on net income. (b) An error in ending inventory will have a similar effect on net income. In the following period, its effect on net income for that period is reversed, and total net income for the two years will be correct.

*In the balance sheet:* Ending inventory errors will have the same effect on total assets and total owner's equity and no effect on liabilities.

**[6] Compute and interpret the inventory turnover ratio.** The inventory turnover ratio is cost of goods sold divided by average inventory. To convert it to average days in inventory, divide 365 days by the inventory turnover ratio.

## Glossary

**Average-cost method** Inventory costing method that uses the weighted-average unit cost to allocate to ending inventory and cost of goods sold the cost of goods available for sale. (p. 271).

**Conservatism** Concept that dictates that when in doubt, choose the method that will be least likely to overstate assets and net income. (p. 275).

**Consigned goods** Goods held for sale by one party although ownership of the goods is retained by another party. (p. 265).

**Consistency principle** Dictates that a company use the same accounting principles and methods from year to year. (p. 274).

**Current replacement cost** The current cost to replace an inventory item. (p. 275).

**Days in inventory** Measure of the average number of days inventory is held; calculated as 365 divided by inventory turnover ratio. (p. 279).

**Finished goods inventory** Manufactured items that are completed and ready for sale. (p. 262).

**First-in, first-out (FIFO) method** Inventory costing method that assumes that the costs of the earliest goods purchased are the first to be recognized as cost of goods sold. (p. 268).

**FOB (free on board) destination** Freight terms indicating that ownership of the goods remains with the seller until the goods reach the buyer. (p. 264).

**FOB (free on board) shipping point** Freight terms indicating that ownership of the goods passes to the buyer

when the public carrier accepts the goods from the seller. (p. 264).

**Inventory turnover** A ratio that measures the number of times on average the inventory sold during the period; computed by dividing cost of goods sold by the average inventory during the period. (p. 279).

**Just-in-time (JIT) inventory method** Inventory system in which companies manufacture or purchase goods just in time for use. (p. 262).

**Last-in, first-out (LIFO) method** Inventory costing method that assumes the costs of the latest units purchased are the first to be allocated to cost of goods sold. (p. 270).

**Lower-of-cost-or-market (LCM) basis** A basis whereby inventory is stated at the lower of either its cost or its market value as determined by current replacement cost. (p. 275).

**Raw materials** Basic goods that will be used in production but have not yet been placed into production. (p. 262).

**Specific identification method** An actual physical flow costing method in which items still in inventory are specifically costed to arrive at the total cost of the ending inventory. (p. 267).

**Weighted-average unit cost** Average cost that is weighted by the number of units purchased at each unit cost. (p. 271).

**Work in process** That portion of manufactured inventory that has been placed into the production process but is not yet complete. (p. 262).

# APPENDIX 6A

## Inventory Cost Flow Methods in Perpetual Inventory Systems

What inventory cost flow methods do companies employ if they use a perpetual inventory system? Simple—they can use any of the inventory cost flow methods described in the chapter. To illustrate the application of the three assumed cost flow methods (FIFO, LIFO, and average-cost), we will use the data shown in Illustration 6A-1 and in this chapter for Houston Electronic's Astro Condenser.

### Study Objective [7]

Apply the inventory cost flow methods to perpetual inventory records.

| Houston Electronics<br>Astro Condensers |                     |       |            |                 |                  |
|---|---------------------|-------|------------|-----------------|------------------|
| Date                                    | Explanation         | Units | Units Cost | Total Cost      | Balance in Units |
| 1/1                                     | Beginning inventory | 100   | \$10       | \$ 1,000        | 100              |
| 4/15                                    | Purchases           | 200   | 11         | 2,200           | 300              |
| 8/24                                    | Purchases           | 300   | 12         | 3,600           | 600              |
| 9/10                                    | Sale                | 550   |            |                 | 50               |
| 11/27                                   | Purchases           | 400   | 13         | 5,200           | 450              |
|   |                     |       |            | <u>\$12,000</u> |                  |

**Illustration 6A-1**  
Inventoriable units and costs

### First-In, First-Out (FIFO)

Under FIFO, the company charges to cost of goods sold the cost of the earliest goods on hand **prior to each sale**. Therefore, the cost of goods sold on September 10 consists of the units on hand January 1 and the units purchased April 15 and August 24. Illustration 6A-2 shows the inventory under a FIFO method perpetual system.

| Date         | Purchases            | Cost of Goods Sold   | Balance (in units and cost)                                |
|--------------|----------------------|--|--|
| January 1    |                      |  | (100 @ \$10) \$1,000                                       |
| April 15     | (200 @ \$11) \$2,200 |  | (100 @ \$10) }<br>(200 @ \$11) } \$3,200                   |
| August 24    | (300 @ \$12) \$3,600 |  | (100 @ \$10) }<br>(200 @ \$11) } \$6,800<br>(300 @ \$12) } |
| September 10 |                      | (100 @ \$10)<br>(200 @ \$11)<br>(250 @ \$12)<br><u>\$6,200</u> | ( 50 @ \$12) \$ 600  |
| November 27  | (400 @ \$13) \$5,200 |  | ( 50 @ \$12) }<br>(400 @ \$13) } <b>\$5,800</b>            |

Cost of goods sold  
Ending inventory

**Illustration 6A-2**  
Perpetual system—FIFO

The ending inventory in this situation is \$5,800, and the cost of goods sold is \$6,200 [(100 @ \$10) + (200 @ \$11) + (250 @ \$12)].

Compare Illustrations 6-5 (page 269) and 6A-2. You can see that the results under FIFO in a perpetual system are the **same as in a periodic system**. In both cases, the ending inventory is \$5,800 and cost of goods sold is \$6,200. Regardless of the system, the first costs in are the costs assigned to cost of goods sold.

## Last-In, First-Out (LIFO)

Under the LIFO method using a perpetual system, the company charges to cost of goods sold the cost of the most recent purchase prior to sale. Therefore, the cost of the goods sold on September 10 consists of all the units from the August 24 and April 15 purchases plus 50 of the units in beginning inventory. Illustration 6A-3 shows the computation of the ending inventory under the LIFO method.

**Illustration 6A-3**  
Perpetual system—LIFO

| Date         | Purchases               | Cost of Goods Sold                           | Balance<br>(in units and cost)               |                |
|--------------|-------------------------|--|--|----------------|
| January 1    |                         |  | (100 @ \$10)                                 | \$1,000        |
| April 15     | (200 @ \$11)    \$2,200 |  | (100 @ \$10)<br>(200 @ \$11)                 | \$3,200        |
| August 24    | (300 @ \$12)    \$3,600 |  | (100 @ \$10)<br>(200 @ \$11)<br>(300 @ \$12) | \$6,800        |
| September 10 |                         | (300 @ \$12)<br>(200 @ \$11)<br>( 50 @ \$10) | (50 @ \$10)                                  | \$ 500         |
|              |                         | <b>\$6,300</b>                               |  |                |
| November 27  | (400 @ \$13)    \$5,200 |  | (50 @ \$10)<br>(400 @ \$13)                  | <b>\$5,700</b> |

Cost of goods sold

Ending inventory

The use of LIFO in a perpetual system will usually produce cost allocations that differ from those using LIFO in a periodic system. In a perpetual system, the company allocates the latest units purchased *prior to each sale* to cost of goods sold. In contrast, in a periodic system, the latest units purchased *during the period* are allocated to cost of goods sold. Thus, when a purchase is made after the last sale, the LIFO periodic system will apply this purchase to the previous sale. Compare Illustrations 6-7 (page 270) and 6A-3. Illustration 6-7 shows that the 400 units at \$13 purchased on November 27 applied to the sale of 550 units on September 10. Under the LIFO perpetual system in Illustration 6A-3, the 400 units at \$13 purchased on November 27 are all applied to the ending inventory.

The ending inventory in this LIFO perpetual illustration is \$5,700, and cost of goods sold is \$6,300, as compared to the LIFO periodic Illustration 6-7 (on page 270) where the ending inventory is \$5,000 and cost of goods sold is \$7,000.

## Average-Cost

The average-cost method in a perpetual inventory system is called the **moving-average method**. Under this method, the company computes a new average **after each purchase**, by dividing the cost of goods available for sale by the units on hand. The average cost is then applied to: (1) the units sold, to determine the cost of goods sold, and (2) the remaining units on hand, to determine the ending inventory amount. Illustration 6A-4 shows the application of the moving-average cost method by Houston Electronics.

**Illustration 6A-4**  
Perpetual system—  
average-cost method

| Date         | Purchases               | Cost of Goods Sold | Balance<br>(in units and cost) |                |
|--------------|-------------------------|--------------------|--------------------------------|----------------|
| January 1    |                         |                    | (100 @ \$10)                   | \$1,000        |
| April 15     | (200 @ \$11)    \$2,200 |                    | (300 @ \$10.667)               | \$3,200        |
| August 24    | (300 @ \$12)    \$3,600 |                    | (600 @ \$11.333)               | \$6,800        |
| September 10 |                         | (550 @ \$11.333)   | (50 @ \$11.333)                | \$ 567         |
|              |                         | <b>\$6,233</b>     |                                |                |
| November 27  | (400 @ \$13)    \$5,200 |                    | (450 @ \$12.816)               | <b>\$5,767</b> |

Cost of goods sold

Ending inventory

As indicated, Houston Electronics computes a **new average each time it makes a purchase**. On April 15, after it buys 200 units for \$2,200, a total of 300 units costing \$3,200 (\$1,000 + \$2,200) are on hand. The average unit cost is \$10.667 ( $\$3,200 \div 300$ ). On August 24, after Houston Electronics buys 300 units for \$3,600, a total of 600 units costing \$6,800 (\$1,000 + \$2,200 + \$3,600) are on hand, at an average cost per unit of \$11.333 ( $\$6,800 \div 600$ ). Houston Electronics uses this unit cost of \$11.333 in costing sales until it makes another purchase, when the company computes a new unit cost. Accordingly, the unit cost of the 550 units sold on September 10 is \$11.333, and the total cost of goods sold is \$6,233. On November 27, following the purchase of 400 units for \$5,200, there are 450 units on hand costing \$5,767 ( $\$567 + \$5,200$ ) with a new average cost of \$12.816 ( $\$5,767 \div 450$ ).

Compare this moving-average cost under the perpetual inventory system to Illustration 6-10 (on page 272) showing the average-cost method under a periodic inventory system.

## COMPREHENSIVE

### Do it! 2

Comprehensive Do it! 1 on page 280 showed cost of goods sold computations under a periodic inventory system. Now let's assume that Gerald D. Englehart Company uses a perpetual inventory system. The company has the same inventory, purchases, and sales data for the month of March as shown earlier:

|            |          |                    |        |
|------------|----------|--------------------|--------|
| Inventory: | March 1  | 200 units @ \$4.00 | \$ 800 |
| Purchases: | March 10 | 500 units @ \$4.50 | 2,250  |
|            | March 20 | 400 units @ \$4.75 | 1,900  |
|            | March 30 | 300 units @ \$5.00 | 1,500  |
| Sales:     | March 15 | 500 units          |        |
|            | March 25 | 400 units          |        |

The physical inventory count on March 31 shows 500 units on hand.

#### Instructions

Under a **perpetual inventory system**, determine the cost of inventory on hand at March 31 and the cost of goods sold for March under (a) FIFO, (b) LIFO, and (c) average-cost.

#### Solution to Comprehensive Do it! 2

The cost of goods available for sale is \$6,450, as follows.

|            |                             |                |
|------------|-----------------------------|----------------|
| Inventory: | 200 units @ \$4.00          | \$ 800         |
| Purchases: | March 10 500 units @ \$4.50 | 2,250          |
|            | March 20 400 units @ \$4.75 | 1,900          |
|            | March 30 300 units @ \$5.00 | 1,500          |
| Total:     | <u>1,400</u>                | <u>\$6,450</u> |

Under a **perpetual inventory system**, the cost of goods sold under each cost flow method is as follows.

| Date     | Purchases              | FIFO Method<br>Cost of Goods Sold | Balance                  |
|----------|------------------------|-----------------------------------|--------------------------|
| March 1  |                        |                                   | (200 @ \$4.00) \$ 800    |
| March 10 | (500 @ \$4.50) \$2,250 |                                   | (200 @ \$4.00) } \$3,050 |
|          |                        |                                   | (500 @ \$4.50) }         |

#### action plan

- ✓ Compute the cost of goods sold under the perpetual FIFO method by allocating to the goods sold the **earliest** cost of goods purchased.
- ✓ Compute the cost of goods sold under the perpetual LIFO method by allocating to the goods sold the **latest** cost of goods purchased.
- ✓ Compute the cost of goods sold under the perpetual average-cost method by allocating to the goods sold a **moving-average** cost.

| Date                              | Purchases                        | Cost of Goods Sold                                     | Balance                                      |

| March 30                          | (300 @ \$5.00) \$1,500           |  | (500 @ \$4.848) \$2,424                      |
|                                   | Ending inventory, <u>\$2,424</u> | Cost of goods sold: \$2,179 + \$1,847 = <u>\$4,026</u> |  |

## Summary of Study Objective for Appendix 6A

**[7] Apply the inventory cost flow methods to perpetual inventory records.** Under FIFO and a perpetual inventory system, companies charge to cost of goods sold the cost of the earliest goods on hand prior to each sale. Under LIFO and a perpetual system, companies charge to cost of

goods sold the cost of the most recent purchase prior to sale. Under the moving-average (average cost) method and a perpetual system, companies compute a new average cost after each purchase.

# APPENDIX 6B

## Estimating Inventories

**Study Objective [8]**  
Describe the two methods of estimating inventories.

In the chapter, we assumed that a company would be able to physically count its inventory. What if it cannot? What if the inventory were destroyed by fire or flood, for example? In that case, the company would use an estimate.

Two circumstances explain why companies sometimes estimate inventories. First, a casualty such as fire, flood, or earthquake may make it impossible to take a physical inventory. Second, managers may want monthly or quarterly financial statements, but a physical inventory is taken only annually. The need for estimating inventories occurs primarily with a periodic inventory system because of the absence of perpetual inventory records.

There are two widely used methods of estimating inventories: (1) the gross profit method, and (2) the retail inventory method.

## Gross Profit Method

The **gross profit method** estimates the cost of ending inventory by applying a gross profit rate to net sales. This method is relatively simple, but effective. Accountants, auditors, and managers frequently use the gross profit method to test the reasonableness of the ending inventory amount. It will detect large errors.

To use this method, a company needs to know its net sales, cost of goods available for sale, and gross profit rate. The company then can estimate its gross profit for the period. Illustration 6B-1 shows the formulas for using the gross profit method.

|                |   |   |   |   |   |
|----------------|---|---|---|---|---|
| <b>Step 1:</b> | <b>Net Sales</b>                                | – | <b>Estimated<br/>Gross<br/>Profit</b>       | = | <b>Estimated<br/>Cost of<br/>Goods Sold</b>       |
| <b>Step 2:</b> | <b>Cost of Goods<br/>Available for<br/>Sale</b> | – | <b>Estimated<br/>Cost of<br/>Goods Sold</b> | = | <b>Estimated<br/>Cost of<br/>Ending Inventory</b> |

**Illustration 6B-1**  
Gross profit method  
formulas

To illustrate, assume that Kishwaukee Company wishes to prepare an income statement for the month of January. Its records show net sales of \$200,000, beginning inventory \$40,000, and cost of goods purchased \$120,000. In the preceding year, the company realized a 30% gross profit rate. It expects to earn the same rate this year. Given these facts and assumptions, Kishwaukee can compute the estimated cost of the ending inventory at January 31 under the gross profit method as follows.

|  |    |                  |
|--|----|------------------|
| <b>Step 1:</b>                                 |    |                  |
| Net sales                                      |    | \$200,000        |
| Less: Estimated gross profit (30% × \$200,000) |    | 60,000           |
| <b>Estimated cost of goods sold</b>            |    | <b>\$140,000</b> |
| <b>Step 2:</b>                                 |    |                  |
| Beginning inventory                            | \$ | 40,000           |
| Cost of goods purchased                        |    | 120,000          |
| Cost of goods available for sale               |    | 160,000          |
| Less: Estimated cost of goods sold             |    | 140,000          |
| <b>Estimated cost of ending inventory</b>      |    | <b>\$ 20,000</b> |

**Illustration 6B-2**  
Example of gross profit  
method

The gross profit method is based on the assumption that the gross profit rate will remain constant. But it may not remain constant, due to a change in merchandising

policies or in market conditions. In such cases, the company should adjust the rate to reflect current operating conditions. In some cases, companies can obtain a more accurate estimate by applying this method on a department or product-line basis.

Note that companies should not use the gross profit method to prepare financial statements at the end of the year. These statements should be based on a physical inventory count.

### Retail Inventory Method

A retail store such as Home Depot, Ace Hardware, or Wal-Mart has thousands of different types of merchandise at low unit costs. In such cases, it is difficult and time-consuming to apply unit costs to inventory quantities. An alternative is to use the retail inventory method to estimate the cost of inventory. Most retail companies can establish a relationship between cost and sales price. The company then applies the cost-to-retail percentage to the ending inventory at retail prices to determine inventory at cost.

Under the retail inventory method, a company’s records must show both the cost and retail value of the goods available for sale. Illustration 6B-3 presents the formulas for using the retail inventory method.

**Illustration 6B-3**  
Retail inventory method formulas

|         |                                    |   |                                    |   |                                    |
|---------|------------------------------------|---|------------------------------------|---|------------------------------------|
| Step 1: | Goods Available for Sale at Retail | − | Net Sales                          | = | Ending Inventory at Retail         |
| Step 2: | Goods Available for Sale at Cost   | ÷ | Goods Available for Sale at Retail | = | Cost-to-Retail Ratio               |
| Step 3: | Ending Inventory at Retail         | × | Cost-to-Retail Ratio               | = | Estimated Cost of Ending Inventory |

We can demonstrate the logic of the retail method by using unit-cost data. Assume that Ortiz Inc. has marked 10 units purchased at \$7 to sell for \$10 per unit. Thus, the cost-to-retail ratio is 70% ( $\$70 \div \$100$ ). If four units remain unsold, their retail value is \$40 ( $4 \times \$10$ ), and their cost is \$28 ( $\$40 \times 70\%$ ). This amount agrees with the total cost of goods on hand on a per unit basis ( $4 \times \$7$ ).

Illustration 6B-4 shows application of the retail method for Valley West Co. Note that it is not necessary to take a physical inventory to determine the estimated cost of goods on hand at any given time.

**Illustration 6B-4**  
Application of retail inventory method

|   | At Cost         | At Retail              |
|---|-----------------|------------------------|
| Beginning inventory   | \$14,000        | \$ 21,500              |
| Goods purchased   | 61,000          | 78,500                 |
| Goods available for sale  | <u>\$75,000</u> | <u>100,000</u>         |
| Net sales   |                 | 70,000                 |
| <b>Step (1) Ending inventory at retail =</b>  |                 | <b>\$ 30,000</b>       |
| <b>Step (2) Cost-to-retail ratio <math>\\$75,000 \div \\$100,000 = 75\%</math></b>        |                 |                        |
| <b>Step (3) Estimated cost of ending inventory = <math>\\$30,000 \times 75\% =</math></b> |                 | <b><u>\$22,500</u></b> |

The retail inventory method also facilitates taking a physical inventory at the end of the year. Valley West can value the goods on hand at the prices marked on the merchandise, and then apply the cost-to-retail ratio to the goods on hand at retail to determine the ending inventory at cost.

The major disadvantage of the retail method is that it is an averaging technique. Thus, it may produce an incorrect inventory valuation if the mix of the ending inventory is not representative of the mix in the goods available for sale. Assume, for example, that the cost-to-retail ratio of 75% for Valley West Co. consists of equal proportions of inventory items that have cost-to-retail ratios of 70%, 75%, and 80%. If the ending inventory contains only items with a 70% ratio, an incorrect inventory cost will result. Companies can minimize this problem by applying the retail method on a department or product-line basis.

### Helpful Hint

In determining inventory at retail, companies use selling prices of the units.

## Summary of Study Objective for Appendix 6B

**[8] Describe the two methods of estimating inventories.** The two methods of estimating inventories are the gross profit method and the retail inventory method. Under the gross profit method, companies apply a gross profit rate to net sales to determine estimated cost of goods sold. They then subtract estimated cost of goods sold from cost of goods available for sale to determine the estimated cost of the ending inventory.

Under the retail inventory method, companies compute a cost-to-retail ratio by dividing the cost of goods available for sale by the retail value of the goods available for sale. They then apply this ratio to the ending inventory at retail to determine the estimated cost of the ending inventory.

## Glossary for Appendix 6B

**Gross profit method** A method for estimating the cost of the ending inventory by applying a gross profit rate to net sales and subtracting estimated cost of goods sold from cost of goods available for sale. (p. 287).

**Retail inventory method** A method for estimating the cost of the ending inventory by applying a cost-to-retail ratio to the ending inventory at retail. (p. 288).

Self-Test, Brief Exercises, Exercises, Problem Set A, and many more components are available for practice in *WileyPLUS*

\***Note:** All **asterisked** Questions, Exercises, and Problems relate to material in the appendix to the chapter.

## Self-Test Questions

Answers are on page 310.

- (SO 1) 1. Which of the following should *not* be included in the physical inventory of a company?
- Goods held on consignment from another company.
  - Goods shipped on consignment to another company.
  - Goods in transit from another company shipped FOB shipping point.
  - None of the above.
- (SO 1) 2. As a result of a thorough physical inventory, Railway Company determined that it had inventory worth \$180,000 at December 31, 2012. This count did not take into consideration the following facts: Rogers Consignment store currently has goods worth \$35,000 on its sales floor that belong to Railway but are being sold on consignment by

Rogers. The selling price of these goods is \$50,000. Railway purchased \$13,000 of goods that were shipped on December 27, FOB destination, that will be received by Railway on January 3. Determine the correct amount of inventory that Railway should report.

- |               |               |
|---------------|---------------|
| a. \$230,000. | c. \$228,000. |
| b. \$215,000. | d. \$193,000. |
3. Cost of goods available for sale consist of two elements: (SO 2) beginning inventory and
- ending inventory.
  - cost of goods purchased.
  - cost of goods sold.
  - All of the above.

- (SO 2) 4. Tinker Bell Company has the following:

|                   | <u>Units</u> | <u>Unit Cost</u> |
|-------------------|--------------|------------------|
| Inventory, Jan. 1 | 8,000        | \$11             |
| Purchase, June 19 | 13,000       | 12               |
| Purchase, Nov. 8  | 5,000        | 13               |

If Tinker Bell has 9,000 units on hand at December 31, the cost of the ending inventory under FIFO is:

- a. \$99,000.                      c. \$113,000.  
 b. \$108,000.                    d. \$117,000.
- (SO 2) 5. Using the data in Question 4 above, the cost of the ending inventory under LIFO is:
- a. \$113,000.                    c. \$99,000.  
 b. \$108,000.                    d. \$100,000.
- (SO 2) 6. Davidson Electronics has the following:

|                   | <u>Units</u> | <u>Unit Cost</u> |
|-------------------|--------------|------------------|
| Inventory, Jan. 1 | 5,000        | \$ 8             |
| Purchase, April 2 | 15,000       | \$10             |
| Purchase, Aug. 28 | 20,000       | \$12             |

If Davidson has 7,000 units on hand at December 31, the cost of ending inventory under the average-cost method is:

- a. \$84,000.                      c. \$56,000.  
 b. \$70,000.                      d. \$75,250.
- (SO 3) 7. In periods of rising prices, LIFO will produce:
- a. higher net income than FIFO.  
 b. the same net income as FIFO.  
 c. lower net income than FIFO.  
 d. higher net income than average costing.

- (SO 3) 8. Factors that affect the selection of an inventory costing method do *not* include:
- a. tax effects.  
 b. balance sheet effects.  
 c. income statement effects.  
 d. perpetual vs. periodic inventory system.

- (SO 4) 9. Rickety Company purchased 1,000 widgets and has 200 widgets in its ending inventory at a cost of \$91 each and a current replacement cost of \$80 each. The ending inventory under lower-of-cost-or-market is:
- a. \$91,000.                      c. \$18,200.  
 b. \$80,000.                      d. \$16,000.

- (SO 5) 10. Atlantis Company's ending inventory is understated \$4,000. The effects of this error on the current year's cost of goods sold and net income, respectively, are:
- a. understated, overstated.  
 b. overstated, understated.

c. overstated, overstated.

d. understated, understated.

11. Harold Company overstated its inventory by \$15,000 at December 31, 2011. It did not correct the error in 2011 or 2012. As a result, Harold's owner's equity was: (SO 4)
- a. overstated at December 31, 2011, and understated at December 31, 2012.  
 b. overstated at December 31, 2011, and properly stated at December 31, 2012.  
 c. understated at December 31, 2011, and understated at December 31, 2012.  
 d. overstated at December 31, 2011, and overstated at December 31, 2012.

12. Which of these would cause the inventory turnover ratio to increase the most? (SO 6)
- a. Increasing the amount of inventory on hand.  
 b. Keeping the amount of inventory on hand constant but increasing sales.  
 c. Keeping the amount of inventory on hand constant but decreasing sales.  
 d. Decreasing the amount of inventory on hand and increasing sales.

13. Carlos Company had beginning inventory of \$80,000, ending inventory of \$110,000, cost of goods sold of \$285,000, and sales of \$475,000. Carlos's days in inventory is: (SO 5)

a. 73 days.                      c. 102.5 days.

b. 121.7 days.                    d. 84.5 days.

- \*14. Songbird Company has sales of \$150,000 and cost of goods available for sale of \$135,000. If the gross profit rate is 30%, the estimated cost of the ending inventory under the gross profit method is: (SO 8)

a. \$15,000.                      c. \$45,000.

b. \$30,000.                      d. \$75,000.

- \*15. In a perpetual inventory system, (SO 7)
- a. LIFO cost of goods sold will be the same as in a periodic inventory system.  
 b. average costs are based entirely on unit cost averages.  
 c. a new average is computed under the average-cost method after each sale.  
 d. FIFO cost of goods sold will be the same as in a periodic inventory system.

## Questions

- "The key to successful business operations is effective inventory management." Do you agree? Explain.
- An item must possess two characteristics to be classified as inventory by a merchandiser. What are these two characteristics?
- Your friend Tom Witt has been hired to help take the physical inventory in Hawkeye Hardware Store. Explain to Tom Witt what this job will entail.
- (a) Reeves Company ships merchandise to Cox Company on December 30. The merchandise reaches the buyer on January 6. Indicate the terms of sale that will result in the goods being included in (1) Reeves's December 31 inventory, and (2) Cox's December 31 inventory.  
 (b) Under what circumstances should Reeves Company include consigned goods in its inventory?

5. Jim's Hat Shop received a shipment of hats for which it paid the wholesaler \$2,970. The price of the hats was \$3,000 but Jim's was given a \$30 cash discount and required to pay freight charges of \$50. In addition, Jim's paid \$130 to cover the travel expenses of an employee who negotiated the purchase of the hats. What amount will Jim's record for inventory? Why?
6. Explain the difference between the terms FOB shipping point and FOB destination.
7. David Shannon believes that the allocation of inventoriable costs should be based on the actual physical flow of the goods. Explain to David why this may be both impractical and inappropriate.
8. What is a major advantage and a major disadvantage of the specific identification method of inventory costing?
9. "The selection of an inventory cost flow method is a decision made by accountants." Do you agree? Explain. Once a method has been selected, what accounting requirement applies?
10. Which assumed inventory cost flow method:
  - (a) usually parallels the actual physical flow of merchandise?
  - (b) assumes that goods available for sale during an accounting period are identical?
  - (c) assumes that the latest units purchased are the first to be sold?
11. In a period of rising prices, the inventory reported in Plato Company's balance sheet is close to the current cost of the inventory. Cecil Company's inventory is considerably below its current cost. Identify the inventory cost flow method being used by each company. Which company has probably been reporting the higher gross profit?
12. Casey Company has been using the FIFO cost flow method during a prolonged period of rising prices. During the same time period, Casey has been paying out all of its net income as dividends. What adverse effects may result from this policy?
13. Peter Lunde is studying for the next accounting mid-term examination. What should Peter know about (a) departing from the cost basis of accounting for inventories and (b) the meaning of "market" in the lower-of-cost-or-market method?
14. Garitson Music Center has 5 CD players on hand at the balance sheet date. Each cost \$400. The current replacement cost is \$380 per unit. Under the lower-of-cost-or-market basis of accounting for inventories, what value should be reported for the CD players on the balance sheet? Why?
15. Ruthie Stores has 20 toasters on hand at the balance sheet date. Each cost \$27. The current replacement cost is \$30 per unit. Under the lower-of-cost-or-market basis of accounting for inventories, what value should Ruthie report for the toasters on the balance sheet? Why?
16. Mintz Company discovers in 2012 that its ending inventory at December 31, 2011, was \$7,000 understated. What effect will this error have on (a) 2011 net income, (b) 2012 net income, and (c) the combined net income for the 2 years?
17. Willingham Company's balance sheet shows Inventory \$162,800. What additional disclosures should be made?
18. Under what circumstances might inventory turnover be too high? That is, what possible negative consequences might occur?
19.  **PEPSICO** What inventory cost flow does PepsiCo use for its inventories? (*Hint*: you will need to examine the notes for PepsiCo's financial statements.)
- \*20. "When perpetual inventory records are kept, the results under the FIFO and LIFO methods are the same as they would be in a periodic inventory system." Do you agree? Explain.
- \*21. How does the average-cost method of inventory costing differ between a perpetual inventory system and a periodic inventory system?
- \*22. When is it necessary to estimate inventories?
- \*23. Both the gross profit method and the retail inventory method are based on averages. For each method, indicate the average used, how it is determined, and how it is applied.
- \*24. Maureen Company has net sales of \$400,000 and cost of goods available for sale of \$300,000. If the gross profit rate is 35%, what is the estimated cost of the ending inventory? Show computations.
- \*25. Milo Shoe Shop had goods available for sale in 2012 with a retail price of \$120,000. The cost of these goods was \$84,000. If sales during the period were \$80,000, what is the ending inventory at cost using the retail inventory method?

## Brief Exercises

**BE6-1** Bernard Company identifies the following items for possible inclusion in the taking of a physical inventory. Indicate whether each item should be included or excluded from the inventory taking.

- (a) Goods shipped on consignment by Bernard to another company.
- (b) Goods in transit from a supplier shipped FOB destination.
- (c) Goods sold but being held for customer pickup.
- (d) Goods held on consignment from another company.

*Identify items to be included in taking a physical inventory.*

(SO 1)

Identify the components of goods available for sale.

(SO 2)

Compute ending inventory using FIFO and LIFO.

(SO 2)

Compute the ending inventory using average-cost.

(SO 2)

Explain the financial statement effect of inventory cost flow assumptions.

(SO 3)

Explain the financial statement effect of inventory cost flow assumptions.

(SO 3)

Determine the LCM valuation using inventory categories.

(SO 4)

Determine correct income statement amounts.

(SO 5)

Compute inventory turnover and days in inventory.

(SO 6)

Apply cost flow methods to perpetual inventory records.

(SO 7)

Apply the gross profit method.

(SO 8)

Apply the retail inventory method.

(SO 8)

**BE6-2** The ledger of Charlotte Company includes the following items: (a) Freight-in, (b) Purchase Returns and Allowances, (c) Purchases, (d) Sales Discounts, (e) Purchase Discounts. Identify which items are included in goods available for sale.

**BE6-3** In its first month of operations, Danielle Company made three purchases of merchandise in the following sequence: (1) 300 units at \$6, (2) 400 units at \$7, and (3) 200 units at \$8. Assuming there are 360 units on hand, compute the cost of the ending inventory under the (a) FIFO method and (b) LIFO method. Danielle uses a periodic inventory system.

**BE6-4** Data for Danielle Company are presented in BE6-3. Compute the cost of the ending inventory under the average-cost method, assuming there are 360 units on hand.

**BE6-5** The management of Rousseau Corp. is considering the effects of various inventory-costing methods on its financial statements and its income tax expense. Assuming that the price the company pays for inventory is increasing, which method will:

- (a) provide the highest net income?
- (b) provide the highest ending inventory?
- (c) result in the lowest income tax expense?
- (d) result in the most stable earnings over a number of years?

**BE6-6** In its first month of operation, Alex Company purchased 100 units of inventory for \$6, then 200 units for \$7, and finally 150 units for \$8. At the end of the month, 180 units remained. Compute the amount of phantom profit that would result if the company used FIFO rather than LIFO. Explain why this amount is referred to as *phantom profit*. The company uses the periodic method.

**BE6-7** Tania Appliance Center accumulates the following cost and market data at December 31.

| <u>Inventory<br/>Categories</u> | <u>Cost<br/>Data</u> | <u>Market<br/>Data</u> |
|---------------------------------|----------------------|------------------------|
| Cameras                         | \$12,000             | \$12,100               |
| Camcorders                      | 9,500                | 9,700                  |
| DVD players                     | 14,000               | 12,800                 |

Compute the lower-of-cost-or-market valuation for the company's total inventory.

**BE6-8** Raymonde Company reports net income of \$90,000 in 2012. However, ending inventory was understated \$10,000. What is the correct net income for 2012? What effect, if any, will this error have on total assets as reported in the balance sheet at December 31, 2012?

**BE6-9** At December 31, 2012, the following information was available for C. Widmore Company: ending inventory \$40,000, beginning inventory \$60,000, cost of goods sold \$270,000, and sales revenue \$380,000. Calculate inventory turnover and days in inventory for C. Widmore Company.

**\*BE6-10** Pierre's Department Store uses a perpetual inventory system. Data for product E2-D2 include the following purchases.

| <u>Date</u> | <u>Number<br/>of Units</u> | <u>Unit<br/>Price</u> |
|-------------|----------------------------|-----------------------|
| May 7       | 50                         | \$10                  |
| July 28     | 30                         | 13                    |

On June 1, Pierre's sold 30 units, and on August 27, 40 more units. Prepare the perpetual inventory schedule for the above transactions using (a) FIFO, (b) LIFO, and (c) moving-average cost.

**\*BE6-11** At May 31, Chang Company has net sales of \$330,000 and cost of goods available for sale of \$230,000. Compute the estimated cost of the ending inventory, assuming the gross profit rate is 35%.

**\*BE6-12** On June 30, Francois Fabrics has the following data pertaining to the retail inventory method: Goods available for sale: at cost \$35,000, at retail \$50,000; net sales \$40,000, and ending inventory at retail \$10,000. Compute the estimated cost of the ending inventory using the retail inventory method.

## Do it! Review

**Do it! 6-1** Chau Company just took its physical inventory. The count of inventory items on hand at the company's business locations resulted in a total inventory cost of \$300,000. In reviewing the details of the count and related inventory transactions, you have discovered the following.

1. Chau has sent inventory costing \$26,000 on consignment to Nikki Company. All of this inventory was at Nikki's showrooms on December 31.
2. The company did not include in the count inventory (cost, \$20,000) that was sold on December 28, terms FOB shipping point. The goods were in transit on December 31.
3. The company did not include in the count inventory (cost, \$17,000) that was purchased with terms of FOB shipping point. The goods were in transit on December 31.

Compute the correct December 31 inventory.

*Apply rules of ownership to determine inventory cost.*  
(SO 1)

**Do it! 6-2** The accounting records of Fernandez Electronics show the following data.

|                     |                     |
|---------------------|---------------------|
| Beginning inventory | 3,000 units at \$5  |
| Purchases           | 8,000 units at \$7  |
| Sales               | 9,200 units at \$10 |

*Compute cost of goods sold under different cost flow methods.*  
(SO 2)

Determine cost of goods sold during the period under a periodic inventory system using (a) the FIFO method, (b) the LIFO method, and (c) the average-cost method. (Round unit cost to nearest tenth of a cent.)

**Do it! 6-3** (a) Kiele Company sells three different categories of tools (small, medium, and large). The cost and fair value of its inventory of tools are as follows.

|        | <u>Cost</u> | <u>Fair Value</u> |
|--------|-------------|-------------------|
| Small  | \$ 64,000   | \$ 73,000         |
| Medium | 290,000     | 260,000           |
| Large  | 152,000     | 171,000           |

*Compute inventory value under LCM.*  
(SO 4)

Determine the value of the company's inventory under the lower-of-cost-or-market approach.

(b) Sanchez Company understated its 2011 ending inventory by \$31,000. Determine the impact this error has on ending inventory, cost of goods sold, and owner's equity in 2011 and 2012.

**Do it! 6-4** Early in 2012, Paulo Company switched to a just-in-time inventory system. Its sales, cost of goods sold, and inventory amounts for 2011 and 2012 are shown below.

|                     | <u>2011</u> | <u>2012</u> |
|---------------------|-------------|-------------|
| Sales               | \$3,120,000 | \$3,713,000 |
| Cost of goods sold  | 1,200,000   | 1,425,000   |
| Beginning inventory | 180,000     | 220,000     |
| Ending inventory    | 220,000     | 80,000      |

*Compute inventory turnover ratio and assess inventory level.*  
(SO 6)

Determine the inventory turnover and days in inventory for 2011 and 2012. Discuss the changes in the amount of inventory, the inventory turnover and days in inventory, and the amount of sales across the two years.

## Exercises

**E6-1** Balboa Bank and Trust is considering giving Rodrigo Company a loan. Before doing so, they decide that further discussions with Rodrigo's accountant may be desirable. One area of particular concern is the inventory account, which has a year-end balance of \$297,000. Discussions with the accountant reveal the following.

*Determine the correct inventory amount.*  
(SO 1)

1. Rodrigo sold goods costing \$38,000 to Santoro Company, FOB shipping point, on December 28. The goods are not expected to arrive at Santoro until January 12. The goods were not included in the physical inventory because they were not in the warehouse.

2. The physical count of the inventory did not include goods costing \$95,000 that were shipped to Rodrigo FOB destination on December 27 and were still in transit at year-end.
3. Rodrigo received goods costing \$22,000 on January 2. The goods were shipped FOB shipping point on December 26 by Penelope Co. The goods were not included in the physical count.
4. Rodrigo sold goods costing \$35,000 to Naomi Co., FOB destination, on December 30. The goods were received at Naomi on January 8. They were not included in Rodrigo's physical inventory.
5. Rodrigo received goods costing \$44,000 on January 2 that were shipped FOB destination on December 29. The shipment was a rush order that was supposed to arrive December 31. This purchase was included in the ending inventory of \$297,000.

### Instructions

Determine the correct inventory amount on December 31.

*Determine the correct inventory amount.*

(SO 1)

**E6-2** Marsha Thomason, an auditor with Dorrit CPAs, is performing a review of Mikhail Company's inventory account. Mikhail did not have a good year and top management is under pressure to boost reported income. According to its records, the inventory balance at year-end was \$740,000. However, the following information was not considered when determining that amount.

1. Included in the company's count were goods with a cost of \$250,000 that the company is holding on consignment. The goods belong to Bakunin Corporation.
2. The physical count did not include goods purchased by Mikhail with a cost of \$40,000 that were shipped FOB destination on December 28 and did not arrive at Mikhail's warehouse until January 3.
3. Included in the inventory account was \$17,000 of office supplies that were stored in the warehouse and were to be used by the company's supervisors and managers during the coming year.
4. The company received an order on December 29 that was boxed and was sitting on the loading dock awaiting pick-up on December 31. The shipper picked up the goods on January 1 and delivered them on January 6. The shipping terms were FOB shipping point. The goods had a selling price of \$40,000 and a cost of \$30,000. The goods were not included in the count because they were sitting on the dock.
5. On December 29, Mikhail shipped goods with a selling price of \$80,000 and a cost of \$60,000 to Omar Sales Corporation FOB shipping point. The goods arrived on January 3. Omar Sales had only ordered goods with a selling price of \$10,000 and a cost of \$8,000. However, a sales manager at Mikhail had authorized the shipment and said that if Omar wanted to ship the goods back next week, it could.
6. Included in the count was \$40,000 of goods that were parts for a machine that the company no longer made. Given the high-tech nature of Mikhail's products, it was unlikely that these obsolete parts had any other use. However, management would prefer to keep them on the books at cost, "since that is what we paid for them, after all."

### Instructions

Prepare a schedule to determine the correct inventory amount. Provide explanations for each item above, saying why you did or did not make an adjustment for each item.

*Calculate cost of goods sold using specific identification and FIFO.*

(SO 2, 3)

**E6-3** On December 1, Nadia Electronics Ltd. has three DVD players left in stock. All are identical, all are priced to sell at \$150. One of the three DVD players left in stock, with serial #1012, was purchased on June 1 at a cost of \$100. Another, with serial #1045, was purchased on November 1 for \$90. The last player, serial #1056, was purchased on November 30 for \$80.

### Instructions

- (a) Calculate the cost of goods sold using the FIFO periodic inventory method assuming that two of the three players were sold by the end of December, Nadia Electronics' year-end.
- (b) If Nadia Electronics used the specific identification method instead of the FIFO method, how might it alter its earnings by "selectively choosing" which particular players to sell to the two customers? What would Nadia's cost of goods sold be if the company wished to minimize earnings? Maximize earnings?
- (c) Which of the two inventory methods do you recommend that Nadia use? Explain why.

*Compute inventory and cost of goods sold using FIFO and LIFO.*

(SO 2)

**E6-4** Andrea's Boards sells a snowboard, Xpert, that is popular with snowboard enthusiasts. Information relating to Andrea's purchases of Xpert snowboards during September is shown on page 295.

During the same month, 121 Xpert snowboards were sold. Andrea's uses a periodic inventory system.

| <u>Date</u> | <u>Explanation</u> | <u>Units</u> | <u>Unit Cost</u> | <u>Total Cost</u> |
|-------------|--------------------|--------------|------------------|-------------------|
| Sept. 1     | Inventory          | 26           | \$ 97            | \$ 2,522          |
| Sept. 12    | Purchases          | 45           | 102              | 4,590             |
| Sept. 19    | Purchases          | 20           | 104              | 2,080             |
| Sept. 26    | Purchases          | 50           | 105              | 5,250             |
|             | Totals             | <u>141</u>   |                  | <u>\$14,442</u>   |

**Instructions**

- (a) Compute the ending inventory at September 30 and cost of goods sold using the FIFO and LIFO methods. Prove the amount allocated to cost of goods sold under each method.
- (b) For both FIFO and LIFO, calculate the sum of ending inventory and cost of goods sold. What do you notice about the answers you found for each method?

**E6-5** Fionnula Co. uses a periodic inventory system. Its records show the following for the month of May, in which 65 units were sold.

*Compute inventory and cost of goods sold using FIFO and LIFO.*

|       |           | <u>Units</u> | <u>Unit Cost</u> | <u>Total Cost</u> |
|-------|-----------|--------------|------------------|-------------------|
| May 1 | Inventory | 30           | \$ 8             | \$240             |
| 15    | Purchases | 25           | 11               | 275               |
| 24    | Purchases | 35           | 12               | 420               |
|       | Totals    | <u>90</u>    |                  | <u>\$935</u>      |

(SO 2)

**Instructions**

Compute the ending inventory at May 31 and cost of goods sold using the FIFO and LIFO methods. Prove the amount allocated to cost of goods sold under each method.

**E6-6** Flanagan Company reports the following for the month of June.

*Compute inventory and cost of goods sold using FIFO and LIFO.*

|        |           | <u>Units</u> | <u>Unit Cost</u> | <u>Total Cost</u> |
|--------|-----------|--------------|------------------|-------------------|
| June 1 | Inventory | 200          | \$5              | \$1,000           |
| 12     | Purchase  | 300          | 6                | 1,800             |
| 23     | Purchase  | 500          | 7                | 3,500             |
| 30     | Inventory | 120          |                  |                   |

(SO 2, 3)

**Instructions**

- (a) Compute the cost of the ending inventory and the cost of goods sold under (1) FIFO and (2) LIFO.
- (b) Which costing method gives the higher ending inventory? Why?
- (c) Which method results in the higher cost of goods sold? Why?

**E6-7** Eloise Company had 100 units in beginning inventory at a total cost of \$10,000. The company purchased 200 units at a total cost of \$26,000. At the end of the year, Eloise had 80 units in ending inventory.

*Compute inventory under FIFO, LIFO, and average-cost.*

(SO 2, 3)

**Instructions**

- (a) Compute the cost of the ending inventory and the cost of goods sold under (1) FIFO, (2) LIFO, and (3) average-cost.
- (b) Which cost flow method would result in the highest net income?
- (c) Which cost flow method would result in inventories approximating current cost in the balance sheet?
- (d) Which cost flow method would result in Eloise paying the least taxes in the first year?

**E6-8** Inventory data for Flanagan Company are presented in E6-6.

*Compute inventory and cost of goods sold using average-cost.*

(SO 2, 3)

**Instructions**

- (a) Compute the cost of the ending inventory and the cost of goods sold using the average-cost method.
- (b) Will the results in (a) be higher or lower than the results under (1) FIFO and (2) LIFO?
- (c) Why is the average unit cost not \$6?

Determine ending inventory under LCM.

(SO 4)

**E6-9** Venden Camera Shop uses the lower-of-cost-or-market basis for its inventory. The following data are available at December 31.

| <u>Item</u>   | <u>Units</u> | <u>Unit Cost</u> | <u>Market</u> |
|---------------|--------------|------------------|---------------|
| Cameras:      |              |                  |               |
| Minolta       | 5            | \$170            | \$156         |
| Canon         | 6            | 150              | 152           |
| Light meters: |              |                  |               |
| Vivitar       | 12           | 125              | 115           |
| Kodak         | 14           | 120              | 135           |

#### Instructions

Determine the amount of the ending inventory by applying the lower-of-cost-or-market basis.

Compute lower-of-cost-or-market.

(SO 4)

**E6-10** Radzinsky Company applied FIFO to its inventory and got the following results for its ending inventory.

|             |                                      |
|-------------|--------------------------------------|
| Cameras     | 100 units at a cost per unit of \$65 |
| DVD players | 150 units at a cost per unit of \$75 |
| iPods       | 125 units at a cost per unit of \$80 |

The cost of purchasing units at year-end was cameras \$71, DVD players \$69, and iPods \$78.

#### Instructions

Determine the amount of ending inventory at lower-of-cost-or-market.

Determine effects of inventory errors.

(SO 5)

**E6-11** Jacob's Hardware reported cost of goods sold as follows.

|                                  | <u>2011</u>      | <u>2012</u>      |
|----------------------------------|------------------|------------------|
| Beginning inventory              | \$ 20,000        | \$ 30,000        |
| Cost of goods purchased          | 150,000          | 175,000          |
| Cost of goods available for sale | 170,000          | 205,000          |
| Ending inventory                 | 30,000           | 35,000           |
| Cost of goods sold               | <u>\$140,000</u> | <u>\$170,000</u> |

Jacob's made two errors: (1) 2011 ending inventory was overstated \$3,000, and (2) 2012 ending inventory was understated \$6,000.

#### Instructions

Compute the correct cost of goods sold for each year.

Prepare correct income statements.

(SO 5)

**E6-12** Pellegrino Watch Company reported the following income statement data for a 2-year period.

|                                  | <u>2011</u>      | <u>2012</u>      |
|----------------------------------|------------------|------------------|
| Sales revenue                    | \$210,000        | \$250,000        |
| Cost of goods sold               |                  |                  |
| Beginning inventory              | 32,000           | 44,000           |
| Cost of goods purchased          | 173,000          | 202,000          |
| Cost of goods available for sale | 205,000          | 246,000          |
| Ending inventory                 | 44,000           | 52,000           |
| Cost of goods sold               | <u>161,000</u>   | <u>194,000</u>   |
| Gross profit                     | <u>\$ 49,000</u> | <u>\$ 56,000</u> |

Pellegrino uses a periodic inventory system. The inventories at January 1, 2011, and December 31, 2012, are correct. However, the ending inventory at December 31, 2011, was overstated \$5,000.

#### Instructions

- Prepare correct income statement data for the 2 years.
- What is the cumulative effect of the inventory error on total gross profit for the 2 years?
-  Explain in a letter to the president of Pellegrino Company what has happened—i.e., the nature of the error and its effect on the financial statements.

**E6-13** This information is available for Paik's Photo Corporation for 2010, 2011, and 2012.

|                     | <u>2010</u> | <u>2011</u> | <u>2012</u> |
|---------------------|-------------|-------------|-------------|
| Beginning inventory | \$ 100,000  | \$ 300,000  | \$ 400,000  |
| Ending inventory    | 300,000     | 400,000     | 480,000     |
| Cost of goods sold  | 900,000     | 1,120,000   | 1,300,000   |
| Sales revenue       | 1,200,000   | 1,600,000   | 1,900,000   |

Compute inventory turnover, days in inventory, and gross profit rate.

(SO 6)

#### Instructions

Calculate inventory turnover, days in inventory, and gross profit rate (from Chapter 5) for Paik's Photo Corporation for 2010, 2011, and 2012. Comment on any trends.

**E6-14** The cost of goods sold computations for Target Company and Caesar Company are shown below.

|                                  | <u>Target Company</u> | <u>Caesar Company</u> |
|----------------------------------|-----------------------|-----------------------|
| Beginning inventory              | \$ 45,000             | \$ 71,000             |
| Cost of goods purchased          | 200,000               | 290,000               |
| Cost of goods available for sale | 245,000               | 361,000               |
| Ending inventory                 | 55,000                | 69,000                |
| Cost of goods sold               | <u>\$190,000</u>      | <u>\$292,000</u>      |

Compute inventory turnover and days in inventory.

(SO 6)

#### Instructions

(a) Compute inventory turnover and days in inventory for each company.

(b) Which company moves its inventory more quickly?

**\*E6-15** Hiroyuki Appliance uses a perpetual inventory system. For its flat-screen television sets, the January 1 inventory was 3 sets at \$600 each. On January 10, Hiroyuki purchased 6 units at \$660 each. The company sold 2 units on January 8 and 4 units on January 15.

Apply cost flow methods to perpetual records.

(SO 7)

#### Instructions

Compute the ending inventory under (1) FIFO, (2) LIFO, and (3) moving-average cost.

**\*E6-16** Flanagan Company reports the following for the month of June.

| <u>Date</u> | <u>Explanation</u> | <u>Units</u> | <u>Unit Cost</u> | <u>Total Cost</u> |
|-------------|--------------------|--------------|------------------|-------------------|
| June 1      | Inventory          | 200          | \$5              | \$1,000           |
| 12          | Purchase           | 300          | 6                | 1,800             |
| 23          | Purchase           | 500          | 7                | 3,500             |
| 30          | Inventory          | 120          |                  |                   |

Calculate inventory and cost of goods sold using three cost flow methods in a perpetual inventory system.

(SO 7)

#### Instructions

(a) Calculate the cost of the ending inventory and the cost of goods sold for each cost flow assumption, using a perpetual inventory system. Assume a sale of 400 units occurred on June 15 for a selling price of \$8 and a sale of 480 units on June 27 for \$9.

(b) How do the results differ from E6-6 and E6-8?

(c) Why is the average unit cost not \$6  $[(\$5 + \$6 + \$7) \div 3 = \$6]$ ?

**\*E6-17** Information about Andrea's Boards is presented in E6-4. Additional data regarding Andrea's sales of Xpert snowboards are provided below. Assume that Andrea's uses a perpetual inventory system.

Apply cost flow methods to perpetual records.

(SO 7)

| <u>Date</u> |        | <u>Units</u> | <u>Unit Price</u> | <u>Total Cost</u> |
|-------------|--------|--------------|-------------------|-------------------|
| Sept. 5     | Sale   | 12           | \$199             | \$ 2,388          |
| Sept. 16    | Sale   | 50           | 199               | 9,950             |
| Sept. 29    | Sale   | 59           | 209               | 12,331            |
|             | Totals | 121          |                   | <u>\$24,669</u>   |

#### Instructions

(a) Compute ending inventory at September 30 using FIFO, LIFO, and moving-average cost.

(b) Compare ending inventory using a perpetual inventory system to ending inventory using a periodic inventory system (from E6-4).

(c) Which inventory cost flow method (FIFO, LIFO) gives the same ending inventory value under both periodic and perpetual? Which method gives different ending inventory values?

Use the gross profit method to estimate inventory.

(SO 8)

**\*E6-18** Sanada Company reported the following information for November and December 2012.

|                               | <u>November</u> | <u>December</u> |
|-------------------------------|-----------------|-----------------|
| Cost of goods purchased       | \$500,000       | \$ 610,000      |
| Inventory, beginning-of-month | 100,000         | 120,000         |
| Inventory, end-of-month       | 120,000         | ???             |
| Sales revenue                 | 800,000         | 1,000,000       |

Sanada's ending inventory at December 31 was destroyed in a fire.

**Instructions**

- (a) Compute the gross profit rate for November.
- (b) Using the gross profit rate for November, determine the estimated cost of inventory lost in the fire.

Determine merchandise lost using the gross profit method of estimating inventory.

(SO 8)

**\*E6-19** The inventory of Dogen Company was destroyed by fire on March 1. From an examination of the accounting records, the following data for the first 2 months of the year are obtained: Sales Revenue \$51,000, Sales Returns and Allowances \$1,000, Purchases \$31,200, Freight-in \$1,200, and Purchase Returns and Allowances \$1,400.

**Instructions**

Determine the merchandise lost by fire, assuming:

- (a) A beginning inventory of \$20,000 and a gross profit rate of 40% on net sales.
- (b) A beginning inventory of \$30,000 and a gross profit rate of 30% on net sales.

Determine ending inventory at cost using retail method.

(SO 8)

**\*E6-20** Seamus Shoe Store uses the retail inventory method for its two departments, Women's Shoes and Men's Shoes. The following information for each department is obtained.

| <u>Item</u>                       | <u>Women's<br/>Shoes</u> | <u>Men's<br/>Shoes</u> |
|-----------------------------------|--------------------------|------------------------|
| Beginning inventory at cost       | \$ 32,000                | \$ 45,000              |
| Cost of goods purchased at cost   | 148,000                  | 136,300                |
| Net sales                         | 178,000                  | 185,000                |
| Beginning inventory at retail     | 46,000                   | 60,000                 |
| Cost of goods purchased at retail | 179,000                  | 185,000                |

**Instructions**

Compute the estimated cost of the ending inventory for each department under the retail inventory method.

## Exercises: Set B

Visit the book's companion website, at [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), and choose the Student Companion site to access Exercise Set B.

## Problems: Set A

Determine items and amounts to be recorded in inventory.

(SO 1)

**P6-1A** Toledo Limited is trying to determine the value of its ending inventory at February 28, 2012, the company's year-end. The accountant counted everything that was in the warehouse as of February 28, which resulted in an ending inventory valuation of \$48,000. However, she didn't know how to treat the following transactions so she didn't record them.

- (a) On February 26, Toledo shipped to a customer goods costing \$800. The goods were shipped FOB shipping point, and the receiving report indicates that the customer received the goods on March 2.
- (b) On February 26, Grisel Inc. shipped goods to Toledo FOB destination. The invoice price was \$350. The receiving report indicates that the goods were received by Toledo on March 2.
- (c) Toledo had \$500 of inventory at a customer's warehouse "on approval." The customer was going to let Toledo know whether it wanted the merchandise by the end of the week, March 4.
- (d) Toledo also had \$400 of inventory on consignment at a Balboa craft shop.
- (e) On February 26, Toledo ordered goods costing \$750. The goods were shipped FOB shipping point on February 27. Toledo received the goods on March 1.

- (f) On February 28, Toledo packaged goods and had them ready for shipping to a customer FOB destination. The invoice price was \$350; the cost of the items was \$250. The receiving report indicates that the goods were received by the customer on March 2.
- (g) Toledo had damaged goods set aside in the warehouse because they are no longer saleable. These goods originally cost \$400 and, originally, Toledo expected to sell these items for \$600.

**Instructions**

For each of the above transactions, specify whether the item in question should be included in ending inventory, and if so, at what amount. For each item that is not included in ending inventory, indicate who owns it and what account, if any, it should have been recorded in.

**P6-2A** Kyoto Distribution markets CDs of the performing artist A. A. Bondy. At the beginning of March, Kyoto had in beginning inventory 1,500 Bondy CDs with a unit cost of \$7. During March Kyoto made the following purchases of Bondy CDs.

|          |             |          |              |
|----------|-------------|----------|--------------|
| March 5  | 3,000 @ \$8 | March 21 | 4,000 @ \$10 |
| March 13 | 5,500 @ \$9 | March 26 | 2,000 @ \$11 |

During March 12,500 units were sold. Kyoto uses a periodic inventory system.

**Instructions**

- (a) Determine the cost of goods available for sale.
- (b) Determine (1) the ending inventory and (2) the cost of goods sold under each of the assumed cost flow methods (FIFO, LIFO, and average-cost). Prove the accuracy of the cost of goods sold under the FIFO and LIFO methods.
- (c) Which cost flow method results in (1) the highest inventory amount for the balance sheet and (2) the highest cost of goods sold for the income statement?

*Determine cost of goods sold and ending inventory using FIFO, LIFO, and average-cost with analysis.*

(SO 2, 3)

**P6-3A** Lu Company had a beginning inventory of 400 units of Product Ribo at a cost of \$8 per unit. During the year, purchases were:

|         |                   |         |                   |
|---------|-------------------|---------|-------------------|
| Feb. 20 | 600 units at \$9  | Aug. 12 | 300 units at \$11 |
| May 5   | 500 units at \$10 | Dec. 8  | 200 units at \$12 |

Lu Company uses a periodic inventory system. Sales totaled 1,500 units.

**Instructions**

- (a) Determine the cost of goods available for sale.
- (b) Determine (1) the ending inventory, and (2) the cost of goods sold under each of the assumed cost flow methods (FIFO, LIFO, and average). Prove the accuracy of the cost of goods sold under the FIFO and LIFO methods.
- (c) Which cost flow method results in (1) the lowest inventory amount for the balance sheet, and (2) the lowest cost of goods sold for the income statement?

(b)(2) Cost of goods sold:  
 FIFO \$109,000  
 LIFO \$119,500  
 Average \$114,062

*Determine cost of goods sold and ending inventory using FIFO, LIFO, and average-cost with analysis.*

(SO 2, 3)

**P6-4A** The management of Reiko Co. is reevaluating the appropriateness of using its present inventory cost flow method, which is average-cost. They request your help in determining the results of operations for 2012 if either the FIFO method or the LIFO method had been used. For 2012, the accounting records show the following data.

| Inventories              |          | Purchases and Sales                           |           |
|--------------------------|----------|---|-----------|
| Beginning (15,000 units) | \$32,000 | Total net sales (215,000 units)               | \$865,000 |
| Ending (30,000 units)    |          | Total cost of goods purchased (230,000 units) | 595,000   |

Purchases were made quarterly as follows.

| Quarter | Units          | Unit Cost | Total Cost       |
|---------|----------------|-----------|------------------|
| 1       | 60,000         | \$2.40    | \$144,000        |
| 2       | 50,000         | 2.50      | 125,000          |
| 3       | 50,000         | 2.60      | 130,000          |
| 4       | 70,000         | 2.80      | 196,000          |
|         | <u>230,000</u> |           | <u>\$595,000</u> |

*Compute ending inventory, prepare income statements, and answer questions using FIFO and LIFO.*

(SO 2, 3)

Operating expenses were \$147,000, and the company's income tax rate is 34%.

- (a) Net income  
 FIFO \$115,500  
 LIFO \$104,940
- (b)(4) \$5,440

Calculate ending inventory, cost of goods sold, gross profit, and gross profit rate under periodic method; compare results.

(SO 2, 3)

- (a)(iii) Gross profit:  
 LIFO \$3,050  
 FIFO \$3,230  
 Average \$3,141

Compare specific identification, FIFO and LIFO under periodic method; use cost flow assumption to influence earnings.

(SO 2, 3)

- (a) Gross profit:  
 (1) Maximum \$166,750  
 (2) Minimum \$157,750

Compute ending inventory, prepare income statements, and answer questions using FIFO and LIFO.

(SO 2, 3)

**Instructions**

- (a) Prepare comparative condensed income statements for 2012 under FIFO and LIFO. (Show computations of ending inventory.)
- (b)  Answer the following questions for management.
  - (1) Which cost flow method (FIFO or LIFO) produces the more meaningful inventory amount for the balance sheet? Why?
  - (2) Which cost flow method (FIFO or LIFO) produces the more meaningful net income? Why?
  - (3) Which cost flow method (FIFO or LIFO) is more likely to approximate actual physical flow of the goods? Why?
  - (4) How much additional cash will be available for management under LIFO than under FIFO? Why?
  - (5) Will gross profit under the average-cost method be higher or lower than (i) FIFO and (ii) LIFO? (Note: It is not necessary to quantify your answer.)

**P6-5A** You are provided with the following information for Aylesworth Inc. for the month ended October 31, 2012. Aylesworth uses a periodic method for inventory.

| Date       | Description         | Units | Unit Cost or Selling Price |
|------------|---------------------|-------|----------------------------|
| October 1  | Beginning inventory | 60    | \$25                       |
| October 9  | Purchase            | 120   | 26                         |
| October 11 | Sale                | 100   | 35                         |
| October 17 | Purchase            | 70    | 27                         |
| October 22 | Sale                | 60    | 40                         |
| October 25 | Purchase            | 80    | 28                         |
| October 29 | Sale                | 110   | 40                         |

**Instructions**

- (a) Calculate (i) ending inventory, (ii) cost of goods sold, (iii) gross profit, and (iv) gross profit rate under each of the following methods.
  - (1) LIFO.
  - (2) FIFO.
  - (3) Average-cost.
- (b) Compare results for the three cost flow assumptions.

**P6-6A** You have the following information for Goodspeed Diamonds. Goodspeed Diamonds uses the periodic method of accounting for its inventory transactions. Goodspeed only carries one brand and size of diamonds—all are identical. Each batch of diamonds purchased is carefully coded and marked with its purchase cost.

|          |  |
|----------|--|
| March 1  | Beginning inventory 150 diamonds at a cost of \$300 per diamond. |
| March 3  | Purchased 200 diamonds at a cost of \$350 each.                  |
| March 5  | Sold 180 diamonds for \$600 each.                                |
| March 10 | Purchased 350 diamonds at a cost of \$375 each.                  |
| March 25 | Sold 400 diamonds for \$650 each.                                |

**Instructions**

- (a) Assume that Goodspeed Diamonds uses the specific identification cost flow method.
  - (1) Demonstrate how Goodspeed Diamonds could maximize its gross profit for the month by specifically selecting which diamonds to sell on March 5 and March 25.
  - (2) Demonstrate how Goodspeed Diamonds could minimize its gross profit for the month by selecting which diamonds to sell on March 5 and March 25.
- (b) Assume that Goodspeed Diamonds uses the FIFO cost flow assumption. Calculate cost of goods sold. How much gross profit would Goodspeed Diamonds report under this cost flow assumption?
- (c) Assume that Goodspeed Diamonds uses the LIFO cost flow assumption. Calculate cost of goods sold. How much gross profit would the company report under this cost flow assumption?
- (d) Which cost flow method should Goodspeed Diamonds select? Explain.

**P6-7A** The management of Hillary Inc. asks your help in determining the comparative effects of the FIFO and LIFO inventory cost flow methods. For 2012, the accounting records provide the data shown on page 301.

|                                     |           |
|-------------------------------------|-----------|
| Inventory, January 1 (10,000 units) | \$ 35,000 |
| Cost of 120,000 units purchased     | 504,500   |
| Selling price of 100,000 units sold | 665,000   |
| Operating expenses                  | 130,000   |

Units purchased consisted of 35,000 units at \$4.00 on May 10; 60,000 units at \$4.20 on August 15; and 25,000 units at \$4.50 on November 20. Income taxes are 28%.

**Instructions**

- (a) Prepare comparative condensed income statements for 2012 under FIFO and LIFO. (Show computations of ending inventory.)
- (b)  Answer the following questions for management in the form of a business letter.
  - (1) Which inventory cost flow method produces the most meaningful inventory amount for the balance sheet? Why?
  - (2) Which inventory cost flow method produces the most meaningful net income? Why?
  - (3) Which inventory cost flow method is most likely to approximate the actual physical flow of the goods? Why?
  - (4) How much more cash will be available for management under LIFO than under FIFO? Why?
  - (5) How much of the gross profit under FIFO is illusionary in comparison with the gross profit under LIFO?

Gross profit:  
 FIFO \$259,000  
 LIFO \$240,500

**\*P6-8A** Yemi Ltd. is a retailer operating in Edmonton, Alberta. Yemi uses the perpetual inventory method. All sales returns from customers result in the goods being returned to inventory; the inventory is not damaged. Assume that there are no credit transactions; all amounts are settled in cash. You are provided with the following information for Yemi Ltd. for the month of January 2012.

*Calculate cost of goods sold and ending inventory for FIFO, moving-average cost, and LIFO under the perpetual system; compare gross profit under each assumption.*  
 (SO 7)

| <u>Date</u> | <u>Description</u> | <u>Quantity</u> | <u>Unit Cost or Selling Price</u> |
|-------------|--------------------|-----------------|-----------------------------------|
| December 31 | Ending inventory   | 150             | \$17                              |
| January 2   | Purchase           | 100             | 21                                |
| January 6   | Sale               | 150             | 40                                |
| January 9   | Sale return        | 10              | 40                                |
| January 9   | Purchase           | 75              | 24                                |
| January 10  | Purchase return    | 15              | 24                                |
| January 10  | Sale               | 50              | 45                                |
| January 23  | Purchase           | 100             | 28                                |
| January 30  | Sale               | 110             | 50                                |

**Instructions**

- (a) For each of the following cost flow assumptions, calculate (i) cost of goods sold, (ii) ending inventory, and (iii) gross profit.
  - (1) LIFO.      (2) FIFO.      (3) Moving-average cost.
- (b) Compare results for the three cost flow assumptions.

Gross profit:  
 LIFO \$6,330  
 FIFO \$7,500  
 Average \$7,090

**\*P6-9A** Farman Appliance Mart began operations on May 1. It uses a perpetual inventory system. During May, the company had the following purchases and sales for its Model 25 Sureshot camera.

*Determine ending inventory under a perpetual inventory system.*  
 (SO 7)

| <u>Date</u> | <u>Purchases</u> |                  | <u>Sales Units</u> |
|-------------|------------------|------------------|--------------------|
|             | <u>Units</u>     | <u>Unit Cost</u> |                    |
| May 1       | 7                | \$150            |                    |
| 4           |                  |                  | 4                  |
| 8           | 8                | \$170            |                    |
| 12          |                  |                  | 5                  |
| 15          | 6                | \$185            |                    |
| 20          |                  |                  | 3                  |
| 25          |                  |                  | 4                  |

**Instructions**

- (a) Determine the ending inventory under a perpetual inventory system using (1) FIFO, (2) moving-average cost, and (3) LIFO.
- (b) Which costing method produces (1) the highest ending inventory valuation and (2) the lowest ending inventory valuation?

(a) FIFO \$925  
 Average \$874  
 LIFO \$790

Estimate inventory loss using gross profit method.

(SO 8)

**\*P6-10A** Jae Company lost 70% of its inventory in a fire on March 25, 2012. The accounting records showed the following gross profit data for February and March.

|                     | <u>February</u> | <u>March</u><br><u>(to 3/25)</u> |
|---------------------|-----------------|----------------------------------|
| Net sales           | \$300,000       | \$250,000                        |
| Net purchases       | 197,800         | 191,000                          |
| Freight-in          | 2,900           | 4,000                            |
| Beginning inventory | 4,500           | 13,200                           |
| Ending inventory    | 13,200          | ?                                |

Jae Company is fully insured for fire losses but must prepare a report for the insurance company.

#### Instructions

- (a) Compute the gross profit rate for the month of February.
- (b) Using the gross profit rate for February, determine both the estimated total inventory and inventory lost in the fire in March.

Compute ending inventory using retail method.

(SO 8)

**\*P6-11A** Marin Department Store uses the retail inventory method to estimate its monthly ending inventories. The following information is available for two of its departments at August 31, 2012.

|                     | <u>Sporting Goods</u> |               | <u>Jewelry and Cosmetics</u> |               |
|---------------------|-----------------------|---------------|------------------------------|---------------|
|                     | <u>Cost</u>           | <u>Retail</u> | <u>Cost</u>                  | <u>Retail</u> |
| Net sales           |                       | \$1,000,000   |                              | \$1,160,000   |
| Purchases           | \$675,000             | 1,066,000     | \$741,000                    | 1,158,000     |
| Purchase returns    | (26,000)              | (40,000)      | (12,000)                     | (20,000)      |
| Purchase discounts  | (12,360)              | —             | (2,440)                      | —             |
| Freight-in          | 9,000                 | —             | 14,000                       | —             |
| Beginning inventory | 47,360                | 74,000        | 39,440                       | 62,000        |

At December 31, Marin Department Store takes a physical inventory at retail. The actual retail values of the inventories in each department are Sporting Goods \$95,000, and Jewelry and Cosmetics \$44,000.

#### Instructions

- (a) Determine the estimated cost of the ending inventory for each department on **August 31**, 2012, using the retail inventory method.
- (b) Compute the ending inventory at cost for each department at **December 31**, assuming the cost-to-retail ratios are 60% for Sporting Goods and 64% for Jewelry and Cosmetics.

## Problems: Set B

Determine items and amounts to be recorded in inventory.

(SO 1)

**P6-1B** Titus Manin Black Limited is trying to determine the value of its ending inventory as of February 28, 2012, the company's year-end. The following transactions occurred, and the accountant asked your help in determining whether they should be recorded or not.

- (a) On February 26, Titus shipped goods costing \$800 to a customer and charged the customer \$1,000. The goods were shipped with terms FOB shipping point and the receiving report indicates that the customer received the goods on March 2.
- (b) On February 26, Welliver Inc. shipped goods to Titus under terms FOB shipping point. The invoice price was \$450 plus \$30 for freight. The receiving report indicates that the goods were received by Titus on March 2.
- (c) Titus had \$650 of inventory isolated in the warehouse. The inventory is designated for a customer who has requested that the goods be shipped on March 10.
- (d) Also included in Titus's warehouse is \$700 of inventory that Ishii Producers shipped to Titus on consignment.
- (e) On February 26, Titus issued a purchase order to acquire goods costing \$900. The goods were shipped with terms FOB destination on February 27. Titus received the goods on March 2.

- (f) On February 26, Titus shipped goods to a customer under terms FOB destination. The invoice price was \$350; the cost of the items was \$200. The receiving report indicates that the goods were received by the customer on March 2.

**Instructions**

For each of the above transactions, specify whether the item in question should be included in ending inventory, and if so, at what amount.

**P6-2B** Achilles Distribution markets CDs of the performing artist Vandyver. At the beginning of October, Achilles had in beginning inventory 2,000 of Vandyver’s CDs with a unit cost of \$7. During October Achilles made the following purchases of Vandyver’s CDs.

|        |             |         |              |
|--------|-------------|---------|--------------|
| Oct. 3 | 3,000 @ \$8 | Oct. 19 | 3,000 @ \$10 |
| Oct. 9 | 3,500 @ \$9 | Oct. 25 | 3,500 @ \$11 |

During October, 11,400 units were sold. Achilles uses a periodic inventory system.

**Instructions**

- (a) Determine the cost of goods available for sale.  
 (b) Determine (1) the ending inventory and (2) the cost of goods sold under each of the assumed cost flow methods (FIFO, LIFO, and average-cost). Prove the accuracy of the cost of goods sold under the FIFO and LIFO methods.  
 (c) Which cost flow method results in (1) the highest inventory amount for the balance sheet and (2) the highest cost of goods sold for the income statement?

*Determine cost of goods sold and ending inventory using FIFO, LIFO, and average-cost with analysis.*

(SO 2, 3)

(b)(2) Cost of goods sold:

|         |           |
|---------|-----------|
| FIFO    | \$98,500  |
| LIFO    | \$111,200 |
| Average | \$104,880 |

**P6-3B** Gacis Company had a beginning inventory on January 1 of 150 units of Product 4-18-15 at a cost of \$20 per unit. During the year, the following purchases were made.

|         |                   |         |                   |
|---------|-------------------|---------|-------------------|
| Mar. 15 | 400 units at \$23 | Sept. 4 | 350 units at \$26 |
| July 20 | 250 units at \$24 | Dec. 2  | 100 units at \$29 |

1,000 units were sold. Gacis Company uses a periodic inventory system.

**Instructions**

- (a) Determine the cost of goods available for sale.  
 (b) Determine (1) the ending inventory, and (2) the cost of goods sold under each of the assumed cost flow methods (FIFO, LIFO, and average-cost). Prove the accuracy of the cost of goods sold under the FIFO and LIFO methods.  
 (c) Which cost flow method results in (1) the highest inventory amount for the balance sheet, and (2) the highest cost of goods sold for the income statement?

*Determine cost of goods sold and ending inventory, using FIFO, LIFO, and average-cost with analysis.*

(SO 2, 3)

(b)(2) Cost of goods sold:

|         |          |
|---------|----------|
| FIFO    | \$23,400 |
| LIFO    | \$24,900 |
| Average | \$24,160 |

**P6-4B** The management of Perrineau Inc. is reevaluating the appropriateness of using its present inventory cost flow method, which is average-cost. The company requests your help in determining the results of operations for 2012 if either the FIFO or the LIFO method had been used. For 2012, the accounting records show these data:

*Compute ending inventory, prepare income statements, and answer questions using FIFO and LIFO.*

(SO 2, 3)

| Inventories             |          | Purchases and Sales                           |           |
|-------------------------|----------|---|-----------|
| Beginning (8,000 units) | \$16,000 | Total net sales (180,000 units)               | \$747,000 |
| Ending (18,000 units)   |          | Total cost of goods purchased (190,000 units) | 468,000   |

Purchases were made quarterly as follows.

| Quarter | Units          | Unit Cost | Total Cost       |
|---------|----------------|-----------|------------------|
| 1       | 50,000         | \$2.20    | \$110,000        |
| 2       | 40,000         | 2.40      | 96,000           |
| 3       | 40,000         | 2.50      | 100,000          |
| 4       | 60,000         | 2.70      | 162,000          |
|         | <u>190,000</u> |           | <u>\$468,000</u> |

Operating expenses were \$130,000, and the company’s income tax rate is 40%.

**Instructions**

- (a) Prepare comparative condensed income statements for 2012 under FIFO and LIFO. (Show computations of ending inventory.)

(a) Gross profit:

|      |           |
|------|-----------|
| FIFO | \$311,600 |
| LIFO | \$301,000 |

- (b)  Answer the following questions for management.
- (1) Which cost flow method (FIFO or LIFO) produces the more meaningful inventory amount for the balance sheet? Why?
  - (2) Which cost flow method (FIFO or LIFO) produces the more meaningful net income? Why?
  - (3) Which cost flow method (FIFO or LIFO) is more likely to approximate the actual physical flow of goods? Why?
  - (4) How much more cash will be available for management under LIFO than under FIFO? Why?
  - (5) Will gross profit under the average-cost method be higher or lower than FIFO? Than LIFO? (*Note:* It is not necessary to quantify your answer.)

Calculate ending inventory, cost of goods sold, gross profit, and gross profit rate under periodic method; compare results.

(SO 2, 3)

**P6-5B** You are provided with the following information for Guillaume Inc. for the month ended June 30, 2012. Guillaume uses the periodic method for inventory.

| Date    | Description         | Quantity | Unit Cost or Selling Price |
|---------|---------------------|----------|----------------------------|
| June 1  | Beginning inventory | 40       | \$40                       |
| June 4  | Purchase            | 135      | 44                         |
| June 10 | Sale                | 110      | 70                         |
| June 11 | Sale return         | 15       | 70                         |
| June 18 | Purchase            | 55       | 46                         |
| June 18 | Purchase return     | 10       | 46                         |
| June 25 | Sale                | 65       | 75                         |
| June 28 | Purchase            | 30       | 50                         |

**Instructions**

- (a) Calculate (i) ending inventory, (ii) cost of goods sold, (iii) gross profit, and (iv) gross profit rate under each of the following methods.
- (1) LIFO.      (2) FIFO.      (3) Average-cost.
- (b) Compare results for the three cost flow assumptions.

(a)(iii) Gross profit:  
 LIFO      \$4,215  
 FIFO      \$4,645  
 Average   \$4,414.60

Compare specific identification, FIFO, and LIFO under periodic method; use cost flow assumption to justify price increase.

(SO 2, 3)

**P6-6B** You are provided with the following information for Dabinpons Inc. Dabinpons Inc. uses the periodic method of accounting for its inventory transactions.

|          |  |
|----------|--|
| March 1  | Beginning inventory 2,000 liters at a cost of 60¢ per liter. |
| March 3  | Purchased 2,500 liters at a cost of 65¢ per liter.           |
| March 5  | Sold 2,200 liters for \$1.05 per liter.                      |
| March 10 | Purchased 4,000 liters at a cost of 72¢ per liter.           |
| March 20 | Purchased 2,500 liters at a cost of 80¢ per liter.           |
| March 30 | Sold 5,000 liters for \$1.25 per liter.                      |

**Instructions**

- (a) Prepare partial income statements through gross profit, and calculate the value of ending inventory that would be reported on the balance sheet, under each of the following cost flow assumptions. Round ending inventory and cost of goods sold to the nearest dollar.
- (1) Specific identification method assuming:
    - (i) The March 5 sale consisted of 1,100 liters from the March 1 beginning inventory and 1,100 liters from the March 3 purchase; and
    - (ii) The March 30 sale consisted of the following number of units sold from beginning inventory and each purchase: 450 liters from March 1; 550 liters from March 3; 2,900 liters from March 10; 1,100 liters from March 20.
  - (2) FIFO.
  - (3) LIFO.
- (b) How can companies use a cost flow method to justify price increases? Which cost flow method would best support an argument to increase prices?

(a)(1) Gross profit:  
 Specific identification  
                                  \$3,590

(2) FIFO      \$3,791  
 (3) LIFO      \$3,225

Compute ending inventory, prepare income statements, and answer questions using FIFO and LIFO.

(SO 2, 3)

**P6-7B** The management of Tamara Co. asks your help in determining the comparative effects of the FIFO and LIFO inventory cost flow methods. For 2012, the accounting records provide the data shown on page 305.

|                                     |           |
|-------------------------------------|-----------|
| Inventory, January 1 (10,000 units) | \$ 45,000 |
| Cost of 100,000 units purchased     | 532,000   |
| Selling price of 80,000 units sold  | 700,000   |
| Operating expenses                  | 140,000   |

Units purchased consisted of 35,000 units at \$5.10 on May 10; 35,000 units at \$5.30 on August 15; and 30,000 units at \$5.60 on November 20. Income taxes are 30%.

**Instructions**

- (a) Prepare comparative condensed income statements for 2012 under FIFO and LIFO. (Show computations of ending inventory.)
- (b)  Answer the following questions for management.
  - (1) Which inventory cost flow method produces the most meaningful inventory amount for the balance sheet? Why?
  - (2) Which inventory cost flow method produces the most meaningful net income? Why?
  - (3) Which inventory cost flow method is most likely to approximate actual physical flow of the goods? Why?
  - (4) How much additional cash will be available for management under LIFO than under FIFO? Why?
  - (5) How much of the gross profit under FIFO is illusory in comparison with the gross profit under LIFO?

(a) Net income  
 FIFO \$105,700  
 LIFO \$91,000

**\*P6-8B** Ticotin Inc. is a retailer operating in British Columbia. Ticotin uses the perpetual inventory method. All sales returns from customers result in the goods being returned to inventory; the inventory is not damaged. Assume that there are no credit transactions; all amounts are settled in cash. You are provided with the following information for Ticotin Inc. for the month of January 2012.

*Calculate cost of goods sold and ending inventory under LIFO, FIFO, and moving-average cost under the perpetual system; compare gross profit under each assumption.*  
 (SO 7)

| Date       | Description         | Quantity | Unit Cost or Selling Price |
|------------|---------------------|----------|----------------------------|
| January 1  | Beginning inventory | 100      | \$15                       |
| January 5  | Purchase            | 150      | 18                         |
| January 8  | Sale                | 110      | 28                         |
| January 10 | Sale return         | 10       | 28                         |
| January 15 | Purchase            | 55       | 20                         |
| January 16 | Purchase return     | 5        | 20                         |
| January 20 | Sale                | 80       | 32                         |
| January 25 | Purchase            | 30       | 22                         |

**Instructions**

- (a) For each of the following cost flow assumptions, calculate (i) cost of goods sold, (ii) ending inventory, and (iii) gross profit.
  - (1) LIFO.      (2) FIFO.      (3) Moving-average cost.
- (b) Compare results for the three cost flow assumptions.

Gross profit:  
 LIFO \$2,020  
 FIFO \$2,420  
 Average \$2,272

**\*P6-9B** Cortez Co. began operations on July 1. It uses a perpetual inventory system. During July, the company had the following purchases and sales.

*Determine ending inventory under a perpetual inventory system.*  
 (SO 7)

| Date    | Purchases |           | Sales Units |
|---------|-----------|-----------|-------------|
|         | Units     | Unit Cost |             |
| July 1  | 5         | \$120     |             |
| July 6  |           |           | 4           |
| July 11 | 7         | \$136     |             |
| July 14 |           |           | 3           |
| July 21 | 8         | \$147     |             |
| July 27 |           |           | 6           |

**Instructions**

- (a) Determine the ending inventory under a perpetual inventory system using (1) FIFO, (2) moving-average cost, and (3) LIFO.
- (b) Which costing method produces the highest ending inventory valuation?

(a) Ending inventory  
 FIFO \$1,029  
 Avg. \$994  
 LIFO \$958

Compute gross profit rate and inventory loss using gross profit method.

(SO 8)

**\*P6-10B** Bottitta Company lost all of its inventory in a fire on December 26, 2012. The accounting records showed the following gross profit data for November and December.

|                                 | <u>November</u> | <u>December<br/>(to 12/26)</u> |
|---------------------------------|-----------------|--------------------------------|
| Net sales                       | \$600,000       | \$700,000                      |
| Beginning inventory             | 32,000          | 36,000                         |
| Purchases                       | 377,000         | 424,000                        |
| Purchase returns and allowances | 13,300          | 14,900                         |
| Purchase discounts              | 8,500           | 9,500                          |
| Freight-in                      | 8,800           | 9,900                          |
| Ending inventory                | 36,000          | ?                              |

Bottitta is fully insured for fire losses but must prepare a report for the insurance company.

#### Instructions

- Compute the gross profit rate for November.
- Using the gross profit rate for November, determine the estimated cost of the inventory lost in the fire.

Compute ending inventory using retail method.

(SO 8)

**\*P6-11B** Farooqui Books uses the retail inventory method to estimate its monthly ending inventories. The following information is available for two of its departments at October 31, 2012.

|                     | <u>Hardcovers</u> |               | <u>Paperbacks</u> |               |
|---------------------|-------------------|---------------|-------------------|---------------|
|                     | <u>Cost</u>       | <u>Retail</u> | <u>Cost</u>       | <u>Retail</u> |
| Beginning inventory | \$ 420,000        | \$ 700,000    | \$ 280,000        | \$ 360,000    |
| Purchases           | 2,135,000         | 3,200,000     | 1,155,000         | 1,540,000     |
| Freight-in          | 24,000            |               | 12,000            |               |
| Purchase discounts  | 44,000            |               | 22,000            |               |
| Net sales           |                   | 3,100,000     |                   | 1,570,000     |

At December 31, Farooqui Books takes a physical inventory at retail. The actual retail values of the inventories in each department are Hardcovers \$790,000 and Paperbacks \$335,000.

#### Instructions

- Determine the estimated cost of the ending inventory for each department at **October 31, 2012**, using the retail inventory method.
- Compute the ending inventory at cost for each department at **December 31**, assuming the cost-to-retail ratios for the year are 65% for hardcovers and 75% for paperbacks.

## Problems: Set C

Visit the book's companion website, at [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), and choose the Student Companion site to access Problem Set C.

## Comprehensive Problem

**CP6** On December 1, 2012, Ruggiero Company had the account balances shown below.

|                     | <u>Debits</u>   |                                    | <u>Credits</u>    |
|---------------------|-----------------|------------------------------------|-------------------|
| Cash                | \$ 4,800        | Accumulated Depreciation—Equipment | \$ 1,500          |
| Accounts Receivable | 3,900           | Accounts Payable                   | 3,000             |
| Inventory           | 1,800*          | Owner's Capital                    | 27,000            |
| Equipment           | 21,000          |                                    | \$31,500          |
|                     | <u>\$31,500</u> |                                    | <u>          </u> |

\*(3,000 × \$0.60)

The following transactions occurred during December.

- Dec. 3 Purchased 4,000 units of inventory on account at a cost of \$0.72 per unit.  
 5 Sold 4,400 units of inventory on account for \$0.90 per unit. (It sold 3,000 of the \$0.60 units and 1,400 of the \$0.72.)  
 7 Granted the December 5 customer \$180 credit for 200 units of inventory returned costing \$150. These units were returned to inventory.  
 17 Purchased 2,200 units of inventory for cash at \$0.80 each.  
 22 Sold 2,000 units of inventory on account for \$0.95 per unit. (It sold 2,000 of the \$0.72 units.)

**Adjustment data:**

1. Accrued salaries payable \$400.
2. Depreciation \$200 per month.

**Instructions**

- (a) Journalize the December transactions and adjusting entries, assuming Ruggiero uses the perpetual inventory method.
- (b) Enter the December 1 balances in the ledger T accounts and post the December transactions. In addition to the accounts mentioned above, use the following additional accounts: Cost of Goods Sold, Depreciation Expense, Salaries and Wages Expense, Salaries and Wages Payable, Sales Revenue, and Sales Returns and Allowances.
- (c) Prepare an adjusted trial balance as of December 31, 2012.
- (d) Prepare an income statement for December 2012 and a classified balance sheet at December 31, 2012.
- (e) Compute ending inventory and cost of goods sold under FIFO, assuming Ruggiero Company uses the periodic inventory system.
- (f) Compute ending inventory and cost of goods sold under LIFO, assuming Ruggiero Company uses the periodic inventory system.

## Continuing Cookie Chronicle

(Note: This is a continuation of the Cookie Chronicle from Chapters 1 through 5.)

**CCC6** Natalie is busy establishing both divisions of her business (cookie classes and mixer sales) and completing her business degree. Her goals for the next 11 months are to sell one mixer per month and to give two to three classes per week.

The cost of the fine European mixers is expected to increase. Natalie has just negotiated new terms with Kzinski that include shipping costs in the negotiated purchase price (mixers will be shipped FOB destination). Natalie must choose a cost flow assumption for her mixer inventory.

Go to the book's companion website, [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), to see the completion of this problem.

# BROADENING YOUR PERSPECTIVE

## Financial Reporting and Analysis

### Financial Reporting Problem: PepsiCo, Inc.

**BYP6-1** The notes that accompany a company's financial statements provide informative details that would clutter the amounts and descriptions presented in the statements. Refer to the financial statements of **PepsiCo, Inc.** and the Notes to Consolidated Financial Statements in Appendix A.

**Instructions**

Answer the following questions. Complete the requirements in millions of dollars, as shown in PepsiCo's annual report.

- (a) What did PepsiCo report for the amount of inventories in its consolidated balance sheet at December 26, 2009? At December 27, 2008?

- (b) Compute the dollar amount of change and the percentage change in inventories between 2008 and 2009. Compute inventory as a percentage of current assets at December 26, 2009.
- (c) How does PepsiCo value its inventories? Which inventory cost flow method does PepsiCo use? (See Notes to the Financial Statements.)
- (d) What is the cost of sales (cost of goods sold) reported by PepsiCo for 2009, 2008, and 2007? Compute the percentage of cost of sales to net sales in 2009.

### **Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company**

**BYP6-2** PepsiCo's financial statements are presented in Appendix A. Financial statements of The Coca-Cola Company are presented in Appendix B.

#### **Instructions**

- (a) Based on the information contained in these financial statements, compute the following 2009 ratios for each company.
  - (1) Inventory turnover ratio
  - (2) Days in inventory
- (b) What conclusions concerning the management of the inventory can you draw from these data?

### **On the Web**

**BYP6-3** A company's annual report usually will identify the inventory method used. Knowing that, you can analyze the effects of the inventory method on the income statement and balance sheet.

**Address:** [www.cisco.com](http://www.cisco.com), or go to [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt)

#### **Instructions**

Answer the following questions based on the current year's annual report on Cisco's website.

- (a) At Cisco's fiscal year-end, what was the inventory on the balance sheet?
- (b) How has this changed from the previous fiscal year-end?
- (c) How much of the inventory was finished goods?
- (d) What inventory method does Cisco use?

## **Critical Thinking**

### **Decision Making Across the Organization**

**BYP6-4** On April 10, 2012, fire damaged the office and warehouse of Inwood Company. Most of the accounting records were destroyed, but the following account balances were determined as of March 31, 2012: Inventory (January 1), 2012, \$80,000; Sales Revenue (January 1–March 31, 2012), \$180,000; Purchases (January 1–March 31, 2012), \$94,000.

The company's fiscal year ends on December 31. It uses a periodic inventory system.

From an analysis of the April bank statement, you discover cancelled checks of \$4,200 for cash purchases during the period April 1–10. Deposits during the same period totaled \$18,500. Of that amount, 60% were collections on accounts receivable, and the balance was cash sales.

Correspondence with the company's principal suppliers revealed \$12,400 of purchases on account from April 1 to April 10. Of that amount, \$1,600 was for merchandise in transit on April 10 that was shipped FOB destination.

Correspondence with the company's principal customers produced acknowledgments of credit sales totaling \$37,000 from April 1 to April 10. It was estimated that \$5,600 of credit sales will never be acknowledged or recovered from customers.

Inwood Company reached an agreement with the insurance company that its fire-loss claim should be based on the average of the gross profit rates for the preceding 2 years. The financial statements for 2010 and 2011 showed the following data.

|                         | <u>2011</u> | <u>2010</u> |
|-------------------------|-------------|-------------|
| Net sales               | \$600,000   | \$480,000   |
| Cost of goods purchased | 404,000     | 356,000     |
| Beginning inventory     | 60,000      | 40,000      |
| Ending inventory        | 80,000      | 60,000      |

Inventory with a cost of \$17,000 was salvaged from the fire.

### Instructions

With the class divided into groups, answer the following.

- (a) Determine the balances in (1) Sales Revenue and (2) Purchases at April 10.
- \* (b) Determine the average gross profit rate for the years 2010 and 2011. (*Hint:* Find the gross profit rate for each year and divide the sum by 2.)
- \* (c) Determine the inventory loss as a result of the fire, using the gross profit method.

## Communication Activity

**BYP6-5** You are the controller of Small Toys Inc. Janice LeMay, the president, recently mentioned to you that she found an error in the 2011 financial statements which she believes has corrected itself. She determined, in discussions with the Purchasing Department, that 2011 ending inventory was overstated by \$1 million. Janice says that the 2012 ending inventory is correct. Thus, she assumes that 2012 income is correct. Janice says to you, “What happened has happened—there’s no point in worrying about it anymore.”

### Instructions

You conclude that Janice is incorrect. Write a brief, tactful memo to Janice, clarifying the situation.

## Ethics Case

**BYP6-6** B. J. Ortiz Wholesale Corp. uses the LIFO method of inventory costing. In the current year, profit at B. J. Ortiz is running unusually high. The corporate tax rate is also high this year, but it is scheduled to decline significantly next year. In an effort to lower the current year’s net income and to take advantage of the changing income tax rate, the president of B. J. Ortiz Wholesale instructs the plant accountant to recommend to the purchasing department a large purchase of inventory for delivery 3 days before the end of the year. The price of the inventory to be purchased has doubled during the year, and the purchase will represent a major portion of the ending inventory value.

### Instructions

- (a) What is the effect of this transaction on this year’s and next year’s income statement and income tax expense? Why?
- (b) If B. J. Ortiz Wholesale had been using the FIFO method of inventory costing, would the president give the same directive?
- (c) Should the plant accountant order the inventory purchase to lower income? What are the ethical implications of this order?

## “All About You” Activity

**BYP6-7** Some of the largest business frauds ever perpetrated have involved the misstatement of inventory. Two classics were at **Leslie Fay Cos.** and **McKesson Corporation.**

### Instructions

There is considerable information regarding inventory frauds available on the Internet. Search for information about one of the two cases mentioned above, or inventory fraud at any other company, and prepare a short explanation of the nature of the inventory fraud.

## FASB Codification Activity

**BYP6-8** If your school has a subscription to the FASB Codification, go to <http://aaahq.org/ascLogin.cfm> to log in and prepare responses to the following.

- The primary basis for accounting for inventories is cost. How is cost defined in the Codification?
- What does the Codification state regarding the use of consistency in the selection or employment of a basis for inventory?
- What does the Codification indicate is a justification for the use of the lower-of-cost-or-market for inventory valuation?

### Answers to Insight and Accounting Across the Organization Questions

**p. 263 A Big Hiccup** **Q:** What steps might the companies take to avoid such a serious disruption in the future? **A:** The manufacturer of the piston rings should spread its manufacturing facilities across a few locations that are far enough apart that they would not all be at risk at once. In addition, the automakers might consider becoming less dependent on a single supplier.

**p. 264 Falsifying Inventory to Boost Income** **Q:** What effect does an overstatement of inventory have on a company's financial statements? **A:** The balance sheet looks stronger because inventory and retained earnings are overstated. The income statement looks better because cost of goods sold is understated and income is overstated.

**p. 275 Is LIFO Fair?** **Q:** What are the arguments for and against the use of LIFO? **A:** Proponents of LIFO argue that it is conceptually superior because it matches the most recent cost with the most recent selling price. Critics contend that it artificially understates the company's net income and consequently reduces tax payments. Also, because most foreign companies are not allowed to use LIFO, its use by U.S. companies reduces the ability of investors to compare U.S. companies with foreign companies.

**p. 279 Improving Inventory Control with RFID** **Q:** Why is inventory control important to managers such as those at Wal-Mart and Best Buy? **A:** In the very competitive environment of discount retailing, where Wal-Mart and Best Buy are major players, small differences in price matter to the customer. Wal-Mart sells a high volume of inventory at a low gross profit rate. When operating in a high-volume, low-margin environment, small cost savings can mean the difference between being profitable or going out of business.

### Answers to Self-Test Questions

1. a 2. b  $(\$180,000 + \$35,000)$  3. b 4. c  $[(5,000 \times \$13) + (4,000 \times \$12)]$  5. d  $[(8,000 \times \$11) + (1,000 \times \$12)]$  6. d  $((5,000 \times \$8) + (15,000 \times \$10) + (20,000 \times \$12)) \div 40,000 = \$10.75$ ;  $\$10.75 \times 7,000$  7. c 8. d 9. d  $(200 \times \$80)$  10. b 11. b 12. d 13. b  $\$285,000 \div [(\$80,000 + \$110,000) \div 2] = 3$ ;  $365 \div 3$  \*14. b  $[\$150,000 - (30\% \times \$150,000)] = \$105,000$ ;  $\$135,000 - \$105,000$  \*15. d

## IFRS A Look at IFRS

The major IFRS requirements related to accounting and reporting for inventories are the same as GAAP. The major differences are that IFRS prohibits the use of the LIFO cost flow assumption and determines market in the lower-of-cost-or-market inventory valuation differently.

### Key Points

- The requirements for accounting for and reporting inventories are more principles-based under IFRS. That is, GAAP provides more detailed guidelines in inventory accounting.
- The definitions for inventory are essentially similar under IFRS and GAAP. Both define inventory as assets held-for-sale in the ordinary course of business, in the process of production for sale (work in process), or to be consumed in the production of goods or services (e.g., raw materials).

- Who owns the goods—goods in transit or consigned goods—as well as the costs to include in inventory, are accounted for the same under IFRS and GAAP.
- Both GAAP and IFRS permit specific identification where appropriate. IFRS actually requires that the specific identification method be used where the inventory items are not interchangeable (i.e., can be specifically identified). If the inventory items are not specifically identifiable, a cost flow assumption is used. GAAP does not specify situations in which specific identification must be used.
- A major difference between IFRS and GAAP relates to the LIFO cost flow assumption. GAAP permits the use of LIFO for inventory valuation. IFRS prohibits its use. FIFO and average-cost are the only two acceptable cost flow assumptions permitted under IFRS.
- IFRS requires companies to use the same cost flow assumption for all goods of a similar nature. GAAP has no specific requirement in this area.
- In the lower-of-cost-or-market test for inventory valuation, IFRS defines market as net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and estimated selling expenses. In other words, net realizable value is the best estimate of the net amounts that inventories are expected to realize. GAAP, on the other hand, defines market as essentially replacement cost.
- Under GAAP, if inventory is written down under the lower-of-cost-or-market valuation, the new basis is now considered its cost. As a result, the inventory may not be written back up to its original cost in a subsequent period. Under IFRS, the write-down may be reversed in a subsequent period up to the amount of the previous write-down. Both the write-down and any subsequent reversal should be reported on the income statement as an expense. An item-by-item approach is generally followed under IFRS.
- An example of the use of lower-of-cost-or-net realizable value under IFRS follows.

Mendel Company has the following four items in its ending inventory as of December 31, 2012. The company uses the lower-of-cost-or-net realizable value approach for inventory valuation following IFRS.

| <u>Item No.</u> | <u>Cost</u> | <u>Net Realizable Value</u> |
|-----------------|-------------|-----------------------------|
| 1320            | \$3,600     | \$3,400                     |
| 1333            | 4,000       | 4,100                       |
| 1428            | 2,800       | 2,100                       |
| 1510            | 5,000       | 4,700                       |

The computation of the ending inventory value to be reported in the financial statements at December 31, 2012, is as follows.

| <u>Item No.</u> | <u>Cost</u>     | <u>Net Realizable Value</u> | <u>LCNRV</u>    |
|-----------------|-----------------|-----------------------------|-----------------|
| 1320            | \$ 3,600        | \$ 3,400                    | \$ 3,400        |
| 1333            | 4,000           | 4,100                       | 4,000           |
| 1428            | 2,800           | 2,100                       | 2,100           |
| 1510            | 5,000           | 4,700                       | 4,700           |
| Total           | <u>\$15,400</u> | <u>\$14,300</u>             | <u>\$14,200</u> |

- Unlike property, plant, and equipment, IFRS does not permit the option of valuing inventories at fair value. As indicated above, IFRS requires inventory to be written down, but inventory cannot be written up above its original cost.
- Similar to GAAP, certain agricultural products and mineral products can be reported at net realizable value using IFRS.

## Looking to the Future

One convergence issue that will be difficult to resolve relates to the use of the LIFO cost flow assumption. As indicated, IFRS specifically prohibits its use. Conversely, the LIFO cost flow assumption is widely used in the United States because of its favorable tax advantages. In addition, many argue that LIFO from a financial reporting point of view provides a better matching of current costs against revenue and, therefore, enables companies to compute a more realistic income.

With a new conceptual framework being developed, it is highly probable that the use of the concept of conservatism will be eliminated. Similarly, the concept of “prudence” in the IASB literature will also be eliminated. This may ultimately have implications for the application of the lower-of-cost-or-net realizable value.

## IFRS Self-Test Questions

- Which of the following should *not* be included in the inventory of a company using IFRS?
  - Goods held on consignment from another company.
  - Goods shipped on consignment to another company.
  - Goods in transit from another company shipped FOB shipping point.
  - None of the above.
- Which method of inventory costing is prohibited under IFRS?
  - Specific identification.
  - LIFO.
  - FIFO.
  - Average-cost.
- Yang Company purchased 2,000 widgets and has 400 widgets in its ending inventory at a cost of \$90 each and a current replacement cost of \$80 each. The net realizable value of each unit in the ending inventory is \$70. The ending inventory under lower-of-cost-or-net realizable value is:
  - \$36,000.
  - \$32,000.
  - \$28,000.
  - None of the above.
- Specific identification:
  - must be used under IFRS if the inventory items are not interchangeable.
  - cannot be used under IFRS.
  - cannot be used under GAAP.
  - must be used under IFRS if it would result in the most conservative net income.
- IFRS requires the following:
  - Ending inventory is written up and down to net realizable value each reporting period.
  - Ending inventory is written down to net realizable value but cannot be written up.
  - Ending inventory is written down to net realizable value and may be written up in future periods to its net realizable value but not above its original cost.
  - Ending inventory is written down to net realizable value and may be written up in future periods to its net realizable value.

## IFRS Concepts and Application

**IFRS6-1** Briefly describe some of the similarities and differences between GAAP and IFRS with respect to the accounting for inventories.

**IFRS6-2** LaTour Inc. is based in France and prepares its financial statements in accordance with IFRS. In 2012, it reported cost of goods sold of €578 million and average inventory of €154 million. Briefly discuss how analysis of LaTour’s inventory turnover ratio (and comparisons to a company using GAAP) might be affected by differences in inventory accounting between IFRS and GAAP.

**IFRS6-3** Franklin Company has the following four items in its ending inventory as of December 31, 2012. The company uses the lower-of-cost-or-net realizable value approach for inventory valuation following IFRS.

| <u>Item No.</u> | <u>Cost</u> | <u>Net Realizable Value</u> |
|-----------------|-------------|-----------------------------|
| AB              | \$1,700     | \$1,400                     |
| TRX             | 2,200       | 2,300                       |
| NWA             | 7,800       | 7,100                       |
| SGH             | 3,000       | 3,700                       |

Compute the lower-of-cost-or-net realizable value.

## **International Financial Reporting**

### **Problem: Zetar plc**

**IFRS6-4** The financial statements of **Zetar plc** are presented in Appendix C. The company's complete annual report, including the notes to its financial statements, is available at [www.zetarplc.com](http://www.zetarplc.com).

#### **Instructions**

Using the notes to the company's financial statements, answer the following questions.

- What cost flow assumption does the company use to value inventory?
- What was the amount of expense that the company reported for inventory write-downs during 2009?
- What amount of raw materials, work in process, and finished goods inventory did the company report at April 30, 2009?

#### **Answers to IFRS Self-Test Questions**

# CHAPTER 7

## Accounting Information Systems

### Study Objectives

After studying this chapter, you should be able to:

- 1 Identify the basic concepts of an accounting information system.
- 2 Describe the nature and purpose of a subsidiary ledger.
- 3 Explain how companies use special journals in journalizing.
- 4 Indicate how companies post a multi-column journal.

### Feature Story

#### QUICKBOOKS® HELPS THIS RETAILER SELL GUITARS

Starting a small business requires many decisions. For example, you have to decide where to locate, how much space you need, how much inventory to have, how many employees to hire, and where to advertise. Small business owners are typically so concerned about the product and sales side of their business that they often do not give enough thought to something that is critical to their success—how to keep track of financial results.

Small business owners today can choose either manual or computerized accounting systems. For example, Paul and Laura West are the owners of the first independent dealership of Carvin guitars and professional audio equipment. When they founded their company, in Sacramento, California, they decided to purchase a computerized accounting system that would integrate

many aspects of their retail operations. They wanted their accounting software to manage their inventory of guitars and amplifiers, ring up sales, record and report financial data, and process credit card

and debit card transactions. They evaluated a number of options and chose QuickBooks® by Intuit Inc.

QuickBooks®, like most other popular software packages, has programs designed for the needs of a specific business, which in this case is retailing. This QuickBooks® retailing package automatically collects sales information from its point-of-sale scanning devices. It also keeps track of inventory levels and automatically generates purchase orders for popular items when re-order points are reached. It even supports sales efforts by compiling a customer database from which the Wests send out targeted direct mailings to potential customers. The computerized system enables data files to be emailed to the company's accountant. This keeps costs down and makes it easier and more efficient to generate financial reports as needed. The Wests believe that the investment in the computerized system has saved them time and money, and allowed them to spend more time on other aspects of their business.

## Preview of CHAPTER 7

As you see from the Feature Story, a reliable information system is a necessity for any company. Whether companies use pen, pencil, or computers in maintaining accounting records, certain principles and procedures apply. The purpose of this chapter is to explain and illustrate these features.

The content and organization of Chapter 7 are as follows.

| Accounting Information Systems   |   |  |
|--|---|--|
| Basic Concepts of Accounting Information Systems   | Subsidiary Ledgers  | Special Journals   |

## Basic Concepts of Accounting Information Systems

**Study Objective [1]**  
Identify the basic concepts of an accounting information system.

The **accounting information system** collects and processes transaction data and communicates financial information to decision makers. It includes each of the steps in the accounting cycle that you studied in earlier chapters. It also includes the documents that provide evidence of the transactions, and the records, trial balances, worksheets, and financial statements that result. An **accounting system** may be either manual or computerized. Most businesses these days use some sort of computerized accounting system, whether it is an off-the-shelf system for small businesses, like QuickBooks or Peachtree, or a more complex custom-made system.

Efficient and effective accounting information systems are based on certain basic principles. These principles, as described in Illustration 7-1, are (1) cost-effectiveness, (2) usefulness, and (3) flexibility. If the accounting system is cost-effective, provides useful output, and has the flexibility to meet future needs, it can contribute to both individual and organizational goals.

### Computerized Accounting Systems

Many small businesses eventually replace their manual accounting system with a computerized general ledger accounting system. **General ledger accounting systems** are software programs that integrate the various accounting functions related to sales, purchases, receivables, payables, cash receipts and disbursements, and payroll. They also generate financial statements. Computerized systems have a number of advantages over manual systems. First, the company typically enters data only once in a computerized system. Second, because the computer does most steps automatically, many errors resulting from human intervention in a manual system,

**Cost-Effectiveness**

The accounting system must be cost-effective. Benefits of information must outweigh the cost of providing it.

**Useful Output**

To be useful, information must be understandable, relevant, reliable, timely, and accurate. Designers of accounting systems must consider the needs and knowledge of various users.

**Flexibility**

The accounting system should accommodate a variety of users and changing information needs. The system should be sufficiently flexible to meet the resulting changes in the demands made upon it.

**Illustration 7-1**

Principles of an efficient and effective accounting information system

such as errors in posting or preparation of financial statements, are eliminated. Computerized systems also provide information up-to-the-minute. More timely information results in better business decisions. Many different general ledger software packages are available.

**CHOOSING A SOFTWARE PACKAGE**

To identify the right software for your business, you must understand your company's operations. For example, consider its needs with regard to inventory, billing, payroll, and cash management. In addition, the company might have specific needs that are not supported by all software systems. For example, you might want to track employees' hours on individual jobs or to extract information for determining sales commissions. Choosing the right system is critical because installation of even a basic system is time-consuming, and learning a new system will require many hours of employee time.

**ENTRY-LEVEL SOFTWARE**

Software publishers tend to classify businesses into groups based on revenue and the number of employees. Companies with revenues of less than \$5 million and up to 20 employees generally use **entry-level programs**. The two leading entry-level programs are Intuit's QuickBooks and Sage Software's Peachtree. These programs control more than 90% of the market. Each of these entry-level programs comes in many different industry-specific versions. For example, some are designed for very specific industry applications such as restaurants, retailing, construction, manufacturing, or nonprofit. (*This textbook's general ledger system can be used in working many of the problems in this textbook.*)

Quality entry-level packages typically involve more than recording transactions and preparing financial statements. Here are some common features and benefits:

- **Easy data access and report preparation.** Users can easily access information related to specific customers or suppliers. For example, you can view all transactions, invoices, payments, as well as contact information for a specific client.
- **Audit trail.** As a result of the Sarbanes-Oxley Act, companies are now far more concerned that their accounting system minimizes opportunities for fraud. Many programs provide an “audit trail” that enables the tracking of all transactions.
- **Internal controls.** Some systems have an internal accounting review that identifies suspicious transactions or likely mistakes such as wrong account numbers or duplicate transactions.
- **Customization.** This feature enables the company to create data fields specific to the needs of its business.
- **Network-compatibility.** Multiple users in the company can access the system at the same time.

### Ethics Note

Entire books and movies have used computer-system tampering as a major theme. Most programmers would agree that tamper-proofing and debugging programs are the most difficult and time-consuming phases of their jobs.

## ENTERPRISE RESOURCE PLANNING SYSTEMS

**Enterprise resource planning (ERP) systems** are typically used by manufacturing companies with more than 500 employees and \$500 million in sales. The best-known of these systems are SAPAG’s SAP (the most widely used), J.D. Edwards’ ERP, and Oracle’s Financials. ERP systems go far beyond the functions of an entry-level general ledger package. They integrate all aspects of the organization, including accounting, sales, human resource management, and manufacturing. Because of the complexity of an ERP system, implementation can take three years and cost five times as much as the purchase price of the system. Purchase and implementation of ERP systems can cost from \$250,000 to as much as \$50 million for the largest multinational corporations.

## ETHICS INSIGHT

### Curbing Fraudulent Activity with Software

The Sarbanes-Oxley Act (SOX) requires that companies demonstrate that they have adequate controls in place to detect significant fraudulent behavior by employees. Recently, about 15% of publicly traded companies reported at least one material weakness in their controls that needed to be remedied.

The SOX requirements have created a huge market for software that can monitor and trace every recorded transaction and adjusting entry. This enables companies to pinpoint who used the accounting system and when they used it. These systems also require “electronic signatures” by employees for all significant transactions. Such signatures verify that employees have followed all required procedures, and that all actions are properly authorized. SOX-related technology spending was estimated to be approximately \$2 billion at one time. One firm that specializes in compliance software had 10 clients prior to SOX and 250 after SOX.

Source: W. M. Bulkeley and C. Forelle, “Anti-Crime Program: How Corporate Scandals Gave Tech Firms a New Business Line,” *Wall Street Journal* (December 9, 2005), p. A1.

Why might this software help reduce fraudulent activity by employees? (See page 357.)

## Manual Accounting Systems

**Manual accounting systems** perform each of the steps in the accounting cycle by hand. For example, someone manually enters each accounting transaction in the journal and manually posts each to the ledger. Other manual computations must be made to obtain ledger account balances and to prepare a trial balance and financial statements. In the remainder of this chapter, we illustrate the use of a manual system.

You might be wondering, “Why cover manual accounting systems if the real world uses computerized systems?” First, small businesses still abound. Most of them begin operations with manual accounting systems and convert to computerized systems as the business grows. You may work in a small business, or start your own someday, so it is useful to know how a manual system works. Second, to understand what computerized accounting systems do, you also need to understand manual accounting systems.

The manual accounting system represented in the first six chapters of this textbook is satisfactory in a company with a low volume of transactions. However, in most companies, it is necessary to add additional ledgers and journals to the accounting system to record transaction data efficiently.

## Subsidiary Ledgers

Imagine a business that has several thousand charge (credit) customers and shows the transactions with these customers in only one general ledger account—Accounts Receivable. It would be nearly impossible to determine the balance owed by an individual customer at any specific time. Similarly, the amount payable to one creditor would be difficult to locate quickly from a single Accounts Payable account in the general ledger.

Instead, companies use subsidiary ledgers to keep track of individual balances. A **subsidiary ledger** is a group of accounts with a common characteristic (for example, all accounts receivable). It is an addition to, and an expansion of, the general ledger. The subsidiary ledger frees the general ledger from the details of individual balances.

Two common subsidiary ledgers are:

1. The **accounts receivable** (or **customers’**) **subsidiary ledger**, which collects transaction data of individual customers.
2. The **accounts payable** (or **creditors’**) **subsidiary ledger**, which collects transaction data of individual creditors.

In each of these subsidiary ledgers, companies usually arrange individual accounts in alphabetical order.

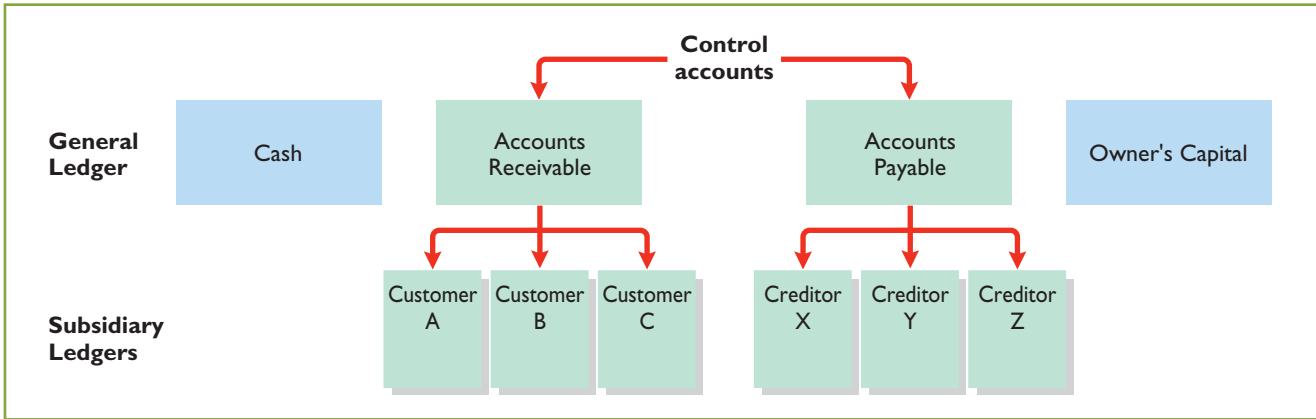

A general ledger account summarizes the detailed data from a subsidiary ledger. For example, the detailed data from the accounts receivable subsidiary ledger are summarized in Accounts Receivable in the general ledger. The general ledger account that summarizes subsidiary ledger data is called a **control account**. Illustration 7-2 (page 320) presents an overview of the relationship of subsidiary ledgers to the general ledger. There, the general ledger control accounts and subsidiary ledger accounts are in green. Note that cash and owner’s capital in this illustration are not control accounts because there are no subsidiary ledger accounts related to these accounts.

**At the end of an accounting period, each general ledger control account balance must equal the composite balance of the individual accounts in the related subsidiary ledger.** For example, the balance in Accounts Payable in Illustration 7-2 must equal the total of the subsidiary balances of Creditors X + Y + Z.

### Study Objective [2]

Describe the nature and purpose of a subsidiary ledger.

**Illustration 7-2**  
Relationship of general ledger and subsidiary ledgers

### Subsidiary Ledger Example

Illustration 7-3 provides an example of a control account and subsidiary ledger for Pujols Enterprises. (Due to space considerations, the explanation column in these accounts is not shown in this and subsequent illustrations.) Illustration 7-3 is based on the transactions listed in Illustration 7-4.

**Illustration 7-3**  
Relationship between general and subsidiary ledgers

**Illustration 7-4**  
Sales and collection transactions

| Credit Sales |              |                 | Collections on Account |              |                |
|--------------|--------------|-----------------|------------------------|--------------|----------------|
| Jan. 10      | Aaron Co.    | \$ 6,000        | Jan. 19                | Aaron Co.    | \$4,000        |
| 12           | Branden Inc. | 3,000           | 21                     | Branden Inc. | 3,000          |
| 20           | Caron Co.    | 3,000           | 29                     | Caron Co.    | 1,000          |
|              |              | <u>\$12,000</u> |                        |              | <u>\$8,000</u> |

Pujols can reconcile the total debits (\$12,000) and credits (\$8,000) in Accounts Receivable in the general ledger to the detailed debits and credits in the subsidiary accounts. Also, the balance of \$4,000 in the control account agrees with the total of the balances in the individual accounts (Aaron Co. \$2,000 + Branden Inc. \$0 + Caron Co. \$2,000) in the subsidiary ledger.

As Illustration 7-3 shows, companies make monthly postings to the control accounts in the general ledger. This practice allows them to prepare monthly financial statements. Companies post to the individual accounts in the subsidiary ledger daily. Daily posting ensures that account information is current. This enables the company to monitor credit limits, bill customers, and answer inquiries from customers about their account balances.

## Advantages of Subsidiary Ledgers

Subsidiary ledgers have several advantages:

1. **They show in a single account transactions affecting one customer or one creditor**, thus providing up-to-date information on specific account balances.
2. **They free the general ledger of excessive details.** As a result, a trial balance of the general ledger does not contain vast numbers of individual account balances.
3. **They help locate errors in individual accounts** by reducing the number of accounts in one ledger and by using control accounts.
4. **They make possible a division of labor** in posting. One employee can post to the general ledger while someone else posts to the subsidiary ledgers.

## ACCOUNTING ACROSS THE ORGANIZATION

**"I'm John Smith, a.k.a. 13695071642"**

Rather than relying on customer or creditor names in a subsidiary ledger, a computerized system expands the account number of the control account in a pre-specified manner. For example, if Accounts Receivable was numbered 10010, the first account in the accounts receivable subsidiary ledger might be numbered 10010-0001. Most systems allow inquiries about specific accounts in the subsidiary ledger (by account number) or about the control account. With the latter, the system would automatically total all the subsidiary accounts whenever an inquiry to the control account was made.

**?** Why use numbers to identify names in a computerized system? (See page 357.)

## Do it!

Presented below is information related to Sims Company for its first month of operations. Determine the balances that appear in the accounts payable subsidiary ledger. What Accounts Payable balance appears in the general ledger at the end of January?

## Subsidiary Ledgers

| Credit Purchases |            |          | Cash Paid |            |         |
|------------------|------------|----------|-----------|------------|---------|
| Jan. 5           | Devon Co.  | \$11,000 | Jan. 9    | Devon Co.  | \$7,000 |
| 11               | Shelby Co. | 7,000    | 14        | Shelby Co. | 2,000   |
| 22               | Taylor Co. | 14,000   | 27        | Taylor Co. | 9,000   |

**action plan**

✓ Subtract cash paid from credit purchases to determine the balances in the accounts payable subsidiary ledger.

✓ Sum the individual balances to determine the Accounts Payable balance.

**Solution**

Subsidiary ledger balances:

Devon Co. \$4,000 (\$11,000 – \$7,000)

Shelby Co. \$5,000 (\$7,000 – \$2,000)

Taylor Co. \$5,000 (\$14,000 – \$9,000)

General ledger Accounts Payable balance: \$14,000 (\$4,000 + \$5,000 + \$5,000)

Related exercise material: BE7-4, BE7-5, E7-1, E7-2, E7-4, E7-5, and **Do it!** 7-1.

## Special Journals

### Study Objective [3]

Explain how companies use special journals in journalizing.

So far you have learned to journalize transactions in a two-column general journal and post each entry to the general ledger. This procedure is satisfactory in only the very smallest companies. To expedite journalizing and posting, most companies use special journals **in addition to the general journal**.

Companies use **special journals** to record similar types of transactions. Examples are all sales of merchandise on account, or all cash receipts. The types of transactions that occur frequently in a company determine what special journals the company uses. Most merchandising enterprises record daily transactions using the journals shown in Illustration 7-5.

#### Illustration 7-5

Use of special journals and the general journal

| Sales Journal                                    | Cash Receipts Journal                                 | Purchases Journal                                    | Cash Payments Journal                                 | General Journal   |
|--|---|--|---|---|
| Used for:<br>All sales of merchandise on account | Used for:<br>All cash received (including cash sales) | Used for:<br>All purchases of merchandise on account | Used for:<br>All cash paid (including cash purchases) | Used for:<br>Transactions that cannot be entered in a special journal, including correcting, adjusting, and closing entries |

**If a transaction cannot be recorded in a special journal, the company records it in the general journal.** For example, if a company had special journals for only the four types of transactions listed above, it would record purchase returns and allowances in the general journal. Similarly, **correcting, adjusting, and closing entries are recorded in the general journal.** In some situations, companies might use special journals other than those listed above. For example, when sales returns and allowances are frequent, a company might use a special journal to record these transactions.

Special journals **permit greater division of labor** because several people can record entries in different journals at the same time. For example, one employee may journalize all cash receipts, and another may journalize all credit sales. Also, the use of special journals **reduces the time needed to complete the posting process.** With special journals, companies may post some accounts monthly, instead of

daily, as we will illustrate later in the chapter. On the following pages, we discuss the four special journals shown in Illustration 7-5.

## Sales Journal

In the **sales journal**, companies record **sales of merchandise on account**. Cash sales of merchandise go in the cash receipts journal. Credit sales of assets other than merchandise go in the general journal.

### JOURNALIZING CREDIT SALES

To demonstrate use of a sales journal, we will use data for Karns Wholesale Supply, which uses a **perpetual inventory system**. Under this system, each entry in the sales journal results in one entry **at selling price** and another entry **at cost**. The entry at selling price is a debit to Accounts Receivable (a control account) and a credit of equal amount to Sales Revenue. The entry at cost is a debit to Cost of Goods Sold and a credit of equal amount to Inventory (a control account). Using a sales journal with two amount columns, the company can show on only one line a sales transaction at both selling price and cost. Illustration 7-6 shows this two-column sales journal of Karns Wholesale Supply, using assumed credit sales transactions (for sales invoices 101–107).

### Helpful Hint

Postings are also made daily to individual ledger accounts in the inventory subsidiary ledger to maintain a perpetual inventory.

| 21    | Abbot Sisters   | 105         |      | 15,400                                     | 10,780                                  |
| 24    | Deli Co.        | 106         |      | 21,210                                     | 15,900                                  |
| 27    | Babson Co.      | 107         |      | 14,570                                     | 10,200                                  |
|       |                 |             |      | <u>90,230</u>                              | <u>62,190</u>                           |

**Illustration 7-6**

Journalizing the sales journal—perpetual inventory system

Note that, unlike the general journal, an explanation is not required for each entry in a special journal. Also, note that use of prenumbered invoices ensures that all invoices are journalized. Finally, note that the reference (Ref.) column is not used in journalizing. It is used in posting the sales journal, as explained in the next section.

### POSTING THE SALES JOURNAL

Companies make daily postings from the sales journal **to the individual accounts receivable** in the subsidiary ledger. Posting **to the general ledger** is done **monthly**. Illustration 7-7 (page 324) shows both the daily and monthly postings.

The subsidiary ledger is separate from the general ledger.

Accounts Receivable is a control account.

<sup>1</sup>The normal balance for Inventory is a debit. But, because of the sequence in which we have posted the special journals, with the sales journals first, the credits to Inventory are posted before the debits. This posting sequence explains the credit balance in Inventory, which exists only until the other journals are posted.

start General Ledger General Jnl Sales Jnl Cash Receipts Jnl Purchases Jnl

**Illustration 7-7**  
Posting the sales journal

A check mark (✓) is inserted in the reference posting column to indicate that the daily posting to the customer's account has been made. If the subsidiary ledger accounts were numbered, the account number would be entered in place of the check mark. At the end of the month, Karns posts the column totals of the sales journal to the general ledger. Here, the column totals are as follows: From the selling-price column, a debit of \$90,230 to Accounts Receivable (account No. 112), and a credit

of \$90,230 to Sales Revenue (account No. 401). From the cost column, a debit of \$62,190 to Cost of Goods Sold (account No. 505), and a credit of \$62,190 to Inventory (account No. 120). Karns inserts the account numbers below the column totals to indicate that the postings have been made. In both the general ledger and subsidiary ledger accounts, the reference **S1** indicates that the posting came from page 1 of the sales journal.

### PROVING THE LEDGERS

The next step is to “prove” the ledgers. To do so, Karns must determine two things: (1) The total of the general ledger debit balances must equal the total of the general ledger credit balances. (2) The sum of the subsidiary ledger balances must equal the balance in the control account. Illustration 7-8 shows the proof of the postings from the sales journal to the general and subsidiary ledgers.

| Postings to General Ledger |                  | Debit Postings to the Accounts Receivable Subsidiary Ledger |                 |
|----------------------------|------------------|---|-----------------|

**Illustration 7-8**

Proving the equality of the postings from the sales journal

### ADVANTAGES OF THE SALES JOURNAL

The use of a special journal to record sales on account has a number of advantages. First, the one-line entry for each sales transaction saves time. In the sales journal, it is not necessary to write out the four account titles for each transaction. Second, only totals, rather than individual entries, are posted to the general ledger. This saves posting time and reduces the possibilities of errors in posting. Finally, a division of labor results because one individual can take responsibility for the sales journal.

### Cash Receipts Journal

In the **cash receipts journal**, companies record all receipts of cash. The most common types of cash receipts are cash sales of merchandise and collections of accounts receivable. Many other possibilities exist, such as receipt of money from bank loans and cash proceeds from disposal of equipment. A one- or two-column cash receipts journal would not have space enough for all possible cash receipt transactions. Therefore, companies use a multiple-column cash receipts journal.

Generally, a cash receipts journal includes the following columns: debit columns for Cash and Sales Discounts, and credit columns for Accounts Receivable, Sales Revenue, and “Other Accounts.” Companies use the “Other Accounts”

category when the cash receipt does not involve a cash sale or a collection of accounts receivable. Under a perpetual inventory system, each sales entry also is accompanied by an entry that debits Cost of Goods Sold and credits Inventory for the cost of the merchandise sold. Illustration 7-9 shows a six-column cash receipts journal.

Companies may use additional credit columns if these columns significantly reduce postings to a specific account. For example, a loan company, such as **Household International**, receives thousands of cash collections from customers. Using separate credit columns for Loans Receivable and Interest Revenue, rather than the Other Accounts credit column, would reduce postings.

### JOURNALIZING CASH RECEIPTS TRANSACTIONS

To illustrate the journalizing of cash receipts transactions, we will continue with the May transactions of Karns Wholesale Supply. Collections from customers relate to the entries recorded in the sales journal in Illustration 7-6. The entries in the cash receipts journal are based on the following cash receipts.

- May 1 D. A. Karns makes an investment of \$5,000 in the business.  
 7 Cash sales of merchandise total \$1,900 (cost, \$1,240).  
 10 Received a check for \$10,388 from Abbot Sisters in payment of invoice No. 101 for \$10,600 less a 2% discount.  
 12 Cash sales of merchandise total \$2,600 (cost, \$1,690).  
 17 Received a check for \$11,123 from Babson Co. in payment of invoice No. 102 for \$11,350 less a 2% discount.  
 22 Received cash by signing a note for \$6,000.  
 23 Received a check for \$7,644 from Carson Bros. in full for invoice No. 103 for \$7,800 less a 2% discount.  
 28 Received a check for \$9,114 from Deli Co. in full for invoice No. 104 for \$9,300 less a 2% discount.

Further information about the columns in the cash receipts journal is listed below.

#### Debit Columns:

- 1. Cash.** Karns enters in this column the amount of cash actually received in each transaction. The column total indicates the total cash receipts for the month.
- 2. Sales Discounts.** Karns includes a Sales Discounts column in its cash receipts journal. By doing so, it does not need to enter sales discount items in the general journal. As a result, the cash receipts journal shows on one line the collection of an account receivable within the discount period.

#### Credit Columns:

- 3. Accounts Receivable.** Karns uses the Accounts Receivable column to record cash collections on account. The amount entered here is the amount to be credited to the individual customer's account.
- 4. Sales Revenue.** The Sales Revenue column records all cash sales of merchandise. Cash sales of other assets (plant assets, for example) are not reported in this column.
- 5. Other Accounts.** Karns uses the Other Accounts column whenever the credit is other than to Accounts Receivable or Sales Revenue. For example, in the first entry, Karns enters \$5,000 as a credit to Owner's Capital. This column is often referred to as the sundry accounts column.

#### Debit and Credit Column:

- 6. Cost of Goods Sold and Inventory.** This column records debits to Cost of Goods Sold and credits to Inventory.

#### Helpful Hint

When is an account title entered in the "Account Credited" column of the cash receipts journal?  
 Answer: A *subsidiary ledger* account is entered when the entry involves a collection of accounts receivable. A *general ledger* account is entered when the account is not shown in a special column (and an amount must be entered in the Other Accounts column). Otherwise, no account is shown in the "Account Credited" column.

start General Ledger General Jnl Sales Jnl Cash Receipts Jnl Purchases Jnl

In a multi-column journal, generally only one line is needed for each entry. Debit and credit amounts for each line must be equal. When Karns journalizes the collection from Abbot Sisters on May 10, for example, three amounts are indicated. Note also that the Account Credited column identifies both general ledger and subsidiary ledger account titles. General ledger accounts are illustrated in the May 1 and May 22 entries. A subsidiary account is illustrated in the May 10 entry for the collection from Abbot Sisters.

When Karns has finished journalizing a multi-column journal, it totals the amount columns and compares the totals to prove the equality of debits and credits. Illustration 7-10 shows the proof of the equality of Karns's cash receipts journal.

### Illustration 7-10

Proving the equality of the cash receipts journal

| Debits             |                 | Credits             |                 |

| Cash               | \$53,769        | Accounts Receivable | \$39,050        |
| Sales Discounts    | 781             | Sales Revenue       | 4,500           |
| Cost of Goods Sold | 2,930           | Other Accounts      | 11,000          |
|                    | <u>\$57,480</u> | Inventory           | 2,930           |
|                    |                 |                     | <u>\$57,480</u> |

Totaling the columns of a journal and proving the equality of the totals is called **footing** and **cross-footing** a journal.

### POSTING THE CASH RECEIPTS JOURNAL

Posting a multi-column journal involves the following steps.

#### Study Objective [4]

Indicate how companies post a multi-column journal.

1. **At the end of the month**, the company posts all column totals, except for the Other Accounts total, to the account title(s) specified in the column heading (such as Cash or Accounts Receivable). The company then enters account numbers below the column totals to show that they have been posted. For example, Karns has posted Cash to account No. 101, Accounts Receivable to account No. 112, Inventory to account No. 120, Sales Revenue to account No. 401, Sales Discounts to account No. 414, and Cost of Goods Sold to account No. 505.
2. The company **separately posts the individual amounts comprising the Other Accounts total** to the general ledger accounts specified in the Account Credited column. See, for example, the credit posting to Owner's Capital. The total amount of this column has not been posted. The symbol (X) is inserted below the total to this column to indicate that the amount has not been posted.
3. The individual amounts in a column, posted in total to a control account (Accounts Receivable, in this case), are posted **daily to the subsidiary ledger** account specified in the Account Credited column. See, for example, the credit posting of \$10,600 to Abbot Sisters.

The symbol **CR**, used in both the subsidiary and general ledgers, identifies postings from the cash receipts journal.

**PROVING THE LEDGERS**

After posting of the cash receipts journal is completed, Karns proves the ledgers. As shown in Illustration 7-11, the general ledger totals agree. Also, the sum of the subsidiary ledger balances equals the control account balance.

| <u>Accounts Receivable Subsidiary Ledger</u> |                 | <u>General Ledger</u> |                  |
|--|-----------------|-----------------------|------------------|
| Abbot Sisters                                | \$15,400        | <u>Debits</u>         |                  |
| Babson Co.                                   | 14,570          | Cash                  | \$53,769         |
| Deli Co.                                     | 21,210          | Accounts Receivable   | 51,180           |
|  | <u>\$51,180</u> | Sales Discounts       | 781              |
|  |                 | Cost of Goods Sold    | 65,120           |
|  |                 |                       | <u>\$170,850</u> |
|  |                 | <u>Credits</u>        |                  |
|  |                 | Notes Payable         | \$ 6,000         |
|  |                 | Owner's Capital       | 5,000            |
|  |                 | Sales Revenue         | 94,730           |
|  |                 | Inventory             | 65,120           |
|  |                 |                       | <u>\$170,850</u> |

**Illustration 7-11**

Proving the ledgers after posting the sales and the cash receipts journals

**Purchases Journal**

In the **purchases journal**, companies record all purchases of merchandise on account. Each entry in this journal results in a debit to Inventory and a credit to Accounts Payable. Illustration 7-13 (on page 330) shows the purchases journal for Karns Wholesale Supply.

When using a one-column purchases journal (as in Illustration 7-13), a company cannot journalize other types of purchases on account or cash purchases in it. For example, in the purchases journal in Illustration 7-13, Karns would have to record credit purchases of equipment or supplies in the general journal. Likewise, all cash purchases would be entered in the cash payments journal. As illustrated later, companies that make numerous credit purchases for items other than merchandise often expand the purchases journal to a multi-column format. (See Illustration 7-15 on page 331.)

**JOURNALIZING CREDIT PURCHASES OF MERCHANDISE**

The journalizing procedure is similar to that for a sales journal. Companies make entries in the purchases journal from purchase invoices. In contrast to the sales journal, the purchases journal may not have an invoice number column, because invoices received from different suppliers will not be in numerical sequence. To ensure that they record all purchase invoices, some companies consecutively number each invoice upon receipt and then use an internal document number column in the purchases journal. The entries for Karns Wholesale Supply are based on the assumed credit purchases listed in Illustration 7-12.

| <u>Date</u> | <u>Supplier</u>           | <u>Amount</u> |
|-------------|---------------------------|---------------|
| 5/6         | Jasper Manufacturing Inc. | \$11,000      |

| May 31 | PI   |       | 63,900 | 63,900  |

The company posts individual amounts to the subsidiary ledger daily.

At the end of the accounting period, the company posts totals to the general ledger.

The subsidiary ledger is separate from the general ledger.

Accounts Payable is a control account.

**Illustration 7-13**  
Journalizing and posting the purchases journal

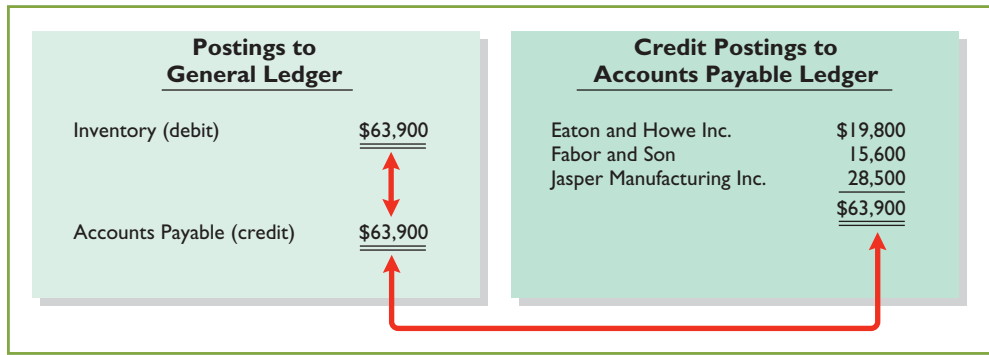

**Helpful Hint**

Postings to subsidiary ledger accounts are done daily because it is often necessary to know a current balance for the subsidiary accounts.

**POSTING THE PURCHASES JOURNAL**

The procedures for posting the purchases journal are similar to those for the sales journal. In this case, Karns makes **daily** postings to the **accounts payable ledger**; it makes **monthly** postings to Inventory and Accounts Payable in the general ledger. In both ledgers, Karns uses **PI** in the reference column to show that the postings are from page 1 of the purchases journal.

Proof of the equality of the postings from the purchases journal to both ledgers is shown in Illustration 7-14.

**Illustration 7-14**  
Proving the equality of the purchases journal

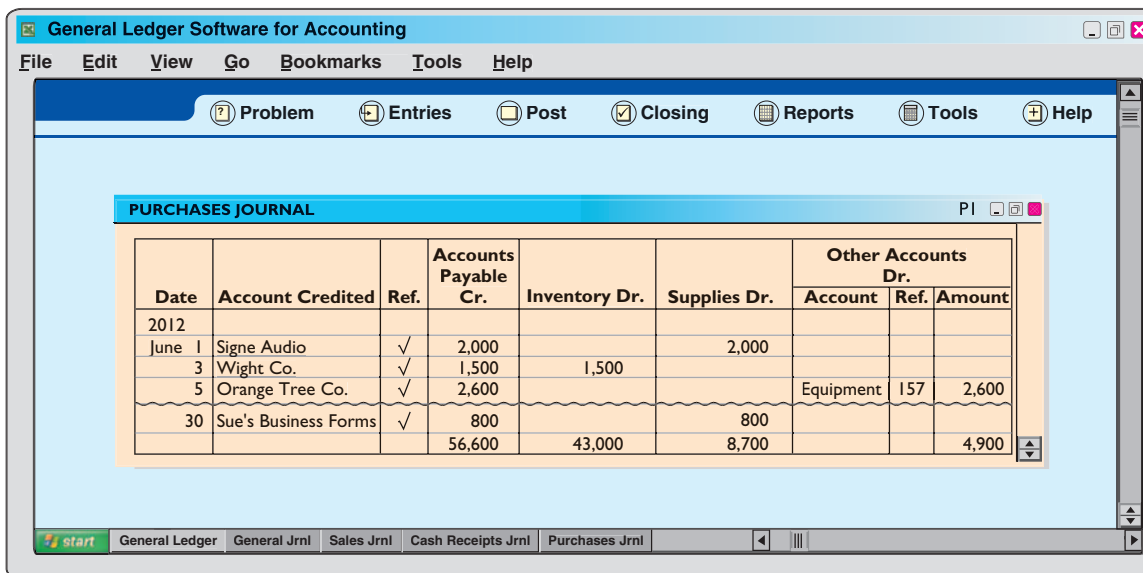

**EXPANDING THE PURCHASES JOURNAL**

As noted earlier, some companies expand the purchases journal to include all types of purchases on account. Instead of one column for inventory and accounts payable, they use a multiple-column format. This format usually includes a credit column for Accounts Payable and debit columns for purchases of Inventory, Supplies, and Other Accounts. Illustration 7-15 shows a multi-column purchases journal for Hanover Co. The posting procedures are similar to those shown earlier for posting the cash receipts journal.

**Helpful Hint**

A single-column purchases journal needs only to be footed to prove the equality of debits and credits.

**Illustration 7-15**  
Multi-column purchases journal

**Cash Payments Journal**

In a **cash payments (cash disbursements) journal**, companies record all disbursements of cash. Entries are made from prenumbered checks. Because companies make cash payments for various purposes, the cash payments journal has multiple columns. Illustration 7-16 (page 332) shows a four-column journal.

**JOURNALIZING CASH PAYMENTS TRANSACTIONS**

The procedures for journalizing transactions in this journal are similar to those for the cash receipts journal. Karns records each transaction on one line, and for each line there must be equal debit and credit amounts. The entries in the cash payments

At the end of the accounting period, the company posts totals to the general ledger.

start General Ledger General Jnl Sales Jnl Cash Receipts Jnl Purchases Jnl

**Illustration 7-16**  
Journalizing and posting the cash payments journal

journal in Illustration 7-16 are based on the following transactions for Karns Wholesale Supply.

- May 1 Issued check No. 101 for \$1,200 for the annual premium on a fire insurance policy.
- 3 Issued check No. 102 for \$100 in payment of freight when terms were FOB shipping point.
- 8 Issued check No. 103 for \$4,400 for the purchase of merchandise.
- 10 Sent check No. 104 for \$10,780 to Jasper Manufacturing Inc. in payment of May 6 invoice for \$11,000 less a 2% discount.
- 19 Mailed check No. 105 for \$6,984 to Eaton and Howe Inc. in payment of May 10 invoice for \$7,200 less a 3% discount.
- 23 Sent check No. 106 for \$6,831 to Fabor and Son in payment of May 14 invoice for \$6,900 less a 1% discount.
- 28 Sent check No. 107 for \$17,150 to Jasper Manufacturing Inc. in payment of May 19 invoice for \$17,500 less a 2% discount.
- 30 Issued check No. 108 for \$500 to D. A. Karns as a cash withdrawal for personal use.

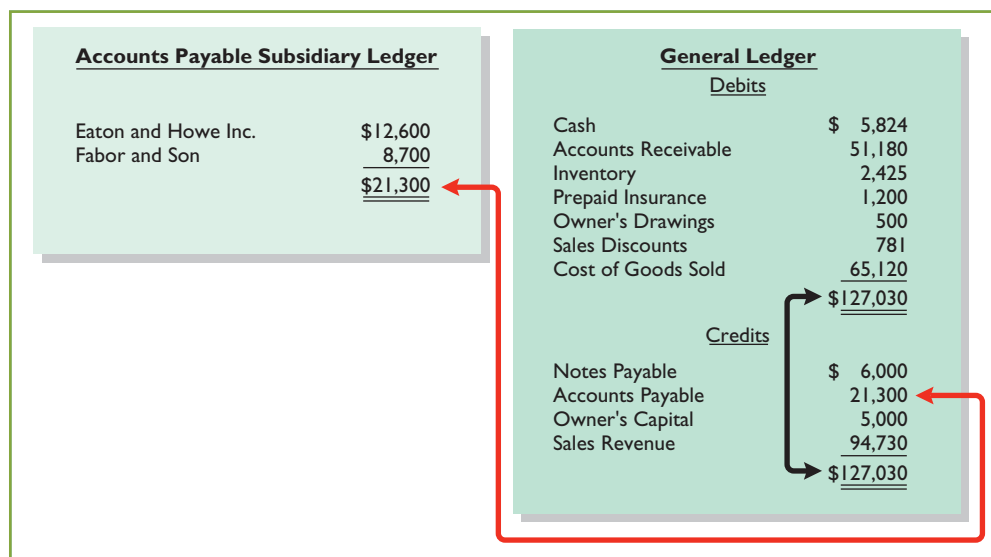

Note that whenever Karns enters an amount in the Other Accounts column, it must identify a specific general ledger account in the Account Debited column. The entries for checks No. 101, 102, 103, and 108 illustrate this situation. Similarly, Karns must identify a subsidiary account in the Account Debited column whenever it enters an amount in the Accounts Payable column. See, for example, the entry for check No. 104.

After Karns journalizes the cash payments journal, it totals the columns. The totals are then balanced to prove the equality of debits and credits.

### POSTING THE CASH PAYMENTS JOURNAL

The procedures for posting the cash payments journal are similar to those for the cash receipts journal. Karns posts the amounts recorded in the Accounts Payable column individually to the subsidiary ledger and in total to the control account. It posts Inventory and Cash only in total at the end of the month. Transactions in the Other Accounts column are posted individually to the appropriate account(s) affected. The company does not post totals for the Other Accounts column.

Illustration 7-16 shows the posting of the cash payments journal. Note that Karns uses the symbol **CP** as the posting reference. After postings are completed, the company proves the equality of the debit and credit balances in the general ledger. In addition, the control account balances should agree with the subsidiary ledger total balance. Illustration 7-17 shows the agreement of these balances.

**Illustration 7-17**  
Proving the ledgers after postings from the sales, cash receipts, purchases, and cash payments journals

## Effects of Special Journals on the General Journal

Special journals for sales, purchases, and cash substantially reduce the number of entries that companies make in the general journal. **Only transactions that cannot be entered in a special journal are recorded in the general journal.** For example, a company may use the general journal to record such transactions as granting of credit to a customer for a sales return or allowance, granting of credit from a supplier for purchases returned, acceptance of a note receivable from a customer, and purchase of equipment by issuing a note payable. Also, **correcting, adjusting, and closing entries are made in the general journal.**

The general journal has columns for date, account title and explanation, reference, and debit and credit amounts. When control and subsidiary accounts are not involved, the procedures for journalizing and posting of transactions are the same as those described in earlier chapters. When control and subsidiary accounts *are* involved, companies make two changes from the earlier procedures:

1. In **journalizing**, they identify both the control and the subsidiary accounts.
2. In **posting**, there must be a **dual posting**: once to the control account and once to the subsidiary account.

To illustrate, assume that on May 31, Karns Wholesale Supply returns \$500 of merchandise for credit to Fabor and Son. Illustration 7-18 shows the entry in the general journal and the posting of the entry. Note that if Karns receives cash instead of credit on this return, then it would record the transaction in the cash receipts journal.

**Illustration 7-18**  
Journalizing and posting the general journal

|--------------------------|------|--------|--------|---------|
| Date                     | Ref. | Debit  | Credit | Balance |
| 2012                     |      |        |        |         |
| May 31                   | PI   |        | 63,900 | 63,900  |
| 31                       | CPI  | 42,600 |        | 21,300  |
| 31                       | GI   | 500    |        | 20,800  |

Note that the general journal indicates two accounts (Accounts Payable, and Faber and Son) for the debit, and two postings (“201/✓”) in the reference column. One debit is posted to the control account and another debit to the creditor’s account in the subsidiary ledger.

## Do it!

Swisher Company had the following transactions during March.

1. Collected cash on account from Oakland Company.
2. Purchased equipment by signing a note payable.
3. Sold merchandise on account.
4. Purchased merchandise on account.
5. Paid \$2,400 for a 2-year insurance policy.

Identify the journal in which each of the transactions above is recorded.

### Solution

- |  |                       |
|--|-----------------------|
| 1. Collected cash on account from Oakland Company. | Cash receipts journal |
| 2. Purchased equipment by signing a note payable.  | General journal       |
| 3. Sold merchandise on account.                    | Sales journal         |
| 4. Purchased merchandise on account.               | Purchases journal     |
| 5. Paid \$2,400 for a 2-year insurance policy.     | Cash payments journal |

## Special Journals

### action plan

- ✓ Determine if the transaction involves the receipt of cash (cash receipts journal) or the payment of cash (cash payments journal).
- ✓ Determine if the transaction is a sale of merchandise on account (sales journal) or a purchase of merchandise on account (purchases journal).
- ✓ All other transactions are recorded in the general journal.

## COMPREHENSIVE

## Do it!

Cassandra Wilson Company uses a six-column cash receipts journal with the following columns.

|                           |                              |
|---------------------------|------------------------------|
| Cash (Dr.)                | Other Accounts (Cr.)         |
| Sales Discounts (Dr.)     | Cost of Goods Sold (Dr.) and |
| Accounts Receivable (Cr.) | Inventory (Cr.)              |
| Sales Revenue (Cr.)       |                              |

Cash receipts transactions for the month of July 2012 are as follows.

- |        |   |
|--------|---|
| July 3 | Cash sales total \$5,800 (cost, \$3,480).   |
| 5      | Received a check for \$6,370 from Jeltz Company in payment of an invoice dated June 26 for \$6,500, terms 2/10, n/30. |
| 9      | Cassandra Wilson, the proprietor, made an additional investment of \$5,000 in cash in the business.                   |
| 10     | Cash sales total \$12,519 (cost, \$7,511).  |
| 12     | Received a check for \$7,275 from R. Eliot & Co. in payment of a \$7,500 invoice dated July 3, terms 3/10, n/30.      |
| 15     | Received an advance of \$700 cash for future services.  |
| 20     | Cash sales total \$15,472 (cost, \$9,283).  |
| 22     | Received a check for \$5,880 from Beck Company in payment of \$6,000 invoice dated July 13, terms 2/10, n/30.         |
| 29     | Cash sales total \$17,660 (cost, \$10,596).   |
| 31     | Received cash of \$200 on interest earned for July.   |

### action plan

- ✓ Record all cash receipts in the cash receipts journal.
- ✓ The “account credited” indicates items posted individually to the subsidiary ledger or to the general ledger.
- ✓ Record cash sales in the cash receipts journal—not in the sales journal.
- ✓ The total debits must equal the total credits.

**Instructions**

- (a) Journalize the transactions in the cash receipts journal.  
 (b) Contrast the posting of the Accounts Receivable and Other Accounts columns.

**Solution to Comprehensive Do it!**

(a)

**CASSANDRA WILSON COMPANY**  
Cash Receipts Journal CR1

| 15   | Unearned Service Revenue |      | 700           |                     |                         |                   | 700                |                                      |
| 20   |                          |      | 15,472        |                     |                         | 15,472            |                    | 9,283                                |
| 22   | Beck Company             |      | 5,880         | 120                 | 6,000                   |                   |                    |                                      |
| 29   |                          |      | 17,660        |                     |                         | 17,660            |                    | 10,596                               |
| 31   | Interest Revenue         |      | 200           |                     |                         |                   | 200                |                                      |
|      |                          |      | <u>76,876</u> | <u>475</u>          | <u>20,000</u>           | <u>51,451</u>     | <u>5,900</u>       | <u>30,870</u>                        |

(b) The Accounts Receivable column total is posted as a credit to Accounts Receivable. The individual amounts are credited to the customers' accounts identified in the Account Credited column, which are maintained in the accounts receivable subsidiary ledger.

The amounts in the Other Accounts column are posted individually. They are credited to the account titles identified in the Account Credited column.

## Summary of Study Objectives

**[1] Identify the basic concepts of an accounting information system.** The basic principles in developing an accounting information system are cost-effectiveness, useful output, and flexibility. Most companies use a computerized accounting system. Smaller companies use entry-level software such as QuickBooks or Peachtree. Larger companies use custom-made software packages, which often integrate all aspects of the organization.

**[2] Describe the nature and purpose of a subsidiary ledger.** A subsidiary ledger is a group of accounts with a common characteristic. It facilitates the recording process by freeing the general ledger from details of individual balances.

**[3] Explain how companies use special journals in journalizing.** Companies use special journals to group similar types of transactions. In a special journal, generally only one line is used to record a complete transaction.

**[4] Indicate how companies post a multi-column journal.** In posting a multi-column journal:

- (a) Companies post all column totals except for the Other Accounts column once at the end of the month to the account title specified in the column heading.  
 (b) Companies do not post the total of the Other Accounts column. Instead, the individual amounts comprising the total are posted separately to the general ledger accounts specified in the Account Credited (Debited) column.  
 (c) The individual amounts in a column posted in total to a control account are posted daily to the subsidiary ledger accounts specified in the Account Credited (Debited) column.

## Glossary

**Accounting information system** A system that collects and processes transaction data, and communicates financial information to decision makers. (p. 316).

**Accounts payable (creditors') subsidiary ledger** A subsidiary ledger that collects transaction data of individual creditors. (p. 319).

**Accounts receivable (customers') subsidiary ledger** A subsidiary ledger that collects transaction data of individual customers. (p. 319).

**Cash payments (disbursements) journal** A special journal that records all disbursements of cash. (p. 331).

**Cash receipts journal** A special journal that records all cash received. (p. 325).

**Control account** An account in the general ledger that summarizes subsidiary ledger data. (p. 319).

**Manual accounting system** A system in which someone performs each of the steps in the accounting cycle by hand. (p. 319).

**Purchases journal** A special journal that records all purchases of merchandise on account. (p. 329).

**Sales journal** A special journal that records all sales of merchandise on account. (p. 323).

**Special journal** A journal that records similar types of transactions, such as all credit sales. (p. 322).

**Subsidiary ledger** A group of accounts with a common characteristic. (p. 319).

Self-Test, Brief Exercises, Exercises, Problem Set A, and many more components are available for practice in *WileyPLUS*

## Self-Test Questions

Answers are on page 357.

- (SO 1) 1. The basic principles of an accounting information system include all of the following except:
- cost-effectiveness.
  - flexibility.
  - useful output.
  - periodicity.
- (SO 1) 2. Which of the following is *not* an advantage of computerized accounting systems?
- Data is entered only once in computerized accounting systems.
  - Computerized accounting systems provide up-to-date information.
  - Computerized accounting systems eliminate entering of transaction information.
  - Computerized accounting systems eliminate many errors resulting from human intervention.
- (SO 2) 3. Which of the following is *incorrect* concerning subsidiary ledgers?
- The purchases ledger is a common subsidiary ledger for creditor accounts.
  - The accounts receivable ledger is a subsidiary ledger.
  - A subsidiary ledger is a group of accounts with a common characteristic.
  - An advantage of the subsidiary ledger is that it permits a division of labor in posting.
- (SO 2) 4. Two common subsidiary ledgers are:
- accounts receivable and cash receipts.
  - accounts payable and cash payments.
  - accounts receivable and accounts payable.
  - sales and cost of goods sold.
- (SO 2) 5. At the beginning of the month, the accounts receivable subsidiary ledger showed balances for Apple Company \$5,000 and Berry Company \$7,000. During the month, credit sales were made to Apple \$6,000, Berry \$4,500, and Cantaloupe \$8,500. Cash was collected on account from Berry \$11,500 and Cantaloupe \$3,000. At the end of the

month, the control account Accounts Receivable in the general ledger should have a balance of:

- \$11,000.
- \$12,000.
- \$16,500.
- \$31,000.

6. A sales journal will be used for:

(SO 3)

|    | Credit<br>Sales | Cash<br>Sales | Sales<br>Discounts |
|----|-----------------|---------------|--------------------|
| a. | no              | yes           | yes                |
| b. | yes             | no            | yes                |
| c. | yes             | no            | no                 |
| d. | yes             | yes           | no                 |

7. A purchase of equipment on account is recorded in the:

(SO 3)

- cash receipts journal.
- purchases journal.
- cash payments journal.
- general journal.

8. A purchase of equipment using cash is recorded in the:

(SO 3)

- cash receipts journal.
- purchases journal.
- cash payments journal.
- general journal.

9. Which of the following statements is *correct*?

(SO 3, 4)

- The sales discount column is included in the cash receipts journal.
- The purchases journal records all purchases of merchandise whether for cash or on account.
- The cash receipts journal records sales on account.
- Merchandise returned by the buyer is recorded by the seller in the purchases journal.

10. Dotel Company's cash receipts journal includes an Accounts Receivable column and an Other Accounts column. At the end of the month, these columns are posted to the general ledger as:

(SO 4)

|    | Accounts Receivable | Other Accounts     |
|----|---------------------|--------------------|
| a. | a column total      | a column total     |
| b. | individual amounts  | a column total     |
| c. | individual amounts  | individual amounts |
| d. | a column total      | individual amounts |

- (SO 4) 11. Which of the following is *incorrect* concerning the posting of the cash receipts journal?
- The total of the Other Accounts column is not posted.
  - All column totals except the total for the Other Accounts column are posted once at the end of the month to the account title(s) specified in the column heading.
  - The totals of all columns are posted daily to the accounts specified in the column heading.
  - The individual amounts in a column posted in total to a control account are posted daily to the subsidiary ledger account specified in the Account Credited column.
- (SO 4) 12. Postings from the purchases journal to the subsidiary ledger are generally made:
- yearly.
  - monthly.
  - weekly.
  - daily.
- (SO 3) 13. Which statement is *incorrect* regarding the general journal?
- Only transactions that cannot be entered in a special journal are recorded in the general journal.
  - Dual postings are always required in the general journal.
  - The general journal may be used to record acceptance of a note receivable in payment of an account receivable.
  - Correcting, adjusting, and closing entries are made in the general journal.
14. When companies use special journals:
- they record all purchase transactions in the purchases journal.
  - they record all cash received, except from cash sales, in the cash receipts journal.
  - they record all cash disbursements in the cash payments journal.
  - a general journal is not necessary.
15. If a customer returns goods for credit, the selling company normally makes an entry in the:
- cash payments journal.
  - sales journal.
  - general journal.
  - cash receipts journal.

## Questions

- (a) What is an accounting information system? (b) "An accounting information system applies only to a manual system." Do you agree? Explain.
- Certain principles should be followed in the development of an accounting information system. Identify and explain each of the principles.
- What are common features of computerized accounting packages beyond recording transactions and preparing financial statements?
- How does an enterprise resource planning (ERP) system differ from an entry-level computerized accounting system?
- What are the advantages of using subsidiary ledgers?
- (a) When do companies normally post to (1) the subsidiary accounts and (2) the general ledger control accounts? (b) Describe the relationship between a control account and a subsidiary ledger.
- Identify and explain the four special journals discussed in the chapter. List an advantage of using each of these journals rather than using only a general journal.
- Thogmartin Company uses special journals. It recorded in a sales journal a sale made on account to R. Peters for \$435. A few days later, R. Peters returns \$70 worth of merchandise for credit. Where should Thogmartin Company record the sales return? Why?
- A \$500 purchase of merchandise on account from Lore Company was properly recorded in the purchases journal. When posted, however, the amount recorded in the subsidiary ledger was \$50. How might this error be discovered?
- Why would special journals used in different businesses not be identical in format? What type of business would maintain a cash receipts journal but not include a column for accounts receivable?
- The cash and the accounts receivable columns in the cash receipts journal were mistakenly overadded by \$4,000 at the end of the month. (a) Will the customers' ledger agree with the Accounts Receivable control account? (b) Assuming no other errors, will the trial balance totals be equal?
- One column total of a special journal is posted at month-end to only two general ledger accounts. One of these two accounts is Accounts Receivable. What is the name of this special journal? What is the other general ledger account to which that same month-end total is posted?
- In what journal would the following transactions be recorded? (Assume that a two-column sales journal and a single-column purchases journal are used.)
  - Recording of depreciation expense for the year.
  - Credit given to a customer for merchandise purchased on credit and returned.
  - Sales of merchandise for cash.
  - Sales of merchandise on account.
  - Collection of cash on account from a customer.
  - Purchase of office supplies on account.
- In what journal would the following transactions be recorded? (Assume that a two-column sales journal and a single-column purchases journal are used.)
  - Cash received from signing a note payable.
  - Investment of cash by the owner of the business.
  - Closing of the expense accounts at the end of the year.

- (d) Purchase of merchandise on account.
  - (e) Credit received for merchandise purchased and returned to supplier.
  - (f) Payment of cash on account due a supplier.
15. What transactions might be included in a multiple-column purchases journal that would not be included in a single-column purchases journal?
16. Give an example of a transaction in the general journal that causes an entry to be posted twice (i.e., to two accounts), one in the general ledger, the other in the subsidiary ledger. Does this affect the debit/credit equality of the general ledger?
17. Give some examples of appropriate general journal transactions for an organization using special journals.

## Brief Exercises

**BE7-1** Indicate whether each of the following statements is true or false.

1. When designing an accounting system, we need to think about the needs and knowledge of both the top managers and various other users.
2. When the environment changes as a result of technological advances, increased competition, or government regulation, an accounting system does not have to be sufficiently flexible to meet the changes in order to save money.
3. In developing an accounting system, cost is relevant. The benefits obtained from the information disseminated must outweigh the cost of providing it.

*Identify basic concepts of an accounting information system.*  
(SO 1)

**BE7-2** Here is a list of words or phrases related to computerized accounting systems.

1. Entry-level software.
2. Enterprise resource planning systems.
3. Network-compatible.
4. Audit trail.
5. Internal control.

*Identify basic concepts of an accounting information system.*  
(SO 1)

### Instructions

Match each word or phrase with the best description of it.

- \_\_\_\_\_ (a) Allows multiple users to access the system at the same time.
- \_\_\_\_\_ (b) Enables the tracking of all transactions.
- \_\_\_\_\_ (c) Identifies suspicious transactions or likely mistakes such as wrong account numbers or duplicate transactions.
- \_\_\_\_\_ (d) Large-scale computer systems that integrate all aspects of the organization including accounting, sales, human resource management, and manufacturing.
- \_\_\_\_\_ (e) System for companies with revenues of less than \$5 million and up to 20 employees.

**BE7-3** Benji Borke has prepared the following list of statements about accounting information systems.

1. The accounting information system includes each of the steps of the accounting cycle, the documents that provide evidence of transactions that have occurred, and the accounting records.
2. The benefits obtained from information provided by the accounting information system need not outweigh the cost of providing that information.
3. Designers of accounting systems must consider the needs and knowledge of various users.
4. If an accounting information system is cost-effective and provides useful output, it does not need to be flexible.

*Identify basic concepts of an accounting information system.*  
(SO 1)

### Instructions

Identify each statement as true or false. If false, indicate how to correct the statement.

**BE7-4** Presented below is information related to Montand Company for its first month of operations. Identify the balances that appear in the accounts receivable subsidiary ledger and the accounts receivable balance that appears in the general ledger at the end of January.

*Identify subsidiary ledger balances.*  
(SO 2)

| Credit Sales |           |          | Cash Collections |           |         |
|--------------|-----------|----------|------------------|-----------|---------|
| Jan. 7       | Ahuna Co. | \$10,000 | Jan. 17          | Ahuna Co. | \$7,000 |
| 15           | Aldo Co.  | 6,000    | 24               | Aldo Co.  | 4,000   |
| 23           | Tito Co.  | 9,000    | 29               | Tito Co.  | 9,000   |

Identify subsidiary ledger accounts.

(SO 2)

Identify special journals.

(SO 3)

Identify entries to cash receipts journal.

(SO 3)

Identify transactions for special journals.

(SO 3)

Identify transactions for special journals.

(SO 3)

Indicate postings for cash receipts journal.

(SO 4)

**BE7-5** Identify in what ledger (general or subsidiary) each of the following accounts is shown.

- |                                |                              |
|--------------------------------|------------------------------|
| 1. Rent Expense                | 3. Notes Payable             |
| 2. Accounts Receivable—Obileye | 4. Accounts Payable—Kolawole |

**BE7-6** Identify the journal in which each of the following transactions is recorded.

- |                             |   |
|-----------------------------|---|
| 1. Cash sales               | 4. Credit sales                           |
| 2. Owner withdrawal of cash | 5. Purchase of merchandise on account     |
| 3. Cash purchase of land    | 6. Receipt of cash for services performed |

**BE7-7** Indicate whether each of the following debits and credits is included in the cash receipts journal. (Use “Yes” or “No” to answer this question.)

- Debit to Sales Revenue.
- Credit to Inventory.
- Credit to Accounts Receivable.
- Debit to Accounts Payable.

**BE7-8** Olekan Co. uses special journals and a general journal. Identify the journal in which each of the following transactions is recorded.

- Purchased equipment on account.
- Purchased merchandise on account.
- Paid utility expense in cash.
- Sold merchandise on account.

**BE7-9** Identify the special journal(s) in which the following column headings appear.

- |                            |                      |
|----------------------------|----------------------|
| 1. Sales Discounts Dr.     | 4. Sales Revenue Cr. |
| 2. Accounts Receivable Cr. | 5. Inventory Dr.     |
| 3. Cash Dr.                |                      |

**BE7-10** Bruni Computer Components Inc. uses a multi-column cash receipts journal. Indicate which column(s) is/are posted only in total, only daily, or both in total and daily.

- |                        |                   |
|------------------------|-------------------|
| 1. Accounts Receivable | 3. Cash           |
| 2. Sales Discounts     | 4. Other Accounts |

## Do it! Review

Determine subsidiary and general ledger balances.

(SO 2)

**Do it! 7-1** Presented below is information related to Chung Company for its first month of operations. Determine the balances that appear in the accounts payable subsidiary ledger. What Accounts Payable balance appears in the general ledger at the end of January?

| Credit Purchases |                |          | Cash Paid |                |          |
|------------------|----------------|----------|-----------|----------------|----------|
| Jan. 6           | Shada Company  | \$ 9,000 | Jan. 11   | Shada Company  | \$ 6,500 |
| Jan. 10          | Liam Company   | 12,000   | Jan. 16   | Liam Company   | 12,000   |
| Jan. 23          | Esmond Company | 10,000   | Jan. 29   | Esmond Company | 7,700    |

Identify special journals.

(SO 3)

**Do it! 7-2** Tomiko Company had the following transactions during April.

- Sold merchandise on account.
- Purchased merchandise on account.
- Collected cash from a sale to Kahale Company.
- Recorded accrued interest on a note payable.
- Paid \$2,000 for supplies.

Identify the journal in which each of the transactions above is recorded.

## Exercises

Determine control account balances, and explain posting of special journals.

(SO 2, 4)

**E7-1** Ruz Company uses both special journals and a general journal as described in this chapter. On June 30, after all monthly postings had been completed, the Accounts Receivable control account in the general ledger had a debit balance of \$320,000; the Accounts Payable control account had a credit balance of \$77,000.

The July transactions recorded in the special journals are summarized below. No entries affecting accounts receivable and accounts payable were recorded in the general journal for July.

|                       |  |
|-----------------------|--|
| Sales journal         | Total sales \$161,400                      |
| Purchases journal     | Total purchases \$56,400                   |
| Cash receipts journal | Accounts receivable column total \$131,000 |
| Cash payments journal | Accounts payable column total \$47,500     |

**Instructions**

- (a) What is the balance of the Accounts Receivable control account after the monthly postings on July 31?
- (b) What is the balance of the Accounts Payable control account after the monthly postings on July 31?
- (c) To what account(s) is the column total of \$161,400 in the sales journal posted?
- (d) To what account(s) is the accounts receivable column total of \$131,000 in the cash receipts journal posted?

**E7-2** Presented below is the subsidiary accounts receivable account of Lana Parilla.

*Explain postings to subsidiary ledger.*

(SO 2)

| Date    | Ref. | Debit  | Credit | Balance |
|---------|------|--------|--------|---------|
| 2012    |      |        |        |         |
| Sept. 2 | S31  | 61,000 |        | 61,000  |
| 9       | G4   |        | 14,000 | 47,000  |
| 27      | CR8  |        | 47,000 | —       |

**Instructions**

Write a memo to Maya Henssens, chief financial officer, that explains each transaction.

**E7-3** On September 1, the balance of the Accounts Receivable control account in the general ledger of Joss Whedon Company was \$10,960. The customers' subsidiary ledger contained account balances as follows: Gareth \$1,440, Gillum \$2,640, Minear \$2,060, Edlund \$4,820. At the end of September, the various journals contained the following information.

*Post various journals to control and subsidiary accounts.*

(SO 2, 4)

**Sales journal:** Sales to Edlund \$800; to Gareth \$1,260; to Molina \$1,330; to Minear \$1,100.

**Cash receipts journal:** Cash received from Minear \$1,310; from Edlund \$2,300; from Molina \$380; from Gillum \$1,800; from Gareth \$1,240.

**General journal:** An allowance is granted to Edlund \$220.

**Instructions**

- (a) Set up control and subsidiary accounts and enter the beginning balances. Do not construct the journals.
- (b) Post the various journals. Post the items as individual items or as totals, whichever would be the appropriate procedure. (No sales discounts given.)
- (c) Prepare a list of customers and prove the agreement of the controlling account with the subsidiary ledger at September 30, 2012.

**E7-4** Malcolnn Reynolds Company has a balance in its Accounts Receivable control account of \$11,000 on January 1, 2012. The subsidiary ledger contains three accounts: Nathan Company, balance \$4,000; Fillion Company, balance \$2,500; and Lassak Company. During January, the following receivable-related transactions occurred.

*Determine control and subsidiary ledger balances for accounts receivable.*

(SO 2)

|                 | <u>Credit Sales</u> | <u>Collections</u> | <u>Returns</u> |
|-----------------|---------------------|--------------------|----------------|
| Nathan Company  | \$9,000             | \$8,000            | \$ -0-         |
| Fillion Company | 7,000               | 2,500              | 3,000          |
| Lassak Company  | 8,500               | 9,000              | -0-            |

**Instructions**

- (a) What is the January 1 balance in the Lassak Company subsidiary account?
- (b) What is the January 31 balance in the control account?
- (c) Compute the balances in the subsidiary accounts at the end of the month.
- (d) Which January transaction would not be recorded in a special journal?

Determine control and subsidiary ledger balances for accounts payable. (SO 2)

**E7-5** Zoe Washburne Company has a balance in its Accounts Payable control account of \$8,250 on January 1, 2012. The subsidiary ledger contains three accounts: Gina Company, balance \$3,000; Torres Company, balance \$1,875; and Wankum Company. During January, the following payable-related transactions occurred.

|                | <u>Purchases</u> | <u>Payments</u> | <u>Returns</u> |
|----------------|------------------|-----------------|----------------|
| Gina Company   | \$6,750          | \$6,000         | \$ -0-         |
| Torres Company | 5,250            | 1,875           | 2,250          |
| Wankum Company | 6,375            | 6,750           | -0-            |

**Instructions**

- (a) What is the January 1 balance in the Wankum Company subsidiary account?
- (b) What is the January 31 balance in the control account?
- (c) Compute the balances in the subsidiary accounts at the end of the month.
- (d) Which January transaction would not be recorded in a special journal?

Record transactions in sales and purchases journal. (SO 2, 3)

**E7-6** Hoban Company uses special journals and a general journal. The following transactions occurred during September 2012.

- Sept. 2 Sold merchandise on account to H. Wash, invoice no. 101, \$720, terms n/30. The cost of the merchandise sold was \$420.
- 10 Purchased merchandise on account from A. Tudyk \$600, terms 2/10, n/30.
- 12 Purchased office equipment on account from R. Press \$6,500.
- 21 Sold merchandise on account to G. Edmonson, invoice no. 102 for \$800, terms 2/10, n/30. The cost of the merchandise sold was \$480.
- 25 Purchased merchandise on account from D. Boyd \$860, terms n/30.
- 27 Sold merchandise to S. Miller for \$700 cash. The cost of the merchandise sold was \$400.

**Instructions**

- (a) Prepare a sales journal (see Illustration 7-7) and a single-column purchases journal (see Illustration 7-13). (Use page 1 for each journal.)
- (b) Record the transaction(s) for September that should be journalized in the sales journal and the purchases journal.

Record transactions in cash receipts and cash payments journal. (SO 2, 3)

**E7-7** Inara Serra Co. uses special journals and a general journal. The following transactions occurred during May 2012.

- May 1 I. Serra invested \$50,000 cash in the business.
- 2 Sold merchandise to Morena Co. for \$6,300 cash. The cost of the merchandise sold was \$4,200.
- 3 Purchased merchandise for \$7,200 from J. DeLeon using check no. 101.
- 14 Paid salary to H. Potter \$700 by issuing check no. 102.
- 16 Sold merchandise on account to K. Kimbell for \$900, terms n/30. The cost of the merchandise sold was \$630.
- 22 A check of \$9,000 is received from M. Baccarin in full for invoice 101; no discount given.

**Instructions**

- (a) Prepare a multiple-column cash receipts journal (see Illustration 7-9) and a multiple-column cash payments journal (see Illustration 7-16). (Use page 1 for each journal.)
- (b) Record the transaction(s) for May that should be journalized in the cash receipts journal and cash payments journal.

Explain journalizing in cash journals. (SO 3)

**E7-8** Blue Glove Company uses the columnar cash journals illustrated in the textbook. In April, the following selected cash transactions occurred.

- 1. Made a refund to a customer as an allowance for damaged goods.
- 2. Received collection from customer within the 3% discount period.
- 3. Purchased merchandise for cash.
- 4. Paid a creditor within the 3% discount period.
- 5. Received collection from customer after the 3% discount period had expired.
- 6. Paid freight on merchandise purchased.
- 7. Paid cash for office equipment.
- 8. Received cash refund from supplier for merchandise returned.
- 9. Withdrew cash for personal use of owner.
- 10. Made cash sales.

**Instructions**

Indicate (a) the journal, and (b) the columns in the journal that should be used in recording each transaction.

**E7-9** Jayne Cobb Company has the following selected transactions during March.

- Mar. 2 Purchased equipment costing \$9,400 from Adam Company on account.
- 5 Received credit of \$410 from Baldwin Company for merchandise damaged in shipment to Jayne Cobb.
- 7 Issued credit of \$400 to Cockrum Company for merchandise the customer returned. The returned merchandise had a cost of \$260.

*Journalize transactions in general journal and explain postings.*  
(SO 2, 4)

Jayne Cobb Company uses a one-column purchases journal, a sales journal, the columnar cash journals used in the text, and a general journal.

**Instructions**

- (a) Journalize the transactions in the general journal.
- (b)  In a brief memo to the president of Jayne Cobb Company, explain the postings to the control and subsidiary accounts from each type of journal.

**E7-10** Below are some typical transactions incurred by Ricketts Company.

1. Payment of creditors on account.
2. Return of merchandise sold for credit.
3. Collection on account from customers.
4. Sale of land for cash.
5. Sale of merchandise on account.
6. Sale of merchandise for cash.
7. Received credit for merchandise purchased on credit.
8. Sales discount taken on goods sold.
9. Payment of employee wages.
10. Income summary closed to owner's capital.
11. Depreciation on building.
12. Purchase of office supplies for cash.
13. Purchase of merchandise on account.

*Indicate journalizing in special journals.*  
(SO 3)

**Instructions**

For each transaction, indicate whether it would normally be recorded in a cash receipts journal, cash payments journal, sales journal, single-column purchases journal, or general journal.

**E7-11** The general ledger of Fairman Company contained the following Accounts Payable control account (in T-account form). Also shown is the related subsidiary ledger.

*Explain posting to control account and subsidiary ledger.*  
(SO 2, 4)

| <b>GENERAL LEDGER</b>   |                 |       |         |                 |        |

**Instructions**

Determine the correct amount of the end-of-month posting from the sales journal to the Accounts Receivable control account.

Compute balances in various accounts.

(SO 4)

**E7-14** Selected account balances for R. Tam Company at January 1, 2012, are presented below.

|                     |          |
|---------------------|----------|
| Accounts Payable    | \$14,000 |
| Accounts Receivable | 22,000   |
| Cash                | 17,000   |
| Inventory           | 13,500   |

R. Tam's sales journal for January shows a total of \$100,000 in the selling price column, and its one-column purchases journal for January shows a total of \$72,000.

The column totals in R. Tam's cash receipts journal are: Cash Dr. \$61,000; Sales Discounts Dr. \$1,100; Accounts Receivable Cr. \$45,000; Sales Revenue Cr. \$6,000; and Other Accounts Cr. \$11,100.

The column totals in R. Tam's cash payments journal for January are: Cash Cr. \$55,000; Inventory Cr. \$1,000; Accounts Payable Dr. \$46,000; and Other Accounts Dr. \$10,000. R. Tam's total cost of goods sold for January is \$63,600.

Accounts Payable, Accounts Receivable, Cash, Inventory, and Sales Revenue are not involved in the "Other Accounts" column in either the cash receipts or cash payments journal, and are not involved in any general journal entries.

### Instructions

Compute the January 31 balance for R. Tam in the following accounts.

- (a) Accounts Payable.
- (b) Accounts Receivable.
- (c) Cash.
- (d) Inventory.
- (e) Sales Revenue.

- 15 Paid Hendricks Co. balance due of \$1,800, check no. 67.
- 16 C. Saffron, the owner, pays his personal insurance premium of \$400, check no. 68.
- 19 Paid Ron Co. in full for invoice no. 610, \$1,600 less 2% cash discount, check no. 69, \$1,568.
- 29 Paid Christina Company in full for invoice no. 264, \$2,500, check no. 70.

**Instructions**

(a) Balancing totals \$12,350

- (a) Journalize the transactions above in a four-column cash payments journal with columns for Other Accounts Dr., Accounts Payable Dr., Inventory Cr., and Cash Cr. Foot and crossfoot the journal.
- (b) Insert the beginning balances in the Accounts Payable control and subsidiary accounts, and post the October transactions to these accounts.
- (c) Prove the agreement of the control account and the subsidiary account balances.

(c) Accounts Payable \$2,100

*Journalize transactions in multi-column purchases journal and sales journal; post to the general and subsidiary ledgers.*

(SO 2, 3, 4)

**P7-3A** The chart of accounts of IT Company includes the following selected accounts.

|                         |                                  |
|-------------------------|----------------------------------|
| 112 Accounts Receivable | 401 Sales Revenue                |
| 120 Inventory           | 412 Sales Returns and Allowances |
| 126 Supplies            | 505 Cost of Goods Sold           |
| 157 Equipment           | 610 Advertising Expense          |
| 201 Accounts Payable    |                                  |

In July, the following selected transactions were completed. All purchases and sales were on account. The cost of all merchandise sold was 70% of the sales price.

- July 1 Purchased merchandise from Roy Company \$8,000.
- 2 Received freight bill from Moss Shipping on Roy purchase \$400.
- 3 Made sales to Jen Company \$1,300, and to O'Dowd Bros. \$1,500.
- 5 Purchased merchandise from Moon Company \$3,200.
- 8 Received credit on merchandise returned to Moon Company \$300.
- 13 Purchased store supplies from Cress Supply \$720.
- 15 Purchased merchandise from Roy Company \$3,600 and from Anton Company \$3,300.
- 16 Made sales to Sager Company \$3,450 and to O'Dowd Bros. \$1,570.
- 18 Received bill for advertising from Lynda Advertisements \$600.
- 21 Sales were made to Jen Company \$310 and to Haddad Company \$2,800.
- 22 Granted allowance to Jen Company for merchandise damaged in shipment \$40.
- 24 Purchased merchandise from Moon Company \$3,000.
- 26 Purchased equipment from Cress Supply \$900.
- 28 Received freight bill from Moss Shipping on Moon purchase of July 24, \$380.
- 30 Sales were made to Sager Company \$5,600.

**Instructions**

(a) Purchases journal—  
Accounts Payable \$24,100  
Sales column total \$16,530

- (a) Journalize the transactions above in a purchases journal, a sales journal, and a general journal. The purchases journal should have the following column headings: Date, Account Credited (Debited), Ref., Accounts Payable Cr., Inventory Dr., and Other Accounts Dr.
- (b) Post to both the general and subsidiary ledger accounts. (Assume that all accounts have zero beginning balances.)
- (c) Prove the agreement of the control and subsidiary accounts.

(c) Accounts Receivable \$16,490  
Accounts Payable \$23,800

*Journalize transactions in special journals.*

(SO 2, 3, 4)

**P7-4A** Selected accounts from the chart of accounts of Ayoade Company are shown below.

|                         |                      |
|-------------------------|----------------------|
| 101 Cash                | 126 Supplies         |
| 112 Accounts Receivable | 157 Equipment        |
| 120 Inventory           | 201 Accounts Payable |

- 401 Sales Revenue
- 412 Sales Returns and Allowances
- 414 Sales Discounts
- 505 Cost of Goods Sold
- 726 Salaries and Wages Expense

| Accounts Payable                   |           | 43,000    |
| Owner's Capital                    |           | 86,450    |
|                                    | \$130,950 | \$130,950 |

The subsidiary ledgers contain the following information: (1) accounts receivable—B. Cordelia \$2,500, I. Togo \$7,500, T. Dudley \$5,000; (2) accounts payable—T. Igawa \$10,000, D. Miranda \$18,000, and K. Inwood \$15,000. The cost of all merchandise sold was 60% of the sales price.

The transactions for January 2013 are as follows.

- Jan. 3 Sell merchandise to M. Rensing \$5,000, terms 2/10, n/30.  
 5 Purchase merchandise from E. Vietti \$2,000, terms 2/10, n/30.  
 7 Receive a check from T. Dudley \$3,500.  
 11 Pay freight on merchandise purchased \$300.  
 12 Pay rent of \$1,000 for January.  
 13 Receive payment in full from M. Rensing.  
 14 Post all entries to the subsidiary ledgers. Issued credit of \$300 to B. Cordelia for returned merchandise.  
 15 Send K. Inwood a check for \$14,850 in full payment of account, discount \$150.  
 17 Purchase merchandise from G. Marley \$1,600, terms 2/10, n/30.  
 18 Pay sales salaries of \$2,800 and office salaries \$2,000.  
 20 Give D. Miranda a 60-day note for \$18,000 in full payment of account payable.  
 23 Total cash sales amount to \$9,100.  
 24 Post all entries to the subsidiary ledgers. Sell merchandise on account to I. Togo \$7,400, terms 1/10, n/30.  
 27 Send E. Vietti a check for \$950.  
 29 Receive payment on a note of \$40,000 from B. Lemke.  
 30 Post all entries to the subsidiary ledgers. Return merchandise of \$300 to G. Marley for credit.

**Instructions**

(a) Open general and subsidiary ledger accounts for the following.

|  |                                  |
|--|----------------------------------|
| 101 Cash                               | 301 Owner's Capital              |
| 112 Accounts Receivable                | 401 Sales Revenue                |
| 115 Notes Receivable                   | 412 Sales Returns and Allowances |
| 120 Inventory                          | 414 Sales Discounts              |
| 157 Equipment                          | 505 Cost of Goods Sold           |
| 158 Accumulated Depreciation—Equipment | 726 Salaries and Wages Expense   |
| 200 Notes Payable                      | 729 Rent Expense                 |
| 201 Accounts Payable                   |                                  |

(b) Record the January transactions in a sales journal, a single-column purchases journal, a cash receipts journal (see Illustration 7-9), a cash payments journal (see Illustration 7-16), and a general journal.

(c) Post the appropriate amounts to the general ledger.

(d) Prepare a trial balance at January 31, 2013.

(e) Determine whether the subsidiary ledgers agree with controlling accounts in the general ledger.

(b) Sales journal \$12,400  
 Purchases journal \$3,600  
 Cash receipts journal (balancing) \$57,600  
 Cash payments journal (balancing) \$22,050  
 (d) Totals \$139,800  
 (e) Accounts Receivable \$18,600  
 Accounts Payable \$12,350

## Problems: Set B

Journalize transactions in cash receipts journal; post to control account and subsidiary ledger.

(SO 2, 3, 4)

**P7-1B** Feig Company's chart of accounts includes the following selected accounts.

|                         |                        |

In addition, the following transactions have not been journalized for February 2012.

- Feb. 2 Purchased merchandise on account from B. Baumgartner for \$3,600, terms 2/10, n/30.
- 7 Purchased merchandise on account from A. Martin for \$23,000, terms 1/10, n/30.
- 9 Paid cash of \$980 for purchase of supplies.
- 12 Paid \$3,528 to B. Baumgartner in payment for \$3,600 invoice, less 2% discount.
- 15 Purchased equipment for \$5,500 cash.
- 16 Purchased merchandise on account from D. Gale \$1,900, terms 2/10, n/30.
- 17 Paid \$22,770 to A. Martin in payment of \$23,000 invoice, less 1% discount.
- 20 S. Hudson withdrew cash of \$800 from the business for personal use.
- 21 Purchased merchandise on account from Kansas Company for \$6,000, terms 1/10, n/30.
- 28 Paid \$1,900 to D. Gale in payment of \$1,900 invoice.

**Instructions**

- (a) Open the following accounts in the general ledger.
- |  |                          |
|--|--------------------------|
| 101 Cash                               | 301 Owner’s Capital      |
| 112 Accounts Receivable                | 306 Owner’s Drawings     |
| 120 Inventory                          | 401 Sales Revenue        |
| 126 Supplies                           | 414 Sales Discounts      |
| 157 Equipment                          | 505 Cost of Goods Sold   |
| 158 Accumulated Depreciation—Equipment | 631 Supplies Expense     |
| 201 Accounts Payable                   | 711 Depreciation Expense |
- (b) Journalize the transactions that have not been journalized in a one-column purchases journal and the cash payments journal (see Illustration 7-16).  
 (c) Post to the accounts receivable and accounts payable subsidiary ledgers. Follow the sequence of transactions as shown in the problem.  
 (d) Post the individual entries and totals to the general ledger.  
 (e) Prepare a trial balance at February 28, 2012.  
 (f) Determine that the subsidiary ledgers agree with the control accounts in the general ledger.  
 (g) The following adjustments at the end of February are necessary.  
     (1) A count of supplies indicates that \$200 is still on hand.  
     (2) Depreciation on equipment for February is \$150.  
 Prepare the adjusting entries and then post the adjusting entries to the general ledger.  
 (h) Prepare an adjusted trial balance at February 28, 2012.
- (b) Purchases journal total \$34,500  
 Cash payments journal—Cash, Cr. \$35,478
- (e) Totals \$54,500  
 (f) Accounts Receivable \$12,000  
 Accounts Payable \$6,000
- (h) Totals \$54,650

- 31 Pay sales salaries of \$4,300 and office salaries of \$3,600.

**Instructions**

- (a) Record the January transactions in the appropriate journal—sales, purchases, cash receipts, cash payments, and general.
- (b) Post the journals to the general and subsidiary ledgers. Add and number new accounts in an orderly fashion as needed.
- (c) Prepare a trial balance at January 31, 2012, using a worksheet. Complete the worksheet using the following additional information.
  - (1) Supplies at January 31 total \$700.
  - (2) Insurance coverage expires on October 31, 2012.
  - (3) Annual depreciation on the equipment is \$1,500.
  - (4) Interest of \$30 has accrued on the note payable.
  - (5) Inventory at January 31 is \$15,000.
- (d) Prepare a multiple-step income statement and an owner's equity statement for January and a classified balance sheet at the end of January.
- (e) Prepare and post the adjusting and closing entries.
- (f) Prepare a post-closing trial balance, and determine whether the subsidiary ledgers agree with the control accounts in the general ledger.

(c) Trial balance totals  
\$196,820;  
Adj. T/B totals \$196,975

(d) Net income \$9,685  
Total assets \$126,315

(f) Post-closing T/B totals  
\$127,940

## BROADENING YOUR PERSPECTIVE

### Financial Reporting and Analysis

#### Financial Reporting Problem—Mini Practice Set

**BYP7-1** (You may use the working papers that accompany this textbook to work this mini practice set.) Bluma Co. uses a perpetual inventory system and both an accounts receivable and an accounts payable subsidiary ledger. Balances related to both the general ledger and the subsidiary ledger for Bluma are indicated in the working papers. Presented on the next page are a series of transactions for Bluma Co. for the month of January. Credit sales terms are 2/10, n/30. The cost of all merchandise sold was 60% of the sales price.

- Jan. 3 Sell merchandise on account to B. Richey \$3,100, invoice no. 510, and to J. Forbes \$1,800, invoice no. 511.
- 5 Purchase merchandise from S. Vogel \$5,000 and D. Lynch \$2,200, terms n/30.
- 7 Receive checks from S. LaDew \$4,000 and B. Garcia \$2,000 after discount period has lapsed.
- 8 Pay freight on merchandise purchased \$235.
- 9 Send checks to S. Hoyt for \$9,000 less 2% cash discount, and to D. Omara for \$11,000 less 1% cash discount.
- 9 Issue credit of \$300 to J. Forbes for merchandise returned.
- 10 Summary daily cash sales total \$15,500.
- 11 Sell merchandise on account to R. Dvorak \$1,600, invoice no. 512, and to S. LaDew \$900, invoice no. 513.
- 12 Pay rent of \$1,000 for January.
- 13 Receive payment in full from B. Richey and J. Forbes less cash discounts.
- 15 Withdraw \$800 cash by M. Bluma for personal use.
- 15 Post all entries to the subsidiary ledgers.
- 16 Purchase merchandise from D. Omara \$18,000, terms 1/10, n/30; S. Hoyt \$14,200, terms 2/10, n/30; and S. Vogel \$1,500, terms n/30.
- 17 Pay \$400 cash for office supplies.
- 18 Return \$200 of merchandise to S. Hoyt and receive credit.
- 20 Summary daily cash sales total \$20,100.
- 21 Issue \$15,000 note, maturing in 90 days, to R. Moses in payment of balance due.
- 21 Receive payment in full from S. LaDew less cash discount.
- 22 Sell merchandise on account to B. Richey \$2,700, invoice no. 514, and to R. Dvorak \$1,300, invoice no. 515.
- 22 Post all entries to the subsidiary ledgers.
- 23 Send checks to D. Omara and S. Hoyt in full payment less cash discounts.
- 25 Sell merchandise on account to B. Garcia \$3,500, invoice no. 516, and to J. Forbes \$6,100, invoice no. 517.
- 27 Purchase merchandise from D. Omara \$14,500, terms 1/10, n/30; D. Lynch \$1,200, terms n/30; and S. Vogel \$5,400, terms n/30.
- 27 Post all entries to the subsidiary ledgers.
- 28 Pay \$200 cash for office supplies.
- 31 Summary daily cash sales total \$21,300.
- 31 Pay sales salaries \$4,300 and office salaries \$3,800.

### Instructions

- (a) Record the January transactions in a sales journal, a single-column purchases journal, a cash receipts journal as shown on page 327, a cash payments journal as shown on page 332, and a two-column general journal.
- (b) Post the journals to the general ledger.
- (c) Prepare a trial balance at January 31, 2012, in the trial balance columns of the worksheet. Complete the worksheet using the following additional information.
- (1) Office supplies at January 31 total \$900.
  - (2) Insurance coverage expires on October 31, 2012.
  - (3) Annual depreciation on the equipment is \$1,500.
  - (4) Interest of \$50 has accrued on the note payable.
- (d) Prepare a multiple-step income statement and an owner's equity statement for January and a classified balance sheet at the end of January.
- (e) Prepare and post adjusting and closing entries.
- (f) Prepare a post-closing trial balance, and determine whether the subsidiary ledgers agree with the control accounts in the general ledger.

## On the Web

**BYP7-2 Intuit** provides some of the leading accounting software packages. Information related to its products are found at its website.

**Address:** <http://quickbooks.intuit.com> or go to [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt)

### Instructions

Look under product and services for the product QuickBooks Premier for Accountants. Be ready to discuss its new features with the class.

## Critical Thinking

### Decision Making Across the Organization

**BYP7-3** Hughey & Payne is a wholesaler of small appliances and parts. Hughey & Payne is operated by two owners, Rich Hughey and Kristen Payne. In addition, the company has one employee, a repair specialist, who is on a fixed salary. Revenues are earned through the sale of appliances to retailers (approximately 75% of total revenues), appliance parts to do-it-yourselfers (10%), and the repair of appliances brought to the store (15%). Appliance sales are made on both a credit and cash basis. Customers are billed on prenumbered sales invoices. Credit terms are always net/30 days. All parts sales and repair work are cash only.

Merchandise is purchased on account from the manufacturers of both the appliances and the parts. Practically all suppliers offer cash discounts for prompt payments, and it is company policy to take all discounts. Most cash payments are made by check. Checks are most frequently issued to suppliers, to trucking companies for freight on merchandise purchases, and to newspapers, radio, and TV stations for advertising. All advertising bills are paid as received. Rich and Kristen each make a monthly drawing in cash for personal living expenses. The salaried repairman is paid twice monthly. Hughey & Payne currently has a manual accounting system.

#### Instructions

With the class divided into groups, answer the following.

- (a) Identify the special journals that Hughey & Payne should have in its manual system. List the column headings appropriate for each of the special journals.
- (b) What control and subsidiary accounts should be included in Hughey & Payne's manual system? Why?

### Communication Activity

**BYP7-4** Barb Doane, a classmate, has a part-time bookkeeping job. She is concerned about the inefficiencies in journalizing and posting transactions. Jim Houser is the owner of the company where Barb works. In response to numerous complaints from Barb and others, Jim hired two additional bookkeepers a month ago. However, the inefficiencies have continued at an even higher rate. The accounting information system for the company has only a general journal and a general ledger. Jim refuses to install a computerized accounting system.

#### Instructions

Now that Barb is an expert in manual accounting information systems, she decides to send a letter to Jim Houser explaining (1) why the additional personnel did not help and (2) what changes should be made to improve the efficiency of the accounting department. Write the letter that you think Barb should send.

### Ethics Case

**BYP7-5** Roniger Products Company operates three divisions, each with its own manufacturing plant and marketing/sales force. The corporate headquarters and central accounting office are in Roniger, and the plants are in Freeport, Rockport, and Bayport, all within 50 miles of Roniger. Corporate management treats each division as an independent profit center and encourages competition among them. They each have similar but different product lines. As a competitive incentive, bonuses are awarded each year to the employees of the fastest-growing and most-profitable division.

Jose Molina is the manager of Roniger's centralized computerized accounting operation that enters the sales transactions and maintains the accounts receivable for all three divisions. Jose came up in the accounting ranks from the Bayport division where his wife, several relatives, and many friends still work.

As sales documents are entered into the computer, the originating division is identified by code. Most sales documents (95%) are coded, but some (5%) are not coded or are coded incorrectly. As the manager, Jose has instructed the data-entry personnel to assign the Bayport code to all uncoded and incorrectly coded sales documents. This is done he says, "in order to expedite processing and to keep the computer files current since they are updated daily." All receivables and cash collections for all three divisions are handled by Roniger as one subsidiary accounts receivable ledger.

#### Instructions

- (a) Who are the stakeholders in this situation?
- (b) What are the ethical issues in this case?
- (c) How might the system be improved to prevent this situation?

## “All About You” Activity

**BYP7-6** In this chapter, you learned about a basic manual accounting information system. Computerized accounting systems range from the very basic and inexpensive to the very elaborate and expensive. However, even the most sophisticated systems are based on the fundamental structures and relationships that you learned in this chapter.

### Instructions

Go to the book companion site for this text, [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), and review the demonstration that is provided for the general ledger software package that is used with this text. Prepare a brief explanation of how the general ledger system works—that is, how it is used, and what information it provides.

### Answers to Insight and Accounting Across the Organization Questions

**p. 318 Curbing Fraudulent Activity with Software** **Q:** Why might this software help reduce fraudulent activity by employees? **A:** By pinpointing who used the accounting system and when they used it, the software can hold employees more accountable for their actions. Companies hope that this will reduce efforts by employees to enter false accounting entries, change the dates of transactions, or create unauthorized expenditures. If employees do engage in these activities, there will be significant evidence of their activities.

**p. 321 “I’m John Smith, a.k.a. 13695071642”** **Q:** Why use numbers to identify names in a computerized system? **A:** Computerized systems process numbers faster than letters. Also, letters sometimes cause problems because you may have two people with the same name. Computerized systems avoid this problem by giving different customers, including those with the same names, different account numbers.

## IFRS A Look at IFRS

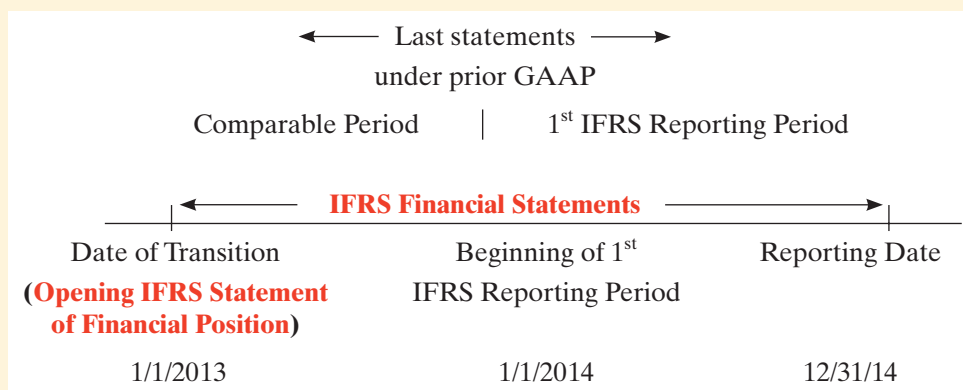

As discussed in Chapter 1, IFRS is growing in acceptance around the world. For example, recent statistics indicate 40% of the Global Fortune 500 companies use IFRS. And the chair of the IASB predicts that IFRS adoption will grow from its current level of 115 countries to nearly 150 countries in the near future.

When countries accept IFRS for use as accepted accounting policies, companies need guidance to ensure that their first IFRS financial statements contain high-quality information. Specifically, *IFRS 1* requires that information in a company’s first IFRS statements (1) be transparent, (2) provide a suitable starting point, and (3) have a cost that does not exceed the benefits.

## Key Points

- The basic concepts related to an accounting information system are the same under GAAP and IFRS.
- The use of subsidiary ledgers and control accounts, as well as the system used for recording transactions, are the same under GAAP and IFRS.
- Many companies will be going through a substantial conversion process to switch from their current reporting standards to IFRS.
- The overriding principle in converting to IFRS is full retrospective application of IFRS. Retrospective application—recasting prior financial statements on the basis of IFRS—provides financial statement users with comparable information.
- As indicated, the objective of the conversion process is to present a set of IFRS statements as if the company always reported under IFRS. To achieve this objective, a company follows these steps.
  1. Identify the timing of its first IFRS statements.
  2. Prepare an opening balance sheet at the date of transition to IFRS.

3. Select accounting principles that comply with IFRS, and apply these principles retrospectively.
  4. Make extensive disclosures to explain the transition to IFRS.
- Once a company decides to convert to IFRS, it must decide on the transition date and the reporting date. The transition date is the beginning of the earliest period for which full comparative IFRS information is presented. The reporting date is the closing balance sheet date for the first IFRS financial statements.
  - To illustrate, assume that FirstChoice Company plans to provide its first IFRS statements for the year ended December 31, 2014. FirstChoice decides to present comparative information for one year only. Therefore, its date of transition to IFRS is January 1, 2013, and its reporting date is December 31, 2014.
  - The timeline for first-time adoption is presented in the following graphic.

The graphic shows the following.

1. The opening IFRS statement of financial position for FirstChoice on January 1, 2013, serves as the starting point (date of transition) for the company's accounting under IFRS.
2. The first full IFRS statements are shown for FirstChoice for December 31, 2014. In other words, a minimum of two years of IFRS statements must be presented before a conversion to IFRS occurs. As a result, FirstChoice must prepare at least one year of comparative financial statements for 2013 using IFRS.
3. FirstChoice presents financial statements in accordance with U.S. GAAP annually to December 31, 2013.

Following this conversion process, FirstChoice provides users of the financial statements with comparable IFRS statements for 2013 and 2014.

- Upon first-time adoption of IFRS, a company must present at least one year of comparative information under IFRS.

## Looking to the Future

The basic recording process shown in this textbook is followed by companies around the globe. It is unlikely to change in the future. The definitional structure of assets, liabilities, equity, revenues, and expenses may change over time as the IASB and FASB evaluate their overall conceptual framework for establishing accounting standards. In addition, high-quality international accounting requires both high-quality accounting standards and high-quality auditing. Similar to the convergence of U.S. GAAP and IFRS, there is a movement to improve international auditing standards. The International Auditing and Assurance Standards Board (IAASB) functions as an independent standard-setting body. It works to establish high-quality auditing and assurance and quality-control standards throughout the world. Whether the IAASB adopts internal control provisions similar to those in SOX remains to be seen. You can follow developments in the international audit arena at <http://www.ifac.org/laasb/>.

## Self-Test Questions

- Information in a company's first IFRS statements must:
  - have a cost that does not exceed the benefits.
  - be transparent.
  - provide a suitable starting point.
  - All the above.
- Indicate which of these statements is *false*.
  - The use of subsidiary ledgers is the same under IFRS and GAAP.
  - GAAP and IFRS use the same accounting principles.
  - The use of special journals is the same under IFRS and GAAP.
  - At conversion, companies should retrospectively adjust the financial statements presented following IFRS.
- The transition date is the date:
  - when a company no longer reports under its national standards.
  - when the company issues its most recent financial statement under IFRS.
  - three years prior to the reporting date.
  - None of the above.
- When converting to IFRS, a company must:
  - recast previously issued financial statements in accordance with IFRS.
  - use U.S. GAAP in the reporting period but subsequently use IFRS.
  - prepare at least three years of comparative statements.
  - use U.S. GAAP in the transition year, but IFRS in the reporting year.
- The purpose of presenting comparative information in the transition to IFRS is:
  - to ensure that the information is reliable.
  - in accordance with the Sarbanes-Oxley Act.
  - to provide users of the financial statements with information on U.S. GAAP in one period and IFRS in the other period.
  - to provide users of the financial statements with information on IFRS for at least two periods.

## IFRS Concepts and Applications

**IFRS7-1** How is the date of transition and the date of reporting determined in first-time adoption of IFRS?

**IFRS7-2** What are the characteristics of high-quality information in a company's first IFRS financial statements?

**IFRS7-3** What are the steps to be completed in preparing the opening IFRS statement of financial position?

**IFRS7-4** Becker Ltd. is planning to adopt IFRS and prepare its first IFRS financial statements at December 31, 2013. What is the date of Becker's opening balance sheet assuming one year of comparative information? What periods will be covered in Becker's first IFRS financial statements?

**IFRS7-5** Stengel plc is preparing its opening IFRS balance sheet on January 1, 2012. Under its previous GAAP, Stengel used the LIFO inventory method. Under LIFO, its inventory is reported at £250,000; under FIFO, which Stengel will use upon adoption of IFRS, the inventory is valued at £265,000. Explain what Stengel must do.

# CHAPTER 8

## Fraud, Internal Control, and Cash

### Study Objectives

After studying this chapter, you should be able to:

- 1 Define fraud and internal control.
- 2 Identify the principles of internal control activities.
- 3 Explain the applications of internal control principles to cash receipts.
- 4 Explain the applications of internal control principles to cash disbursements.
- 5 Describe the operation of a petty cash fund.
- 6 Indicate the control features of a bank account.
- 7 Prepare a bank reconciliation.
- 8 Explain the reporting of cash.

### Feature Story

#### MINDING THE MONEY IN MOOSE JAW

If you're ever looking for a cappuccino in Moose Jaw, Saskatchewan, stop by **Stephanie's Gourmet Coffee and More**, located on Main Street. Staff there serve, on average, 650 cups of coffee a day, including both regular and specialty coffees, not to mention soups, Italian sandwiches, and a wide assortment of gourmet cheesecakes.

"We've got high school students who come here, and students from the community college," says owner/manager Stephanie Mintenko, who has run the place since opening it in 1995. "We have customers who are retired, and others who are working people and have only 30 minutes for lunch. We have to be pretty quick."

That means that the cashiers have to be efficient. Like most businesses where purchases are low-cost and high-volume, cash control has to be simple.

“We have an electronic cash register, but it’s not the fancy new kind where you just punch in the item,” explains Ms. Mintenko. “You have to punch in the prices.” The machine does keep track of sales in several categories, however. Cashiers punch a button to indicate whether each item is a beverage, a meal, or a charge for the cafe’s Internet connections. An internal tape in the machine keeps a record of all transactions; the customer receives a receipt only upon request.

There is only one cash register. “Up to three of us might operate it on any given shift, including myself,” says Ms. Mintenko.

She and her staff do two “cashouts” each day—one with the shift change at 5:00 p.m. and one when the shop closes at 10:00 p.m. At each cashout, they count the cash in the register drawer. That amount, minus the cash change carried forward (the float), should match the shift total on the register tape. If there’s a discrepancy, they do another count. Then, if necessary, “we go through the whole tape to find the mistake,” she explains. “It usually turns out to be someone who punched in \$18 instead of \$1.80, or something like that.”

Ms. Mintenko sends all the cash tapes and float totals to a bookkeeper, who double-checks everything and provides regular reports. “We try to keep the accounting simple, so we can concentrate on making great coffee and food.”

- **Investor Insight: Madoff’s Ponzi Scheme** (p. 387)

## Preview of CHAPTER 8

As the story about recording cash sales at **Stephanie's Gourmet Coffee and More** indicates, control of cash is important to ensure that fraud does not occur. Companies also need controls to safeguard other types of assets. For example, Stephanie's undoubtedly has controls to prevent the theft of food and supplies, and controls to prevent the theft of tableware and dishes from its kitchen.

In this chapter, we explain the essential features of an internal control system and how it prevents fraud. We also describe how those controls apply to a specific asset—cash. The applications include some controls with which you may be already familiar, such as the use of a bank.

The content and organization of Chapter 8 are as follows.

| Fraud, Internal Control, and Cash   |   |  |   |
|---|---|--|---|
| Fraud and Internal Control  | Cash Controls   | Control Features: Use of a Bank  | Reporting Cash  |
| <ul style="list-style-type: none"> <li>• Fraud</li> <li>• The Sarbanes-Oxley Act</li> <li>• Internal control</li> <li>• Principles of internal control activities</li> <li>• Limitations</li> </ul> | <ul style="list-style-type: none"> <li>• Cash receipts controls</li> <li>• Cash disbursements controls</li> </ul> | <ul style="list-style-type: none"> <li>• Making deposits</li> <li>• Writing checks</li> <li>• Bank statements</li> <li>• Reconciling the bank account</li> <li>• Electronic funds transfer (EFT) system</li> </ul> | <ul style="list-style-type: none"> <li>• Cash equivalents</li> <li>• Restricted cash</li> </ul> |

## Fraud and Internal Control

### Study Objective [1]

Define fraud and internal control.

The Feature Story describes many of the internal control procedures used by **Stephanie's Gourmet Coffee and More**. These procedures are necessary to discourage employees from fraudulent activities.

### Fraud

A **fraud** is a dishonest act by an employee that results in personal benefit to the employee at a cost to the employer. Examples of fraud reported in the financial press include:

- A bookkeeper in a small company diverted \$750,000 of bill payments to a personal bank account over a three-year period.
- A shipping clerk with 28 years of service shipped \$125,000 of merchandise to himself.
- A computer operator embezzled \$21 million from **Wells Fargo Bank** over a two-year period.
- A church treasurer “borrowed” \$150,000 of church funds to finance a friend’s business dealings.

Why does fraud occur? The three main factors that contribute to fraudulent activity are depicted by the **fraud triangle** in Illustration 8-1.

The most important element of the fraud triangle is **opportunity**. For an employee to commit fraud, the workplace environment must provide opportunities

that an employee can take advantage of. Opportunities occur when the workplace lacks sufficient controls to deter and detect fraud. For example, inadequate monitoring of employee actions can create opportunities for theft and can embolden employees because they believe they will not be caught.

A second factor that contributes to fraud is **financial pressure**. Employees sometimes commit fraud because of personal financial problems caused by too much debt. Or they might commit fraud because they want to lead a lifestyle that they cannot afford on their current salary.

The third factor that contributes to fraud is **rationalization**. In order to justify their fraud, employees rationalize their dishonest actions. For example, employees sometimes justify fraud because they believe they are underpaid while the employer is making lots of money. Employees feel justified in stealing because they believe they deserve to be paid more.

**Illustration 8-1**  
Fraud triangle

## The Sarbanes-Oxley Act

What can be done to prevent or to detect fraud? After numerous corporate scandals came to light in the early 2000s, Congress addressed this issue by passing the **Sarbanes-Oxley Act of 2002 (SOX)**. Under SOX, all publicly traded U.S. corporations are required to maintain an adequate system of internal control. Corporate executives and boards of directors must ensure that these controls are reliable and effective. In addition, independent outside auditors must attest to the adequacy of the internal control system. Companies that fail to comply are subject to fines, and company officers can be imprisoned. SOX also created the Public Company Accounting Oversight Board (PCAOB), to establish auditing standards and regulate auditor activity.

One poll found that 60% of investors believe that SOX helps safeguard their stock investments. Many say they would be unlikely to invest in a company that fails to follow SOX requirements. Although some corporate executives have criticized the time and expense involved in following the SOX requirements, SOX appears to be working well. For example, the chief accounting officer of **Eli Lilly** noted that SOX triggered a comprehensive review of how the company documents controls. This review uncovered redundancies and pointed out controls that needed to be added. In short, it added up to time and money well spent. And the finance chief at **General Electric** noted, “We have seen value in SOX. It helps build investors’ trust and gives them more confidence.”<sup>1</sup>

## Internal Control

**Internal control** consists of all the related methods and measures adopted within an organization to safeguard its assets, enhance the reliability of its accounting records, increase efficiency of operations, and ensure compliance with laws and regulations. Internal control systems have five primary components as listed below.<sup>2</sup>

- **A control environment.** It is the responsibility of top management to make it clear that the organization values integrity and that unethical activity will not be tolerated. This component is often referred to as the “tone at the top.”

<sup>1</sup>“Corporate Regulation Must Be Working—There’s a Backlash,” *Wall Street Journal*, June 16, 2004, p. C1; and Judith Burns, “Is Sarbanes-Oxley Working?” *Wall Street Journal*, June 21, 2004, pp. R8–R9.

<sup>2</sup>The Committee of Sponsoring Organizations of the Treadway Commission, “Internal Control—Integrated Framework,” [www.coso.org/publications/executive\\_summary\\_integrated\\_framework.htm](http://www.coso.org/publications/executive_summary_integrated_framework.htm) (accessed March 2008).

- **Risk assessment.** Companies must identify and analyze the various factors that create risk for the business and must determine how to manage these risks.
- **Control activities.** To reduce the occurrence of fraud, management must design policies and procedures to address the specific risks faced by the company.
- **Information and communication.** The internal control system must capture and communicate all pertinent information both down and up the organization, as well as communicate information to appropriate external parties.
- **Monitoring.** Internal control systems must be monitored periodically for their adequacy. Significant deficiencies need to be reported to top management and/or the board of directors.

## Principles of Internal Control Activities

Each of the five components of an internal control system is important. Here, we will focus on one component, the control activities. The reason? These activities are the backbone of the company's efforts to address the risks it faces, such as fraud. The specific control activities used by a company will vary, depending on management's assessment of the risks faced. This assessment is heavily influenced by the size and nature of the company.

The six principles of control activities are as follows.

- Establishment of responsibility
- Segregation of duties
- Documentation procedures
- Physical controls
- Independent internal verification
- Human resource controls

We explain these principles in the following sections. You should recognize that they apply to most companies and are relevant to both manual and computerized accounting systems.

### ESTABLISHMENT OF RESPONSIBILITY

An essential principle of internal control is to assign responsibility to specific employees. **Control is most effective when only one person is responsible for a given task.**

To illustrate, assume that the cash on hand at the end of the day in a **Safeway** supermarket is \$10 short of the cash rung up on the cash register. If only one person has operated the register, the shift manager can quickly determine responsibility for the shortage. If two or more individuals have worked the register, it may be impossible to determine who is responsible for the error. In the Feature Story, the principle of establishing responsibility does not appear to be strictly applied by **Stephanie's**, since three people operate the cash register on any given shift.

Establishing responsibility often requires limiting access only to authorized personnel, and then identifying those personnel. For example, the automated systems used by many companies have mechanisms such as identifying passcodes that keep track of who made a journal entry, who rang up a sale, or who entered an inventory storeroom at a particular time. Use of identifying passcodes enables the company to establish responsibility by identifying the particular employee who carried out the activity.

### Study Objective [2]

Identify the principles of internal control activities.

Transfer of cash drawers

## ANATOMY OF A FRAUD

Maureen Frugali was a training supervisor for claims processing at Colossal Healthcare. As a standard part of the claims processing training program, Maureen created fictitious claims for use by trainees. These fictitious claims were then sent to the accounts payable department. After the training claims had been processed, she was to notify Accounts Payable of all fictitious claims, so that they would not be paid. However, she did not inform Accounts Payable about every fictitious claim. She created some fictitious claims for entities that she controlled (that is, she would receive the payment), and she let Accounts Payable pay her.

Total take: \$11 million

**THE MISSING CONTROL**

**Establishment of responsibility.** The healthcare company did not adequately restrict the responsibility for authoring and approving claims transactions. The training supervisor should not have been authorized to create claims in the company's "live" system.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 61–70.

**SEGREGATION OF DUTIES**

Segregation of duties is indispensable in an internal control system. There are two common applications of this principle:

1. Different individuals should be responsible for related activities.
2. The responsibility for record-keeping for an asset should be separate from the physical custody of that asset.

The rationale for segregation of duties is this: **The work of one employee should, without a duplication of effort, provide a reliable basis for evaluating the work of another employee.** For example, the personnel that design and program computerized systems should not be assigned duties related to day-to-day use of the system. Otherwise, they could design the system to benefit them personally and conceal the fraud through day-to-day use.

**Segregation of Related Activities.** **Making one individual responsible for related activities increases the potential for errors and irregularities.** For example, companies should assign related *purchasing activities* to different individuals. Related purchasing activities include ordering merchandise, order approval, receiving goods, authorizing payment, and paying for goods or services. Various frauds are possible when one person handles related purchasing activities. For example:

- If a purchasing agent is allowed to order goods without obtaining supervisory approval, the likelihood of the purchasing agent receiving kickbacks from suppliers increases.
- If an employee who orders goods also handles receipt of the goods and invoice, as well as payment authorization, he or she might authorize payment for a fictitious invoice.

These abuses are less likely to occur when companies divide the purchasing tasks.

Similarly, companies should assign related *sales activities* to different individuals. Related selling activities include making a sale, shipping (or delivering) the goods to the customer, billing the customer, and receiving payment. Various

frauds are possible when one person handles related sales transactions. For example:

- If a salesperson can make a sale without obtaining supervisory approval, he or she might make sales at unauthorized prices to increase sales commissions.
- A shipping clerk who also has access to accounting records could ship goods to himself.
- A billing clerk who handles billing and receipt could understate the amount billed for sales made to friends and relatives.

These abuses are less likely to occur when companies divide the sales tasks: The salespeople make the sale; the shipping department ships the goods on the basis of the sales order; and the billing department prepares the sales invoice after comparing the sales order with the report of goods shipped.

**ANATOMY OF A FRAUD**

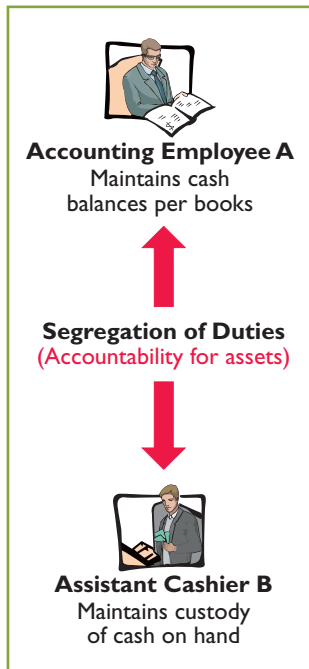

Lawrence Fairbanks, the assistant vice-chancellor of communications at Aesop University, was allowed to make purchases of under \$2,500 for his department without external approval. Unfortunately, he also sometimes bought items for himself, such as expensive antiques and other collectibles. How did he do it? He replaced the vendor invoices he received with fake vendor invoices that he created. The fake invoices had descriptions that were more consistent with the communications department's purchases. He submitted these fake invoices to the accounting department as the basis for their journal entries and to the accounts payable department as the basis for payment.

Total take: \$475,000

**THE MISSING CONTROL**

**Segregation of duties.** The university had not properly segregated related purchasing activities. Lawrence was ordering items, receiving the items, and receiving the invoice. By receiving the invoice, he had control over the documents that were used to account for the purchase and thus was able to substitute a fake invoice.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 3–15.

**Segregation of Record-Keeping from Physical Custody.** The accountant should have neither physical custody of the asset nor access to it. Likewise, the custodian of the asset should not maintain or have access to the accounting records. **The custodian of the asset is not likely to convert the asset to personal use when one employee maintains the record of the asset, and a different employee has physical custody of the asset.** The separation of accounting responsibility from the custody of assets is especially important for cash and inventories because these assets are very vulnerable to fraud.

**ANATOMY OF A FRAUD**

Angela Bauer was an accounts payable clerk for Aggasiz Construction Company. She prepared and issued checks to vendors and reconciled bank statements. She perpetrated a fraud in this way: She wrote checks for costs that the company had not actually incurred (e.g., fake taxes). A supervisor then approved and signed the checks. Before issuing the check, though, she would “white-out” the payee line on the check and change it to personal accounts that she controlled. She was able to conceal the theft because she also reconciled the bank account. That is, nobody else ever saw that the checks had been altered.

Total take: \$570,000

**THE MISSING CONTROL**

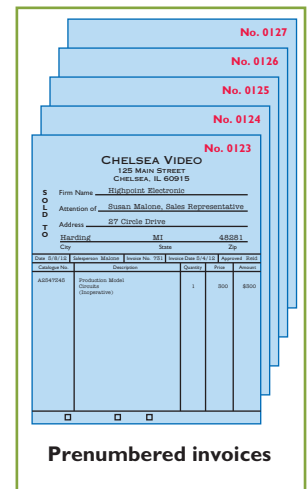

**Segregation of duties.** Aggasiz Construction Company did not properly segregate record-keeping from physical custody. Angela had physical custody of the checks, which essentially was control of the cash. She also had record-keeping responsibility because she prepared the bank reconciliation.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 100–107.

**DOCUMENTATION PROCEDURES**

Documents provide evidence that transactions and events have occurred. At **Stephanie’s Gourmet Coffee and More**, the cash register tape is the restaurant’s documentation for the sale and the amount of cash received. Similarly, a shipping document indicates that the goods have been shipped, and a sales invoice indicates that the company has billed the customer for the goods. By requiring signatures (or initials) on the documents, the company can identify the individual(s) responsible for the transaction or event. Companies should document transactions when the transaction occurs.

Companies should establish procedures for documents. First, whenever possible, companies should use **prenumbered documents, and all documents should be accounted for.** Prenumbering helps to prevent a transaction from being recorded more than once, or conversely, from not being recorded at all. Second, the control system should require that employees **promptly forward source documents for accounting entries to the accounting department.** This control measure helps to ensure timely recording of the transaction and contributes directly to the accuracy and reliability of the accounting records.

Prenumbered invoices

**ANATOMY OF A FRAUD**

To support their reimbursement requests for travel costs incurred, employees at Mod Fashions Corporation’s design center were required to submit receipts. The receipts could include the detailed bill provided for a meal, or the credit card receipt provided when the credit card payment is made, or a copy of the employee’s monthly credit card bill that listed the item. A number of the designers who frequently traveled together came up with a fraud scheme: They submitted claims for the same expenses. For example, if they had a meal together that cost \$200, one person submitted the detailed meal bill, another submitted the credit card receipt, and a third submitted a monthly credit card bill showing the meal as a line item. Thus, all three received a \$200 reimbursement.

Total take: \$75,000

**THE MISSING CONTROL**

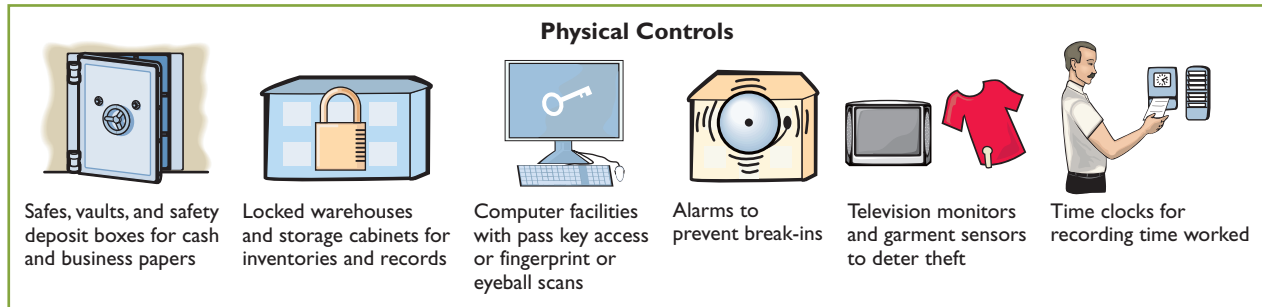

**Documentation procedures.** Mod Fashions should require the original, detailed receipt. It should not accept photocopies, and it should not accept credit card statements. In addition, documentation procedures could be further improved by requiring the use of a corporate credit card (rather than a personal credit card) for all business expenses.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 79–90.

**PHYSICAL CONTROLS**

Use of physical controls is essential. *Physical controls* relate to the safeguarding of assets and enhance the accuracy and reliability of the accounting records. Illustration 8-2 shows examples of these controls.

**Illustration 8-2**  
Physical controls

**ANATOMY OF A FRAUD**

At Centerstone Health, a large insurance company, the mailroom each day received insurance applications from prospective customers. Mailroom employees scanned the applications into electronic documents before the applications were processed. Once the applications are scanned they can be accessed online by authorized employees.

Insurance agents at Centerstone Health earn commissions based upon successful applications. The sales agent's name is listed on the application. However, roughly 15% of the applications are from customers who did not work with a sales agent. Two friends—Alex, an employee in record keeping, and Parviz, a sales agent—thought up a way to perpetrate a fraud. Alex identified scanned applications that did not list a sales agent. After business hours, he entered the mailroom and found the hardcopy applications that did not show a sales agent. He wrote in Parviz's name as the sales agent and then rescanned the application for processing. Parviz received the commission, which the friends then split.

Total take: \$240,000

**THE MISSING CONTROL**

**Physical controls.** Centerstone Health lacked two basic physical controls that could have prevented this fraud. First, the mailroom should have been locked during nonbusiness hours, and access during business hours should have been tightly controlled. Second, the scanned applications supposedly could be accessed only by authorized employees using their passwords. However, the password for each employee was the same as the employee's user ID. Since employee user-ID numbers were available to all other employees, all employees knew all other employees' passwords. Unauthorized employees could access the scanned applications. Thus, Alex could enter the system using another employee's password and access the scanned applications.

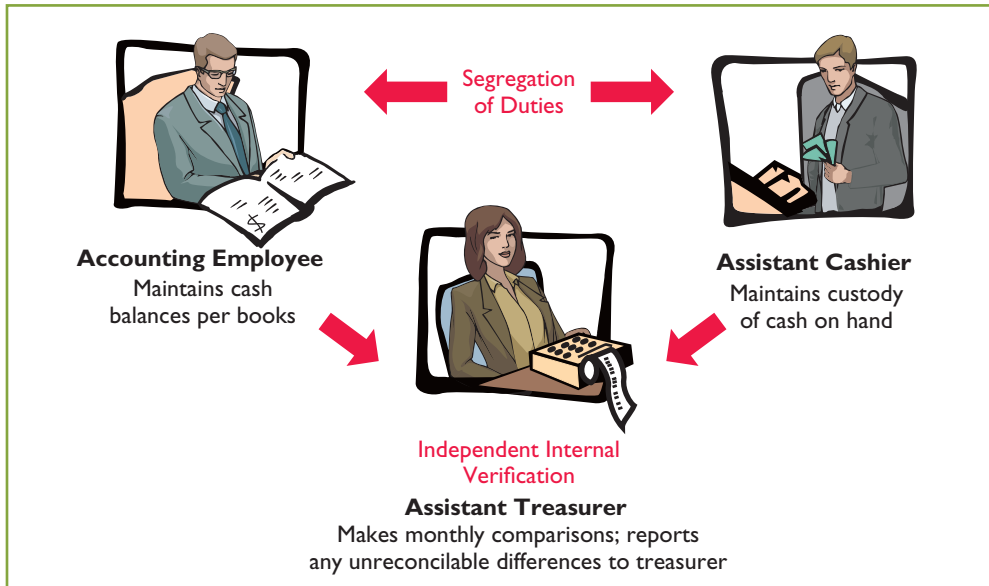

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 316–326.

**INDEPENDENT INTERNAL VERIFICATION**

Most internal control systems provide for **independent internal verification**. This principle involves the review of data prepared by employees. To obtain maximum benefit from independent internal verification:

1. Companies should verify records periodically or on a surprise basis.
2. An employee who is independent of the personnel responsible for the information should make the verification.
3. Discrepancies and exceptions should be reported to a management level that can take appropriate corrective action.

Independent internal verification is especially useful in comparing recorded accountability with existing assets. The reconciliation of the cash register tape with the cash in the register at **Stephanie’s Gourmet Coffee and More** is an example of this internal control principle. Another common example is the reconciliation of a company’s cash balance per books with the cash balance per bank and the verification of the perpetual inventory records through a count of physical inventory. Illustration 8-3 shows the relationship between this principle and the segregation of duties principle.

**Illustration 8-3**  
Comparison of segregation of duties principle with independent internal verification principle

### ANATOMY OF A FRAUD

Bobbi Jean Donnelly, the office manager for Mod Fashions Corporations design center, was responsible for preparing the design center budget and reviewing expense reports submitted by design center employees. Her desire to upgrade her wardrobe got the better of her, and she enacted a fraud that involved filing expense-reimbursement requests for her own personal clothing purchases. She was able to conceal the fraud because she was responsible for reviewing all expense reports, including her own. In addition, she sometimes was given ultimate responsibility for signing off on the expense reports when her boss was “too busy.” Also, because she controlled the budget, when she submitted her expenses, she coded them to budget items that she knew were running under budget, so that they would not catch anyone’s attention.

Total take: \$275,000

### THE MISSING CONTROL

**Independent internal verification.** Bobbi Jean’s boss should have verified her expense reports. When asked what he thought her expenses for a year were, the boss said about \$10,000. At \$115,000 per year, her actual expenses were more than ten times what would have been expected. However, because he was “too busy” to verify her expense reports or to review the budget, he never noticed.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 79–90.

Large companies often assign independent internal verification to internal auditors. **Internal auditors** are company employees who continuously evaluate the effectiveness of the company's internal control systems. They review the activities of departments and individuals to determine whether prescribed internal controls are being followed. They also recommend improvements when needed. In fact, most fraud is discovered by the company through internal mechanisms such as existing internal controls and internal audits. For example, the alleged fraud at **WorldCom**, involving billions of dollars, was uncovered by an internal auditor.

## HUMAN RESOURCE CONTROLS

Human resource control activities include the following.

1. **Bond employees who handle cash.** **Bonding** involves obtaining insurance protection against theft by employees. It contributes to the safeguarding of cash in two ways: First, the insurance company carefully screens all individuals before adding them to the policy and may reject risky applicants. Second, bonded employees know that the insurance company will vigorously prosecute all offenders.
2. **Rotate employees' duties and require employees to take vacations.** These measures deter employees from attempting thefts since they will not be able to permanently conceal their improper actions. Many banks, for example, have discovered employee thefts when the employee was on vacation or assigned to a new position.
3. **Conduct thorough background checks.** Many believe that the most important and inexpensive measure any business can take to reduce employee theft and fraud is for the human resources department to conduct thorough background checks. Two tips: (1) Check to see whether job applicants actually graduated from the schools they list. (2) Never use the telephone numbers for previous employers given on the reference sheet; always look them up yourself.

## ANATOMY OF A FRAUD

Ellen Lowry was the desk manager and Josephine Rodriguez was the head of housekeeping at the Excelsior Inn, a luxury hotel. The two best friends were so dedicated to their jobs that they never took vacations, and they frequently filled in for other employees. In fact, Ms. Rodriguez, whose job as head of housekeeping did not include cleaning rooms, often cleaned rooms herself, "just to help the staff keep up." These two "dedicated" employees, working as a team, found a way to earn a little more cash. Ellen, the desk manager, provided significant discounts to guests who paid with cash. She kept the cash and did not register the guest in the hotel's computerized system. Instead, she took the room out of circulation "due to routine maintenance." Because the room did not show up as being used, it did not receive a normal housekeeping assignment. Instead, Josephine, the head of housekeeping, cleaned the rooms during the guests' stay.

Total take: \$95,000

### THE MISSING CONTROL

**Human resource controls.** Ellen, the desk manager, had been fired by a previous employer after being accused of fraud. If the Excelsior Inn had conducted a thorough background check, it would not have hired her. The hotel fraud was detected when Ellen missed work for a few days due to illness. A system of mandatory vacations and rotating days off would have increased the chances of detecting the fraud before it became so large.

Source: Adapted from Wells, *Fraud Casebook* (2007), pp. 145–155.

# ACCOUNTING ACROSS THE ORGANIZATION

## SOX Boosts the Role of Human Resources

Under SOX, a company needs to keep track of employees' degrees and certifications to ensure that employees continue to meet the specified requirements of a job. Also, to ensure proper employee supervision and proper separation of duties, companies must develop and monitor an organizational chart. When one corporation went through this exercise, it found that out of 17,000 employees, there were 400 people who did not report to anyone, and they had 35 people who reported to each other. In addition, if an employee complains of an unfair firing and mentions financial issues at the company, HR must refer the case to the company audit committee and possibly to its legal counsel.

**?** Why would unsupervised employees or employees who report to each other represent potential internal control threats? (See page 410.)

## Limitations of Internal Control

Companies generally design their systems of internal control to provide **reasonable assurance** of proper safeguarding of assets and reliability of the accounting records. The concept of reasonable assurance rests on the premise that the costs of establishing control procedures should not exceed their expected benefit.

To illustrate, consider shoplifting losses in retail stores. Stores could eliminate such losses by having a security guard stop and search customers as they leave the store. But store managers have concluded that the negative effects of such a procedure cannot be justified. Instead, stores have attempted to control shoplifting losses by less costly procedures: They post signs saying, "We reserve the right to inspect all packages" and "All shoplifters will be prosecuted." They use hidden TV cameras and store detectives to monitor customer activity, and they install sensor equipment at exits.

The **human element** is an important factor in every system of internal control. A good system can become ineffective as a result of employee fatigue, carelessness, or indifference. For example, a receiving clerk may not bother to count goods received and may just "fudge" the counts. Occasionally, two or more individuals may work together to get around prescribed controls. Such **collusion** can significantly reduce the effectiveness of a system, eliminating the protection offered by segregation of duties. No system of internal control is perfect.

The size of the business also may impose limitations on internal control. A small company, for example, may find it difficult to segregate duties or to provide for independent internal verification.

### Helpful Hint

Controls may vary with the risk level of the activity. For example, management may consider cash to be high risk and maintaining inventories in the stockroom as low risk. Thus, management would have stricter controls for cash.

## ETHICS INSIGHT

### Big Theft at Small Companies

A study by the Association of Certified Fraud Examiners indicates that businesses with fewer than 100 employees are most at risk for employee theft. In fact, 38% of frauds occurred at companies with fewer than 100 employees. The median loss at small companies was \$200,000, which was higher than the median fraud at companies with more than 10,000 employees (\$147,000). A \$200,000 loss can threaten the very existence of a small company.

Source: 2008 Report to the Nation on Occupational Fraud and Abuse, Association of Certified Fraud Examiners, [www.acfe.com/documents/2008-rttn.pdf](http://www.acfe.com/documents/2008-rttn.pdf), p. 26.

**?** Why are small companies more susceptible to employee theft? (See page 410.)

## Do it!

### Control Activities

Identify which control activity is violated in each of the following situations, and explain how the situation creates an opportunity for a fraud.

1. The person with primary responsibility for reconciling the bank account is also the company's accountant and makes all bank deposits.
2. Wellstone Company's treasurer received an award for distinguished service because he had not taken a vacation in 30 years.
3. In order to save money spent on order slips, and to reduce time spent keeping track of order slips, a local bar/restaurant does not buy prenumbered order slips.

#### action plan

- ✓ Familiarize yourself with each of the control activities summarized on page xxx.
- ✓ Understand the nature of the frauds that each control activity is intended to address.

#### Solution

1. Violates the control activity of segregation of duties. Record-keeping should be separate from physical custody. As a consequence, the employee could embezzle cash and make journal entries to hide the theft.
2. Violates the control activity of human resource controls. Key employees must take vacations. Otherwise, the treasurer, who manages the company's cash, might embezzle cash and use his position to conceal the theft.
3. Violates the control activity of documentation procedures. If pre-numbered documents are not used, then it is virtually impossible to account for the documents. As a consequence, an employee could write up a dinner sale, receive the cash from the customer, and then throw away the order slip and keep the cash.

Related exercise material: BE8-1, BE8-2, BE8-3, E8-1, and **Do it!** 8-1.

## Cash Controls

Cash is the one asset that is readily convertible into any other type of asset. It also is easily concealed and transported, and is highly desired. Because of these characteristics, **cash is the asset most susceptible to fraudulent activities**. In addition, because of the large volume of cash transactions, numerous errors may occur in executing and recording them. To safeguard cash and to ensure the accuracy of the accounting records for cash, effective internal control over cash is critical.

### Cash Receipts Controls

Illustration 8-4 shows how the internal control principles explained earlier apply to cash receipts transactions. As you might expect, companies vary considerably in how they apply these principles. To illustrate internal control over cash receipts, we will examine control activities for a retail store with both over-the-counter and mail receipts.

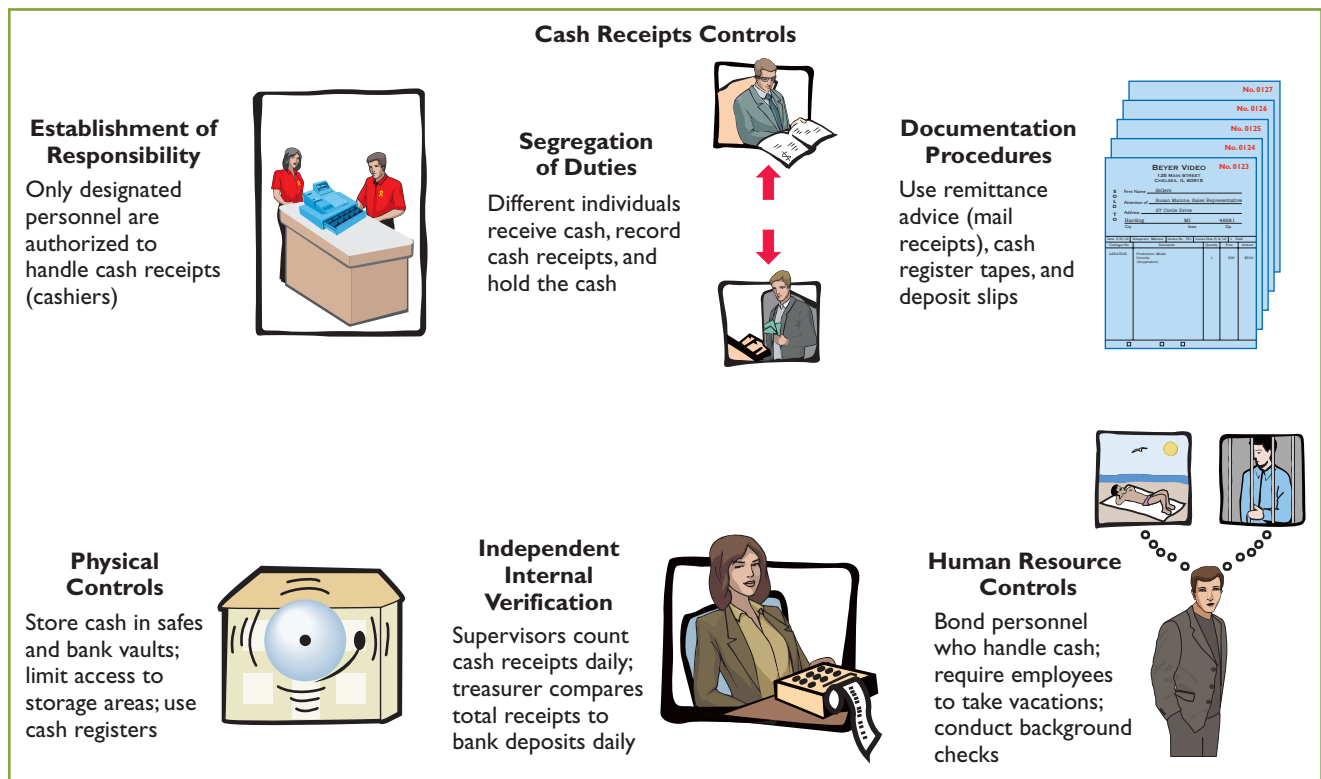

#### OVER-THE-COUNTER RECEIPTS

In retail businesses, control of over-the-counter receipts centers on cash registers that are visible to customers. A cash sale is rung up on a cash register, with the amount clearly visible to the customer. This activity prevents the cashier from ringing up a lower amount and pocketing the difference. The customer receives an itemized cash register receipt slip and is expected to count the change received. The

#### Study Objective [3]

Explain the applications of internal control principles to cash receipts.

**Illustration 8-4**  
Application of internal control principles to cash receipts

cash register's tape is locked in the register until a supervisor removes it. This tape accumulates the daily transactions and totals.

At the end of the clerk's shift, the clerk counts the cash and sends the cash and the count to the cashier. The cashier counts the cash, prepares a deposit slip, and deposits the cash at the bank. The cashier also sends a duplicate of the deposit slip to the accounting department to indicate cash received. The supervisor removes the cash register tape and sends it to the accounting department as the basis for a journal entry to record the cash received. Illustration 8-5 (page 374) summarizes this process.

This system for handling cash receipts uses an important internal control principle—segregation of record-keeping from physical custody. The supervisor has access to the cash register tape, but **not** to the cash. The clerk and the cashier have access to the cash, but **not** to the register tape. In addition, the cash register tape provides documentation and enables independent internal verification. Use of these three principles of internal control (segregation of record-keeping from physical custody, documentation, and independent internal verification) provides an effective system of internal control. Any attempt at fraudulent activity should be detected unless there is collusion among the employees.

In some instances, the amount deposited at the bank will not agree with the cash recorded in the accounting records based on the cash register tape. These differences often result because the clerk hands incorrect change back to the retail customer. In this case, the difference between the actual cash and the amount reported on the cash register tape is reported in a Cash Over and Short account. For example, suppose that the cash register tape indicated sales of \$6,956.20 but the amount of cash was only \$6,946.10. A cash shortfall of \$10.10 exists. To account for this cash shortfall and related cash, the company makes the following entry.

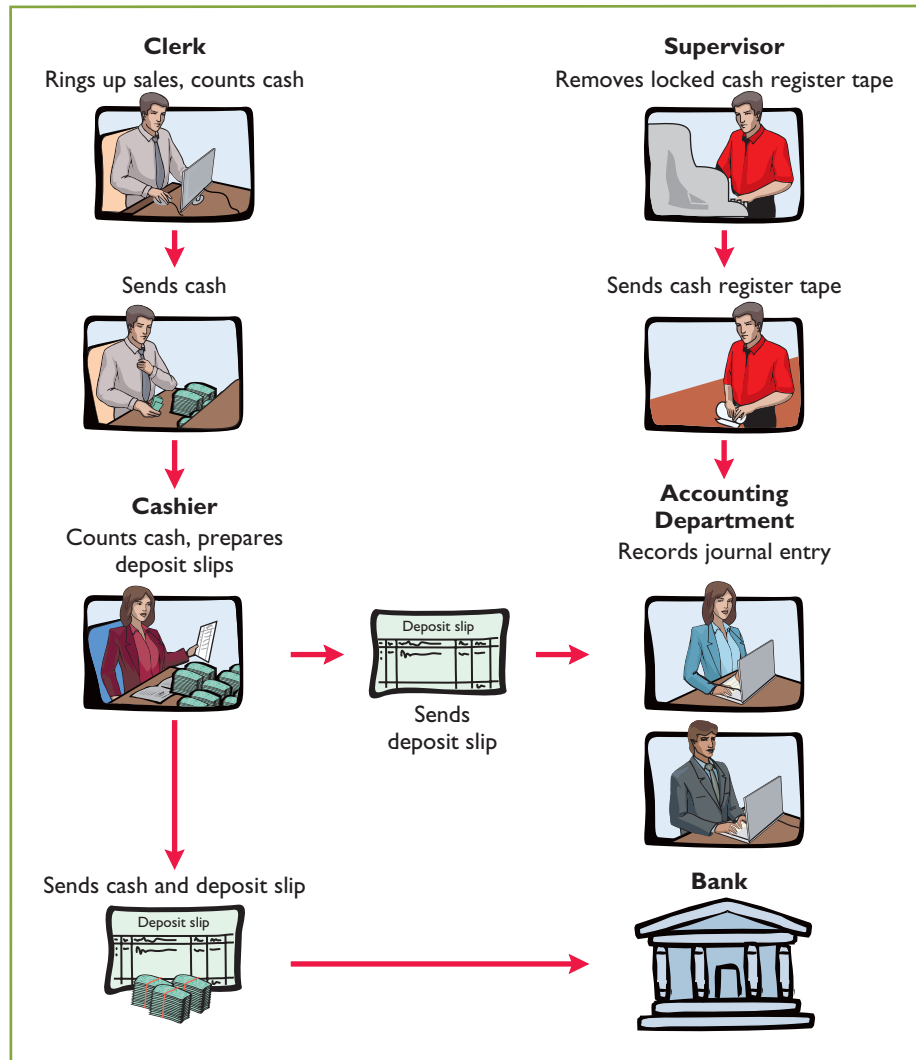

**Illustration 8-5**

Control of over-the-counter receipts

**Helpful Hint**

Flowcharts such as this one enhance the understanding of the flow of documents, the processing steps, and the internal control procedures.

|                   |   |          |   |           |
|-------------------|---|----------|---|-----------|
| <b>A</b>          | = | <b>L</b> | + | <b>OE</b> |
| +6,946.10         |   |          |   | -10.10    |
|                   |   |          |   | +6,956.20 |
| <b>Cash Flows</b> |   |          |   |           |
| +6,946.10         |   |          |   |           |

|                            |          |
|----------------------------|----------|
| Cash                       | 6,946.10 |
| Cash Over and Short        | 10.10    |
| Sales Revenue              |          |
| (To record cash shortfall) | 6,956.20 |

|          |          |
|----------|----------|
| 6,946.10 |          |
| 10.10    |          |
|          | 6,956.20 |

Cash Over and Short is an income statement item. It is reported as miscellaneous expense when there is a cash shortfall, and as miscellaneous revenue when there is an overage. Clearly, the amount should be small. Any material amounts in this account should be investigated.

**MAIL RECEIPTS**

All mail receipts should be opened in the presence of at least two mail clerks. These receipts are generally in the form of checks. A mail clerk should endorse each check “For Deposit Only.” This restrictive endorsement reduces the likelihood that someone could divert the check to personal use. Banks will not give an individual cash when presented with a check that has this type of endorsement.

The mail-receipt clerks prepare, in triplicate, a list of the checks received each day. This list shows the name of the check issuer, the purpose of the payment, and the amount of the check. Each mail clerk signs the list to establish responsibility for the

data. The original copy of the list, along with the checks, is then sent to the cashier's department. A copy of the list is sent to the accounting department for recording in the accounting records. The clerks also keep a copy.

This process provides excellent internal control for the company. By employing two clerks, the chance of fraud is reduced; each clerk knows he or she is being observed by the other clerk(s). To engage in fraud, they would have to collude. The customers who submit payments also provide control, because they will contact the company with a complaint if they are not properly credited for payment. Because the cashier has access to cash but not the records, and the accounting department has access to records but not cash, neither can engage in undetected fraud.

## Do it!

L. R. Cortez is concerned about the control over cash receipts in his fast-food restaurant, Big Cheese. The restaurant has two cash registers. At no time do more than two employees take customer orders and ring up sales. Work shifts for employees range from 4 to 8 hours. Cortez asks your help in installing a good system of internal control over cash receipts.

### Solution

Cortez should assign a cash register to each employee at the start of each work shift, with register totals set at zero. Each employee should be instructed to use only the assigned register and to ring up all sales. Each customer should be given a receipt. At the end of the shift, the employee should do a cash count. A separate employee should compare the cash count with the register tape, to be sure they agree. In addition, Cortez should install an automated system that would enable the company to compare orders rung up on the register to orders processed by the kitchen.

Related exercise material: BE8-5, E8-2, and **Do it!** 8-2.

## Control over Cash Receipts

### action plan

- ✓ Differentiate among the internal control principles of (1) establishing responsibility, (2) using physical controls, and (3) independent internal verification.
- ✓ Design an effective system of internal control over cash receipts.

## Cash Disbursements Controls

Companies disburse cash for a variety of reasons, such as to pay expenses and liabilities or to purchase assets. **Generally, internal control over cash disbursements is more effective when companies pay by check, rather than by cash.** One exception is for **incidental amounts that are paid out of petty cash.**<sup>3</sup>

Companies generally issue checks only after following specified control procedures. Illustration 8-6 (page 376) shows how principles of internal control apply to cash disbursements.

### VOUCHER SYSTEM CONTROLS

Most medium and large companies use vouchers as part of their internal control over cash disbursements. A **voucher system** is a network of approvals by authorized individuals, acting independently, to ensure that all disbursements by check are proper.

### Study Objective [4]

Explain the applications of internal control principles to cash disbursements.

<sup>3</sup>We explain the operation of a petty cash fund on pages 377–380.

**Cash Disbursements Controls**

**Establishment of Responsibility**

Only designated personnel are authorized to sign checks (treasurer) and approve vendors

**Physical Controls**

Store blank checks in safes, with limited access; print check amounts by machine in indelible ink

**Segregation of Duties**

Different individuals approve and make payments; check signers do not record disbursements

**Independent Internal Verification**

Compare checks to invoices; reconcile bank statement monthly

**Documentation Procedures**

Use prenumbered checks and account for them in sequence; each check must have an approved invoice; require employees to use corporate credit cards for reimbursable expenses; stamp invoices "paid"

**Human Resource Controls**

Bond personnel who handle cash; require employees to take vacations; conduct background checks

**Illustration 8-6**

Application of internal control principles to cash disbursements

The system begins with the authorization to incur a cost or expense. It ends with the issuance of a check for the liability incurred. A **voucher** is an authorization form prepared for each expenditure. Companies require vouchers for all types of cash disbursements except those from petty cash.

The starting point in preparing a voucher is to fill in the appropriate information about the liability on the face of the voucher. The vendor's invoice provides most of the needed information. Then, an employee in accounts payable records the voucher (in a journal called a **voucher register**) and files it according to the date on which it is to be paid. The company issues and sends a check on that date, and stamps the voucher "paid." The paid voucher is sent to the accounting department for recording (in a journal called the **check register**). A voucher system involves two journal entries, one to record the liability when the voucher is issued and a second to pay the liability that relates to the voucher.

The use of a voucher system improves internal control over cash disbursements. First, the authorization process inherent in a voucher system establishes responsibility. Each individual has responsibility to review the underlying documentation to

ensure that it is correct. In addition, the voucher system keeps track of the documents that back up each transaction. By keeping these documents in one place, a supervisor can independently verify the authenticity of each transaction. Consider, for example, the case of Aesop University presented on page 366. Aesop did not use a voucher system for transactions under \$2,500. As a consequence, there was no independent verification of the documents, which enabled the employee to submit fake invoices to hide his unauthorized purchases.

### PETTY CASH FUND CONTROLS

As you learned earlier in the chapter, better internal control over cash disbursements is possible when companies make payments by check. However, using checks to pay small amounts is both impractical and a nuisance. For instance, a company would not want to write checks to pay for postage due, working lunches, or taxi fares. A common way of handling such payments, while maintaining satisfactory control, is to use a **petty cash fund** to pay relatively small amounts. The operation of a petty cash fund, often called an **imprest system**, involves (1) establishing the fund, (2) making payments from the fund, and (3) replenishing the fund.<sup>4</sup>

**Establishing the Petty Cash Fund.** Two essential steps in establishing a petty cash fund are: (1) appointing a petty cash custodian who will be responsible for the fund, and (2) determining the size of the fund. Ordinarily, a company expects the amount in the fund to cover anticipated disbursements for a three- to four-week period.

To establish the fund, a company issues a check payable to the petty cash custodian for the stipulated amount. For example, if Laird Company decides to establish a \$100 fund on March 1, the general journal entry is:

|        |  |     |     |
|--------|--|-----|-----|
| Mar. 1 | Petty Cash<br>Cash<br>(To establish a petty cash fund) | 100 | 100 |
|--------|--|-----|-----|

The fund custodian cashes the check and places the proceeds in a locked petty cash box or drawer. Most petty cash funds are established on a fixed-amount basis. The company will make no additional entries to the Petty Cash account unless management changes the stipulated amount of the fund. For example, if Laird Company decides on July 1 to increase the size of the fund to \$250, it would debit Petty Cash \$150 and credit Cash \$150.

**Making Payments from the Petty Cash Fund.** The petty cash fund custodian has the authority to make payments from the fund that conform to prescribed management policies. Usually, management limits the size of expenditures that come from petty cash. Likewise, it may not permit use of the fund for certain types of transactions (such as making short-term loans to employees).

Each payment from the fund must be documented on a prenumbered petty cash receipt (or petty cash voucher), as shown in Illustration 8-7 (page 378). The signatures of both the fund custodian and the person receiving payment are required on the receipt. If other supporting documents such as a freight bill or invoice are available, they should be attached to the petty cash receipt.

### Study Objective [5]

Describe the operation of a petty cash fund.

|            |   |   |   |    |
|------------|---|---|---|----|
| A          | = | L | + | OE |
| +100       |   |   |   |    |
| -100       |   |   |   |    |
| Cash Flows |   |   |   |    |
| no effect  |   |   |   |    |

### Ethics Note

Petty cash funds are authorized and legitimate. In contrast, "slush" funds are unauthorized and hidden (under the table).

### Helpful Hint

The petty cash receipt satisfies two internal control procedures: (1) establishing responsibility (signature of custodian), and (2) documentation procedures.

<sup>4</sup>The term "imprest" means an advance of money for a designated purpose.

**Illustration 8-7**  
Petty cash receipt

No. 7 LAIRD COMPANY  
Petty Cash Receipt

Date 3/6/12  
Amount \$18.00

Paid to Acme Express Agency  
For Collect Express Charges

CHARGE TO Freight-in

Approved L.A. Bird Custodian  
Received Payment R.E. Meins

**Ethics Note**

Internal control over a petty cash fund is strengthened by: (1) having a supervisor make surprise counts of the fund to confirm whether the paid petty cash receipts and fund cash equal the imprest amount, and (2) canceling or mutilating the paid petty cash receipts so they cannot be resubmitted for reimbursement.

The fund custodian keeps the receipts in the petty cash box until the fund is replenished. The sum of the petty cash receipts and the money in the fund should equal the established total at all times. Management can (and should) make surprise counts at any time to determine whether the fund is being maintained correctly.

The company does not make an accounting entry to record a payment when it is made from petty cash. It is considered both inexpedient and unnecessary to do so. Instead, the company recognizes the accounting effects of each payment when it replenishes the fund.

**Replenishing the Petty Cash Fund.** When the money in the petty cash fund reaches a minimum level, the company replenishes the fund. The petty cash custodian initiates a request for reimbursement. The individual prepares a schedule (or summary) of the payments that have been made and sends the schedule, supported by petty cash receipts and other documentation, to the treasurer’s office. The treasurer’s office examines the receipts and supporting documents to verify that proper payments from the fund were made. The treasurer then approves the request and issues a check to restore the fund to its established amount. At the same time, all supporting documentation is stamped “paid” so that it cannot be submitted again for payment.

To illustrate, assume that on March 15 Laird’s petty cash custodian requests a check for \$87. The fund contains \$13 cash and petty cash receipts for postage \$44, freight-out \$38, and miscellaneous expenses \$5. The general journal entry to record the check is:

|                   |   |   |   |         |
|-------------------|---|---|---|---------|
| A                 | = | L | + | OE      |
|                   |   |   |   | -44 Exp |
|                   |   |   |   | -38 Exp |
|                   |   |   |   | -5 Exp  |
| -87               |   |   |   |         |
| <b>Cash Flows</b> |   |   |   |         |
| -87               |   |   |   |         |

|         |   |                     |
|---------|---|---------------------|
| Mar. 15 | Postage Expense<br>Freight-out<br>Miscellaneous Expense<br>Cash<br>(To replenish petty cash fund) | 44<br>38<br>5<br>87 |
|---------|---|---------------------|

Note that the reimbursement entry does not affect the Petty Cash account. Replenishment changes the composition of the fund by replacing the petty cash receipts with cash. It does not change the balance in the fund.

Occasionally, in replenishing a petty cash fund, the company may need to recognize a cash shortage or overage. This results when the total of the cash plus

receipts in the petty cash box does not equal the established amount of the petty cash fund. To illustrate, assume that Laird’s petty cash custodian has only \$12 in cash in the fund plus the receipts as listed. The request for reimbursement would therefore be for \$88, and Laird would make the following entry.

|         |                                |    |    |
|---------|--------------------------------|----|----|
| Mar. 15 | Postage Expense                | 44 |    |
|         | Freight-out                    | 38 |    |
|         | Miscellaneous Expense          | 5  |    |
|         | Cash Over and Short            | 1  |    |
|         | Cash                           |    | 88 |
|         | (To replenish petty cash fund) |    |    |

|                   |   |   |   |    |         |
|-------------------|---|---|---|----|---------|
| A                 | = | L | + | OE |         |
|                   |   |   |   |    | -44 Exp |
|                   |   |   |   |    | -38 Exp |
|                   |   |   |   |    | -5 Exp  |
|                   |   |   |   |    | -1 Exp  |
|                   |   |   |   |    | -88     |
| <b>Cash Flows</b> |   |   |   |    | -88     |

Conversely, if the custodian has \$14 in cash, the reimbursement request would be for \$86, and the company would credit Cash Over and Short for \$1 (overage). A company reports a debit balance in Cash Over and Short in the income statement as miscellaneous expense. It reports a credit balance in the account as miscellaneous revenue. The company closes Cash Over and Short to Income Summary at the end of the year.

Companies should replenish a petty cash fund at the end of the accounting period, regardless of the cash in the fund. Replenishment at this time is necessary in order to recognize the effects of the petty cash payments on the financial statements.

**Helpful Hint**

Cash over and short situations result from mathematical errors or from failure to keep accurate records.

**ETHICS INSIGHT**

**How Employees Steal**

A recent study by the Association of Certified Fraud Examiners found that two-thirds of all employee thefts involved a fraudulent disbursement by an employee. The most common form (28.3% of cases) was fraudulent billing schemes. In these, the employee causes the company to issue a payment to the employee by submitting a bill for nonexistent goods or services, purchases of personal goods by the employee, or inflated invoices. The following graph shows various types of fraudulent disbursements and the median loss from each.

Source: 2008 Report to the Nation on Occupational Fraud and Abuse, Association of Certified Fraud Examiners, [www.acfe.com/documents/2008\\_rttn.pdf](http://www.acfe.com/documents/2008_rttn.pdf), p.13.

**?** How can companies reduce the likelihood of fraudulent disbursements? (See page 410.)

## Do it!

### Petty Cash Fund

#### action plan

- ✓ To establish the fund, set up a separate general ledger account.
- ✓ Determine how much cash is needed to replenish the fund: subtract the cash remaining from the petty cash fund balance.
- ✓ Total the petty cash receipts. Determine any cash over or short—the difference between the cash needed to replenish the fund and the total of the petty cash receipts.
- ✓ Record the expenses incurred according to the petty cash receipts when replenishing the fund.

Bateer Company established a \$50 petty cash fund on July 1. On July 30, the fund had \$12 cash remaining and petty cash receipts for postage \$14, office supplies \$10, and delivery expense \$15. Prepare journal entries to establish the fund on July 1 and to replenish the fund on July 30.

#### Solution

|        |                                |    |    |
|--------|--------------------------------|----|----|
| July 1 | Petty Cash                     | 50 |    |
|        | Cash                           |    | 50 |
|        | (To establish petty cash fund) |    |    |
| 30     | Postage Expense                | 14 |    |
|        | Supplies                       | 10 |    |
|        | Delivery Expense               | 15 |    |
|        | Cash Over and Short            |    | 1  |
|        | Cash (\$50 – \$12)             |    | 38 |
|        | (To replenish petty cash)      |    |    |

## Control Features: Use of a Bank

### Study Objective [6]

Indicate the control features of a bank account.

**The use of a bank contributes significantly to good internal control over cash.** A company can safeguard its cash by using a bank as a depository and as a clearing house for checks received and written. Use of a bank minimizes the amount of currency that a company must keep on hand. Also, use of a bank facilitates the control of cash because it creates a double record of all bank transactions—one by the company and the other by the bank. The asset account Cash maintained by the company should have the same balance as the bank's liability account for that company. A **bank reconciliation** compares the bank's balance with the company's balance and explains any differences to make them agree.

Many companies have more than one bank account. For efficiency of operations and better control, national retailers like **Wal-Mart** and **Target** may have regional bank accounts. Large companies, with tens of thousands of employees, may have a payroll bank account, as well as one or more general bank accounts. Also, a company may maintain several bank accounts in order to have more than one source for short-term loans when needed.

### Making Bank Deposits

An authorized employee, such as the head cashier, should make a company's bank deposits. Each deposit must be documented by a deposit slip (ticket), as shown in Illustration 8-8.

Deposit slips are prepared in duplicate. The bank retains the original; the depositor keeps the duplicate, machine-stamped by the bank to establish its authenticity.

### Writing Checks

Most of us write checks, without thinking very much about them. A **check** is a written order signed by the depositor directing the bank to pay a specified sum of money to

**Bank code numbers** →

a designated recipient. There are three parties to a check: (1) the **maker** (or drawer) who issues the check, (2) the **bank** (or payer) on which the check is drawn, and (3) the **payee** to whom the check is payable. A check is a **negotiable instrument** that one party can transfer to another party by endorsement. Each check should be accompanied by an explanation of its purpose. In many companies, a remittance advice attached to the check, as shown in Illustration 8-9 explains the check's purpose.

Check with remittance advice

It is important to know the balance in the checking account at all times. To keep the balance current, the depositor should enter each deposit and check on running-balance memo forms provided by the bank or on the check stubs in the checkbook.

### Bank Statements

If you have a personal checking account, you are probably familiar with bank statements. A **bank statement** shows the depositor’s bank transactions and balances.<sup>5</sup> Each month, a depositor receives a statement from the bank. Illustration 8-10 presents a typical bank statement. It shows: (1) checks paid and other debits that reduce the balance in the depositor’s account, (2) deposits and other credits that increase the balance in the account, and (3) the account balance after each day’s transactions.

**Helpful Hint**

Essentially, the bank statement is a copy of the bank’s records sent to the customer for periodic review.

Symbols: **CM** Credit Memo    **EC** Error Correction    **NSF** Not Sufficient Funds    **Reconcile Your Account Promptly**  
**DM** Debit Memo    **INT** Interest Earned    **SC** Service Charge

**Helpful Hint**

The bank *credits* to the customer’s account every deposit it receives. The reverse occurs when the bank “pays” a check issued by a company on its checking account balance: Payment reduces the bank’s liability. Thus the bank *debits* check payments to the customer’s account with the bank.

The bank statement lists in numerical sequence all “paid” checks, along with the date the check was paid and its amount. Upon paying a check, the bank stamps the check “paid”; a paid check is sometimes referred to as a **canceled** check. On the statement the bank also includes memoranda explaining other debits and credits it made to the depositor’s account.

<sup>5</sup>Our presentation assumes that the depositor makes all adjustments at the end of the month. In practice, a company may also make journal entries during the month as it receives information from the bank regarding its account.

### DEBIT MEMORANDUM

Some banks charge a monthly fee for their services. Often they charge this fee only when the average monthly balance in a checking account falls below a specified amount. They identify the fee, called a **bank service charge**, on the bank statement by a symbol such as **SC**. The bank also sends with the statement a debit memorandum explaining the charge noted on the statement. Other debit memoranda may also be issued for other bank services such as the cost of printing checks, issuing traveler's checks, and wiring funds to other locations. The symbol **DM** is often used for such charges.

Banks also use a debit memorandum when a deposited check from a customer "bounces" because of insufficient funds. For example, assume that Scott Company, a customer of Laird Company, sends a check for \$800 to Laird Company for services provided. Unfortunately, Scott does not have sufficient funds at its bank to pay for these services. In such a case, Scott's bank marks the check **NSF** (not sufficient funds) and returns it to Laird's (the depositor's) bank. Laird's bank then debits Laird's account, as shown by the symbol NSF on the bank statement in Illustration 8-10. The bank sends the NSF check and debit memorandum to Laird as notification of the charge. Laird then records an Account Receivable from Scott Company (the writer of the bad check) and reduces cash for the NSF check.

### CREDIT MEMORANDUM

Sometimes a depositor asks the bank to collect its notes receivable. In such a case, the bank will credit the depositor's account for the cash proceeds of the note. This is illustrated by the symbol **CM** on the Laird Company bank statement. The bank issues and sends with the statement a credit memorandum to explain the entry. Many banks also offer interest on checking accounts. The interest earned may be indicated on the bank statement by the symbol **CM** or **INT**.

## Reconciling the Bank Account

The bank and the depositor maintain independent records of the depositor's checking account. People tend to assume that the respective balances will always agree. In fact, the two balances are seldom the same at any given time, and both balances differ from the "correct" or "true" balance. Therefore, it is necessary to make the balance per books and the balance per bank agree with the correct or true amount—a process called **reconciling the bank account**. The need for agreement has two causes:

1. **Time lags** that prevent one of the parties from recording the transaction in the same period as the other party.
2. **Errors** by either party in recording transactions.

Time lags occur frequently. For example, several days may elapse between the time a company mails a check to a payee and the date the bank pays the check. Similarly, when the depositor uses the bank's night depository to make its deposits, there will be a difference of at least one day between the time the depositor records the deposit and the time the bank does so. A time lag also occurs whenever the bank mails a debit or credit memorandum to the depositor.

The incidence of errors depends on the effectiveness of the internal controls of the depositor and the bank. Bank errors are infrequent. However, either party could accidentally record a \$450 check as \$45 or \$540. In addition, the bank might mistakenly charge a check to a wrong account by keying in an incorrect account name or number.

### RECONCILIATION PROCEDURE

**The bank reconciliation should be prepared by an employee who has no other responsibilities pertaining to cash.** If a company fails to follow this internal control

#### Study Objective [7]

Prepare a bank reconciliation.

principle of independent internal verification, cash embezzlements may go unnoticed. For example, a cashier who prepares the reconciliation can embezzle cash and conceal the embezzlement by misstating the reconciliation. Thus, the bank accounts would reconcile, and the embezzlement would not be detected.

In reconciling the bank account, it is customary to reconcile the balance per books and balance per bank to their adjusted (correct or true) cash balances. The starting point in preparing the reconciliation is to enter the balance per bank statement and balance per books on the reconciliation schedule. The company then makes various adjustments, as shown in Illustration 8-11.

The following steps should reveal all the reconciling items that cause the difference between the two balances.

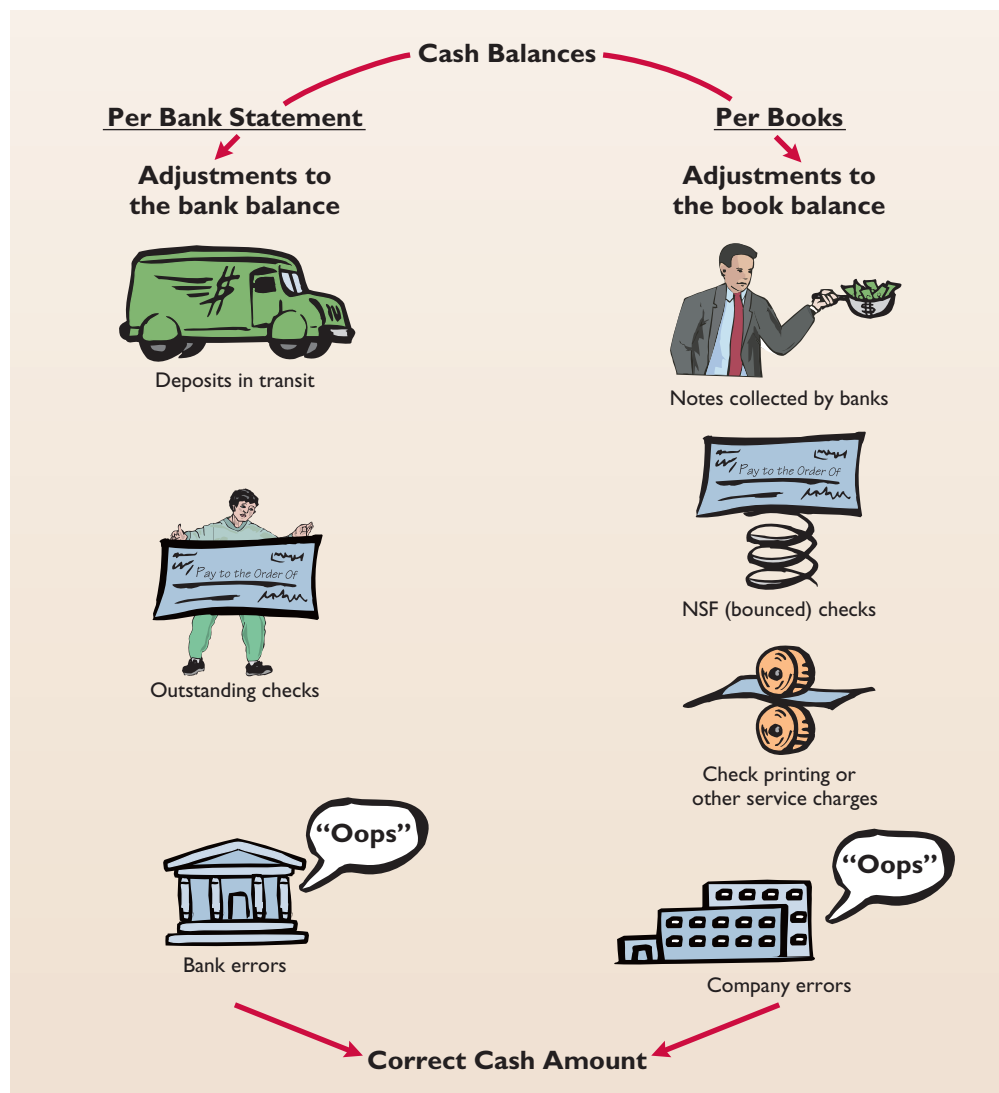

**Helpful Hint**

Deposits in transit and outstanding checks are reconciling items because of time lags.

**Step 1. Deposits in transit.** Compare the individual deposits listed on the bank statement with deposits in transit from the preceding bank reconciliation and with the deposits per company records or duplicate deposit slips. Deposits recorded by the depositor that have not been recorded by the bank are the **deposits in transit**. Add these deposits to the balance per bank.

**Step 2. Outstanding checks.** Compare the paid checks shown on the bank statement with (a) checks outstanding from the previous bank reconciliation,

**Illustration 8-11**  
Bank reconciliation adjustments

and (b) checks issued by the company as recorded in the cash payments journal (or in the check register in your personal checkbook). Issued checks recorded by the company but that have not yet been paid by the bank are **outstanding checks**. Deduct outstanding checks from the balance per the bank.

**Step 3. Errors.** Note any errors discovered in the foregoing steps and list them in the appropriate section of the reconciliation schedule. For example, if the company mistakenly recorded as \$169 a paid check correctly written for \$196, it would deduct the error of \$27 from the balance per books. All errors made by the depositor are reconciling items in determining the adjusted cash balance per books. In contrast, all errors made by the bank are reconciling items in determining the adjusted cash balance per the bank.

**Step 4. Bank memoranda.** Trace bank memoranda to the depositor’s records. List in the appropriate section of the reconciliation schedule any unrecorded memoranda. For example, the company would deduct from the balance per books a \$5 debit memorandum for bank service charges. Similarly, it would add to the balance per books \$32 of interest earned.

**BANK RECONCILIATION ILLUSTRATED**

The bank statement for Laird Company, in Illustration 8-10, shows a balance per bank of \$15,907.45 on April 30, 2012. On this date the balance of cash per books is \$11,589.45. Using the four reconciliation steps, Laird determines the following reconciling items.

|   |            |
|---|------------|
| <b>Step 1. Deposits in transit:</b> April 30 deposit (received by bank on May 1).   | \$2,201.40 |
| <b>Step 2. Outstanding checks:</b> No. 453, \$3,000.00; no. 457, \$1,401.30; no. 460, \$1,502.70.   | 5,904.00   |
| <b>Step 3. Errors:</b> Laird wrote check no. 443 for \$1,226.00 and the bank correctly paid that amount. However, Laird recorded the check as \$1,262.00. | 36.00      |
| <b>Step 4. Bank memoranda:</b>  |            |
| a. Debit—NSF check from J. R. Baron for \$425.60  | 425.60     |
| b. Debit—Charge for printing company checks \$30.00   | 30.00      |
| c. Credit—Collection of note receivable for \$1,000 plus interest earned \$50, less bank collection fee \$15.00   | 1,035.00   |

Illustration 8-12 (page 386) shows Laird’s bank reconciliation.

**ENTRIES FROM BANK RECONCILIATION**

The company records each reconciling item used to determine the **adjusted cash balance per books**. **If the company does not journalize and post these items, the Cash account will not show the correct balance.** Laird Company would make the following entries on April 30.

**Collection of Note Receivable.** This entry involves four accounts. Assuming that the interest of \$50 has not been accrued and the collection fee is charged to Miscellaneous Expense, the entry is:

|         |  |  |  |
|---------|--|--|--|
| Apr. 30 | Cash<br>Miscellaneous Expense<br>Notes Receivable<br>Interest Revenue<br>(To record collection of note receivable by bank) | 1,035.00<br>15.00<br>1,000.00<br>50.00 | 1,035.00<br>15.00<br>1,000.00<br>50.00 |
|---------|--|--|--|

**Helpful Hint**

Note in the bank statement on page 382 that checks no. 459 and 461 have been paid but check no. 460 is not listed. Thus, this check is outstanding. If a complete bank statement were provided, checks no. 453 and 457 would also not be listed. The amounts for these three checks are obtained from the company’s cash payments records.

**Helpful Hint**

The entries that follow are adjusting entries. In prior chapters, Cash was an account that did not require adjustment. That was a simplifying assumption for learning purposes, because we had not yet explained a bank reconciliation.

|                             |   |   |   |         |
|-----------------------------|---|---|---|---------|
| A                           | = | L | + | OE      |

| Less: NSF check   | 425.60          |  |                             |
| Bank service charge   | <u>30.00</u>    |  | <u>455.60</u>               |
|   |                 |  | <b><u>\$12,204.85</u></b> ← |

|            |   |     |   |   |
|------------|---|-----|---|---|
| A          | = | L   | + | OE  |
| +36        |   | +36 |   |   |
| <hr/>      |   |     |   |   |
| Cash Flows |   |     |   |   |
| +36        |   |     |   |  |

|            |   |         |   |   |
|------------|---|---------|---|---|
| A          | = | L       | + | OE  |
| +425.60    |   | -425.60 |   |   |
| <hr/>      |   |         |   |   |
| Cash Flows |   |         |   |   |
| -425.60    |   |         |   |  |

|            |   |         |   |   |
|------------|---|---------|---|---|
| A          | = | L       | + | OE  |
| -30        |   | -30 Exp |   |   |
| <hr/>      |   |         |   |   |
| Cash Flows |   |         |   |   |
| -30        |   |         |   |  |

**Book Error.** The cash disbursements journal shows that check no. 443 was a payment on account to Andrea Company, a supplier. The correcting entry is:

|         |   |       |       |
|---------|---|-------|-------|
| Apr. 30 | Cash  | 36.00 |       |
|         | Accounts Payable—Andrea Company               |       | 36.00 |
|         | (To correct error in recording check no. 443) |       |       |

**NSF Check.** As indicated earlier, an NSF check becomes an account receivable to the depositor. The entry is:

|         |                                 |        |        |
|---------|---------------------------------|--------|--------|
| Apr. 30 | Accounts Receivable—J. R. Baron | 425.60 |        |
|         | Cash                            |        | 425.60 |
|         | (To record NSF check)           |        |        |

**Bank Service Charges.** Depositors debit check printing charges (DM) and other bank service charges (SC) to Miscellaneous Expense because they are usually nominal in amount. The entry is:

|         |  |       |       |
|---------|--|-------|-------|
| Apr. 30 | Miscellaneous Expense                          | 30.00 |       |
|         | Cash   |       | 30.00 |
|         | (To record charge for printing company checks) |       |       |

Instead of making four separate entries, Laird could combine them into one compound entry.

After Laird has posted the entries, the Cash account will show the following.

**Illustration 8-13**  
Adjusted balance in cash account

| Cash         |                  |         |        |
|--------------|------------------|---------|--------|
| Apr. 30 Bal. | 11,589.45        | Apr. 30 | 425.60 |
| 30           | 1,035.00         | 30      | 30.00  |
| 30           | 36.00            |         |        |
| <hr/>        |                  |         |        |
| Apr. 30 Bal. | <b>12,204.85</b> |         |        |

The adjusted cash balance in the ledger should agree with the adjusted cash balance per books in the bank reconciliation in Illustration 8-12 (page 386).

What entries does the bank make? If the company discovers any bank errors in preparing the reconciliation, it should notify the bank. The bank then can make the necessary corrections in its records. The bank does not make any entries for deposits in transit or outstanding checks. Only when these items reach the bank will the bank record these items.

## Electronic Funds Transfer (EFT) System

It is not surprising that companies and banks have developed approaches to transfer funds among parties without the use of paper (deposit tickets, checks, etc.). Such procedures, called **electronic funds transfers (EFT)**, are disbursement systems that use wire, telephone, or computers to transfer cash balances from one location to another. Use of EFT is quite common. For example, many employees receive no formal payroll checks from their employers. Instead, employers send electronic payroll data to the appropriate banks. Also, individuals now frequently make regular payments such as those for house, car, and utilities by EFT.

EFT transfers normally result in better internal control since no cash or checks are handled by company employees. This does not mean that opportunities for fraud are eliminated. In fact, the same basic principles related to internal control apply to EFT transfers. For example, without proper segregation of duties and authorizations, an employee might be able to redirect electronic payments into a personal bank account and conceal the theft with fraudulent accounting entries.

### INVESTOR INSIGHT

#### Madoff's Ponzi Scheme

No recent fraud has generated more interest and rage than the one perpetrated by Bernard Madoff. Madoff was an elite New York investment fund manager who was highly regarded by securities regulators. Investors flocked to him because he delivered very steady returns of between 10% and 15%, no matter whether the market was going up or going down. However, for many years, Madoff did not actually invest the cash that people gave to him. Instead, he was running a Ponzi scheme: He paid returns to existing investors using cash received from new investors. As long as the size of his investment fund continued to grow from new investments at a rate that exceeded the amounts that he needed to pay out in returns, Madoff was able to operate his fraud smoothly. To conceal his misdeeds, he fabricated false investment statements that were provided to investors. In addition, Madoff hired an auditor that never verified the accuracy of the investment records but automatically issued unqualified opinions each year. Although a competing fund manager warned the SEC a number of times over a nearly 10-year period that he thought Madoff was engaged in fraud, the SEC never aggressively investigated the allegations. Investors, many of which were charitable organizations, lost more than \$18 billion. Madoff was sentenced to a jail term of 150 years.

**?** How was Madoff able to conceal such a giant fraud? (See page 410.)

## Do it!

Sally Kist owns Linen Kist Fabrics. Sally asks you to explain how she should treat the following reconciling items when reconciling the company's bank account: (1) a debit memorandum for an NSF check, (2) a credit memorandum for a note collected by the bank, (3) outstanding checks, and (4) a deposit in transit.

### Bank Reconciliation

**action plan**

- ✓ Understand the purpose of a bank reconciliation.
- ✓ Identify time lags and explain how they cause reconciling items.

**Solution**

Sally should treat the reconciling items as follows.

- (1) NSF check: Deduct from balance per books.
- (2) Collection of note: Add to balance per books.
- (3) Outstanding checks: Deduct from balance per bank.
- (4) Deposit in transit: Add to balance per bank.

## Reporting Cash

### Study Objective [8]

Explain the reporting of cash.

**Cash** consists of coins, currency (paper money), check, money orders, and money on hand or on deposit in a bank or similar depository. Companies report cash in two different statements: the balance sheet and the statement of cash flows. The balance sheet reports the amount of cash available at a given point in time. The statement of cash flows shows the sources and uses of cash during a period of time. The cash flow statement was introduced in Chapter 1 and will be discussed in much detail in Chapter 17. In this section, we discuss some important points regarding the presentation of cash in the balance sheet.

When presented in a balance sheet, cash on hand, cash in banks, and petty cash are often combined and reported simply as **Cash**. Because it is the most liquid asset owned by the company, cash is listed first in the current assets section of the balance sheet.

### Cash Equivalents

Many companies use the designation “Cash and cash equivalents” in reporting cash. (See Illustration 8-14 for an example.) **Cash equivalents** are short-term, highly liquid investments that are both:

1. Readily convertible to known amounts of cash, and
2. So near their maturity that their market value is relatively insensitive to changes in interest rates.

#### Illustration 8-14

Balance sheet presentation of cash

| Delta Air Lines, Inc.             |                |
|-----------------------------------|----------------|
| Balance Sheet (partial)           |                |
| December 31, 2009 (in millions)   |                |
| <b>Assets</b>                     |                |
| Current assets                    |                |
| <b>Cash and cash equivalents</b>  | <b>\$4,607</b> |
| Short-term investments            | 71             |
| <b>Restricted cash</b>            | <b>423</b>     |
| Accounts receivable and other net | 1,360          |
| Parts inventories                 | 327            |
| Prepaid expenses and other        | 953            |
| Total current assets              | <u>\$7,741</u> |

Examples of cash equivalents are Treasury bills, commercial paper (short-term corporate notes), and money market funds. All typically are purchased with cash that is in excess of immediate needs.

Occasionally, a company will have a net negative balance in its bank account. In this case, the company should report the negative balance among current liabilities. For example, farm equipment manufacturer **Ag-Chem** recently reported “Checks outstanding in excess of cash balances” of \$2,145,000 among its current liabilities.

## Restricted Cash

A company may have **restricted cash**, cash that is not available for general use but rather is restricted for a special purpose. For example, landfill companies are often required to maintain a fund of restricted cash to ensure they will have adequate resources to cover closing and clean-up costs at the end of a landfill site’s useful life. **McKesson Corp.** recently reported restricted cash of \$962 million to be paid out as the result of investor lawsuits.

Cash restricted in use should be reported separately on the balance sheet as restricted cash. If the company expects to use the restricted cash within the next year, it reports the amount as a current asset. When this is not the case, it reports the restricted funds as a noncurrent asset.

Illustration 8-14 shows restricted cash reported in the financial statements of **Delta Air Lines**. The company is required to maintain restricted cash as collateral to support insurance obligations related to workers’ compensation claims. Delta does not have access to these funds for general use, and so it must report them separately, rather than as part of cash and cash equivalents.

### Ethics Note

Recently, some companies were forced to restate their financial statements because they had too broadly interpreted which types of investments could be treated as cash equivalents. By reporting these items as cash equivalents, the companies made themselves look more liquid.

## COMPREHENSIVE

### Do it!

Poorten Company’s bank statement for May 2012 shows the following data.

|                   |          |                               |          |
|-------------------|----------|-------------------------------|----------|
| Balance 5/1       | \$12,650 | Balance 5/31                  | \$14,280 |
| Debit memorandum: |          | Credit memorandum:            |          |
| NSF check         | \$175    | Collection of note receivable | \$505    |

The cash balance per books at May 31 is \$13,319. Your review of the data reveals the following.

1. The NSF check was from Copple Co., a customer.
2. The note collected by the bank was a \$500, 3-month, 12% note. The bank charged a \$10 collection fee. No interest has been accrued.
3. Outstanding checks at May 31 total \$2,410.
4. Deposits in transit at May 31 total \$1,752.
5. A Poorten Company check for \$352, dated May 10, cleared the bank on May 25. The company recorded this check, which was a payment on account, for \$325.

### Instructions

- (a) Prepare a bank reconciliation at May 31.
- (b) Journalize the entries required by the reconciliation.

**action plan**

- ✓ Follow the four steps in the reconciliation procedure (pp. 384–385).
- ✓ Work carefully to minimize mathematical errors in the reconciliation.
- ✓ Prepare entries from reconciling items per books.
- ✓ Make sure the cash ledger balance after posting the reconciling entries agrees with the adjusted cash balance per books.

**Solution to Comprehensive Do it!**

## Summary of Study Objectives

**[1] Define fraud and internal control.** A fraud is a dishonest act by an employee that results in personal benefit to the employee at a cost to the employer. The fraud triangle refers to the three factors that contribute to fraudulent activity by employees: opportunity, financial pressure, and rationalization. Internal control consists of all the related methods and measures adopted within an organization to safeguard its assets, enhance the reliability of its accounting records, increase efficiency of operations, and ensure compliance with laws and regulations.

**[2] Identify the principles of internal control activities.** The principles of internal control are: establishment of responsibility; segregation of duties; documentation procedures; physical controls; independent internal verification; and human resource controls such as bonding and requiring employees to take vacations.

**[3] Explain the applications of internal control principles to cash receipts.** Internal controls over cash receipts include: (a) designating specific personnel to handle cash; (b) assigning different individuals to receive cash, record cash, and

maintain custody of cash; (c) using remittance advices for mail receipts, cash register tapes for over-the-counter receipts, and deposit slips for bank deposits; (d) using company safes and bank vaults to store cash with access limited to authorized personnel, and using cash registers in executing over-the-counter receipts; (e) making independent daily counts of register receipts and daily comparison of total receipts with total deposits; and (f) bonding personnel that handle cash and requiring them to take vacations.

**[4] Explain the applications of internal control principles to cash disbursements.** Internal controls over cash disbursements include: (a) having specific individuals such as the treasurer authorized to sign checks and approve invoices; (b) assigning different individuals to approve items for payment, pay the items, and record the payment; (c) using prenumbered checks and accounting for all checks, with each check supported by an approved invoice; (d) storing blank checks in a safe or vault with access restricted to authorized personnel, and using a checkwriting machine to imprint amounts on checks; (e) comparing each check with the approved invoice before issuing the

check, and making monthly reconciliations of bank and book balances; and (f) bonding personnel who handle cash, requiring employees to take vacations, and conducting background checks.

**[5] Describe the operation of a petty cash fund.** Companies operate a petty cash fund to pay relatively small amounts of cash. They must establish the fund, make payments from the fund, and replenish the fund when the cash in the fund reaches a minimum level.

**[6] Indicate the control features of a bank account.** A bank account contributes to good internal control by providing physical controls for the storage of cash. It minimizes the amount of currency that a company must keep on hand, and it creates a double record of a depositor's bank transactions.

**[7] Prepare a bank reconciliation.** It is customary to reconcile the balance per books and balance per bank to their adjusted balances. The steps in the reconciling process are to determine deposits in transit, outstanding checks, errors by the depositor or the bank, and unrecorded bank memoranda.

**[8] Explain the reporting of cash.** Companies list cash first in the current assets section of the balance sheet. In some cases, they report cash together with cash equivalents. Cash restricted for a special purpose is reported separately as a current asset or as a noncurrent asset, depending on when the cash is expected to be used.

## Glossary

**Bank reconciliation** The process of comparing the bank's balance of an account with the company's balance and explaining any differences to make them agree. (p. 380).

**Bank service charge** A fee charged by a bank for the use of its services. (p. 383).

**Bank statement** A monthly statement from the bank that shows the depositor's bank transactions and balances. (p. 382).

**Bonding** Obtaining insurance protection against misappropriation of assets by employees. (p. 370).

**Cash** Resources that consist of coins, currency, checks, money orders, and money on hand or on deposit in a bank or similar depository. (p. 388).

**Cash equivalents** Short-term, highly liquid investments that can be converted to a specific amount of cash. (p. 388).

**Check** A written order signed by a bank depositor, directing the bank to pay a specified sum of money to a designated recipient. (p. 380).

**Deposits in transit** Deposits recorded by the depositor but not yet been recorded by the bank. (p. 384).

**Electronic funds transfer (EFT)** A disbursement system that uses wire, telephone, or computers to transfer funds from one location to another. (p. 387).

**Fraud** A dishonest act by an employee that results in personal benefit to the employee at a cost to the employer. (p. 362).

**Fraud triangle** The three factors that contribute to fraudulent activity by employees: opportunity, financial pressure, and rationalization. (p. 362).

**Internal auditors** Company employees who continuously evaluate the effectiveness of the company's internal control system. (p. 370).

**Internal control** All of the related methods and activities adopted within an organization to safeguard its assets and enhance the accuracy and reliability of its accounting records. (p. 363).

**NSF check** A check that is not paid by a bank because of insufficient funds in a customer's bank account. (p. 383).

**Outstanding checks** Checks issued and recorded by a company but not yet paid by the bank. (p. 385).

**Petty cash fund** A cash fund used to pay relatively small amounts. (p. 377).

**Restricted cash** Cash that must be used for a special purpose. (p. 389).

**Sarbanes-Oxley Act of 2002 (SOX)** Regulations passed by Congress to try to reduce unethical corporate behavior. (p. 363).

**Voucher** An authorization form prepared for each payment in a voucher system. (p. 376).

**Voucher system** A network of approvals by authorized individuals acting independently to ensure that all disbursements by check are proper. (p. 375).

Self-Test, Brief Exercises, Exercises, Problem Set A, and many more components are available for practice in *WileyPLUS*

## Self-Test Questions

Answers are on page 410.

- (SO 1) 1. Which of the following is *not* an element of the fraud triangle?
- |                        |                           |
|------------------------|---------------------------|
| a. Rationalization.    | c. Segregation of duties. |
| b. Financial pressure. | d. Opportunity.           |
2. An organization uses internal control to enhance the accuracy and reliability of its accounting records and to:
- safeguard its assets.
  - prevent fraud.
- (SO 1)

- c. produce correct financial statements.  
d. deter employee dishonesty.
- (SO 1) 3. Which of the following was *not* a result of the Sarbanes-Oxley Act?  
a. Companies must file financial statements with the Internal Revenue Service.  
b. All publicly traded companies must maintain adequate internal controls.  
c. The Public Company Accounting Oversight Board was created to establish auditing standards and regulate auditor activity.  
d. Corporate executives and board of directors must ensure that controls are reliable and effective, and they can be fined or imprisoned for failure to do so.
- (SO 2) 4. The principles of internal control do *not* include:  
a. establishment of responsibility.  
b. documentation procedures.  
c. management responsibility.  
d. independent internal verification.
- (SO 2) 5. Physical controls do *not* include:  
a. safes and vaults to store cash.  
b. independent bank reconciliations.  
c. locked warehouses for inventories.  
d. bank safety deposit boxes for important papers.
- (SO 3) 6. Permitting only designated personnel to handle cash receipts is an application of the principle of:  
a. segregation of duties.  
b. establishment of responsibility.  
c. independent check.  
d. human resource controls.
- (SO 3) 7. Which of the following control activities is *not* relevant to when a company uses a computerized (rather than manual) accounting system?  
a. Establishment of responsibility.  
b. Segregation of duties.  
c. Independent internal verification.  
d. All of these control activities are relevant to a computerized system.
- (SO 4) 8. The use of prenumbered checks in disbursing cash is an application of the principle of:  
a. establishment of responsibility.  
b. segregation of duties.  
c. physical controls.  
d. documentation procedures.
9. A company writes a check to replenish a \$100 petty cash fund when the fund contains receipts of \$94 and \$4 in cash. In recording the check, the company should:  
a. debit Cash Over and Short for \$2.  
b. debit Petty Cash for \$94.  
c. credit Cash for \$94.  
d. credit Petty Cash for \$2.
10. The control features of a bank account do *not* include: (SO 6)  
a. having bank auditors verify the correctness of the bank balance per books.  
b. minimizing the amount of cash that must be kept on hand.  
c. providing a double record of all bank transactions.  
d. safeguarding cash by using a bank as a depository.
11. In a bank reconciliation, deposits in transit are: (SO 7)  
a. deducted from the book balance.  
b. added to the book balance.  
c. added to the bank balance.  
d. deducted from the bank balance.
12. The reconciling item in a bank reconciliation that will result in an adjusting entry by the depositor is: (SO 7)  
a. outstanding checks.      c. a bank error.  
b. deposit in transit.      d. bank service charges.
13. Which of the following items in a cash drawer at November 30 is *not* cash? (SO 8)  
a. Money orders.  
b. Coins and currency.  
c. A customer check dated December 1.  
d. A customer check dated November 28.
14. Which of the following statements correctly describes the reporting of cash? (SO 8)  
a. Cash cannot be combined with cash equivalents.  
b. Restricted cash funds may be combined with Cash.  
c. Cash is listed first in the current assets section.  
d. Restricted cash funds cannot be reported as a current asset.

for additional Self-Test Questions.

## Questions

1. A local bank reported that it lost \$150,000 as the result of an employee fraud. Randal Smith is not clear on what is meant by an “employee fraud.” Explain the meaning of fraud to Randal and give an example of frauds that might occur at a bank.
2. Fraud experts often say that there are three primary factors that contribute to employee fraud. Identify the three factors and explain what is meant by each.
3. Identify and describe the five components of a good internal control system.
4. “Internal control is concerned only with enhancing the accuracy of the accounting records.” Do you agree? Explain.
5. What principles of internal control apply to most organizations?
6. At the corner grocery store, all sales clerks make change out of one cash register drawer. Is this a violation of internal control? Why?
7. Meg Lucas is reviewing the principle of segregation of duties. What are the two common applications of this principle?
8. How do documentation procedures contribute to good internal control?
9. What internal control objectives are met by physical controls?

10. (a) Explain the control principle of independent internal verification. (b) What practices are important in applying this principle?
11. The management of Sewell Company asks you, as the company accountant, to explain (a) the concept of reasonable assurance in internal control and (b) the importance of the human factor in internal control.
12. McCartney Fertilizer Co. owns the following assets at the balance sheet date.
- |                              |          |
|------------------------------|----------|
| Cash in bank savings account | \$ 8,000 |
| Cash on hand                 | 850      |
| Cash refund due from the IRS | 1,000    |
| Checking account balance     | 12,000   |
| Postdated checks             | 500      |
- What amount should McCartney report as cash in the balance sheet?
13. What principle(s) of internal control is (are) involved in making daily cash counts of over-the-counter receipts?
14. Jacobs Department Stores has just installed new electronic cash registers in its stores. How do cash registers improve internal control over cash receipts?
15. At Hummel Wholesale Company, two mail clerks open all mail receipts. How does this strengthen internal control?
16. “To have maximum effective internal control over cash disbursements, all payments should be made by check.” Is this true? Explain.
17. Joe Griswold Company’s internal controls over cash disbursements provide for the treasurer to sign checks imprinted by a check-writing machine in indelible ink after comparing the check with the approved invoice. Identify the internal control principles that are present in these controls.
18. How do the principles of (a) physical controls and (b) documentation controls apply to cash disbursements?
19. (a) What is a voucher system? (b) What principles of internal control apply to a voucher system?
20. What is the essential feature of an electronic funds transfer (EFT) procedure?
21. (a) Identify the three activities that pertain to a petty cash fund, and indicate an internal control principle that is applicable to each activity. (b) When are journal entries required in the operation of a petty cash fund?
22. “The use of a bank contributes significantly to good internal control over cash.” Is this true? Why or why not?
23. Lori Figgs is confused about the lack of agreement between the cash balance per books and the balance per the bank. Explain the causes for the lack of agreement to Lori, and give an example of each cause.
24. What are the four steps involved in finding differences between the balance per books and balance per bank?
25. Kristen Hope asks your help concerning an NSF check. Explain to Kristen (a) what an NSF check is, (b) how it is treated in a bank reconciliation, and (c) whether it will require an adjusting entry.
26. (a) “Cash equivalents are the same as cash.” Do you agree? Explain. (b) How should restricted cash funds be reported on the balance sheet?
27.  **PEPSICO** At what amount does PepsiCo report cash and cash equivalents in its 2009 consolidated balance sheet?

## Brief Exercises

**BE8-1** Match each situation with the fraud triangle factor—opportunity, financial pressure, or rationalization—that best describes it.

- An employee’s monthly credit card payments are nearly 75% of his or her monthly earnings.
- An employee earns minimum wage at a firm that has reported record earnings for each of the last five years.
- An employee has an expensive gambling habit.
- An employee has check-writing and signing responsibilities for a small company, as well as reconciling the bank account.

*Identify fraud triangle concepts.*  
(SO 1)

**BE8-2** Angela Kinsey has prepared the following list of statements about internal control.

- One of the objectives of internal control is to safeguard assets from employee theft, robbery, and unauthorized use.
- One of the objectives of internal control is to enhance the accuracy and reliability of the accounting records.
- No laws require U.S. corporations to maintain an adequate system of internal control.

*Indicate internal control concepts.*  
(SO 1)

Identify each statement as true or false. If false, indicate how to correct the statement.

**BE8-3** Phyllis Lapin is the new owner of Ready Parking. She has heard about internal control but is not clear about its importance for her business. Explain to Phyllis the four purposes of internal control and give her one application of each purpose for Ready Parking.

*Explain the importance of internal control.*  
(SO 1)

Identify internal control principles.

(SO 2)

**BE8-4** The internal control procedures in Meredith Palmer Company provide that:

1. Employees who have physical custody of assets do not have access to the accounting records.
2. Each month the assets on hand are compared to the accounting records by an internal auditor.
3. A prenumbered shipping document is prepared for each shipment of goods to customers.

Identify the principles of internal control that are being followed.

Identify the internal control principles applicable to cash receipts.

(SO 3)

**BE8-5** Kate Flannery Company has the following internal control procedures over cash receipts. Identify the internal control principle that is applicable to each procedure.

1. All over-the-counter receipts are registered on cash registers.
2. All cashiers are bonded.
3. Daily cash counts are made by cashier department supervisors.
4. The duties of receiving cash, recording cash, and custody of cash are assigned to different individuals.
5. Only cashiers may operate cash registers.

Make journal entries for cash overage and shortfall.

(SO 3)

**BE8-6** The cash register tape for Kelly Kapoor Industries reported sales of \$6,891.50. Record the journal entry that would be necessary for each of the following situations. (a) Cash to be accounted for exceeds cash on hand by \$50.75. (b) Cash on hand exceeds cash to be accounted for by \$28.32.

Make journal entry using cash count sheet.

(SO 3)

**BE8-7** While examining cash receipts information, the accounting department determined the following information: opening cash balance \$150, cash on hand \$1,125.74, and cash sales per register tape \$990.83. Prepare the required journal entry based upon the cash count sheet.

Identify the internal control principles applicable to cash disbursements.

(SO 4)

**BE8-8** Mindy Kaliny Company has the following internal control procedures over cash disbursements. Identify the internal control principle that is applicable to each procedure.

1. Company checks are prenumbered.
2. The bank statement is reconciled monthly by an internal auditor.
3. Blank checks are stored in a safe in the treasurer's office.
4. Only the treasurer or assistant treasurer may sign checks.
5. Check signers are not allowed to record cash disbursement transactions.

Prepare entry to replenish a petty cash fund.

(SO 5)

**BE8-9** On March 20, Toby's petty cash fund of \$100 is replenished when the fund contains \$7 in cash and receipts for postage \$52, freight-out \$26, and travel expense \$10. Prepare the journal entry to record the replenishment of the petty cash fund.

Identify the control features of a bank account.

(SO 6)

**BE8-10** Creed Bratton is uncertain about the control features of a bank account. Explain the control benefits of (a) a check and (b) a bank statement.

Indicate location of reconciling items in a bank reconciliation.

(SO 7)

**BE8-11** The following reconciling items are applicable to the bank reconciliation for Flender-son Company: (1) outstanding checks, (2) bank debit memorandum for service charge, (3) bank credit memorandum for collecting a note for the depositor, (4) deposits in transit. Indicate how each item should be shown on a bank reconciliation.

Identify reconciling items that require adjusting entries.

(SO 7)

**BE8-12** Using the data in BE8-11, indicate (a) the items that will result in an adjustment to the depositor's records and (b) why the other items do not require adjustment.

Prepare partial bank reconciliation.

(SO 7)

**BE8-13** At July 31, Martinez Company has the following bank information: cash balance per bank \$7,420, outstanding checks \$762, deposits in transit \$1,120, and a bank service charge \$20. Determine the adjusted cash balance per bank at July 31.

Prepare partial bank reconciliation.

(SO 7)

**BE8-14** At August 31, Oscar Company has a cash balance per books of \$8,500 and the following additional data from the bank statement: charge for printing Oscar Company checks \$35, interest earned on checking account balance \$40, and outstanding checks \$800. Determine the adjusted cash balance per books at August 31.

Explain the statement presentation of cash balances.

(SO 8)

**BE8-15** Nunez Company has the following cash balances: Cash in Bank \$15,742, Payroll Bank Account \$6,000, and Plant Expansion Fund Cash \$25,000. Explain how each balance should be reported on the balance sheet.

## Do it! Review

**Do it! 8-1** Identify which control activity is violated in each of the following situations, and explain how the situation creates an opportunity for fraud or inappropriate accounting practices.

1. Once a month, the sales department sends sales invoices to the accounting department to be recorded.
2. Leah Hutcherson orders merchandise for Rice Lake Company; he also receives merchandise and authorizes payment for merchandise.
3. Several clerks at Pig Foods use the same cash register drawer.

*Identify violations of control activities.*

(SO 2)

**Do it! 8-2** Andy Bernard is concerned with control over mail receipts at Andy's Sporting Goods. All mail receipts are opened by Ed Helms. Ed sends the checks to the accounting department, where they are stamped "For Deposit Only." The accounting department records and deposits the mail receipts weekly. Andy asks for your help in installing a good system of internal control over mail receipts.

*Design system of internal control over cash receipts.*

(SO 3)

**Do it! 8-3** Craig Robinson Company established a \$100 petty cash fund on August 1. On August 30, the fund had \$9 cash remaining and petty cash receipts for postage \$31, office supplies \$42, and miscellaneous expense \$16. Prepare journal entries to establish the fund on August 1 and replenish the fund on August 30.

*Make journal entries for petty cash fund.*

(SO 5)

**Do it! 8-4** Daryl Philbin owns Philbin Blankets. Philbin asks you to explain how he should treat the following reconciling items when reconciling the company's bank account.

*Explain treatment of items in bank reconciliation.*

(SO 7)

1. Outstanding checks
2. A deposit in transit
3. The bank charged to our account a check written by another company
4. A debit memorandum for a bank service charge

## Exercises

**E8-1** Jan Levinson is the owner of Levinson's Pizza. Levinson's is operated strictly on a carryout basis. Customers pick up their orders at a counter where a clerk exchanges the pizza for cash. While at the counter, the customer can see other employees making the pizzas and the large ovens in which the pizzas are baked.

*Identify the principles of internal control.*

(SO 2)

### Instructions

Identify the six principles of internal control and give an example of each principle that you might observe when picking up your pizza. (*Note:* It may not be possible to observe all the principles.)

**E8-2** The following control procedures are used at Melora Company for over-the-counter cash receipts.

*Identify internal control weaknesses over cash receipts and suggest improvements.*

(SO 2, 3)

1. To minimize the risk of robbery, cash in excess of \$100 is stored in an unlocked attaché case in the stock room until it is deposited in the bank.
2. All over-the-counter receipts are registered by three clerks who use a cash register with a single cash drawer.
3. The company accountant makes the bank deposit and then records the day's receipts.
4. At the end of each day, the total receipts are counted by the cashier on duty and reconciled to the cash register total.
5. Cashiers are experienced; they are not bonded.

### Instructions

- (a) For each procedure, explain the weakness in internal control, and identify the control principle that is violated.
- (b) For each weakness, suggest a change in procedure that will result in good internal control.

Identify internal control weaknesses over cash disbursements and suggest improvements.  
(SO 2, 4)

**E8-3** The following control procedures are used in Kelly Erin’s Boutique Shoppe for cash disbursements.

1. The company accountant prepares the bank reconciliation and reports any discrepancies to the owner.
2. The store manager personally approves all payments before signing and issuing checks.
3. Each week, Kelly leaves 100 company checks in an unmarked envelope on a shelf behind the cash register.
4. After payment, bills are filed in a paid invoice folder.
5. The company checks are unnumbered.

**Instructions**

- (a) For each procedure, explain the weakness in internal control, and identify the internal control principle that is violated.
- (b) For each weakness, suggest a change in the procedure that will result in good internal control.

Identify internal control weaknesses for cash disbursements and suggest improvements.  
(SO 4)

**E8-4** At Hannon Company, checks are not prenumbered because both the purchasing agent and the treasurer are authorized to issue checks. Each signer has access to unissued checks kept in an unlocked file cabinet. The purchasing agent pays all bills pertaining to goods purchased for resale. Prior to payment, the purchasing agent determines that the goods have been received and verifies the mathematical accuracy of the vendor’s invoice. After payment, the invoice is filed by the vendor, and the purchasing agent records the payment in the cash disbursements journal. The treasurer pays all other bills following approval by authorized employees. After payment, the treasurer stamps all bills PAID, files them by payment date, and records the checks in the cash disbursements journal. Hannon Company maintains one checking account that is reconciled by the treasurer.

**Instructions**

- (a) List the weaknesses in internal control over cash disbursements.
- (b)  Write a memo to the company treasurer indicating your recommendations for improvement.

Indicate whether procedure is good or weak internal control.  
(SO 2, 3, 4)

**E8-5** Listed below are five procedures followed by Ellie Kempet Company.

1. Several individuals operate the cash register using the same register drawer.
2. A monthly bank reconciliation is prepared by someone who has no other cash responsibilities.
3. Roy Anderson writes checks and also records cash payment journal entries.
4. One individual orders inventory, while a different individual authorizes payments.
5. Unnumbered sales invoices from credit sales are forwarded to the accounting department every four weeks for recording.

**Instructions**

Indicate whether each procedure is an example of good internal control or of weak internal control. If it is an example of good internal control, indicate which internal control principle is being followed. If it is an example of weak internal control, indicate which internal control principle is violated. Use the table below.

| <u>Procedure</u> | <u>IC Good or Weak?</u> | <u>Related Internal Control Principle</u> |
|------------------|-------------------------|---|
| 1.               |                         |   |
| 2.               |                         |   |
| 3.               |                         |   |
| 4.               |                         |   |
| 5.               |                         |   |

Indicate whether procedure is good or weak internal control.  
(SO 2, 3, 4)

**E8-6** Listed below are five procedures followed by Wallace Company.

1. Employees are required to take vacations.
2. Any member of the sales department can approve credit sales.
3. Andy Buckley ships goods to customers, bills customers, and receives payment from customers.
4. Total cash receipts are compared to bank deposits daily by someone who has no other cash responsibilities.
5. Time clocks are used for recording time worked by employees.

**Instructions**

Indicate whether each procedure is an example of good internal control or of weak internal control. If it is an example of good internal control, indicate which internal control principle is being followed. If it is an example of weak internal control, indicate which internal control principle is violated. Use the table below.

| <u>Procedure</u> | <u>IC Good or Weak?</u> | <u>Related Internal Control Principle</u> |
|------------------|-------------------------|---|
| 1.               |                         |   |
| 2.               |                         |   |
| 3.               |                         |   |
| 4.               |                         |   |
| 5.               |                         |   |

**E8-7** Karen Filippelli Company established a petty cash fund on May 1, cashing a check for \$100. The company reimbursed the fund on June 1 and July 1 with the following results.

June 1: Cash in fund \$2.75. Receipts: delivery expense \$31.25; postage expense \$39.00; and miscellaneous expense \$25.00.

July 1: Cash in fund \$3.25. Receipts: delivery expense \$21.00; entertainment expense \$51.00; and miscellaneous expense \$24.75.

On July 10, Karen Filippelli increased the fund from \$100 to \$150.

*Prepare journal entries for a petty cash fund.*

(SO 5)

**Instructions**

Prepare journal entries for Karen Filippelli Company for May 1, June 1, July 1, and July 10.

**E8-8** Rashida Company uses an imprest petty cash system. The fund was established on March 1 with a balance of \$100. During March, the following petty cash receipts were found in the petty cash box.

*Prepare journal entries for a petty cash fund.*

(SO 5)

| <u>Date</u> | <u>Receipt No.</u> | <u>For</u>            | <u>Amount</u> |
|-------------|--------------------|-----------------------|---------------|
| 3/5         | 1                  | Stamp Inventory       | \$39          |
| 7           | 2                  | Freight-out           | 21            |
| 9           | 3                  | Miscellaneous Expense | 6             |
| 11          | 4                  | Travel Expense        | 24            |
| 14          | 5                  | Miscellaneous Expense | 5             |

The fund was replenished on March 15 when the fund contained \$3 in cash. On March 20, the amount in the fund was increased to \$150.

**Instructions**

Journalize the entries in March that pertain to the operation of the petty cash fund.

**E8-9** Bob Vance is unable to reconcile the bank balance at January 31. Bob's reconciliation is as follows.

*Prepare bank reconciliation and adjusting entries.*

(SO 7)

|                            |                   |
|----------------------------|-------------------|
| Cash balance per bank      | \$3,560.20        |
| Add: NSF check             | 690.00            |
| Less: Bank service charge  | 25.00             |
| Adjusted balance per bank  | <u>\$4,225.20</u> |
| <br>                       |                   |
| Cash balance per books     | \$3,875.20        |
| Less: Deposits in transit  | 530.00            |
| Add: Outstanding checks    | 930.00            |
| Adjusted balance per books | <u>\$4,275.20</u> |

**Instructions**

(a) Prepare a correct bank reconciliation.

(b) Journalize the entries required by the reconciliation.

**E8-10** On April 30, the bank reconciliation of Gabe Lewis Company shows three outstanding checks: no. 254, \$650; no. 255, \$820; and no. 257, \$410. The May bank statement and the May cash payments journal show the following.

*Determine outstanding checks.*

(SO 7)

| Bank Statement |           |        | Cash Payments Journal |           |        |
|----------------|-----------|--------|-----------------------|-----------|--------|
| Checks Paid    |           |        | Checks Issued         |           |        |
| Date           | Check No. | Amount | Date                  | Check No. | Amount |
| 5/4            | 254       | 650    | 5/2                   | 258       | 159    |
| 5/2            | 257       | 410    | 5/5                   | 259       | 275    |
| 5/17           | 258       | 159    | 5/10                  | 260       | 890    |
| 5/12           | 259       | 275    | 5/15                  | 261       | 500    |
| 5/20           | 261       | 500    | 5/22                  | 262       | 750    |
| 5/29           | 263       | 480    | 5/24                  | 263       | 480    |
| 5/30           | 262       | 750    | 5/29                  | 264       | 560    |

**Instructions**

Using step 2 in the reconciliation procedure, list the outstanding checks at May 31.

Prepare bank reconciliation and adjusting entries.

(SO 7)

**E8-11** The following information pertains to Miner Video Company.

1. Cash balance per bank, July 31, \$7,263.
2. July bank service charge not recorded by the depositor \$28.
3. Cash balance per books, July 31, \$7,284.
4. Deposits in transit, July 31, \$1,500.
5. Bank collected \$900 note for Miner in July, plus interest \$36, less fee \$20. The collection has not been recorded by Miner, and no interest has been accrued.
6. Outstanding checks, July 31, \$591.

**Instructions**

- (a) Prepare a bank reconciliation at July 31.
- (b) Journalize the adjusting entries at July 31 on the books of Miner Video Company.

Prepare bank reconciliation and adjusting entries.

(SO 7)

**E8-12** The information below relates to the Cash account in the ledger of Porter Company.

Balance September 1—\$17,150; Cash deposited—\$64,000.  
 Balance September 30—\$17,404; Checks written—\$63,746.

The September bank statement shows a balance of \$16,422 on September 30 and the following memoranda.

| Credits                                       |         | Debits                   |       |
|---|---------|--------------------------|-------|
| Collection of \$1,500 note plus interest \$30 | \$1,530 | NSF check: Charles Esten | \$425 |
| Interest earned on checking account           | \$45    | Safety deposit box rent  | \$65  |

At September 30, deposits in transit were \$4,450, and outstanding checks totaled \$2,383.

**Instructions**

- (a) Prepare the bank reconciliation at September 30.
- (b) Prepare the adjusting entries at September 30, assuming (1) the NSF check was from a customer on account, and (2) no interest had been accrued on the note.

Compute deposits in transit and outstanding checks for two bank reconciliations.

(SO 7)

**E8-13** The cash records of Holly Company show the following four situations.

1. The June 30 bank reconciliation indicated that deposits in transit total \$720. During July, the general ledger account Cash shows deposits of \$15,750, but the bank statement indicates that only \$15,600 in deposits were received during the month.
2. The June 30 bank reconciliation also reported outstanding checks of \$680. During the month of July, Holly Company books show that \$17,200 of checks were issued. The bank statement showed that \$16,400 of checks cleared the bank in July.
3. In September, deposits per the bank statement totaled \$26,700, deposits per books were \$25,400, and deposits in transit at September 30 were \$2,100.
4. In September, cash disbursements per books were \$23,700, checks clearing the bank were \$25,000, and outstanding checks at September 30 were \$2,100.

There were no bank debit or credit memoranda. No errors were made by either the bank or Holly Company.

**Instructions**

Answer the following questions.

- (a) In situation (1), what were the deposits in transit at July 31?
- (b) In situation (2), what were the outstanding checks at July 31?
- (c) In situation (3), what were the deposits in transit at August 31?
- (d) In situation (4), what were the outstanding checks at August 31?

**E8-14** Flax Company has recorded the following items in its financial records.

|                              |           |
|------------------------------|-----------|
| Cash in bank                 | \$ 47,000 |
| Cash in plant expansion fund | 100,000   |
| Cash on hand                 | 12,000    |
| Highly liquid investments    | 34,000    |
| Petty cash                   | 500       |
| Receivables from customers   | 89,000    |
| Stock investments            | 61,000    |

*Show presentation of cash in financial statements.*

(SO 8)

The cash in bank is subject to a compensating balance of \$5,000. The highly liquid investments had maturities of 3 months or less when they were purchased. The stock investments will be sold in the next 6 to 12 months. The plant expansion project will begin in 3 years.

**Instructions**

- (a) What amount should Flax report as “Cash and cash equivalents” on its balance sheet?
- (b) Where should the items not included in part (a) be reported on the balance sheet?
- (c) What disclosures should Flax make in its financial statements concerning “cash and cash equivalents”?

## Exercises: Set B

Visit the book’s companion website, at [www.wiley.com/college/veygandt](http://www.wiley.com/college/veygandt), and choose the Student Companion site to access Exercise Set B.

## Problems: Set A

**P8-1A** Mose Office Supply Company recently changed its system of internal control over cash disbursements. The system includes the following features.

*Identify internal control principles over cash disbursements.*

(SO 2, 4)

Instead of being unnumbered and manually prepared, all checks must now be prenumbered and written by using the new checkwriting machine purchased by the company. Before a check can be issued, each invoice must have the approval of Linda Purl, the purchasing agent, and Idris Elba, the receiving department supervisor. Checks must be signed by either Vivianne Collins, the treasurer, or Nick D’Agosto, the assistant treasurer. Before signing a check, the signer is expected to compare the amount of the check with the amount on the invoice.

After signing a check, the signer stamps the invoice PAID and inserts within the stamp, the date, check number, and amount of the check. The “paid” invoice is then sent to the accounting department for recording.

Blank checks are stored in a safe in the treasurer’s office. The combination to the safe is known only by the treasurer and assistant treasurer. Each month, the bank statement is reconciled with the bank balance per books by the assistant chief accountant. All employees who handle or account for cash are bonded.

**Instructions**

Identify the internal control principles and their application to cash disbursements of Mose Office Supply Company.

**P8-2A** Ursula Company maintains a petty cash fund for small expenditures. The following transactions occurred over a 2-month period.

*Journalize and post petty cash fund transactions.*

(SO 5)

- July 1 Established petty cash fund by writing a check on Scranton Bank for \$200.
- 15 Replenished the petty cash fund by writing a check for \$196.00. On this date the fund consisted of \$4.00 in cash and the following petty cash receipts: freight-out \$94.00, postage expense \$42.40, entertainment expense \$46.60, and miscellaneous expense \$11.20.

- 31 Replenished the petty cash fund by writing a check for \$192.00. At this date, the fund consisted of \$8.00 in cash and the following petty cash receipts: freight-out \$82.10, charitable contributions expense \$45.00, postage expense \$25.50, and miscellaneous expense \$39.40.
- Aug. 15 Replenished the petty cash fund by writing a check for \$187.00. On this date, the fund consisted of \$13.00 in cash and the following petty cash receipts: freight-out \$75.60, entertainment expense \$43.00, postage expense \$33.00, and miscellaneous expense \$37.00.
- 16 Increased the amount of the petty cash fund to \$300 by writing a check for \$100.
- 31 Replenished petty cash fund by writing a check for \$284.00. On this date, the fund consisted of \$16 in cash and the following petty cash receipts: postage expense \$140.00, travel expense \$95.60, and freight-out \$47.10.

**Instructions**

- (a) July 15, Cash short \$1.80
- (b) Aug. 31 balance \$300

- (a) Journalize the petty cash transactions.
- (b) Post to the Petty Cash account.
- (c) What internal control features exist in a petty cash fund?

Prepare a bank reconciliation and adjusting entries.  
(SO 7)

**P8-3A** On May 31, 2012, Sabre Company had a cash balance per books of \$6,781.50. The bank statement from New York State Bank on that date showed a balance of \$6,404.60. A comparison of the statement with the cash account revealed the following facts.

1. The statement included a debit memo of \$40 for the printing of additional company checks.
2. Cash sales of \$836.15 on May 12 were deposited in the bank. The cash receipts journal entry and the deposit slip were incorrectly made for \$886.15. The bank credited Sabre Company for the correct amount.
3. Outstanding checks at May 31 totaled \$576.25. Deposits in transit were \$1,916.15.
4. On May 18, the company issued check No. 1181 for \$685 to Carol Stills on account. The check, which cleared the bank in May, was incorrectly journalized and posted by Sabre Company for \$658.
5. A \$2,500 note receivable was collected by the bank for Sabre Company on May 31 plus \$80 interest. The bank charged a collection fee of \$20. No interest has been accrued on the note.
6. Included with the cancelled checks was a check issued by Rapier Company to Tom Lujak for \$800 that was incorrectly charged to Sabre Company by the bank.
7. On May 31, the bank statement showed an NSF charge of \$680 for a check issued by Jo Bennett, a customer, to Sabre Company on account.

**Instructions**

- (a) Adjusted cash balance per bank \$8,544.50

- (a) Prepare the bank reconciliation at May 31, 2012.
- (b) Prepare the necessary adjusting entries for Sabre Company at May 31, 2012.

Prepare a bank reconciliation and adjusting entries from detailed data.  
(SO 7)

**P8-4A** The bank portion of the bank reconciliation for Helene Company at November 30, 2012, was as follows.

| <b>HELENE COMPANY</b>          |                 |                    |
|--------------------------------|-----------------|--------------------|
| Bank Reconciliation            |                 |                    |
| November 30, 2012              |                 |                    |
| Cash balance per bank          |                 | \$14,367.90        |
| Add: Deposits in transit       |                 | <u>2,530.20</u>    |
|                                |                 | 16,898.10          |
| Less: Outstanding checks       |                 |                    |
| Check Number                   | Check Amount    |                    |
| 3451                           | \$2,260.40      |                    |
| 3470                           | 720.10          |                    |
| 3471                           | 844.50          |                    |
| 3472                           | 1,426.80        |                    |
| 3474                           | <u>1,050.00</u> |                    |
|                                |                 | <u>6,301.80</u>    |
| Adjusted cash balance per bank |                 | <u>\$10,596.30</u> |

The adjusted cash balance per bank agreed with the cash balance per books at November 30.

The December bank statement showed the following checks and deposits.

| <b>Bank Statement</b> |               |                    |                 |                    |
|-----------------------|---------------|--------------------|-----------------|--------------------|
| <b>Checks</b>         |               |                    | <b>Deposits</b> |                    |
| <u>Date</u>           | <u>Number</u> | <u>Amount</u>      | <u>Date</u>     | <u>Amount</u>      |
| 12-1                  | 3451          | \$ 2,260.40        | 12-1            | \$ 2,530.20        |
| 12-2                  | 3471          | 844.50             | 12-4            | 1,211.60           |
| 12-7                  | 3472          | 1,426.80           | 12-8            | 2,365.10           |
| 12-4                  | 3475          | 1,640.70           | 12-16           | 2,672.70           |
| 12-8                  | 3476          | 1,300.00           | 12-21           | 2,945.00           |
| 12-10                 | 3477          | 2,130.00           | 12-26           | 2,567.30           |
| 12-15                 | 3479          | 3,080.00           | 12-29           | 2,836.00           |
| 12-27                 | 3480          | 600.00             | 12-30           | 1,025.00           |
| 12-30                 | 3482          | 475.50             | Total           | <u>\$18,152.90</u> |
| 12-29                 | 3483          | 1,140.00           |                 |                    |
| 12-31                 | 3485          | 540.80             |                 |                    |
|                       | Total         | <u>\$15,438.70</u> |                 |                    |

The cash records per books for December showed the following.

| <b>Cash Payments Journal</b> |               |               |             |               |                    | <b>Cash Receipts Journal</b> |                    |
|------------------------------|---------------|---------------|-------------|---------------|--------------------|------------------------------|--------------------|
| <u>Date</u>                  | <u>Number</u> | <u>Amount</u> | <u>Date</u> | <u>Number</u> | <u>Amount</u>      | <u>Date</u>                  | <u>Amount</u>      |

| 12-10                        | 3480          | 600.00        | Total       |               | <u>\$14,933.20</u> | 12-28                        | 2,836.00           |
| 12-17                        | 3481          | 807.40        |             |               |                    | 12-30                        | 1,025.00           |
|                              |               |               |             |               |                    | 12-31                        | 1,690.40           |
|                              |               |               |             |               |                    | Total                        | <u>\$17,322.10</u> |

The bank statement contained two memoranda:

1. A credit of \$4,145 for the collection of a \$4,000 note for Helene Company plus interest of \$160 and less a collection fee of \$15. Helene Company has not accrued any interest on the note.
2. A debit of \$572.80 for an NSF check written by L. Purl, a customer. At December 31, the check had not been redeposited in the bank.

At December 31, the cash balance per books was \$12,485.20, and the cash balance per the bank statement was \$20,154.30. The bank did not make any errors, but two errors were made by Helene Company.

#### Instructions

- (a) Using the four steps in the reconciliation procedure, prepare a bank reconciliation at December 31.
- (b) Prepare the adjusting entries based on the reconciliation. (*Hint:* The correction of any errors pertaining to recording checks should be made to Accounts Payable. The correction of any errors relating to recording cash receipts should be made to Accounts Receivable.)

(a) Adjusted balance per books \$15,958.40

Prepare a bank reconciliation and adjusting entries. (SO 7)

**P8-5A** Hidetoshi Company maintains a checking account at the Imura Bank. At July 31, selected data from the ledger balance and the bank statement are shown below.

|                    | <b>Cash in Bank</b> |                 |
|--------------------|---------------------|-----------------|
|                    | <b>Per Books</b>    | <b>Per Bank</b> |
| Balance, July 1    | \$17,600            | \$16,800        |
| July receipts      | 81,400              |                 |
| July credits       |                     | 82,470          |
| July disbursements | 77,150              |                 |
| July debits        |                     | 74,756          |
| Balance, July 31   | <u>\$21,850</u>     | <u>\$24,514</u> |

Analysis of the bank data reveals that the credits consist of \$79,000 of July deposits and a credit memorandum of \$3,470 for the collection of a \$3,400 note plus interest revenue of \$70. The July debits per bank consist of checks cleared \$74,700 and a debit memorandum of \$56 for printing additional company checks.

You also discover the following errors involving July checks: (1) A check for \$230 to a creditor on account that cleared the bank in July was journalized and posted as \$320. (2) A salary check to an employee for \$255 was recorded by the bank for \$155.

The June 30 bank reconciliation contained only two reconciling items: deposits in transit \$7,000 and outstanding checks of \$6,200.

#### Instructions

(a) Adjusted balance per books \$25,354

(a) Prepare a bank reconciliation at July 31, 2012.

(b) Journalize the adjusting entries to be made by Hidetoshi Company. Assume that interest on the note has not been accrued.

Identify internal control weaknesses in cash receipts and cash disbursements. (SO 2, 3, 4)

**P8-6A** Hasagama Middle School wants to raise money for a new sound system for its auditorium. The primary fund-raising event is a dance at which the famous disc jockey D.J. Rivet will play classic and not-so-classic dance tunes. Will Schuester, the music and theater instructor, has been given the responsibility for coordinating the fund-raising efforts. This is Will's first experience with fund-raising. He decides to put the eighth-grade choir in charge of the event; he will be a relatively passive observer.

Will had 500 unnumbered tickets printed for the dance. He left the tickets in a box on his desk and told the choir students to take as many tickets as they thought they could sell for \$5 each. In order to ensure that no extra tickets would be floating around, he told them to dispose of any unsold tickets. When the students received payment for the tickets, they were to bring the cash back to Will and he would put it in a locked box in his desk drawer.

Some of the students were responsible for decorating the gymnasium for the dance. Will gave each of them a key to the money box and told them that if they took money out to purchase materials, they should put a note in the box saying how much they took and what it was used for. After 2 weeks the money box appeared to be getting full, so Will asked Luke Gilmor to count the money, prepare a deposit slip, and deposit the money in a bank account Will had opened.

The day of the dance, Will wrote a check from the account to pay the DJ. D.J. Rivet, however, said that he accepted only cash and did not give receipts. So Will took \$200 out of the cash box and gave it to D.J. At the dance Will had Mel Harris working at the entrance to the gymnasium, collecting tickets from students, and selling tickets to those who had not pre-purchased them. Will estimated that 400 students attended the dance.

The following day Will closed out the bank account, which had \$250 in it, and gave that amount plus the \$180 in the cash box to Principal Foran. Principal Foran seemed surprised that, after generating roughly \$2,000 in sales, the dance netted only \$430 in cash. Will did not know how to respond.

#### Instructions

Identify as many internal control weaknesses as you can in this scenario, and suggest how each could be addressed.

## Problems: Set B

**P8-1B** Magical Elves Theater is located in the Brooklyn Mall. A cashier's booth is located near the entrance to the theater. Three cashiers are employed. One works from 1–5 P.M., another from 5–9 P.M. The shifts are rotated among the three cashiers. The cashiers receive cash from customers and operate a machine that ejects serially numbered tickets. The rolls of tickets are inserted and locked into the machine by the theater manager at the beginning of each cashier's shift.

After purchasing a ticket, the customer takes the ticket to an usher stationed at the entrance of the theater lobby some 60 feet from the cashier's booth. The usher tears the ticket in half, admits the customer, and returns the ticket stub to the customer. The other half of the ticket is dropped into a locked box by the usher.

At the end of each cashier's shift, the theater manager removes the ticket rolls from the machine and makes a cash count. The cash count sheet is initialed by the cashier. At the end of the day, the manager deposits the receipts in total in a bank night deposit vault located in the mall. The manager also sends copies of the deposit slip and the initialed cash count sheets to the theater company treasurer for verification and to the company's accounting department. Receipts from the first shift are stored in a safe located in the manager's office.

### Instructions

- Identify the internal control principles and their application to the cash receipts transactions of the Magical Elves Theater.
- If the usher and cashier decide to collaborate to misappropriate cash, what actions might they take?

**P8-2B** Chow Company maintains a petty cash fund for small expenditures. The following transactions occurred over a 2-month period.

- July 1 Established petty cash fund by writing a check on China Bank for \$100.
- 15 Replenished the petty cash fund by writing a check for \$96.90. On this date, the fund consisted of \$3.10 in cash and the following petty cash receipts: freight-out \$51.00, postage expense \$20.50, entertainment expense \$23.10, and miscellaneous expense \$4.10.
- 31 Replenished the petty cash fund by writing a check for \$95.90. At this date, the fund consisted of \$4.10 in cash and the following petty cash receipts: freight-out \$43.50, charitable contributions expense \$20.00, postage expense \$20.10, and miscellaneous expense \$12.30.
- Aug. 15 Replenished the petty cash fund by writing a check for \$98.00. On this date, the fund consisted of \$2.00 in cash and the following petty cash receipts: freight-out \$40.20, entertainment expense \$21.00, postage expense \$14.00, and miscellaneous expense \$19.80.
- 16 Increased the amount of the petty cash fund to \$150 by writing a check for \$50.
- 31 Replenished the petty cash fund by writing a check for \$137.00. On this date, the fund consisted of \$13 in cash and the following petty cash receipts: freight-out \$74.00, entertainment expense \$43.20, and postage expense \$17.70.

### Instructions

- Journalize the petty cash transactions.
- Post to the Petty Cash account.
- What internal control features exist in a petty cash fund?

**P8-3B** Rohatyn Genetics Company of Lancaster, Wisconsin, spreads herbicides and applies liquid fertilizer for local farmers. On May 31, 2012, the company's Cash account per its general ledger showed the following balance.

| CASH   |             |      |       |        | NO. 101 |
|--------|-------------|------|-------|--------|---------|
| Date   | Explanation | Ref. | Debit | Credit | Balance |
| May 31 | Balance     |      |       |        | 13,287  |

*Identify internal control weaknesses over cash receipts.*

(SO 2, 3)

*Journalize and post petty cash fund transactions.*

(SO 5)

- July 15 Cash over \$1.80
- Aug. 31 balance \$150

*Prepare a bank reconciliation and adjusting entries.*

(SO 7)

The bank statement from Lancaster State Bank on that date showed the following balance.

| <b>LANCASTER STATE BANK</b> |                             |                      |
|-----------------------------|-----------------------------|----------------------|
| <u>Checks and Debits</u>    | <u>Deposits and Credits</u> | <u>Daily Balance</u> |
| XXX                         | XXX                         | 5/31    13,332       |

A comparison of the details on the bank statement with the details in the cash account revealed the following facts.

1. The statement included a debit memo of \$35 for the printing of additional company checks.
2. Cash sales of \$1,720 on May 12 were deposited in the bank. The cash receipts journal entry and the deposit slip were incorrectly made for \$1,820. The bank credited Rohatyn Genetics Company for the correct amount.
3. Outstanding checks at May 31 totaled \$1,225, and deposits in transit were \$2,100.
4. On May 18, the company issued check no. 1181 for \$911 to J. Greenberg on account. The check, which cleared the bank in May, was incorrectly journalized and posted by Rohatyn Genetics Company for \$119.
5. A \$4,000 note receivable was collected by the bank for Rohatyn Genetics Company on May 31 plus \$80 interest. The bank charged a collection fee of \$25. No interest has been accrued on the note.
6. Included with the cancelled checks was a check issued by Powers Company to Jerry Saltz for \$900 that was incorrectly charged to Rohatyn Genetics Company by the bank.
7. On May 31, the bank statement showed an NSF charge of \$1,308 for a check issued by Simon de Pury, a customer, to Rohatyn Genetics Company on account.

**Instructions**

(a) Adj. cash bal. \$15,107

- (a) Prepare the bank reconciliation at May 31, 2012.
- (b) Prepare the necessary adjusting entries for Rohatyn Genetics Company at May 31, 2012.

*Prepare a bank reconciliation and adjusting entries from detailed data.*

(SO 7)

**P8-4B** The bank portion of the bank reconciliation for Williams Company at October 31, 2012, was as follows.

| <b>WILLIAMS COMPANY</b>        |                     |                     |
|--------------------------------|---------------------|---------------------|

| 11-2                         | 2476          | 1,556         | 11-22       | 2484          | 460            | 11-7                         | 545            |
| 11-2                         | 2477          | 330           | 11-23       | 2485          | 525            | 11-12                        | 1,416          |
| 11-4                         | 2478          | 300           | 11-24       | 2486          | 495            | 11-17                        | 810            |
| 11-8                         | 2479          | 890           | 11-29       | 2487          | 210            | 11-20                        | 1,642          |
| 11-10                        | 2480          | 714           | 11-30       | 2488          | 635            | 11-24                        | 1,412          |
| 11-15                        | 2481          | 382           | Total       |               | <u>\$8,067</u> | 11-27                        | 908            |
| 11-18                        | 2482          | 350           |             |               |                | 11-29                        | 652            |
|                              |               |               |             |               |                | 11-30                        | <u>1,541</u>   |
|                              |               |               |             |               |                | Total                        | <u>\$9,592</u> |

The bank statement contained two bank memoranda:

1. A credit of \$1,375 for the collection of a \$1,300 note for Williams Company plus interest of \$91 and less a collection fee of \$16. Williams Company has not accrued any interest on the note.
2. A debit for the printing of additional company checks \$34.

At November 30, the cash balance per books was \$5,958, and the cash balance per the bank statement was \$9,100. The bank did not make any errors, but two errors were made by Williams Company.

#### Instructions

- (a) Using the four steps in the reconciliation procedure described on pages 384–385, prepare a bank reconciliation at November 30.
- (b) Prepare the adjusting entries based on the reconciliation. (*Hint:* The correction of any errors pertaining to recording checks should be made to Accounts Payable. The correction of any errors relating to recording cash receipts should be made to Accounts Receivable).

**P8-5B** Trong Company's bank statement from Nguyen National Bank at August 31, 2012, shows the information below.

|                          |          |                         |         |
|--------------------------|----------|-------------------------|---------|
| Balance, August 1        | \$11,284 | Bank credit memoranda:  |         |
| August deposits          | 47,521   | Collection of note      |         |
| Checks cleared in August | 46,475   | receivable plus \$105   |         |
| Balance, August 31       | 16,856   | interest                | \$4,505 |
|                          |          | Interest earned         | 41      |
|                          |          | Bank debit memorandum:  |         |
|                          |          | Safety deposit box rent | 20      |

(a) Adjusted cash balance per bank \$7,191

Prepare a bank reconciliation and adjusting entries.  
(SO 7)

A summary of the Cash account in the ledger for August shows: Balance, August 1, \$10,959; receipts \$50,050; disbursements \$47,794; and balance, August 31, \$13,215. Analysis reveals that the only reconciling items on the July 31 bank reconciliation were a deposit in transit for \$2,600 and outstanding checks of \$2,925. The deposit in transit was the first deposit recorded by the bank in August. In addition, you determine that there were two errors involving company checks drawn in August: (1) A check for \$340 to a creditor on account that cleared the bank in August was journalized and posted for \$430. (2) A salary check to an employee for \$275 was recorded by the bank for \$277.

### Instructions

(a) Adjusted balance per books \$17,831

- (a) Prepare a bank reconciliation at August 31.  
 (b) Journalize the adjusting entries to be made by Trong Company at August 31. Assume that interest on the note has not been accrued by the company.

Prepare a comprehensive bank reconciliation with theft and internal control deficiencies.  
 (SO 2, 3, 4, 7)

**P8-6B** Braun Company is a very profitable small business. It has not, however, given much consideration to internal control. For example, in an attempt to keep clerical and office expenses to a minimum, the company has combined the jobs of cashier and bookkeeper. As a result, Judith Tan handles all cash receipts, keeps the accounting records, and prepares the monthly bank reconciliations.

The balance per the bank statement on October 31, 2012, was \$15,453. Outstanding checks were: no. 62 for \$107.74, no. 183 for \$127.50, no. 284 for \$215.26, no. 862 for \$162.10, no. 863 for \$192.78, and no. 864 for \$140.49. Included with the statement was a credit memorandum of \$340 indicating the collection of a note receivable for Braun Company by the bank on October 25. This memorandum has not been recorded by Braun Company.

The company's ledger showed one cash account with a balance of \$18,608.81. The balance included undeposited cash on hand. Because of the lack of internal controls, Tan took for personal use all of the undeposited receipts in excess of \$3,226.18. She then prepared the following bank reconciliation in an effort to conceal her theft of cash.

### BANK RECONCILIATION

|   |               |                    |
|---|---------------|--------------------|
| Cash balance per books, October 31          |               | \$18,608.81        |
| Add: Outstanding checks                     |               |                    |
| No. 862                                     | \$162.10      |                    |
| No. 863                                     | 192.78        |                    |
| No. 864                                     | <u>140.49</u> |                    |
|   |               | <u>410.37</u>      |
|   |               | 19,019.18          |
| Less: Undeposited receipts                  |               | <u>3,226.18</u>    |
| Unadjusted balance per bank, October 31     |               | 15,793.00          |
| Less: Bank credit memorandum                |               | <u>340.00</u>      |
| Cash balance per bank statement, October 31 |               | <u>\$15,453.00</u> |

### Instructions

(a) Adjusted balance per books \$17,733.31

- (a) Prepare a correct bank reconciliation. (*Hint:* Deduct the amount of the theft from the adjusted balance per books.)  
 (b) Indicate the three ways that Tan attempted to conceal the theft and the dollar amount pertaining to each method.  
 (c) What principles of internal control were violated in this case?

## Problems: Set C

Visit the book's companion website, at [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), and choose the Student Companion site to access Problem Set C.

## Comprehensive Problem

**CP8** On December 1, 2012, Bluemound Company had the following account balances.

|                     | <u>Debits</u>   |                           | <u>Credits</u>  |
|---------------------|-----------------|---------------------------|-----------------|
| Cash                | \$18,200        | Accumulated Depreciation— |                 |
| Notes Receivable    | 2,200           | Equipment                 | \$ 3,000        |
| Accounts Receivable | 7,500           | Accounts Payable          | 6,100           |
| Inventory           | 16,000          | Owner's Capital           | <u>64,400</u>   |
| Prepaid Insurance   | 1,600           |                           | <u>\$73,500</u> |
| Equipment           | <u>28,000</u>   |                           |                 |
|                     | <u>\$73,500</u> |                           |                 |

During December, the company completed the following transactions.

- Dec. 7 Received \$3,600 cash from customers in payment of account (no discount allowed).  
 12 Purchased merchandise on account from Klump Co. \$12,000, terms 1/10, n/30.  
 17 Sold merchandise on account \$15,000, terms 2/10, n/30. The cost of the merchandise sold was \$10,000.  
 19 Paid salaries \$2,500.  
 22 Paid Klump Co. in full, less discount.  
 26 Received collections in full, less discounts, from customers billed on December 17.

Adjustment data:

1. Depreciation \$200 per month.
2. Insurance expired \$400.

### Instructions

- (a) Journalize the December transactions. (Assume a perpetual inventory system.)
- (b) Enter the December 1 balances in the ledger T accounts and post the December transactions. Use Cost of Goods Sold, Depreciation Expense, Insurance Expense, Salaries and Wages Expense, Sales Revenue, and Sales Discounts.
- (c) The statement from Jackson County Bank on December 31 showed a balance of \$21,994. A comparison of the bank statement with the Cash account revealed the following facts.
  1. The bank collected a note receivable of \$2,200 for Bluemound Company on December 15.
  2. The December 31 receipts of \$2,736 were not included in the bank deposits for December. The company deposited these receipts in a night deposit vault on December 31.
  3. Checks outstanding on December 31 totaled \$1,210.
  4. On December 31, the bank statement showed a NSF charge of \$800 for a check received by the company from L. Shur, a customer, on account.

Prepare a bank reconciliation as of December 31 based on the available information. (*Hint:* The cash balance per books is \$22,120. This can be proven by finding the balance in the Cash account from parts (a) and (b).)
- (d) Journalize the adjusting entries resulting from the bank reconciliation and adjustment data.
- (e) Post the adjusting entries to the ledger T accounts.
- (f) Prepare an adjusted trial balance.
- (g) Prepare an income statement for December and a classified balance sheet at December 31.

## Continuing Cookie Chronicle

(*Note:* This is a continuation of the Cookie Chronicle from Chapters 1 through 7.)

**CCC8 Part 1** Natalie is struggling to keep up with the recording of her accounting transactions. She is spending a lot of time marketing and selling mixers and giving her cookie classes. Her friend John is an accounting student who runs his own accounting service. He has asked Natalie if she would like to have him do her accounting. John and Natalie meet and discuss her business.

**Part 2** Natalie decides that she cannot afford to hire John to do her accounting. One way that she can ensure that her cash account does not have any errors and is accurate and up-to-date is to prepare a bank reconciliation at the end of each month. Natalie would like you to help her.

Go to the book's companion website, [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), to see the completion of this problem.

# BROADENING YOUR PERSPECTIVE

## Financial Reporting and Analysis

### *Financial Reporting Problem: PepsiCo, Inc.*

**BYP8-1** The financial statements of **PepsiCo, Inc.** are presented in Appendix A at the end of this textbook.

#### Instructions

- (a) What comments, if any, are made about cash in the report of the independent registered public accounting firm?
- (b) What data about cash and cash equivalents are shown in the consolidated balance sheet?
- (c) In its notes to Consolidated Financial Statements, how does PepsiCo define cash equivalents?
- (d) In management's letter that assumes "Responsibility for Financial Reporting," what does PepsiCo's management say about internal control? (See page A31 in Appendix A of the back of the book.)

### *Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company*

**BYP8-2** PepsiCo's financial statements are presented in Appendix A. Financial statements of **The Coca-Cola Company** are presented in Appendix B.

#### Instructions

- (a) Based on the information contained in these financial statements, determine each of the following for each company:
  - (1) Cash and cash equivalents balance at December 26, 2009, for PepsiCo and at December 31, 2009, for Coca-Cola.
  - (2) Increase (decrease) in cash and cash equivalents from 2008 to 2009.
  - (3) Cash provided by operating activities during the year ended December 2009 (from statement of cash flows).
- (b) What conclusions concerning the management of cash can be drawn from these data?

### *On the Web*

**BYP8-3** All organizations should have systems of internal control. Universities are no exception. This site discusses the basics of internal control in a university setting.

**Address:** [www.bc.edu/offices/audit/controls](http://www.bc.edu/offices/audit/controls), or go to [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt)

**Steps:** Go to the site shown above.

#### Instructions

The front page of this site provides links to pages that answer six critical questions. Use these links to answer the following questions.

- (a) In a university setting, who has responsibility for evaluating the adequacy of the system of internal control?
- (b) What do reconciliations ensure in the university setting? Who should review the reconciliation?
- (c) What are some examples of physical controls?
- (d) What are two ways to accomplish inventory counts?

## Critical Thinking

### *Decision Making Across the Organization*

**BYP8-4** The board of trustees of a local church is concerned about the internal accounting controls for the offering collections made at weekly services. The trustees ask you to serve on a three-person audit team with the internal auditor of a local college and a CPA who has just joined the church.

At a meeting of the audit team and the board of trustees, you learn the following.

1. The church's board of trustees has delegated responsibility for the financial management and audit of the financial records to the finance committee. This group prepares the annual budget and approves major disbursements. It is not involved in collections or record-keeping. No audit has been made in recent years because the same trusted employee has kept church records and served as financial secretary for 15 years. The church does not carry any fidelity insurance.
2. The collection at the weekly service is taken by a team of ushers who volunteer to serve one month. The ushers take the collection plates to a basement office at the rear of the church. They hand their plates to the head usher and return to the church service. After all plates have been turned in, the head usher counts the cash received. The head usher then places the cash in the church safe along with a notation of the amount counted. The head usher volunteers to serve for 3 months.
3. The next morning, the financial secretary opens the safe and recounts the collection. The secretary withholds \$150–\$200 in cash, depending on the cash expenditures expected for the week, and deposits the remainder of the collections in the bank. To facilitate the deposit, church members who contribute by check are asked to make their checks payable to “Cash.”
4. Each month, the financial secretary reconciles the bank statement and submits a copy of the reconciliation to the board of trustees. The reconciliations have rarely contained any bank errors and have never shown any errors per books.

### Instructions

With the class divided into groups, answer the following.

- (a) Indicate the weaknesses in internal accounting control over the handling of collections.
- (b) List the improvements in internal control procedures that you plan to make at the next meeting of the audit team for (1) the ushers, (2) the head usher, (3) the financial secretary, and (4) the finance committee.
- (c) What church policies should be changed to improve internal control?

## Communication Activity

**BYP8-5** As a new auditor for the CPA firm of Croix, Marais, and Kale, you have been assigned to review the internal controls over mail cash receipts of Manhattan Company. Your review reveals the following: Checks are promptly endorsed “For Deposit Only,” but no list of the checks is prepared by the person opening the mail. The mail is opened either by the cashier or by the employee who maintains the accounts receivable records. Mail receipts are deposited in the bank weekly by the cashier.

### Instructions

Write a letter to Jerry Mays, owner of Manhattan Company, explaining the weaknesses in internal control and your recommendations for improving the system.

## Ethics Case

**BYP8-6** You are the assistant controller in charge of general ledger accounting at Riverside Bottling Company. Your company has a large loan from an insurance company. The loan agreement requires that the company's cash account balance be maintained at \$200,000 or more, as reported monthly.

At June 30, the cash balance is \$80,000, which you report to Gena Schmitt, the financial vice president. Gena excitedly instructs you to keep the cash receipts book open for one additional day for purposes of the June 30 report to the insurance company. Gena says, “If we don't get that cash balance over \$200,000, we'll default on our loan agreement. They could close us down, put us all out of our jobs!” Gena continues, “I talked to Oconto Distributors (one of Riverside's largest customers) this morning. They said they sent us a check for \$150,000 yesterday. We should receive it tomorrow. If we include just that one check in our cash balance, we'll be in the clear. It's in the mail!”

### Instructions

- (a) Who will suffer negative effects if you do not comply with Gena Schmitt's instructions? Who will suffer if you do comply?
- (b) What are the ethical considerations in this case?
- (c) What alternatives do you have?

## “All About You” Activity

**BYP8-7** The **All About You** feature (available on the book’s companion website) indicates potential security risks that may arise from your personal computer. It is important to keep in mind, however, that there are also many other ways that your identity can be stolen other than from your computer. The federal government provides many resources to help protect you from identity thieves.

### Instructions

Go to <http://onguardonline.gov/idtheft.html>, and click on **ID Theft Faceoff**. Complete the quiz provided there.

## FASB Codification Activity

**BYP8-8** If your school has a subscription to the FASB Codification, go to <http://aaahq.org/ascLogin.cfm> to log in and prepare responses to the following.

- (a) How is cash defined in the Codification?
- (b) How are cash equivalents defined in the Codification?
- (c) What are the disclosure requirements related to cash and cash equivalents?

### Answers to Insight and Accounting Across the Organization Questions

**p. 371 SOX Boosts the Role of Human Resources** **Q:** Why would unsupervised employees or employees who report to each other represent potential internal control threats? **A:** An unsupervised employee may have a fraudulent job (or may even be a fictitious person), e.g., a person drawing a paycheck without working. Or, if two employees supervise each other, there is no real separation of duties, and they can conspire to defraud the company.

**p. 371 Big Theft at Small Companies** **Q:** Why are small companies more susceptible to employee theft? **A:** The high degree of trust often found in small companies makes them more vulnerable. Also, small companies tend to have less sophisticated systems of internal control, and they usually lack internal auditors. In addition, it is very hard to achieve some internal control features, such as segregation of duties, when you have very few employees.

**p. 379 How Employees Steal** **Q:** How can companies reduce the likelihood of fraudulent disbursements? **A:** To reduce the occurrence of fraudulent disbursements, a company should follow the procedures discussed in this chapter. These include having only designated personnel sign checks; having different personnel approve payments and make payments; ensuring that check signers do not record disbursements; using prenumbered checks and matching each check to an approved invoice; storing blank checks securely; reconciling the bank statement; and stamping invoices PAID.

**p. 387 Madoff’s Ponzi Scheme** **Q:** How was Madoff able to conceal such a giant fraud? **A:** Madoff fabricated false investment statements that were provided to investors. In addition, his auditor never verified these investment statements even though the auditor gave him an unqualified opinion each year.

## IFRS A Look at IFRS

Fraud can occur anywhere. And because the three main factors that contribute to fraud are universal in nature, the principles of internal control activities are used globally by companies. While Sarbanes-Oxley (SOX) does not apply to international companies, most large international companies have internal controls similar to those indicated in the chapter. IFRS and GAAP are very similar in accounting for cash. *IAS No. 1 (revised)*, “Presentation of Financial Statements,” is the only standard that discusses issues specifically related to cash.

## Key Points

- The fraud triangle discussed in this chapter is applicable to all international companies. Some of the major frauds on an international basis are **Parmalat** (Italy), **Royal Ahold** (the Netherlands), and **Satyam Computer Services** (India).
- Rising economic crime poses a growing threat to companies, with nearly half of all organizations worldwide being victims of fraud in a recent two-year period (*PricewaterhouseCoopers' Global Economic Crime Survey, 2005*). Specifically, 44% of Romanian companies surveyed experienced fraud in the past two years.
- Globally, the number of companies reporting fraud increased from 37% to 45% since 2003, a 22% increase. The cost to companies was an average US\$1.7 million in losses from “tangible frauds,” that is, those that result in an immediate and direct financial loss. These include asset misappropriation, false pretenses, and counterfeiting (*PricewaterhouseCoopers' Global Economic Crime Survey, 2005*).
- Accounting scandals both in the United States and internationally have re-ignited the debate over the relative merits of GAAP, which takes a “rules-based” approach to accounting, versus IFRS, which takes a “principles-based” approach. The FASB announced that it intends to introduce more principles-based standards.
- On a lighter note, at one time Ig Nobel Prize in Economics went to the CEOs of those companies involved in the corporate accounting scandals of that year for “adapting the mathematical concept of imaginary numbers for use in the business world.” The Ig Nobel Prizes (read Ignoble, as not noble) are a parody of the Nobel Prizes and are given each year in early October for 10 achievements that “first make people laugh, and then make them think.” Organized by the scientific humor magazine *Annals of Improbable Research (AIR)*, they are presented by a group that includes genuine Nobel laureates at a ceremony at Harvard University’s Sanders Theater. (See [en.wikipedia.org/wiki/Ig\\_Nobel\\_Prize](http://en.wikipedia.org/wiki/Ig_Nobel_Prize).)
- Internal controls are a system of checks and balances designed to prevent and detect fraud and errors. While most companies have these systems in place, many have never completely documented them, nor had an independent auditor attest to their effectiveness. Both of these actions are required under SOX.
- Companies find that internal control review is a costly process but badly needed. One study estimates the cost of SOX compliance for U.S. companies at over \$35 billion, with audit fees doubling in the first year of compliance. At the same time, examination of internal controls indicates lingering problems in the way companies operate. One study of first compliance with the internal-control testing provisions documented material weaknesses for about 13% of companies reporting in a two-year period (*PricewaterhouseCoopers' Global Economic Crime Survey, 2005*).
- The SOX internal control standards apply only to companies listed on U.S. exchanges. There is continuing debate over whether foreign issuers should have to comply with this extra layer of regulation.
- The accounting and internal control procedures related to cash are essentially the same under both IFRS and this textbook. In addition, the definition used for cash equivalents is the same.
- Most companies report cash and cash equivalents together under IFRS, as shown in this textbook. In addition, IFRS follows the same accounting policies related to the reporting of restricted cash.
- IFRS defines cash and cash equivalents as follows.
  - ◆ **Cash** is comprised of cash on hand and demand deposits.
  - ◆ **Cash equivalents** are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

## Looking to the Future

Ethics has become a very important aspect of reporting. Different cultures have different perspectives on bribery and other questionable activities, and consequently penalties for engaging in such activities vary considerably across countries.

High-quality international accounting requires both high-quality accounting standards and high-quality auditing. Similar to the convergence of GAAP and IFRS, there is movement to improve international auditing standards. The International Auditing and Assurance Standards Board (IAASB) functions as an independent standard-setting body. It works to establish high-quality auditing and assurance and quality-control standards throughout the world. Whether the IAASB adopts internal control provisions similar to those in SOX remains to be seen. You can follow developments in the international audit arena at <http://www.ifac.org/iaasb/>.

Under proposed new standards for financial statements, companies would not be allowed to combine cash equivalents with cash.

## IFRS Self-Test Questions

1. Non-U.S. companies that follow IFRS:
  - (a) do not normally use the principles of internal control activities used in this textbook.
  - (b) often offset cash with accounts payable on the balance sheet.
  - (c) are not required to follow SOX.
  - (d) None of the above.
2. Which of the following is the correct accounting under IFRS for cash?
  - (a) Cash cannot be combined with cash equivalents.
  - (b) Restricted cash funds may be reported as a current or non-current asset depending on the circumstances.
  - (c) Restricted cash funds cannot be reported as a current asset.
  - (d) Cash on hand is not reported on the balance sheet as Cash.
3. The Sarbanes-Oxley Act of 2002 applies to:
  - (a) all U.S. companies listed on U.S. exchanges.
  - (b) all companies that list stock on any stock exchange in any country.
  - (c) all European companies listed on European exchanges.
  - (d) Both (a) and (c).
4. High-quality international accounting requires both high-quality accounting standards and:
  - (a) a reconsideration of SOX to make it less onerous.
  - (b) high-quality auditing standards.
  - (c) government intervention to ensure that the public interest is protected.
  - (d) the development of new principles of internal control activities.
5. Cash equivalents under IFRS:
  - (a) are significantly different than the cash equivalents discussed in the textbook.
  - (b) are generally disclosed separately from cash.
  - (c) may be required to be reported separately from cash in the future.
  - (d) None of the above.

## IFRS Concepts and Application

**IFRS8-1** Some people argue that the internal control requirements of the Sarbanes-Oxley Act (SOX) put U.S. companies at a competitive disadvantage to companies outside the United States. Discuss the competitive implications (both pros and cons) of SOX.

**IFRS8-2** State whether each of the following is true or false. For those that are false, explain why.

- (a) A proposed new financial accounting standard would not allow cash equivalents to be reported in combination with cash.
- (b) Perspectives on bribery and penalties for engaging in bribery are the same across all countries.
- (c) Cash equivalents are comprised of cash on hand and demand deposits.
- (d) SOX was created by the International Accounting Standards Board.

## **International Financial Reporting**

### **Problem: Zetar plc**

**IFRS8-3** The financial statements of **Zetar plc** are presented in Appendix C. The company's complete annual report, including the notes to its financial statements, is available at [www.zetarplc.com](http://www.zetarplc.com).

#### **Instructions**

Using the notes to the company's financial statements, answer the following questions.

- (a) Which committee of the board of directors is responsible for considering management's reports on internal control?
- (b) What are the company's key control procedures?
- (c) Does the company have an internal audit department?
- (d) In what section or sections does Zetar report its bank overdrafts?

# CHAPTER 9

## Accounting for Receivables

### Study Objectives

After studying this chapter, you should be able to:

- 1 Identify the different types of receivables.
- 2 Explain how companies recognize accounts receivable.
- 3 Distinguish between the methods and bases companies use to value accounts receivable.
- 4 Describe the entries to record the disposition of accounts receivable.
- 5 Compute the maturity date of and interest on notes receivable.
- 6 Explain how companies recognize notes receivable.
- 7 Describe how companies value notes receivable.
- 8 Describe the entries to record the disposition of notes receivable.
- 9 Explain the statement presentation and analysis of receivables.

### Feature Story

#### A DOSE OF CAREFUL MANAGEMENT KEEPS RECEIVABLES HEALTHY

“Sometimes you have to know when to be very tough, and sometimes you can give them a bit of a break,” says Vivi Su. She’s not talking about her children, but about the customers of a subsidiary of pharmaceutical company **Whitehall-Robins**, where she works as supervisor of credit and collections.

For example, while the company’s regular terms are 1/15, n/30 (1% discount if paid within 15 days), a customer might ask for and receive a few days of grace and still get the discount. Or a customer might place orders above its credit limit, in which case, depending on its payment history and the circumstances, Ms. Su might authorize shipment of the goods anyway.

“It’s not about drawing a line in the sand, and that’s all,” she explains. “You want a good relationship with your customers—but you also need to bring in the money.”

“The money,” in Whitehall-Robins’s case, amounts to some \$170 million in sales a year. Nearly all of it comes in through the credit accounts Ms. Su manages. The process starts with the decision to grant a customer

an account in the first place, Ms. Su explains. The sales rep gives the customer a credit application. “My department reviews this application very carefully; a customer needs to supply three good references, and we also run a check with a credit firm like Equifax. If we accept them, then based on their size and history, we assign a credit limit.”

Once accounts are established, the company supervises them very carefully. “I get an aging report every single day,” says Ms. Su.

“The rule of thumb is that we should always have at least 85% of receivables current—meaning they were billed less than 30 days ago,” she continues. “But we try to do even better than that—I like to see 90%.” Similarly, her guideline is never to have more than 5% of receivables at over 90 days. But long before that figure is reached, “we jump on it,” she says firmly.

At 15 days overdue, Whitehall-Robins phones the client. Often there’s a reasonable explanation for the delay—an invoice may have gone astray, or the payables clerk is away. “But if a customer keeps on delaying, and tells us several times that it’ll only be a few more days, we know there’s a problem,” says Ms. Su. After 45 days, “I send a letter. Then a second notice is sent in writing. After the third and final notice, the client has 10 days to pay, and then I hand it over to a collection agency, and it’s out of my hands.”

Ms. Su’s boss, Terry Norton, records an estimate for bad debts every year, based on a percentage of receivables. The percentage depends on the current aging history. He also calculates and monitors the company’s receivables turnover ratio, which the company reports in its financial statements. “I think of it in terms of collection period of DSO—days of sales outstanding,” he explains.

Ms. Su knows that she and Mr. Norton are crucial to the profitability of Whitehall-Robins. “Receivables are generally the second-largest asset of any company (after its capital assets),” she points out. “So it’s no wonder we keep a very close eye on them.”

## Preview of CHAPTER 9

As indicated in the Feature Story, receivables are a significant asset for many pharmaceutical companies. Because a significant portion of sales in the United States are done on credit, receivables are significant to companies in other industries as well. As a consequence, companies must pay close attention to their receivables and manage them carefully. In this chapter you will learn what journal entries companies make when they sell products, when they collect cash from those sales, and when they write off accounts they cannot collect.

The content and organization of the chapter are as follows.

| Accounting for Receivables   |  |  |  |

## Types of Receivables

### Study Objective [1]

Identify the different types of receivables.

The term **receivables** refers to amounts due from individuals and companies. Receivables are claims that are expected to be collected in cash. The management of receivables is a very important activity for any company that sells goods or services on credit.

Receivables are important because they represent one of a company's most liquid assets. For many companies, receivables are also one of the largest assets. For example, receivables represented 30.8% of the current assets of pharmaceutical giant **Rite Aid** in 2009. Illustration 9-1 lists receivables as a percentage of total assets for five other well-known companies in a recent year.

### Illustration 9-1

Receivables as a percentage of assets

| Company   | Receivables as a Percentage of Total Assets |
|---|---|
| General Electric                                | 52%   |
| Ford Motor Company                              | 42%   |
| Minnesota Mining and Manufacturing Company (3M) | 14%   |
| DuPont Co.                                      | 17%   |
| Intel Corporation                               | 5%  |

The relative significance of a company's receivables as a percentage of its assets depends on various factors: its industry, the time of year, whether it extends long-term financing, and its credit policies. To reflect important differences among receivables, they are frequently classified as (1) accounts receivable, (2) notes receivable, and (3) other receivables.

**Accounts receivable** are amounts customers owe on account. They result from the sale of goods and services. Companies generally expect to collect accounts receivable within 30 to 60 days. They are usually the most significant type of claim held by a company.

**Notes receivable** represent claims for which formal instruments of credit are issued as evidence of the debt. The credit instrument normally requires the debtor to pay interest and extends for time periods of 60–90 days or longer. Notes and accounts receivable that result from sales transactions are often called **trade receivables**.

**Other receivables** include nontrade receivables such as interest receivable, loans to company officers, advances to employees, and income taxes refundable. These do not generally result from the operations of the business. Therefore, they are generally classified and reported as separate items in the balance sheet.

### Ethics Note

Companies report receivables from employees separately in the financial statements. The reason: Sometimes those assets are not the result of an “arm’s-length” transaction.

## Accounts Receivable

Three accounting issues associated with accounts receivable are:

1. Recognizing accounts receivable.
2. Valuing accounts receivable.
3. Disposing of accounts receivable.

### Recognizing Accounts Receivable

Recognizing accounts receivable is relatively straightforward. A service organization records a receivable when it provides service on account. A merchandiser records accounts receivable at the point of sale of merchandise on account. When a merchandiser sells goods, it increases (debits) Accounts Receivable and increases (credits) Sales Revenue.

The seller may offer terms that encourage early payment by providing a discount. Sales returns also reduce receivables. The buyer might find some of the goods unacceptable and choose to return the unwanted goods.

To review, assume that Jordache Co. on July 1, 2012, sells merchandise on account to Polo Company for \$1,000, terms 2/10, n/30. On July 5, Polo returns merchandise worth \$100 to Jordache Co. On July 11, Jordache receives payment from Polo Company for the balance due. The journal entries to record these transactions on the books of Jordache Co. are as follows. **(Cost of goods sold entries are omitted.)**

|         |   |       |       |
|---------|---|-------|-------|
| July 1  | Accounts Receivable—Polo Company              | 1,000 |       |
|         | Sales Revenue                                 |       | 1,000 |
|         | (To record sales on account)                  |       |       |
| July 5  | Sales Returns and Allowances                  | 100   |       |
|         | Accounts Receivable—Polo Company              |       | 100   |
|         | (To record merchandise returned)              |       |       |
| July 11 | Cash (\$900 – \$18)                           | 882   |       |
|         | Sales Discounts (\$900 × .02)                 | 18    |       |
|         | Accounts Receivable—Polo Company              |       | 900   |
|         | (To record collection of accounts receivable) |       |       |

Some retailers issue their own credit cards. When you use a retailer’s credit card (JCPenney, for example), the retailer charges interest on the balance due if not paid within a specified period (usually 25–30 days).

### Study Objective [2]

Explain how companies recognize accounts receivable.

### Ethics Note

In exchange for lower interest rates, some companies have eliminated the 25-day grace period before finance charges kick in. Be sure you read the fine print in any credit agreement you sign.

### Helpful Hint

These entries are the same as those described in Chapter 5. For simplicity, we have omitted inventory and cost of goods sold from this set of journal entries and from end-of-chapter material.

To illustrate, assume that you use your JCPenney Company credit card to purchase clothing with a sales price of \$300. JCPenney will increase (debit) Accounts Receivable for \$300 and increase (credit) Sales Revenue for \$300 (cost of goods sold entry omitted) as follows.

|                   |   |   |   |          |
|-------------------|---|---|---|----------|
| A                 | = | L | + | OE       |
| +300              |   |   |   | +300 Rev |
| <b>Cash Flows</b> |   |   |   |          |
| no effect         |   |   |   |          |

|                                 |     |     |
|---------------------------------|-----|-----|
| Accounts Receivable             | 300 |     |
| Sales Revenue                   |     | 300 |
| (To record sale of merchandise) |     |     |

Assuming that you owe \$300 at the end of the month, and JCPenney charges 1.5% per month on the balance due, the adjusting entry that JCPenney makes to record interest revenue of \$4.50 ( $\$300 \times 1.5\%$ ) is as follows.

|                   |   |   |   |           |
|-------------------|---|---|---|-----------|
| A                 | = | L | + | OE        |
| +4.50             |   |   |   | +4.50 Rev |
| <b>Cash Flows</b> |   |   |   |           |
| no effect         |   |   |   |           |

|                                    |      |      |
|------------------------------------|------|------|
| Accounts Receivable                | 4.50 |      |
| Interest Revenue                   |      | 4.50 |
| (To record interest on amount due) |      |      |

Interest revenue is often substantial for many retailers.

#### ANATOMY OF A FRAUD

Tasanee was the accounts receivable clerk for a large non-profit foundation that provided performance and exhibition space for the performing and visual arts. Her responsibilities included activities normally assigned to an accounts receivable clerk, such as recording revenues from various sources that included donations, facility rental fees, ticket revenue, and bar receipts. However, she was also responsible for handling all cash and checks from the time they were received until the time she deposited them, as well as preparing the bank reconciliation. Tasanee took advantage of her situation by falsifying bank deposits and bank reconciliations so that she could steal cash from the bar receipts. Since nobody else logged the donations or matched the donation receipts to pledges prior to Tasanee receiving them, she was able to offset the cash that was stolen against donations that she received but didn't record. Her crime was made easier by the fact that her boss, the company's controller, only did a very superficial review of the bank reconciliation and thus didn't notice that some numbers had been cut out from other documents and taped onto the bank reconciliation.

Total take: \$1.5 million

#### THE MISSING CONTROL

**Segregation of duties.** The foundation should not have allowed an accounts receivable clerk, whose job was to record receivables, to also handle cash, record cash, make deposits, and especially prepare the bank reconciliation.

**Independent internal verification.** The controller was supposed to perform a thorough review of the bank reconciliation. Because he did not, he was terminated from his position.

### Study Objective [3]

Distinguish between the methods and bases companies use to value accounts receivable.

## Valuing Accounts Receivable

Once companies record receivables in the accounts, the next question is: How should they report receivables in the financial statements? Companies report accounts receivable on the balance sheet as an asset. But determining the **amount** to report is sometimes difficult because some receivables will become uncollectible.

Each customer must satisfy the credit requirements of the seller before the credit sale is approved. Inevitably, though, some accounts receivable become uncollectible. For example, a customer may not be able to pay because of a decline in its sales revenue due to a downturn in the economy. Similarly, individuals may be laid off from their jobs or faced with unexpected hospital bills. Companies record credit losses as debits to **Bad Debts Expense** (or Uncollectible Accounts Expense). Such losses are a normal and necessary risk of doing business on a credit basis.

Recently, when U.S. home prices fell, home foreclosures rose, and the economy in general slowed, lenders experienced huge increases in their bad debts expense. For example, during a recent quarter **Wachovia**, the fourth largest U.S. bank, increased bad debts expense from \$108 million to \$408 million. Similarly, **American Express** increased its bad debts expense by 70%.

Two methods are used in accounting for uncollectible accounts: (1) the direct write-off method and (2) the allowance method. The following sections explain these methods.

### DIRECT WRITE-OFF METHOD FOR UNCOLLECTIBLE ACCOUNTS

Under the **direct write-off method**, when a company determines a particular account to be uncollectible, it charges the loss to Bad Debts Expense. Assume, for example, that Warden Co. writes off as uncollectible M. E. Doran's \$200 balance on December 12. Warden's entry is:

|         |  |                        |
|---------|--|------------------------|
| Dec. 12 | Bad Debts Expense<br>Accounts Receivable—M. E. Doran<br>(To record write-off of M. E. Doran account) | 200<br><br><br><br>200 |
|---------|--|------------------------|

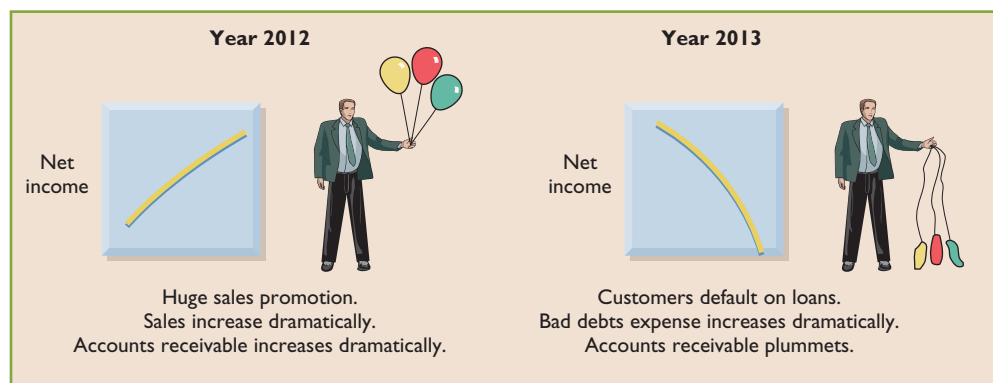

### Alternative Terminology

You will sometimes see *Bad Debts Expense* called *Uncollectible Accounts Expense*.

|                   |   |   |   |          |
|-------------------|---|---|---|----------|
| A                 | = | L | + | OE       |
|                   |   |   |   | -200 Exp |
| -200              |   |   |   |          |
| <b>Cash Flows</b> |   |   |   |          |
| no effect         |   |   |   |          |

Under this method, Bad Debts Expense will show only **actual losses** from uncollectibles. The company will report accounts receivable at its gross amount.

Although this method is simple, its use can reduce the usefulness of both the income statement and balance sheet. Consider the following example. Assume that in 2012, Quick Buck Computer Company decided it could increase its revenues by offering computers to college students without requiring any money down and with no credit-approval process. On campuses across the country, it distributed one million computers with a selling price of \$800 each. This increased Quick Buck's revenues and receivables by \$800 million. The promotion was a huge success! The 2012 balance sheet and income statement looked great. Unfortunately, during 2013, nearly 40% of the customers defaulted on their loans. This made the 2013 income statement and balance sheet look terrible. Illustration 9-2 shows the effect of these events on the financial statements if the direct write-off method is used.

**Illustration 9-2**  
Effects of direct write-off method

Under the direct write-off method, companies often record bad debts expense in a period different from the period in which they record the revenue. The method does not attempt to match bad debts expense to sales revenues in the income statement. Nor does the direct write-off method show accounts receivable in the balance sheet at the amount the company actually expects to receive. **Consequently, unless bad debts losses are insignificant, the direct write-off method is not acceptable for financial reporting purposes.**

**ALLOWANCE METHOD FOR UNCOLLECTIBLE ACCOUNTS**

The **allowance method** of accounting for bad debts involves estimating uncollectible accounts at the end of each period. This provides better matching on the income statement. It also ensures that companies state receivables on the balance sheet at their cash (net) realizable value. **Cash (net) realizable value** is the net amount the company expects to receive in cash. It excludes amounts that the company estimates it will not collect. Thus, this method reduces receivables in the balance sheet by the amount of estimated uncollectible receivables.

GAAP requires the allowance method for financial reporting purposes when bad debts are material in amount. This method has three essential features:

1. Companies **estimate** uncollectible accounts receivable. They match this estimated expense **against revenues** in the same accounting period in which they record the revenues.
2. Companies debit estimated uncollectibles to Bad Debts Expense and credit them to Allowance for Doubtful Accounts through an adjusting entry at the end of each period. Allowance for Doubtful Accounts is a contra account to Accounts Receivable.
3. When companies write off a specific account, they debit actual uncollectibles to Allowance for Doubtful Accounts and credit that amount to Accounts Receivable.

**Helpful Hint**

In this context, *material* means significant or important to financial statement users.

**Recording Estimated Uncollectibles.** To illustrate the allowance method, assume that Hampson Furniture has credit sales of \$1,200,000 in 2012. Of this amount, \$200,000 remains uncollected at December 31. The credit manager estimates that \$12,000 of these sales will be uncollectible. The adjusting entry to record the estimated uncollectibles increases (debits) Bad Debts Expense and increases (credits) Allowance for Doubtful Accounts, as follows.

|                   |   |   |   |             |
|-------------------|---|---|---|-------------|
| A                 | = | L | + | OE          |
| -12,000           |   |   |   | -12,000 Exp |
| <b>Cash Flows</b> |   |   |   |             |
| no effect         |   |   |   |             |

|         |  |        |        |
|---------|--|--------|--------|
| Dec. 31 | Bad Debts Expense                              | 12,000 |        |
|         | Allowance for Doubtful Accounts                |        | 12,000 |
|         | (To record estimate of uncollectible accounts) |        |        |

Hampson reports Bad Debts Expense in the income statement as an operating expense (usually as a selling expense). Thus, the estimated uncollectibles are matched with sales in 2012. Hampson records the expense in the same year it made the sales.

Allowance for Doubtful Accounts shows the estimated amount of claims on customers that the company expects will become uncollectible in the future. Companies use a contra account instead of a direct credit to Accounts Receivable because they do not know *which* customers will not pay. The credit balance in the allowance account will absorb the specific write-offs when they occur. As Illustration 9-3 shows, the company deducts the allowance account from accounts receivable in the current assets section of the balance sheet.

The amount of \$188,000 in Illustration 9-3 represents the expected **cash realizable value** of the accounts receivable at the statement date. **Companies do not close Allowance for Doubtful Accounts at the end of the fiscal year.**

**Helpful Hint**

Cash realizable value is sometimes referred to as *accounts receivable (net)*.

| Hampson Furniture<br>Balance Sheet (partial) |                      |                |
|--|----------------------|----------------|
| Current assets                               |                      |                |
| Cash   |                      | \$ 14,800      |
| <b>Accounts receivable</b>                   | <b>\$200,000</b>     |                |
| <b>Less: Allowance for doubtful accounts</b> | <b><u>12,000</u></b> | <b>188,000</b> |
| Inventory                                    |                      | 310,000        |
| Supplies                                     |                      | <u>25,000</u>  |
| Total current assets                         |                      | \$537,800      |

**Illustration 9-3**  
Presentation of allowance for doubtful accounts

**Recording the Write-Off of an Uncollectible Account.** As described in the Feature Story, companies use various methods of collecting past-due accounts, such as letters, calls, and legal action. When they have exhausted all means of collecting a past-due account and collection appears impossible, the company should write off the account. In the credit card industry, for example, it is standard practice to write off accounts that are 210 days past due. To prevent premature or unauthorized write-offs, authorized management personnel should formally approve each write-off. To maintain good internal control, companies should not authorize someone to write off accounts who also has daily responsibilities related to cash or receivables.

To illustrate a receivables write-off, assume that the financial vice president of Hampson Furniture authorizes a write-off of the \$500 balance owed by R. A. Ware on March 1, 2013. The entry to record the write-off is:

|        |  |            |
|--------|--|------------|
| Mar. 1 | Allowance for Doubtful Accounts<br>Accounts Receivable—R. A. Ware<br>(Write-off of R. A. Ware account) | 500<br>500 |
|--------|--|------------|

|                   |   |   |   |    |
|-------------------|---|---|---|----|
| A                 | = | L | + | OE |
| +500              |   |   |   |    |
| -500              |   |   |   |    |
| <b>Cash Flows</b> |   |   |   |    |
| no effect         |   |   |   |    |

Bad Debts Expense does not increase when the write-off occurs. **Under the allowance method, companies debit every bad debt write-off to the allowance account rather than to Bad Debts Expense.** A debit to Bad Debts Expense would be incorrect because the company has already recognized the expense when it made the adjusting entry for estimated bad debts. Instead, the entry to record the write-off of an uncollectible account reduces both Accounts Receivable and Allowance for Doubtful Accounts. After posting, the general ledger accounts will appear as in Illustration 9-4.

| Accounts Receivable |         |        | Allowance for Doubtful Accounts |             |        |
|---------------------|---------|--------|---------------------------------|-------------|--------|
| Jan. 1 Bal.         | 200,000 | Mar. 1 | 500                             | Mar. 1      | 500    |
| Mar. 1 Bal.         | 199,500 |        |                                 | Jan. 1 Bal. | 12,000 |
|                     |         |        |                                 | Mar. 1 Bal. | 11,500 |

**Illustration 9-4**  
General ledger balances after write-off

A write-off affects **only balance sheet accounts**—not income statement accounts. The write-off of the account reduces both Accounts Receivable and Allowance for Doubtful Accounts. Cash realizable value in the balance sheet, therefore, remains the same, as Illustration 9-5 shows.

|                                 | Before Write-Off        | After Write-Off         |
|---------------------------------|-------------------------|-------------------------|
| Accounts receivable             | \$200,000               | \$199,500               |
| Allowance for doubtful accounts | 12,000                  | 11,500                  |
| <b>Cash realizable value</b>    | <b><u>\$188,000</u></b> | <b><u>\$188,000</u></b> |

**Illustration 9-5**  
Cash realizable value comparison

**Recovery of an Uncollectible Account.** Occasionally, a company collects from a customer after it has written off the account as uncollectible. The company makes two entries to record the recovery of a bad debt: (1) It reverses the entry made in writing off the account. This reinstates the customer’s account. (2) It journalizes the collection in the usual manner.

To illustrate, assume that on July 1, R. A. Ware pays the \$500 amount that Hampson had written off on March 1. Hampson makes these entries:

|                   |   |   |   |    |
|-------------------|---|---|---|----|
| A                 | = | L | + | OE |
| +500              |   |   |   |    |
| -500              |   |   |   |    |
| <b>Cash Flows</b> |   |   |   |    |
| no effect         |   |   |   |    |

|        |  |  |  |     |  |  |  |  |     |
|--------|--|--|--|-----|--|--|--|--|-----|
|        |  |  |  | (1) |  |  |  |  |     |
| July 1 |  | Accounts Receivable—R. A. Ware               |  | 500 |  |  |  |  |     |
|        |  | Allowance for Doubtful Accounts              |  |     |  |  |  |  | 500 |
|        |  | (To reverse write-off of R. A. Ware account) |  |     |  |  |  |  |     |

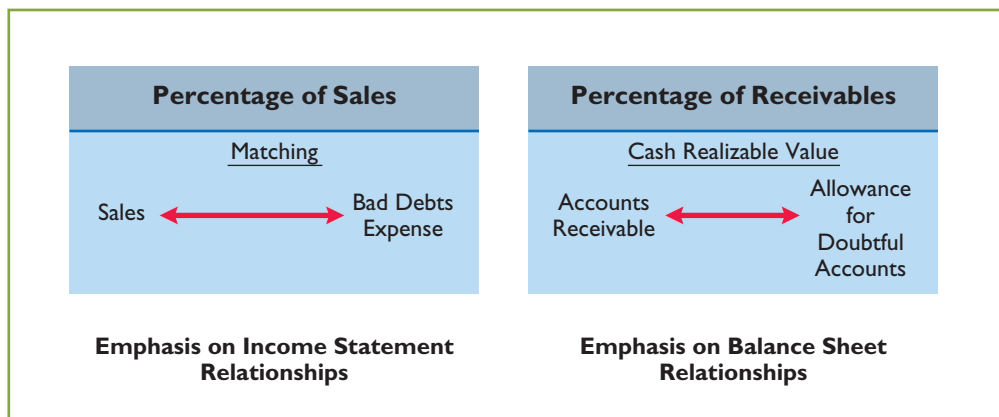

|                   |   |   |   |    |
|-------------------|---|---|---|----|
| A                 | = | L | + | OE |
| +500              |   |   |   |    |
| -500              |   |   |   |    |
| <b>Cash Flows</b> |   |   |   |    |
| +500              |   |   |   |    |

|        |  |  |  |     |  |  |  |  |     |
|--------|--|--|--|-----|--|--|--|--|-----|
|        |  |  |  | (2) |  |  |  |  |     |
| July 1 |  | Cash                                   |  | 500 |  |  |  |  |     |
|        |  | Accounts Receivable—R. A. Ware         |  |     |  |  |  |  | 500 |
|        |  | (To record collection from R. A. Ware) |  |     |  |  |  |  |     |

Note that the recovery of a bad debt, like the write-off of a bad debt, affects **only balance sheet accounts**. The net effect of the two entries above is a debit to Cash and a credit to Allowance for Doubtful Accounts for \$500. Accounts Receivable and the Allowance for Doubtful Accounts both increase in entry (1) for two reasons: First, the company made an error in judgment when it wrote off the account receivable. Second, after R. A. Ware did pay, Accounts Receivable in the general ledger and Ware’s account in the subsidiary ledger should show the collection for possible future credit purposes.

**Estimating the Allowance.** For Hampson Furniture in Illustration 9-3, the amount of the expected uncollectibles was given. However, in “real life,” companies must estimate that amount when they use the allowance method. Two bases are used to determine this amount: **(1) percentage of sales**, and **(2) percentage of receivables**. Both bases are generally accepted. The choice is a management decision. It depends on the relative emphasis that management wishes to give to expenses and revenues on the one hand or to cash realizable value of the accounts receivable on the other. The choice is whether to emphasize income statement or balance sheet relationships. Illustration 9-6 compares the two bases.

**Illustration 9-6**  
Comparison of bases for estimating uncollectibles

The percentage-of-sales basis results in a better matching of expenses with revenues—an income statement viewpoint. The percentage-of-receivables basis produces the better estimate of cash realizable value—a balance sheet viewpoint. Under both bases, the company must determine its past experience with bad debt losses.

**Percentage-of-Sales.** In the **percentage-of-sales basis**, management estimates what percentage of credit sales will be uncollectible. This percentage is based on past experience and anticipated credit policy.

The company applies this percentage to either total credit sales or net credit sales of the current year. To illustrate, assume that Gonzalez Company elects to use the percentage-of-sales basis. It concludes that 1% of net credit sales will become uncollectible. If net credit sales for 2012 are \$800,000, the estimated bad debts expense is \$8,000 (1% × \$800,000). The adjusting entry is:

|         |  |                |
|---------|--|----------------|
| Dec. 31 | Bad Debts Expense<br>Allowance for Doubtful Accounts<br>(To record estimated bad debts for year) | 8,000<br>8,000 |
|---------|--|----------------|

|                   |   |        |   |            |
|-------------------|---|--------|---|------------|
| A                 | = | L      | + | OE         |
|                   |   |        |   | -8,000 Exp |
|                   |   | -8,000 |   |            |
| <hr/>             |   |        |   |            |
| <b>Cash Flows</b> |   |        |   |            |
| no effect         |   |        |   |            |

After the adjusting entry is posted, assuming the allowance account already has a credit balance of \$1,723, the accounts of Gonzalez Company will show the following:

| Bad Debts Expense |       | Allowance for Doubtful Accounts |       |
|-------------------|-------|---------------------------------|-------|
| Dec. 31 Adj.      | 8,000 |                                 |       |
|                   |       | Jan. 1 Bal.                     | 1,723 |
|                   |       | Dec. 31 Adj.                    | 8,000 |
|                   |       | Dec. 31 Bal.                    | 9,723 |

**Illustration 9-7**  
Bad debts accounts after posting

**This basis of estimating uncollectibles emphasizes the matching of expenses with revenues.** As a result, Bad Debts Expense will show a direct percentage relationship to the sales base on which it is computed. **When the company makes the adjusting entry, it disregards the existing balance in Allowance for Doubtful Accounts.** The adjusted balance in this account should be a reasonable approximation of the realizable value of the receivables. If actual write-offs differ significantly from the amount estimated, the company should modify the percentage for future years.

**Percentage-of-Receivables.** Under the **percentage-of-receivables basis**, management estimates what percentage of receivables will result in losses from uncollectible accounts. The company prepares an **aging schedule**, in which it classifies customer balances by the length of time they have been unpaid. Because of its emphasis on time, the analysis is often called **aging the accounts receivable**. In the Feature Story, **Whitehall-Robins** prepared an aging report daily.

After the company arranges the accounts by age, it determines the expected bad debt losses. It applies percentages based on past experience to the totals in each category. The longer a receivable is past due, the less likely it is to be collected. Thus, the estimated percentage of uncollectible debts increases as the number of days past due increases. Illustration 9-8 (page 424) shows an aging schedule for Dart Company. Note that the estimated percentage uncollectible increases from 2 to 40% as the number of days past due increases.

**Illustration 9-8**  
Aging schedule

| Customer                           | Total           | Not Yet Due     | Number of Days Past Due |                |                |                |
|------------------------------------|-----------------|-----------------|-------------------------|----------------|----------------|----------------|
|                                    |                 |                 | 1-30                    | 31-60          | 61-90          | Over 90        |
| T. E. Adert                        | \$ 600          |                 | \$ 300                  |                | \$ 200         | \$ 100         |
| R. C. Bortz                        | 300             | \$ 300          |                         |                |                |                |
| B. A. Carl                         | 450             |                 | 200                     | \$ 250         |                |                |
| O. L. Diker                        | 700             | 500             |                         |                | 200            |                |
| T. O. Ebbet                        | 600             |                 |                         | 300            |                | 300            |
| Others                             | 36,950          | 26,200          | 5,200                   | 2,450          | 1,600          | 1,500          |
|                                    | <u>\$39,600</u> | <u>\$27,000</u> | <u>\$5,700</u>          | <u>\$3,000</u> | <u>\$2,000</u> | <u>\$1,900</u> |
| Estimated Percentage Uncollectible |                 | 2%              | 4%                      | 10%            | 20%            | 40%            |
| Total Estimated Bad Debts          | <b>\$ 2,228</b> | \$ 540          | \$ 228                  | \$ 300         | \$ 400         | \$ 760         |

**Helpful Hint**

The older categories have higher percentages because the longer an account is past due, the less likely it is to be collected.

Total estimated bad debts for Dart Company (\$2,228) represent the amount of existing customer claims the company expects will become uncollectible in the future. This amount represents the **required balance** in Allowance for Doubtful Accounts at the balance sheet date. **The amount of the bad debt adjusting entry is the difference between the required balance and the existing balance in the allowance account.** If the trial balance shows Allowance for Doubtful Accounts with a credit balance of \$528, the company will make an adjusting entry for \$1,700 (\$2,228 – \$528), as shown here.

|                   |   |   |   |            |
|-------------------|---|---|---|------------|
| A                 | = | L | + | OE         |
|                   |   |   |   | -1,700 Exp |
| -1,700            |   |   |   |            |
| <b>Cash Flows</b> |   |   |   |            |
| no effect         |   |   |   |            |

|         |  |       |       |
|---------|--|-------|-------|
| Dec. 31 | Bad Debts Expense<br>Allowance for Doubtful Accounts<br>(To adjust allowance account to total<br>estimated uncollectibles) | 1,700 | 1,700 |
|---------|--|-------|-------|

After Dart posts its adjusting entry, its accounts will appear as follows.

**Illustration 9-9**  
Bad debts accounts after posting

| Bad Debts Expense |       | Allowance for Doubtful Accounts |       |
|-------------------|-------|---------------------------------|-------|
| Dec. 31 Adj.      | 1,700 |                                 |       |
|                   |       | Bal.                            | 528   |
|                   |       | Dec. 31 Adj.                    | 1,700 |
|                   |       | Bal.                            | 2,228 |

Occasionally, the allowance account will have a **debit balance** prior to adjustment. This occurs when write-offs during the year have exceeded previous provisions for bad debts. In such a case, the company **adds the debit balance to the required balance** when it makes the adjusting entry. Thus, if there had been a \$500 debit balance in the allowance account before adjustment, the adjusting entry would have been for \$2,728 (\$2,228 + \$500) to arrive at a credit balance of \$2,228. The percentage-of-receivables basis will normally result in the better approximation of cash realizable value.

## Do it!

Brule Co. has been in business five years. The ledger at the end of the current year shows:

|                                 |               |
|---------------------------------|---------------|
| Accounts Receivable             | \$30,000 Dr.  |
| Sales Revenue                   | \$180,000 Cr. |
| Allowance for Doubtful Accounts | \$2,000 Dr.   |

Bad debts are estimated to be 10% of receivables. Prepare the entry to adjust Allowance for Doubtful Accounts.

### Solution

The following entry should be made to bring the balance in Allowance for Doubtful Accounts up to a balance of \$3,000 ( $0.1 \times \$30,000$ ):

|  |       |       |
|--|-------|-------|
| Bad Debts Expense [(0.1 × \$30,000) + \$2,000] | 5,000 |       |
| Allowance for Doubtful Accounts                |       | 5,000 |
| (To record estimate of uncollectible accounts) |       |       |

Related exercise material: BE9-3, BE9-4, BE9-5, BE9-6, BE9-7, E9-3, E9-4, E9-5, E9-6, and **Do it!** 9-1.

## Uncollectible Accounts Receivable

### action plan

- ✓ Report receivables at their cash (net) realizable value.
- ✓ Estimate the amount the company does not expect to collect.
- ✓ Consider the existing balance in the allowance account when using the percentage-of-receivables basis.

## Disposing of Accounts Receivable

In the normal course of events, companies collect accounts receivable in cash and remove the receivables from the books. However, as credit sales and receivables have grown in significance, the “normal course of events” has changed. Companies now frequently sell their receivables to another company for cash, thereby shortening the cash-to-cash operating cycle.

Companies sell receivables for two major reasons. First, **they may be the only reasonable source of cash**. When money is tight, companies may not be able to borrow money in the usual credit markets. Or, if money is available, the cost of borrowing may be prohibitive.

A second reason for selling receivables is that **billing and collection are often time-consuming and costly**. It is often easier for a retailer to sell the receivables to another party with expertise in billing and collection matters. Credit card companies such as **MasterCard**, **Visa**, and **Discover** specialize in billing and collecting accounts receivable.

### SALE OF RECEIVABLES

A common sale of receivables is a sale to a factor. A **factor** is a finance company or bank that buys receivables from businesses and then collects the payments directly from the customers. Factoring is a multibillion dollar business.

Factoring arrangements vary widely. Typically the factor charges a commission to the company that is selling the receivables. This fee ranges from 1–3% of the amount of receivables purchased. To illustrate, assume that Hendredon Furniture factors \$600,000 of receivables to Federal Factors. Federal Factors assesses a service charge of 2% of the amount of receivables sold. The journal entry to record the sale by Hendredon Furniture is as follows.

|   |         |         |
|---|---------|---------|
| Cash  | 588,000 |         |
| Service Charge Expense (2% × \$600,000)     | 12,000  |         |
| Accounts Receivable                         |         | 600,000 |
| (To record the sale of accounts receivable) |         |         |

### Study Objective [4]

Describe the entries to record the disposition of accounts receivable.

|                   |   |   |   |             |
|-------------------|---|---|---|-------------|
| A                 | = | L | + | OE          |
| +588,000          |   |   |   | -12,000 Exp |
| -600,000          |   |   |   |             |
| <b>Cash Flows</b> |   |   |   |             |
| <b>+588,000</b>   |   |   |   |             |

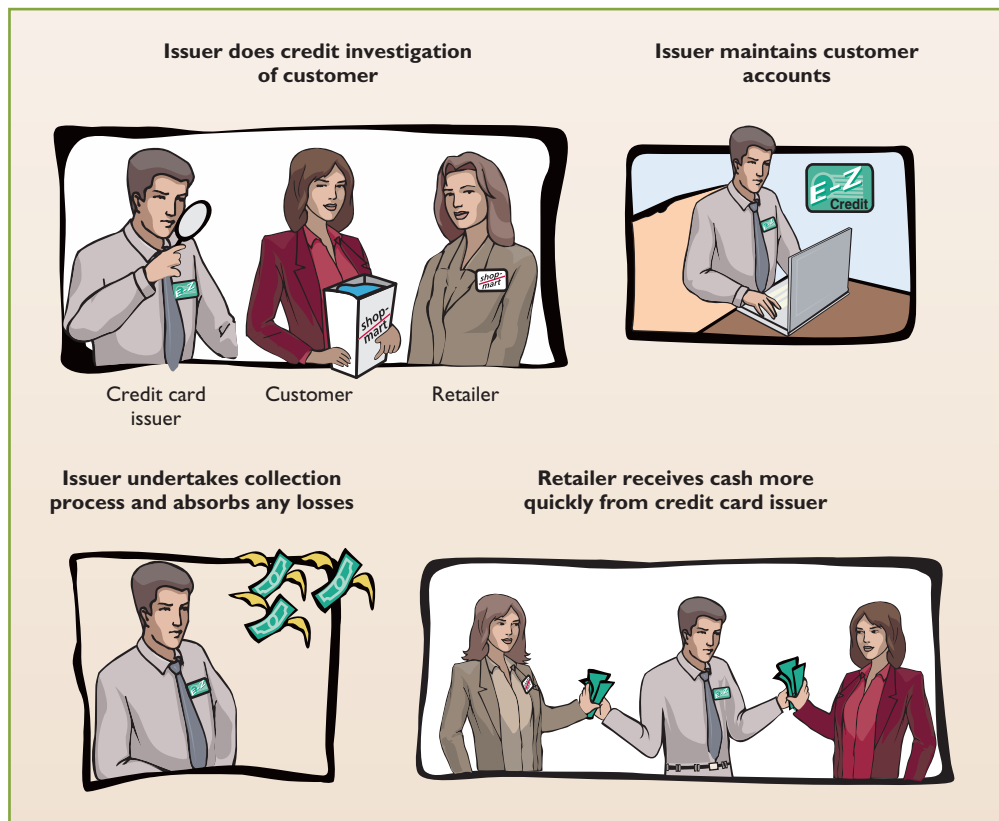

If the company often sells its receivables, it records the service charge expense (such as that incurred by Hendredon) as selling expense. If the company infrequently sells receivables, it may report this amount in the “Other expenses and losses” section of the income statement.

**CREDIT CARD SALES**

Over one billion credit cards are in use in the United States—more than three credit cards for every man, woman, and child in this country. **Visa**, **MasterCard**, and **American Express** are the national credit cards that most individuals use. Three parties are involved when national credit cards are used in retail sales: (1) the credit card issuer, who is independent of the retailer, (2) the retailer, and (3) the customer. A retailer’s acceptance of a national credit card is another form of selling (factoring) the receivable.

Illustration 9-10 shows the major advantages of national credit cards to the retailer. In exchange for these advantages, the retailer pays the credit card issuer a fee of 2–6% of the invoice price for its services.

**Illustration 9-10**  
Advantages of credit cards to the retailer

**Accounting for Credit Card Sales.** The retailer generally considers sales from the use of national credit card sales as *cash sales*. The retailer must pay to the bank that issues the card a fee for processing the transactions. The retailer records the credit card slips in a similar manner as checks deposited from a cash sale.

To illustrate, Anita Ferreri purchases \$1,000 of compact discs for her restaurant from Karen Kerr Music Co., using her Visa First Bank Card. First Bank charges a service fee of 3%. The entry to record this transaction by Karen Kerr Music is as follows.

|                   |   |   |   |            |
|-------------------|---|---|---|------------|
| A                 | = | L | + | OE         |
| +970              |   |   |   |            |
|                   |   |   |   | –30 Exp    |
|                   |   |   |   | +1,000 Rev |
| <b>Cash Flows</b> |   |   |   |            |
| +970              |   |   |   |            |

|                                    |     |       |
|------------------------------------|-----|-------|
| Cash                               | 970 | 1,000 |
| Service Charge Expense             | 30  |       |
| Sales Revenue                      |     |       |
| (To record Visa credit card sales) |     |       |

## ACCOUNTING ACROSS THE ORGANIZATION

### How Does a Credit Card Work?

Most of you know how to use a credit card, but do you know what happens in the transaction and how the transaction is processed? Suppose that you use a **Visa** card to purchase some new ties at **Nordstrom**. The salesperson swipes your card, and the swiping machine reads the information on the magnetic strip on the back of the card. The salesperson then types in the amount of the purchase. The machine contacts the Visa computer, which routes the call back to the bank that issued your Visa card. The issuing bank verifies that the account exists, that the card is not stolen, and that you have not exceeded your credit limit. At this point, the slip is printed, which you sign.

Visa acts as the clearing agent for the transaction. It transfers funds from the issuing bank to Nordstrom's bank account. Generally this transfer of funds, from sale to the receipt of funds in the merchant's account, takes two to three days.

In the meantime, Visa puts a pending charge on your account for the amount of the tie purchase; that amount counts immediately against your available credit limit. At the end of the billing period, Visa sends you an invoice (your credit card bill) which shows the various charges you made, and the amounts that Visa expended on your behalf, for the month. You then must "pay the piper" for your stylish new ties.

**?** Assume that Nordstrom prepares a bank reconciliation at the end of each month. If some credit card sales have not been processed by the bank, how should Nordstrom treat these transactions on its bank reconciliation? (See page 453.)

## Do it!

Mehl Wholesalers Co. has been expanding faster than it can raise capital. According to its local banker, the company has reached its debt ceiling. Mehl's suppliers (creditors) are demanding payment within 30 days of the invoice date for goods acquired, but Mehl's customers are slow in paying (60–90 days). As a result, Mehl has a cash flow problem.

Mehl needs \$120,000 in cash to safely cover next Friday's payroll. Its balance of outstanding accounts receivables totals \$750,000. What might Mehl do to alleviate this cash crunch? Record the entry that Mehl would make when it raises the needed cash.

### Solution

Assuming that Mehl Wholesalers factors \$125,000 of its accounts receivable at a 1% service charge, it would make the following entry.

|   |         |         |
|---|---------|---------|
| Cash                                      | 123,750 |         |
| Service Charge Expense                    | 1,250   |         |
| Accounts Receivable                       |         | 125,000 |
| (To record sale of receivables to factor) |         |         |

Related exercise material: BE9-8, E9-7, E9-8, E9-9, and **Do it!** 9-2.

## Disposition of Accounts Receivable

### action plan

- ✓ To speed up the collection of cash, sell receivables to a factor.
- ✓ Calculate service charge expense as a percentage of the factored receivables.

## Notes Receivable

Companies may also grant credit in exchange for a formal credit instrument known as a promissory note. A **promissory note** is a written promise to pay a specified amount of money on demand or at a definite time. Promissory notes may be used

(1) when individuals and companies lend or borrow money, (2) when the amount of the transaction and the credit period exceed normal limits, or (3) in settlement of accounts receivable.

In a promissory note, the party making the promise to pay is called the **maker**. The party to whom payment is to be made is called the **payee**. The note may specifically identify the payee by name or may designate the payee simply as the bearer of the note.

In the note shown in Illustration 9-11, Calhoun Company is the maker, Wilma Company is the payee. To Wilma Company, the promissory note is a note receivable; to Calhoun Company, it is a note payable.

**Illustration 9-11**  
Promissory note

### Helpful Hint

Who are the two key parties to a note, and what entry does each party make when the note is issued?

Answer:

1. The maker, Calhoun Company, credits Notes Payable.
2. The payee, Wilma Company, debits Notes Receivable.

The illustration shows a sample promissory note with several key terms highlighted and labeled with callouts:

- Amount:** \$1,000
- Date:** Chicago, Illinois May 1, 2012
- Term:** 2 months after date
- Payee:** Wilma Company
- Interest Rate:** 12%
- Maker:** Calhoun Company
- Signature:** Phyllis Miller, Treasurer

Notes receivable give the holder a stronger legal claim to assets than do accounts receivable. Like accounts receivable, notes receivable can be readily sold to another party. Promissory notes are negotiable instruments (as are checks), which means that they can be transferred to another party by endorsement.

Companies frequently accept notes receivable from customers who need to extend the payment of an outstanding account receivable. They often require such notes from high-risk customers. In some industries (such as the pleasure and sport boat industry), all credit sales are supported by notes. The majority of notes, however, originate from loans.

The basic issues in accounting for notes receivable are the same as those for accounts receivable:

1. **Recognizing** notes receivable.
2. **Valuing** notes receivable.
3. **Disposing of** notes receivable.

On the following pages, we will look at these issues. Before we do, we need to consider two issues that did not apply to accounts receivable: maturity date and computing interest.

## Determining the Maturity Date

When the life of a note is expressed in terms of months, you find the date when it matures by counting the months from the date of issue. For example, the maturity date of a three-month note dated May 1 is August 1. A note drawn on the last day of a month matures on the last day of a subsequent month. That is, a July 31 note due in two months matures on September 30.

### Study Objective [5]

Compute the maturity date of and interest on notes receivable.

When the due date is stated in terms of days, you need to count the exact number of days to determine the maturity date. In counting, **omit the date the note is issued but include the due date**. For example, the maturity date of a 60-day note dated July 17 is September 15, computed as follows.

|                                 |           |                  |
|---------------------------------|-----------|------------------|
| Term of note                    |           | 60 days          |
| July (31–17)                    | 14        |                  |
| August                          | <u>31</u> | <u>45</u>        |
| <b>Maturity date: September</b> |           | <b><u>15</u></b> |

**Illustration 9-12**  
Computation of maturity date

Illustration 9-13 shows three ways of stating the maturity date of a promissory note.

**Illustration 9-13**  
Maturity date of different notes

## Computing Interest

Illustration 9-14 gives the basic formula for computing interest on an interest-bearing note.

$$\text{Face Value of Note} \times \text{Annual Interest Rate} \times \text{Time in Terms of One Year} = \text{Interest}$$

**Illustration 9-14**  
Formula for computing interest

The interest rate specified in a note is an **annual** rate of interest. The time factor in the computation in Illustration 9-14 expresses the fraction of a year that the note is outstanding. When the maturity date is stated in days, the time factor is often the number of days divided by 360. When counting days, omit the date that the note is issued but include the due date. When the due date is stated in months, the time factor is the number of months divided by 12. Illustration 9-15 (page 430) shows computation of interest for various time periods.

### Helpful Hint

The interest rate specified is the *annual* rate.

## Disposing of Notes Receivable

Notes may be held to their maturity date, at which time the face value plus accrued interest is due. In some situations, the maker of the note defaults, and the payee must make an appropriate adjustment. In other situations, similar to accounts receivable, the holder of the note speeds up the conversion to cash by selling the receivables as described later in this chapter.

### Study Objective [8]

Describe the entries to record the disposition of notes receivable.

### HONOR OF NOTES RECEIVABLE

A note is **honored** when its maker pays in full at its maturity date. For each interest-bearing note, the **amount due at maturity** is the face value of the note plus interest for the length of time specified on the note.

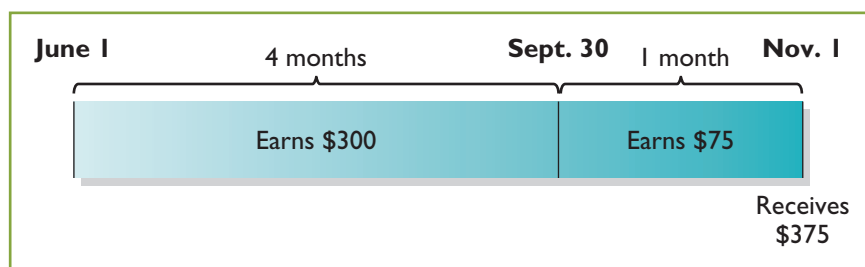

To illustrate, assume that Wolder Co. lends Higley Co. \$10,000 on June 1, accepting a five-month, 9% interest note. In this situation, interest is \$375 ( $\$10,000 \times 9\% \times \frac{5}{12}$ ). The amount due, the maturity value, is \$10,375 ( $\$10,000 + \$375$ ). To obtain payment, Wolder (the payee) must present the note either to Higley Co. (the maker) or to the maker's agent, such as a bank. If Wolder presents the note to Higley Co. on November 1, the maturity date, Wolder's entry to record the collection is:

|        |  |                                 |                           |
|--------|--|---------------------------------|---------------------------|
| Nov. 1 | Cash<br>Notes Receivable<br>Interest Revenue ( $\$10,000 \times 9\% \times \frac{5}{12}$ )<br>(To record collection of Higley note and interest) | 10,375<br><br><br>10,000<br>375 | <br><br><br>10,000<br>375 |
|--------|--|---------------------------------|---------------------------|

|   |   |   |   |    |            |
|---|---|---|---|----|------------|
| A | = | L | + | OE |            |
|   |   |   |   |    | +10,375    |
|   |   |   |   |    | -10,000    |
|   |   |   |   |    | +375 Rev   |
|   |   |   |   |    | Cash Flows |
|   |   |   |   |    | +10,375    |

### ACCRUAL OF INTEREST RECEIVABLE

Suppose instead that Wolder Co. prepares financial statements as of September 30. The timeline in Illustration 9-16 presents this situation.

**Illustration 9-16**  
Timeline of interest earned

To reflect interest earned but not yet received, Wolder must accrue interest on September 30. In this case, the adjusting entry by Wolder is for four months of interest, or \$300, as shown below.

|          |  |                                |                 |
|----------|--|--------------------------------|-----------------|
| Sept. 30 | Interest Receivable ( $\$10,000 \times 9\% \times \frac{4}{12}$ )<br>Interest Revenue<br>(To accrue 4 months' interest on Higley note) | 300<br><br><br><br><br><br>300 | <br><br><br>300 |
|----------|--|--------------------------------|-----------------|

|   |   |   |   |    |            |
|---|---|---|---|----|------------|
| A | = | L | + | OE |            |
|   |   |   |   |    | +300       |
|   |   |   |   |    | +300 Rev   |
|   |   |   |   |    | Cash Flows |
|   |   |   |   |    | no effect  |

At the note's maturity on November 1, Wolder receives \$10,375. This amount represents repayment of the \$10,000 note as well as five months of interest, or \$375, as shown on the next page. The \$375 is comprised of the \$300 Interest Receivable

|                   |   |   |   |         |
|-------------------|---|---|---|---------|
| A                 | = | L | + | OE      |
| +10,375           |   |   |   |         |
| -10,000           |   |   |   |         |
| -300              |   |   |   |         |
|                   |   |   |   | +75 Rev |
| <hr/>             |   |   |   |         |
| <b>Cash Flows</b> |   |   |   |         |
| +10,375           |   |   |   |         |

accrued on September 30 plus \$75 earned during October. Wolder’s entry to record the honoring of the Higley note on November 1 is:

|        |   |        |        |
|--------|---|--------|--------|
| Nov. 1 | Cash [ $\$10,000 + (\$10,000 \times 9\% \times \frac{5}{12})$ ] | 10,375 |        |
|        | Notes Receivable  |        | 10,000 |
|        | Interest Receivable   |        | 300    |
|        | Interest Revenue ( $\$10,000 \times 9\% \times \frac{1}{12}$ )  |        | 75     |
|        | (To record collection of Higley note and interest)              |        |        |

In this case, Wolder credits Interest Receivable because the receivable was established in the adjusting entry on September 30.

### DISHONOR OF NOTES RECEIVABLE

A **dishonored note** is a note that is not paid in full at maturity. A dishonored note receivable is no longer negotiable. However, the payee still has a claim against the maker of the note for both the note and the interest. Therefore the note holder usually transfers the Notes Receivable account to an Account Receivable.

To illustrate, assume that Higley Co. on November 1 indicates that it cannot pay at the present time. The entry to record the dishonor of the note depends on whether Wolder Co. expects eventual collection. If it does expect eventual collection, Wolder Co. debits the amount due (face value and interest) on the note to Accounts Receivable. It would make the following entry at the time the note is dishonored (assuming no previous accrual of interest).

|                   |   |   |   |          |
|-------------------|---|---|---|----------|
| A                 | = | L | + | OE       |
| +10,375           |   |   |   |          |
| -10,000           |   |   |   |          |
|                   |   |   |   | +375 Rev |
| <hr/>             |   |   |   |          |
| <b>Cash Flows</b> |   |   |   |          |
| no effect         |   |   |   |          |

|        |   |        |        |
|--------|---|--------|--------|
| Nov. 1 | Accounts Receivable—Higley              | 10,375 |        |
|        | Notes Receivable                        |        | 10,000 |
|        | Interest Revenue                        |        | 375    |
|        | (To record the dishonor of Higley note) |        |        |

If instead, on November 1, there is no hope of collection, the note holder would write off the face value of the note by debiting Allowance for Doubtful Accounts. No interest revenue would be recorded because collection will not occur.

### SALE OF NOTES RECEIVABLE

The accounting for the sale of notes receivable is recorded similarly to the sale of accounts receivable. The accounting entries for the sale of notes receivable are left for a more advanced course.

## ACCOUNTING ACROSS THE ORGANIZATION

### Bad Information Can Lead to Bad Loans

Many factors have contributed to the recent credit crisis. One significant factor that resulted in many bad loans was a failure by lenders to investigate loan customers sufficiently. For example, **Countrywide Financial Corporation** wrote many loans under its “Fast and Easy” loan program. That program allowed borrowers to provide little or no documentation for their income or their assets. Other lenders had similar programs, which earned the nickname “liars’ loans.” One study found that in these situations 60% of applicants overstated their incomes by more than 50% in order to qualify for a loan. Critics of the banking industry say that because loan officers were compensated for loan volume, and because banks were selling the loans to investors rather than holding them, the lenders had little incentive to investigate the borrowers’ creditworthiness.

Source: Glenn R. Simpson and James R. Hagerty, “Countrywide Loss Focuses Attention on Underwriting,” *Wall Street Journal* (April 30, 2008), p. B1; and Michael Corkery, “Fraud Seen as Driver in Wave of Foreclosures,” *Wall Street Journal* (December 21, 2007), p. A1.

**?** What steps should the banks have taken to ensure the accuracy of financial information provided on loan applications? (See page 453.)

**Do it!**

Gambit Stores accepts from Leonard Co. a \$3,400, 90-day, 6% note dated May 10 in settlement of Leonard's overdue account. (a) What is the maturity date of the note? (b) What entry does Gambit make at the maturity date, assuming Leonard pays the note and interest in full at that time?

**Solution**

(a) The maturity date is August 8, computed as follows.

|                       |           |           |
|-----------------------|-----------|-----------|
| Term of note:         |           | 90 days   |
| May (31–10)           | 21        |           |
| June                  | 30        |           |
| July                  | <u>31</u> | <u>82</u> |
| Maturity date: August |           | <u>8</u>  |

(b) The interest payable at the maturity date is \$51, computed as follows.

$$\begin{array}{r} \text{Face} \times \text{Rate} \times \text{Time} = \text{Interest} \\ \$3,400 \times 6\% \times 90/360 = \$51 \end{array}$$

The entry recorded by Gambit Stores at the maturity date is:

|  |       |       |
|--|-------|-------|
| Cash                                   | 3,451 |       |
| Notes Receivable                       |       | 3,400 |
| Interest Revenue                       |       | 51    |
| (To record collection of Leonard note) |       |       |

**Notes Receivable****action plan**

- ✓ Count the exact number of days to determine the maturity date. Omit the date the note is issued, but include the due date.
- ✓ Determine whether interest was accrued.
- ✓ Compute the accrued interest.
- ✓ Prepare the entry for payment of the note and interest.
- ✓ The entry to record interest at maturity in this solution assumes no interest has been previously accrued on this note.

**Statement Presentation and Analysis****Presentation**

Companies should identify in the balance sheet or in the notes to the financial statements each of the major types of receivables. Short-term receivables appear in the current assets section of the balance sheet. Short-term investments appear before short-term receivables because these investments are more liquid (nearer to cash). Companies report both the gross amount of receivables and the allowance for doubtful accounts.

In a multiple-step income statement, companies report bad debts expense and service charge expense as selling expenses in the operating expenses section. Interest revenue appears under "Other revenues and gains" in the nonoperating activities section of the income statement.

**Analysis**

Investors and corporate managers compute financial ratios to evaluate the liquidity of a company's accounts receivable. They use the **accounts receivable turnover ratio** to assess the liquidity of the receivables. This ratio measures the number of times, on average, the company collects accounts receivable during the period. It is computed by dividing net credit sales (net sales less cash sales) by the average

**Study Objective [9]**

Explain the statement presentation and analysis of receivables.

net accounts receivable during the year. Unless seasonal factors are significant, average net accounts receivable outstanding can be computed from the beginning and ending balances of net accounts receivable.

For example, in 2009 **Cisco Systems** had net sales of \$29,131 million for the year. It had a beginning accounts receivable (net) balance of \$3,821 million and an ending accounts receivable (net) balance of \$3,177 million. Assuming that Cisco's sales were all on credit, its accounts receivable turnover ratio is computed as follows.

**Illustration 9-17**

Accounts receivable turnover ratio and computation

|                         |   |  |   |                                     |
|-------------------------|---|--|---|-------------------------------------|
| <b>Net Credit Sales</b> | ÷ | <b>Average Net Accounts Receivable</b> | = | <b>Accounts Receivable Turnover</b> |
| \$29,131                | ÷ | $\frac{\$3,821 + \$3,177}{2}$          | = | <b>8.3 times</b>                    |

The result indicates an accounts receivable turnover ratio of 8.3 times per year. The higher the turnover ratio the more liquid the company's receivables.

A variant of the accounts receivable turnover ratio that makes the liquidity even more evident is its conversion into an **average collection period** in terms of days. This is done by dividing the turnover ratio into 365 days. For example, Cisco's turnover of 8.3 times is divided into 365 days, as shown in Illustration 9-18, to obtain approximately 44 days. This means that it takes Cisco 44 days to collect its accounts receivable.

**Illustration 9-18**

Average collection period for receivables formula and computation

|                     |   |                                     |   |  |
|---------------------|---|-------------------------------------|---|--|
| <b>Days in Year</b> | ÷ | <b>Accounts Receivable Turnover</b> | = | <b>Average Collection Period in Days</b> |
| 365 days            | ÷ | 8.3 times                           | = | <b>44 days</b>                           |

Companies frequently use the average collection period to assess the effectiveness of a company's credit and collection policies. The general rule is that the collection period should not greatly exceed the credit term period (that is, the time allowed for payment).

**Do it!****Analysis of Receivables****action plan**

- ✓ Review the formula to compute the accounts receivable turnover.
- ✓ Make sure that both the beginning and ending accounts receivable balances are considered in the computation.
- ✓ Review the formula to compute the average collection period in days.

In 2012, Phil Mickelson Company has net credit sales of \$923,795 for the year. It had a beginning accounts receivable (net) balance of \$38,275 and an ending accounts receivable (net) balance of \$35,988. Compute Phil Mickelson Company's (a) accounts receivable turnover and (b) average collection period in days.

**Solution**

|            |                  |   |                                 |   |                                   |
|------------|------------------|---|---------------------------------|---|-----------------------------------|
| <b>(a)</b> | Net credit sales | ÷ | Average net accounts receivable | = | Accounts receivable turnover      |
|            | \$923,795        | ÷ | $\frac{38,275 + 35,988}{2}$     | = | 24.9 times                        |
| <b>(b)</b> | Days in year     | ÷ | Accounts receivable turnover    | = | Average collection period in days |
|            | 365              | ÷ | 24.9 times                      | = | 14.7 days                         |

## COMPREHENSIVE

## Do it!

The following selected transactions relate to Dylan Company.

- Mar. 1 Sold \$20,000 of merchandise to Potter Company, terms 2/10, n/30.  
 11 Received payment in full from Potter Company for balance due.  
 12 Accepted Juno Company's \$20,000, 6-month, 12% note for balance due.  
 13 Made Dylan Company credit card sales for \$13,200.  
 15 Made Visa credit card sales totaling \$6,700. A 3% service fee is charged by Visa.
- Apr. 11 Sold accounts receivable of \$8,000 to Harcot Factor. Harcot Factor assesses a service charge of 2% of the amount of receivables sold.  
 13 Received collections of \$8,200 on Dylan Company credit card sales and added finance charges of 1.5% to the remaining balances.
- May 10 Wrote off as uncollectible \$16,000 of accounts receivable. Dylan uses the percentage-of-sales basis to estimate bad debts.
- June 30 Credit sales recorded during the first 6 months total \$2,000,000. The bad debt percentage is 1% of credit sales. At June 30, the balance in the allowance account is \$3,500.
- July 16 One of the accounts receivable written off in May was from J. Simon, who pays the amount due, \$4,000, in full.

## Instructions

Prepare the journal entries for the transactions.

|         | Accounts Receivable [(\$13,200 – \$8,200) × 1.5%] | 75     |        |
|         | Interest Revenue                                  |        | 75     |
|         | (To record interest on amount due)                |        |        |
| May 10  | Allowance for Doubtful Accounts                   | 16,000 |        |
|         | Accounts Receivable                               |        | 16,000 |
|         | (To record write-off of accounts receivable)      |        |        |

## action plan

- ✓ Generally, record accounts receivable at invoice price.
- ✓ Recognize that sales returns and allowances and cash discounts reduce the amount received on accounts receivable.
- ✓ Record service charge expense on the seller's books when accounts receivable are sold.
- ✓ Prepare an adjusting entry for bad debts expense.
- ✓ Ignore any balance in the allowance account under the percentage-of-sales basis. Recognize the balance in the allowance account under the percentage-of-receivables basis.
- ✓ Record write-offs of accounts receivable only in balance sheet accounts.

|         |  |        |        |
|---------|--|--------|--------|
| June 30 | Bad Debts Expense ( $\$2,000,000 \times 1\%$ ) | 20,000 |        |
|         | Allowance for Doubtful Accounts                |        | 20,000 |
|         | (To record estimate of uncollectible accounts) |        |        |
| July 16 | Accounts Receivable—J. Simon                   | 4,000  |        |
|         | Allowance for Doubtful Accounts                |        | 4,000  |
|         | (To reverse write-off of accounts receivable)  |        |        |
|         | Cash   | 4,000  |        |
|         | Accounts Receivable—J. Simon                   |        | 4,000  |
|         | (To record collection of accounts receivable)  |        |        |

## Summary of Study Objectives

### [1] Identify the different types of receivables.

Receivables are frequently classified as (1) accounts, (2) notes, and (3) other. Accounts receivable are amounts customers owe on account. Notes receivable are claims for which lenders issue formal instruments of credit as proof of the debt. Other receivables include nontrade receivables such as interest receivable, loans to company officers, advances to employees, and income taxes refundable.

### [2] Explain how companies recognize accounts receivable.

Companies record accounts receivable at invoice price. They are reduced by sales returns and allowances. Cash discounts reduce the amount received on accounts receivable. When interest is charged on a past due receivable, the company adds this interest to the accounts receivable balance and recognizes it as interest revenue.

### [3] Distinguish between the methods and bases companies use to value accounts receivable.

There are two methods of accounting for uncollectible accounts: the allowance method and the direct write-off method. Companies may use either the percentage-of-sales or the percentage-of-receivables basis to estimate uncollectible accounts using the allowance method. The percentage-of-sales basis emphasizes the expense recognition (matching) principle. The percentage-of-receivables basis emphasizes the cash realizable value of the accounts receivable. An aging schedule is often used with this basis.

### [4] Describe the entries to record the disposition of accounts receivable.

When a company collects an account receivable, it credits Accounts Receivable. When a company sells (factors) an account receivable, a service charge expense reduces the amount received.

### [5] Compute the maturity date of and interest on notes receivable.

For a note stated in months, the maturity date is found by counting the months from the date of issue. For a note stated in days, the number of days is counted, omitting the issue date and counting the due date. The formula for computing interest is:  $\text{Face value} \times \text{Interest rate} \times \text{Time}$ .

### [6] Explain how companies recognize notes receivable.

Companies record notes receivable at face value. In some cases, it is necessary to accrue interest prior to maturity. In this case, companies debit Interest Receivable and credit Interest Revenue.

### [7] Describe how companies value notes receivable.

As with accounts receivable, companies report notes receivable at their cash (net) realizable value. The notes receivable allowance account is Allowance for Doubtful Accounts. The computation and estimations involved in valuing notes receivable at cash realizable value, and in recording the proper amount of bad debts expense and related allowance are similar to those for accounts receivable.

### [8] Describe the entries to record the disposition of notes receivable.

Notes can be held to maturity. At that time the face value plus accrued interest is due, and the note is removed from the accounts. In many cases, the holder of the note speeds up the conversion by selling the receivable to another party (a factor). In some situations, the maker of the note dishonors the note (defaults), in which case the company transfers the note and accrued interest to an account receivable or writes off the note.

### [9] Explain the statement presentation and analysis of receivables.

Companies should identify in the balance sheet or in the notes to the financial statements each major type of receivable. Short-term receivables are considered current assets. Companies report the gross amount of receivables and the allowance for doubtful accounts. They report bad debts and service charge expenses in the multiple-step income statement as operating (selling) expenses; interest revenue appears under other revenues and gains in the nonoperating activities section of the statement. Managers and investors evaluate accounts receivable for liquidity by computing a turnover ratio and an average collection period.

## Glossary

- Accounts receivable** Amounts owed by customers on account. (p. 416).
- Accounts receivable turnover ratio** A measure of the liquidity of accounts receivable; computed by dividing net credit sales by average net accounts receivable. (p. 433).
- Aging the accounts receivable** The analysis of customer balances by the length of time they have been unpaid. (p. 423).
- Allowance method** A method of accounting for bad debts that involves estimating uncollectible accounts at the end of each period. (p. 420).
- Average collection period** The average amount of time that a receivable is outstanding; calculated by dividing 365 days by the accounts receivables turnover ratio. (p. 434).
- Bad Debts Expense** An expense account to record uncollectible receivables. (p. 419).
- Cash (net) realizable value** The net amount a company expects to receive in cash. (p. 420).
- Direct write-off method** A method of accounting for bad debts that involves expensing accounts at the time they are determined to be uncollectible. (p. 419).
- Dishonored note** A note that is not paid in full at maturity. (p. 432).
- Factor** A finance company or bank that buys receivables from businesses and then collects the payments directly from the customers. (p. 425).
- Maker** The party in a promissory note who is making the promise to pay. (p. 428).
- Notes receivable** Claims for which formal instruments of credit are issued as proof of the debt. (p. 417).
- Other receivables** Various forms of nontrade receivables, such as interest receivable and income taxes refundable. (p. 417).
- Payee** The party to whom payment of a promissory note is to be made. (p. 428).
- Percentage-of-receivables basis** Management estimates what percentage of receivables will result in losses from uncollectible accounts. (p. 423).
- Percentage-of-sales basis** Management estimates what percentage of credit sales will be uncollectible. (p. 423).
- Promissory note** A written promise to pay a specified amount of money on demand or at a definite time. (p. 427).
- Receivables** Amounts due from individuals and other companies. (p. 416).
- Trade receivables** Notes and accounts receivable that result from sales transactions. (p. 417).

Self-Test, Brief Exercises, Exercises, Problem Set A, and many more components are available for practice in *WileyPLUS*

## Self-Test Questions

Answers are on page 453.

- (SO 1) 1. Receivables are frequently classified as:
- accounts receivable, company receivables, and other receivables.
  - accounts receivable, notes receivable, and employee receivables.
  - accounts receivable and general receivables.
  - accounts receivable, notes receivable, and other receivables.
- (SO 2) 2. Buehler Company on June 15 sells merchandise on account to Chaz Co. for \$1,000, terms 2/10, n/30. On June 20, Chaz Co. returns merchandise worth \$300 to Buehler Company. On June 24, payment is received from Chaz Co. for the balance due. What is the amount of cash received?
- \$700.
  - \$680.
  - \$686.
  - None of the above.
- (SO 3) 3. Which of the following approaches for bad debts is best described as a balance sheet method?
- Percentage-of-receivables basis.
  - Direct write-off method.
  - Percentage-of-sales basis.
  - Both a and b.
- (SO 3) 4. Hughes Company has a credit balance of \$5,000 in its Allowance for Doubtful Accounts before any adjustments are made at the end of the year. Based on review and aging of its accounts receivable at the end of the year, Hughes estimates that \$60,000 of its receivables are uncollectible. The amount of bad debts expense which should be reported for the year is:
- \$5,000.
  - \$55,000.
  - \$60,000.
  - \$65,000.
5. Use the same information as in question 4, except that Hughes has a debit balance of \$5,000 in its Allowance for Doubtful Accounts before any adjustments are made at the end of the year. In this situation, the amount of bad debts expense that should be reported for the year is:
- \$5,000.
  - \$55,000.
  - \$60,000.
  - \$65,000.
6. Net sales for the month are \$800,000, and bad debts are expected to be 1.5% of net sales. The company uses the percentage-of-sales basis. If Allowance for Doubtful Accounts has a credit balance of \$15,000 before adjustment, what is the balance after adjustment?
- \$15,000.
  - \$27,000.
  - \$23,000.
  - \$31,000.
7. In 2012, Roso Carlson Company had net credit sales of \$750,000. On January 1, 2012, Allowance for Doubtful Accounts had a credit balance of \$18,000. During 2012, \$30,000 of uncollectible accounts receivable were written off. Past experience indicates that 3% of net credit sales become

9. DeVito Company accepts both its own credit cards and national credit cards. What are the advantages of accepting both types of cards?
10. An article recently appeared in the *Wall Street Journal* indicating that companies are selling their receivables at a record rate. Why are companies selling their receivables?
11. Pinkston Textiles decides to sell \$600,000 of its accounts receivable to First Factors Inc. First Factors assesses a service charge of 3% of the amount of receivables sold. Prepare the journal entry that Pinkston Textiles makes to record this sale.
12. Your roommate is uncertain about the advantages of a promissory note. Compare the advantages of a note receivable with those of an account receivable.
13. How may the maturity date of a promissory note be stated?
14. Indicate the maturity date of each of the following promissory notes:
 

| Date of Note | Terms                       |
|--------------|-----------------------------|
| (a) March 13 | one year after date of note |
| (b) May 4    | 3 months after date         |
| (c) June 20  | 30 days after date          |
| (d) July 1   | 60 days after date          |
15. Compute the missing amounts for each of the following notes.
 

|     | Principal | Annual Interest Rate | Time     | Total Interest |
|-----|-----------|----------------------|----------|----------------|
| (a) | ?         | 9%                   | 120 days | \$ 600         |
| (b) | \$30,000  | 10%                  | 3 years  | ?              |
| (c) | \$60,000  | ?                    | 5 months | \$2,000        |
| (d) | \$45,000  | 8%                   | ?        | \$1,200        |
16. In determining interest revenue, some financial institutions use 365 days per year and others use 360 days. Why might a financial institution use 360 days?
17. Cain Company dishonors a note at maturity. What are the options available to the lender?
18. **General Motors Corporation** has accounts receivable and notes receivable. How should the receivables be reported on the balance sheet?
19. The accounts receivable turnover ratio is 8.14, and average net receivables during the period are \$400,000. What is the amount of net credit sales for the period?
20. **PEPSICO** What percentage does **PepsiCo's** allowance for doubtful accounts represent as a percent of its gross receivables?

## Brief Exercises

**BE9-1** Presented below are three receivables transactions. Indicate whether these receivables are reported as accounts receivable, notes receivable, or other receivables on a balance sheet.

- (a) Sold merchandise on account for \$64,000 to a customer.
- (b) Received a promissory note of \$57,000 for services performed.
- (c) Advanced \$10,000 to an employee.

*Identify different types of receivables.*

(SO 1)

**BE9-2** Record the following transactions on the books of Nao Co.

- (a) On July 1, Nao Co. sold merchandise on account to Bustamante Inc. for \$15,200, terms 2/10, n/30.
- (b) On July 8, Bustamante Inc. returned merchandise worth \$3,800 to Nao Co.
- (c) On July 11, Bustamante Inc. paid for the merchandise.

*Record basic accounts receivable transactions.*

(SO 2)

**BE9-3** During its first year of operations, Parot Company had credit sales of \$3,000,000; \$600,000 remained uncollected at year-end. The credit manager estimates that \$35,000 of these receivables will become uncollectible.

- (a) Prepare the journal entry to record the estimated uncollectibles.
- (b) Prepare the current assets section of the balance sheet for Parot Company. Assume that in addition to the receivables it has cash of \$90,000, inventory of \$130,000, and prepaid insurance of \$7,500.

*Prepare entry for allowance method and partial balance sheet.*

(SO 3, 9)

**BE9-4** At the end of 2012, Henderson Co. has accounts receivable of \$700,000 and an allowance for doubtful accounts of \$54,000. On January 24, 2013, the company learns that its receivable from Jaime Lynn is not collectible, and management authorizes a write-off of \$5,400.

- (a) Prepare the journal entry to record the write-off.
- (b) What is the cash realizable value of the accounts receivable (1) before the write-off and (2) after the write-off?

*Prepare entry for write-off; determine cash realizable value.*

(SO 3)

**BE9-5** Assume the same information as BE9-4. On March 4, 2013, Henderson Co. receives payment of \$5,400 in full from Jaime Lynn. Prepare the journal entries to record this transaction.

*Prepare entries for collection of bad debts write-off.*

(SO 3)

**BE9-6** Erik Co. elects to use the percentage-of-sales basis in 2012 to record bad debts expense. It estimates that 2% of net credit sales will become uncollectible. Sales revenues are \$800,000 for 2012, sales returns and allowances are \$45,000, and the allowance for doubtful accounts has a credit balance of \$9,000. Prepare the adjusting entry to record bad debts expense in 2012.

*Prepare entry using percentage-of-sales method.*

(SO 3)

## 440 9 Accounting for Receivables

Prepare entry using percentage-of-receivables method.

(SO 3)

**BE9-7** Johnson Co. uses the percentage-of-receivables basis to record bad debts expense. It estimates that 1% of accounts receivable will become uncollectible. Accounts receivable are \$450,000 at the end of the year, and the allowance for doubtful accounts has a credit balance of \$1,500.

- (a) Prepare the adjusting journal entry to record bad debts expense for the year.
- (b) If the allowance for doubtful accounts had a debit balance of \$800 instead of a credit balance of \$1,500, determine the amount to be reported for bad debts expense.

Prepare entries to dispose of accounts receivable.

(SO 4)

**BE9-8** Presented below are two independent transactions.

- (a) Ryan's Restaurant accepted a Visa card in payment of a \$150 lunch bill. The bank charges a 4% fee. What entry should Ryan's make?
- (b) Shultz Company sold its accounts receivable of \$60,000. What entry should Shultz make, given a service charge of 3% on the amount of receivables sold?

Compute interest and determine maturity dates on notes.

(SO 5)

**BE9-9** Compute interest and find the maturity date for the following notes.

|     | <u>Date of Note</u> | <u>Principal</u> | <u>Interest Rate (%)</u> | <u>Terms</u> |
|-----|---------------------|------------------|--------------------------|--------------|
| (a) | June 10             | \$80,000         | 6%                       | 60 days      |
| (b) | July 14             | \$50,000         | 7%                       | 90 days      |
| (c) | April 27            | \$12,000         | 8%                       | 75 days      |

Determine maturity dates and compute interest and rates on notes.

(SO 5)

**BE9-10** Presented below are data on three promissory notes. Determine the missing amounts.

|     | <u>Date of Note</u> | <u>Terms</u> | <u>Maturity Date</u> | <u>Principal</u> | <u>Annual Interest Rate</u> | <u>Total Interest</u> |
|-----|---------------------|--------------|----------------------|------------------|-----------------------------|-----------------------|
| (a) | April 1             | 60 days      | ?                    | \$600,000        | 9%                          | ?                     |
| (b) | July 2              | 30 days      | ?                    | 90,000           | ?                           | \$600                 |
| (c) | March 7             | 6 months     | ?                    | 120,000          | 10%                         | ?                     |

Prepare entry for notes receivable exchanged for account receivable.

(SO 6)

**BE9-11** On January 10, 2012, Honig Co. sold merchandise on account to Peregrine Co. for \$13,600, n/30. On February 9, Peregrine Co. gave Honig Co. a 10% promissory note in settlement of this account. Prepare the journal entry to record the sale and the settlement of the account receivable.

Compute ratios to analyze receivables.

(SO 9)

**BE9-12** The financial statements of **Minnesota Mining and Manufacturing Company (3M)** report net sales of \$20.0 billion. Accounts receivable (net) are \$2.7 billion at the beginning of the year and \$2.8 billion at the end of the year. Compute 3M's receivables turnover ratio. Compute 3M's average collection period for accounts receivable in days.

## Do it! Review

Prepare entry for uncollectible accounts.

(SO 3)

**Do it! 9-1** Valasquez Company has been in business several years. At the end of the current year, the ledger shows:

|                                 |                |
|---------------------------------|----------------|
| Accounts Receivable             | \$ 310,000 Dr. |
| Sales Revenue                   | 2,200,000 Cr.  |
| Allowance for Doubtful Accounts | 6,100 Cr.      |

Bad debts are estimated to be 7% of receivables. Prepare the entry to adjust Allowance for Doubtful Accounts.

Prepare entry for factored accounts.

(SO 4)

**Do it! 9-2** Mark Distributors is a growing company whose ability to raise capital has not been growing as quickly as its expanding assets and sales. Mark's local banker has indicated that the company cannot increase its borrowing for the foreseeable future. Mark's suppliers are demanding payment for goods acquired within 30 days of the invoice date, but Mark's customers are slow in paying for their purchases (60–90 days). As a result, Mark has a cash flow problem.

Mark needs \$160,000 to cover next Friday's payroll. Its balance of outstanding accounts receivable totals \$1,000,000. What might Mark do to alleviate this cash crunch? Record the entry that Mark would make when it raises the needed cash. (Assume a 2% service charge.)

Prepare entries for notes receivable.

(SO 5, 8)

**Do it! 9-3** Nadeau Wholesalers accepts from Nicole Stores a \$6,200, 4-month, 12% note dated May 31 in settlement of Nicole's overdue account. (a) What is the maturity date of the note?

(b) What is the entry made by Nadeau at the maturity date, assuming Nicole pays the note and interest in full at that time?

**Do it! 9-4** In 2012, Abdi Farah Company has net credit sales of \$1,600,000 for the year. It had a beginning accounts receivable (net) balance of \$101,000 and an ending accounts receivable (net) balance of \$107,000. Compute Abdi Farah Company's (a) accounts receivable turnover and (b) average collection period in days.

*Compute ratios for receivables.*  
(SO 9)

## Exercises

**E9-1** Presented below are selected transactions of Santos Company. Santos sells in large quantities to other companies and also sells its product in a small retail outlet.

*Journalize entries related to accounts receivable.*

- March 1 Sold merchandise on account to Jaclyn Company for \$3,000, terms 2/10, n/30.  
3 Jaclyn Company returned merchandise worth \$500 to Santos.  
9 Santos collected the amount due from Jaclyn Company from the March 1 sale.  
15 Santos sold merchandise for \$400 in its retail outlet. The customer used his Santos credit card.  
31 Santos added 1.5% monthly interest to the customer's credit card balance.

(SO 2)

### Instructions

Prepare journal entries for the transactions above.

**E9-2** Presented below are two independent situations.

*Journalize entries for recognizing accounts receivable.*

- (a) On January 6, Mendenhall Co. sells merchandise on account to Miles Inc. for \$9,000, terms 2/10, n/30. On January 16, Miles Inc. pays the amount due. Prepare the entries on Mendenhall's books to record the sale and related collection.  
(b) On January 10, Markus Klinko uses his Indrani Co. credit card to purchase merchandise from Indrani Co. for \$9,000. On February 10, Klinko is billed for the amount due of \$9,000. On February 12, Klinko pays \$5,000 on the balance due. On March 10, Klinko is billed for the amount due, including interest at 2% per month on the unpaid balance as of February 12. Prepare the entries on Indrani Co.'s books related to the transactions that occurred on January 10, February 12, and March 10.

(SO 2)

**E9-3** The ledger of G.K. Reid Company at the end of the current year shows Accounts Receivable \$120,000, Sales Revenue \$840,000, and Sales Returns and Allowances \$30,000.

*Journalize entries to record allowance for doubtful accounts using two different bases.*

### Instructions

- (a) If G.K. Reid uses the direct write-off method to account for uncollectible accounts, journalize the adjusting entry at December 31, assuming G.K. Reid determines that L. Gaga's \$1,400 balance is uncollectible.  
(b) If Allowance for Doubtful Accounts has a credit balance of \$2,100 in the trial balance, journalize the adjusting entry at December 31, assuming bad debts are expected to be (1) 1% of net sales, and (2) 10% of accounts receivable.  
(c) If Allowance for Doubtful Accounts has a debit balance of \$200 in the trial balance, journalize the adjusting entry at December 31, assuming bad debts are expected to be (1) 0.75% of net sales and (2) 6% of accounts receivable.

(SO 3)

**E9-4** Lohan Company has accounts receivable of \$93,100 at March 31. An analysis of the accounts shows the following information.

*Determine bad debts expense; prepare the adjusting entry for bad debts expense.*

| <u>Month of Sale</u> | <u>Balance, March 31</u> |
|----------------------|--------------------------|
| March                | \$60,000                 |
| February             | 17,600                   |
| January              | 8,500                    |
| Prior to January     | 7,000                    |
|                      | <u>\$93,100</u>          |

(SO 3)

Credit terms are 2/10, n/30. At March 31, Allowance for Doubtful Accounts has a credit balance of \$1,200 prior to adjustment. The company uses the percentage-of-receivables basis for estimating uncollectible accounts. The company's estimate of bad debts is shown on the next page.

| <u>Age of Accounts</u> | <u>Estimated Percentage<br/>Uncollectible</u> |
|------------------------|---|
| 1–30 days              | 2.0%  |
| 31–60 days             | 5.0%  |
| 61–90 days             | 30.0%   |
| Over 90 days           | 50.0%   |

**Instructions**

- (a) Determine the total estimated uncollectibles.  
 (b) Prepare the adjusting entry at March 31 to record bad debts expense.

*Journalize write-off and recovery.*

(SO 3)

**E9-5** At December 31, 2011, Kardashian Company had a balance of \$15,000 in Allowance for Doubtful Accounts. During 2012, Kardashian wrote off accounts totaling \$13,000. One of those accounts (\$1,800) was later collected. At December 31, 2012, an aging schedule indicated that the balance in Allowance for Doubtful Accounts should be \$19,000.

**Instructions**

Prepare journal entries to record the 2012 transactions of Kardashian Company.

*Journalize percentage of sales basis, write-off, recovery.*

(SO 3)

**E9-6** On December 31, 2012, Dita Co. estimated that 2% of its net sales of \$400,000 will become uncollectible. The company recorded this amount as an addition to Allowance for Doubtful Accounts. On May 11, 2013, Dita Co. determined that the Alex Lundquist account was uncollectible and wrote off \$1,100. On June 12, 2013, Lundquist paid the amount previously written off.

**Instructions**

Prepare the journal entries on December 31, 2012, May 11, 2013, and June 12, 2013.

*Journalize entries for the sale of accounts receivable.*

(SO 4)

**E9-7** Presented below are two independent situations.

- (a) On March 3, Van Teese Appliances sells \$680,000 of its receivables to Naomi Factors Inc. Naomi Factors assesses a finance charge of 3% of the amount of receivables sold. Prepare the entry on Van Teese Appliances' books to record the sale of the receivables.  
 (b) On May 10, Campbell Company sold merchandise for \$3,500 and accepted the customer's America Bank MasterCard. America Bank charges a 4% service charge for credit card sales. Prepare the entry on Campbell Company's books to record the sale of merchandise.

*Journalize entries for credit card sales.*

(SO 4)

**E9-8** Presented below are two independent situations.

- (a) On April 2, Brooklyn Decker uses her J. C. Penney Company credit card to purchase merchandise from a J. C. Penney store for \$1,500. On May 1, Decker is billed for the \$1,500 amount due. Decker pays \$700 on the balance due on May 3. On June 1, Decker receives a bill for the amount due, including interest at 1.0% per month on the unpaid balance as of May 3. Prepare the entries on J. C. Penney Co.'s books related to the transactions that occurred on April 2, May 3, and June 1.  
 (b) On July 4, Vanderloo's Restaurant accepts a Visa card for a \$200 dinner bill. Visa charges a 3% service fee. Prepare the entry on Vanderloo's books related to this transaction.

*Journalize credit card sales, and indicate the statement presentation of financing charges and service charge expense.*

(SO 4)

**E9-9** Bowie Stores accepts both its own and national credit cards. During the year, the following selected summary transactions occurred.

- Jan. 15 Made Bowie credit card sales totaling \$18,000. (There were no balances prior to January 15.)  
 20 Made Visa credit card sales (service charge fee 2%) totaling \$4,300.  
 Feb. 10 Collected \$10,000 on Bowie credit card sales.  
 15 Added finance charges of 1% to Bowie credit card balance.

**Instructions**

- (a) Journalize the transactions for Bowie Stores.  
 (b) Indicate the statement presentation of the financing charges and the credit card service charge expense for Bowie Stores.

*Journalize entries for notes receivable transactions.*

(SO 5, 6)

**E9-10** Stroup Supply Co. has the following transactions related to notes receivable during the last 2 months of 2012.

- Nov. 1 Loaned \$15,000 cash to Jorge Perez on a 1-year, 10% note.  
 Dec. 11 Sold goods to Armlle Hammer, Inc., receiving a \$6,750, 90-day, 8% note.  
 16 Received a \$4,000, 6-month, 9% note in exchange for Max Weinberg's outstanding accounts receivable.  
 31 Accrued interest revenue on all notes receivable.

**Instructions**

- (a) Journalize the transactions for Stroup Supply Co.  
 (b) Record the collection of the Perez note at its maturity in 2013.

**E9-11** Record the following transactions for Conando Co. in the general journal.

*Journalize entries for notes receivable.*

**2012**

- May 1 Received a \$7,500, 1-year, 10% note in exchange for Andy Richter's outstanding accounts receivable.  
 Dec.31 Accrued interest on the Richter note.  
 Dec.31 Closed the interest revenue account.

(SO 5, 6)

**2013**

- May 1 Received principal plus interest on the Richter note. (No interest has been accrued in 2013.)

**E9-12** La Bamba Company had the following select transactions.

*Prepare entries for note receivable transactions.*

- Apr. 1, 2012 Accepted Shatner Company's 1-year, 12% note in settlement of a \$20,000 account receivable.  
 July 1, 2012 Loaned \$25,000 cash to Richie Rosenberg on a 9-month, 10% note.  
 Dec. 31, 2012 Accrued interest on all notes receivable.  
 Apr. 1, 2013 Received principal plus interest on the Shatner note.  
 Apr. 1, 2013 Richie Rosenberg dishonored its note; La Bamba expects it will eventually collect.

(SO 5, 6, 8)

**Instructions**

Prepare journal entries to record the transactions. La Bamba prepares adjusting entries once a year on December 31.

**E9-13** On May 2, George Company lends \$7,600 to Takei, Inc., issuing a 6-month, 9% note. At the maturity date, November 2, Takei indicates that it cannot pay.

*Journalize entries for dishonor of notes receivable.*

(SO 5, 8)

**Instructions**

- (a) Prepare the entry to record the issuance of the note.  
 (b) Prepare the entry to record the dishonor of the note, assuming that George Company expects collection will occur.  
 (c) Prepare the entry to record the dishonor of the note, assuming that George Company does not expect collection in the future.

**E9-14** Nachito Company had accounts receivable of \$100,000 on January 1, 2012. The only transactions that affected accounts receivable during 2012 were net credit sales of \$1,000,000, cash collections of \$900,000, and accounts written off of \$30,000.

*Compute receivables turnover and average collection period.*

(SO 9)

**Instructions**

- (a) Compute the ending balance of accounts receivable.  
 (b) Compute the accounts receivable turnover ratio for 2012.  
 (c) Compute the average collection period in days.

## Exercises: Set B

Visit the book's companion website, at [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), and choose the Student Companion site to access Exercise Set B.

## Problems: Set A

**P9-1A** At December 31, 2011, Mernt Co. reported the following information on its balance sheet.

*Prepare journal entries related to bad debts expense.*

(SO 2, 3, 9)

|                                       |           |
|---------------------------------------|-----------|
| Accounts receivable                   | \$960,000 |
| Less: Allowance for doubtful accounts | 80,000    |

During 2012, the company had the following transactions related to receivables.

1. Sales on account \$3,200,000
2. Sales returns and allowances 50,000
3. Collections of accounts receivable 2,810,000
4. Write-offs of accounts receivable deemed uncollectible 90,000
5. Recovery of bad debts previously written off as uncollectible 24,000

**Instructions**

- (a) Prepare the journal entries to record each of these five transactions. Assume that no cash discounts were taken on the collections of accounts receivable.
- (b) Enter the January 1, 2012, balances in Accounts Receivable and Allowance for Doubtful Accounts, post the entries to the two accounts (use T accounts), and determine the balances.
- (c) Prepare the journal entry to record bad debts expense for 2012, assuming that an aging of accounts receivable indicates that expected bad debts are \$115,000.
- (d) Compute the accounts receivable turnover ratio for 2012.

- (b) Accounts receivable \$1,210,000  
ADA \$14,000
- (c) Bad debts expense \$101,000

Compute bad debts amounts.  
(SO 3)

**P9-2A** Information related to Jordan Schlansky Company for 2012 is summarized below.

|                                    |             |
|------------------------------------|-------------|
| Total credit sales                 | \$2,200,000 |
| Accounts receivable at December 31 | 825,000     |
| Bad debts written off              | 33,000      |

**Instructions**

- (a) What amount of bad debts expense will Jordan Schlansky Company report if it uses the direct write-off method of accounting for bad debts?
- (b) Assume that Jordan Schlansky Company estimates its bad debts expense to be 2% of credit sales. What amount of bad debts expense will Jordan Schlansky record if it has an Allowance for Doubtful Accounts credit balance of \$4,000?
- (c) Assume that Jordan Schlansky Company estimates its bad debts expense based on 6% of accounts receivable. What amount of bad debts expense will Jordan Schlansky record if it has an Allowance for Doubtful Accounts credit balance of \$3,000?
- (d) Assume the same facts as in (c), except that there is a \$3,000 debit balance in Allowance for Doubtful Accounts. What amount of bad debts expense will Jordan Schlansky record?
- (e) What is the weakness of the direct write-off method of reporting bad debts expense?

Journalize entries to record transactions related to bad debts.

(SO 2, 3)

**P9-3A** Presented below is an aging schedule for McCann Company.

| Worksheet.xls                                       |                                    |                  |                  |                         |                 |                 |                 |
|---|------------------------------------|------------------|------------------|-------------------------|-----------------|-----------------|-----------------|
| File Edit View Insert Format Tools Data Window Help |                                    |                  |                  |                         |                 |                 |                 |
|   | A                                  | B                | C                | D                       | E               | F               | G               |

| 10  | Estimated Percentage Uncollectible |                  | 3%               | 6%                      | 13%             | 25%             | 60%             |
| 11  | Total Estimated Bad Debts          | <u>\$ 42,610</u> | <u>\$ 4,560</u>  | <u>\$ 1,920</u>         | <u>\$ 3,380</u> | <u>\$ 8,750</u> | <u>\$24,000</u> |
| 12  |                                    |                  |                  |                         |                 |                 |                 |

At December 31, 2012, the unadjusted balance in Allowance for Doubtful Accounts is a credit of \$12,000.

**Instructions**

- (a) Journalize and post the adjusting entry for bad debts at December 31, 2012.
- (b) Journalize and post to the allowance account the following events and transactions in the year 2013.

- (a) Bad debts expense \$30,610

- (1) On March 31, a \$1,000 customer balance originating in 2012 is judged uncollectible.
- (2) On May 31, a check for \$1,000 is received from the customer whose account was written off as uncollectible on March 31.
- (c) Journalize the adjusting entry for bad debts on December 31, 2013, assuming that the unadjusted balance in Allowance for Doubtful Accounts is a debit of \$800 and the aging schedule indicates that total estimated bad debts will be \$28,600.

(c) Bad debts expense  
\$29,400

**P9-4A** Pender Inc. uses the allowance method to estimate uncollectible accounts receivable. The company produced the following aging of the accounts receivable at year-end.

Journalize transactions related to bad debts.

(SO 2, 3)

|   | A                   | B       | C                          | D      | E      | F      | G        |
|---|---------------------|---------|----------------------------|--------|--------|--------|----------|
| 1 |                     |         | Number of Days Outstanding |        |        |        |          |
| 2 |                     |         |                            |        |        |        |          |
| 3 |                     | Total   | 0-30                       | 31-60  | 61-90  | 91-120 | Over 120 |
| 4 | Accounts receivable | 200,000 | 77,000                     | 46,000 | 39,000 | 23,000 | \$15,000 |
| 5 | % uncollectible     |         | 1%                         | 4%     | 5%     | 8%     | 10%      |
| 6 | Estimated bad debts |         |                            |        |        |        |          |
| 7 |                     |         |                            |        |        |        |          |

**Instructions**

- (a) Calculate the total estimated bad debts based on the above information.
- (b) Prepare the year-end adjusting journal entry to record the bad debts using the aged uncollectible accounts receivable determined in (a). Assume the current balance in Allowance for Doubtful Accounts is a \$8,000 debit.
- (c) Of the above accounts, \$5,000 is determined to be specifically uncollectible. Prepare the journal entry to write off the uncollectible account.
- (d) The company collects \$5,000 subsequently on a specific account that had previously been determined to be uncollectible in (c). Prepare the journal entry(ies) necessary to restore the account and record the cash collection.
- (e) Comment on how your answers to (a)–(d) would change if Pender Inc. used 3% of *total* accounts receivable, rather than aging the accounts receivable. What are the advantages to the company of aging the accounts receivable rather than applying a percentage to total accounts receivable?

(a) Tot. est.  
bad debts \$11,510

**P9-5A** At December 31, 2012, the trial balance of Stack Company contained the following amounts before adjustment.

Journalize entries to record transactions related to bad debts.

(SO 3)

|                                 | Debits    | Credits  |
|---------------------------------|-----------|----------|
| Accounts Receivable             | \$385,000 |          |
| Allowance for Doubtful Accounts |           | \$ 2,000 |
| Sales Revenue                   |           | 950,000  |

**Instructions**

- (a) Based on the information given, which method of accounting for bad debts is Stack Company using—the direct write-off method or the allowance method? How can you tell?
- (b) Prepare the adjusting entry at December 31, 2012, for bad debts expense under each of the following independent assumptions.
  - (1) An aging schedule indicates that \$11,750 of accounts receivable will be uncollectible.
  - (2) The company estimates that 1% of sales will be uncollectible.
- (c) Repeat part (b) assuming that instead of a credit balance there is an \$2,000 debit balance in Allowance for Doubtful Accounts.
- (d) During the next month, January 2013, a \$3,000 account receivable is written off as uncollectible. Prepare the journal entry to record the write-off.
- (e) Repeat part (d) assuming that Stack uses the direct write-off method instead of the allowance method in accounting for uncollectible accounts receivable.
- (f) What type of account is Allowance for Doubtful Accounts? How does it affect how accounts receivable is reported on the balance sheet at the end of the accounting period?

(b) (2) \$9,500

Prepare entries for various notes receivable transactions.

(SO 2, 4, 5, 8, 9)

**P9-6A** Manatee Company closes its books monthly. On September 30, selected ledger account balances are:

|                     |          |
|---------------------|----------|
| Notes Receivable    | \$33,000 |
| Interest Receivable | 170      |

Notes Receivable include the following.

| Date     | Maker          | Face     | Term     | Interest |
|----------|----------------|----------|----------|----------|
| Aug. 16  | M. Bear Inc.   | \$ 8,000 | 60 days  | 8%       |
| Aug. 25  | Pope Co.       | 9,000    | 60 days  | 10%      |
| Sept. 30 | Quackers Corp. | 16,000   | 6 months | 9%       |

Interest is computed using a 360-day year. During October, the following transactions were completed.

- Oct. 7 Made sales of \$6,900 on Manatee credit cards.
- 12 Made sales of \$900 on MasterCard credit cards. The credit card service charge is 3%.
- 15 Added \$460 to Manatee customer balance for finance charges on unpaid balances.
- 15 Received payment in full from M. Bear Inc. on the amount due.
- 24 Received notice that the Pope note has been dishonored. (Assume that Pope is expected to pay in the future.)

**Instructions**

- (a) Journalize the October transactions and the October 31 adjusting entry for accrued interest receivable.
- (b) Enter the balances at October 1 in the receivable accounts. Post the entries to all of the receivable accounts.
- (c) Show the balance sheet presentation of the receivable accounts at October 31.

(b) Accounts receivable \$16,510

(c) Total receivables \$32,630

Prepare entries for various receivable transactions.

(SO 2, 4, 5, 6, 7, 8)

**P9-7A** On January 1, 2012, Pierre Company had Accounts Receivable \$139,000, Notes Receivable \$25,000, and Allowance for Doubtful Accounts \$13,200. The note receivable is from Stacy Richter Company. It is a 4-month, 12% note dated December 31, 2011. Pierre Company prepares financial statements annually. During the year, the following selected transactions occurred.

- Jan. 5 Sold \$20,000 of merchandise to Bernard Company, terms n/15.
- 20 Accepted Bernard Company's \$20,000, 3-month, 9% note for balance due.
- Feb. 18 Sold \$8,000 of merchandise to LaBamba Company and accepted LaBamba's \$8,000, 6-month, 9% note for the amount due.
- Apr. 20 Collected Bernard Company note in full.
- 30 Received payment in full from Stacy Richter Company on the amount due.
- May 25 Accepted Cloppy Inc.'s \$4,000, 3-month, 7% note in settlement of a past-due balance on account.
- Aug. 18 Received payment in full from LaBamba Company on note due.
- 25 The Cloppy Inc. note was dishonored. Cloppy Inc. is not bankrupt; future payment is anticipated.
- Sept. 1 Sold \$12,000 of merchandise to Bessie Lou Company and accepted a \$12,000, 6-month, 10% note for the amount due.

**Instructions**

Journalize the transactions.

## Problems: Set B

Prepare journal entries related to bad debts expense.

(SO 2, 3, 9)

**P9-1B** At December 31, 2011, Artie Kendall Imports reported the following information on its balance sheet.

|                                       |           |
|---------------------------------------|-----------|
| Accounts receivable                   | \$250,000 |
| Less: Allowance for doubtful accounts | 15,000    |

During 2012, the company had the following transactions related to receivables.

- 1. Sales on account \$2,400,000
- 2. Sales returns and allowances 45,000

|  |           |
|--|-----------|
| 3. Collections of accounts receivable                            | 2,250,000 |
| 4. Write-offs of accounts receivable deemed uncollectible        | 12,000    |
| 5. Recovery of bad debts previously written off as uncollectible | 3,000     |

**Instructions**

- (a) Prepare the journal entries to record each of these five transactions. Assume that no cash discounts were taken on the collections of accounts receivable.
- (b) Enter the January 1, 2012, balances in Accounts Receivable and Allowance for Doubtful Accounts. Post the entries to the two accounts (use T accounts), and determine the balances.
- (c) Prepare the journal entry to record bad debts expense for 2012, assuming that an aging of accounts receivable indicates that estimated bad debts are \$22,000.
- (d) Compute the accounts receivable turnover ratio for the year 2012.

(b) Accounts receivable  
\$343,000  
ADA \$6,000  
(c) Bad debts expense  
\$16,000

**P9-2B** Information related to Gustavo Company for 2012 is summarized below.

|                                    |             |
|------------------------------------|-------------|
| Total credit sales                 | \$1,100,000 |
| Accounts receivable at December 31 | 369,000     |
| Bad debts written off              | 22,150      |

Compute bad debts amounts.  
(SO 3)

**Instructions**

- (a) What amount of bad debts expense will Gustavo Company report if it uses the direct write-off method of accounting for bad debts?
- (b) Assume that Gustavo Company decides to estimate its bad debts expense to be 2% of credit sales. What amount of bad debts expense will Gustavo record if Allowance for Doubtful Accounts has a credit balance of \$3,000?
- (c) Assume that Gustavo Company decides to estimate its bad debts expense based on 6% of accounts receivable. What amount of bad debts expense will Gustavo Company record if Allowance for Doubtful Accounts has a credit balance of \$4,000?
- (d) Assume the same facts as in (c), except that there is a \$2,000 debit balance in Allowance for Doubtful Accounts. What amount of bad debts expense will Gustavo record?
- (e) What is the weakness of the direct write-off method of reporting bad debts expense?

**P9-3B** Presented below is an aging schedule for Stol Company.

Journalize entries to record transactions related to bad debts.

| 12  |                                    |           |             |                         |          |           |          |

At December 31, 2012, the unadjusted balance in Allowance for Doubtful Accounts is a credit of \$16,000.

**Instructions**

- (a) Journalize and post the adjusting entry for bad debts at December 31, 2012.
- (b) Journalize and post to the allowance account the following events and transactions in the year 2013.
  - (1) March 1, a \$1,900 customer balance originating in 2012 is judged uncollectible.
  - (2) May 1, a check for \$1,900 is received from the customer whose account was written off as uncollectible on March 1.

(a) Bad debts expense  
\$38,570

448 9 Accounting for Receivables

(c) Bad debts expense  
\$44,300

Journalize transactions related to bad debts.

(SO 2, 3)

(c) Journalize the adjusting entry for bad debts on December 31, 2013. Assume that the unadjusted balance in Allowance for Doubtful Accounts is a debit of \$2,000, and the aging schedule indicates that total estimated bad debts will be \$42,300.

**P9-4B** The following represents selected information taken from a company's aging schedule to estimate uncollectible accounts receivable at year-end.

|   | A                   | B         | C                          | D        | E        | F        | G        |
|---|---------------------|-----------|----------------------------|----------|----------|----------|----------|
| 1 |                     |           | Number of Days Outstanding |          |          |          |          |
| 2 |                     |           |                            |          |          |          |          |
| 3 |                     | Total     | 0-30                       | 31-60    | 61-90    | 91-120   | Over 120 |
| 4 | Accounts receivable | \$375,000 | \$220,000                  | \$90,000 | \$40,000 | \$10,000 | \$15,000 |
| 5 | % uncollectible     |           | 1%                         | 4%       | 5%       | 8%       | 10%      |
| 6 | Estimated bad debts |           |                            |          |          |          |          |
| 7 |                     |           |                            |          |          |          |          |

(a) Tot. est.  
bad debts \$10,100

Journalize entries to record transactions related to bad debts.

(SO 3)

**Instructions**

- (a) Calculate the total estimated bad debts based on the above information.
- (b) Prepare the year-end adjusting journal entry to record the bad debts using the allowance method and the aged uncollectible accounts receivable determined in (a). Assume the current balance in Allowance for Doubtful Accounts is a \$3,000 credit.
- (c) Of the above accounts, \$1,600 is determined to be specifically uncollectible. Prepare the journal entry to write off the uncollectible accounts.
- (d) The company subsequently collects \$700 on a specific account that had previously been determined to be uncollectible in (c). Prepare the journal entry(ies) necessary to restore the account and record the cash collection.
- (e) Explain how establishing an allowance account satisfies the expense recognition principle.

**P9-5B** At December 31, 2012, the trial balance of Flexenfusser Company contained the following amounts before adjustment.

|                                 | Debits    | Credits  |
|---------------------------------|-----------|----------|
| Accounts Receivable             | \$250,000 |          |
| Allowance for Doubtful Accounts |           | \$ 1,100 |
| Sales Revenue                   |           | 600,000  |

**Instructions**

(a) (2) \$12,000

- (a) Prepare the adjusting entry at December 31, 2012, to record bad debts expense under each of the following independent assumptions.
  - (1) An aging schedule indicates that \$12,500 of accounts receivable will be uncollectible.
  - (2) The company estimates that 2% of sales will be uncollectible.
- (b) Repeat part (a) assuming that instead of a credit balance, there is a \$1,100 debit balance in Allowance for Doubtful Accounts.
- (c) During the next month, January 2013, a \$3,200 account receivable is written off as uncollectible. Prepare the journal entry to record the write-off.
- (d) Repeat part (c) assuming that Flexenfusser Company uses the direct write-off method instead of the allowance method in accounting for uncollectible accounts receivable.
- (e) What are the advantages of using the allowance method in accounting for uncollectible accounts as compared to the direct write-off method?

Prepare entries for various notes receivable transactions.

(SO 2, 4, 5, 8, 9)

**P9-6B** Mr. T Co. closes its books monthly. On June 30, selected ledger account balances are:

|                     |          |
|---------------------|----------|
| Notes Receivable    | \$57,000 |
| Interest Receivable | 420      |

Notes Receivable include the following.

| Date    | Maker        | Face     | Term     | Interest |
|---------|--------------|----------|----------|----------|
| May 16  | Abe Inc.     | \$12,000 | 60 days  | 10%      |
| May 26  | Vigoda Co.   | 30,000   | 60 days  | 9%       |
| June 30 | Lipton Corp. | 15,000   | 6 months | 12%      |

During July, the following transactions were completed.

- July 5 Made sales of \$7,200 on Mr. T Co. credit cards.  
 14 Made sales of \$1,000 on Visa credit cards. The credit card service charge is 3%.  
 14 Added \$510 to Mr. T Co. credit card customer balances for finance charges on unpaid balances.  
 15 Received payment in full from Abe Inc. on the amount due.  
 25 Received notice that the Vigoda Co. note has been dishonored. (Assume that Vigoda Co. is expected to pay in the future.)

### Instructions

- (a) Journalize the July transactions and the July 31 adjusting entry for accrued interest receivable. (Interest is computed using 360 days.)  
 (b) Enter the balances at July 1 in the receivable accounts. Post the entries to all of the receivable accounts.  
 (c) Show the balance sheet presentation of the receivable accounts at July 31.

(b) Accounts receivable  
\$38,160

(c) Total receivables \$53,310

**P9-7B** On January 1, 2012, DeCarlo Company had Accounts Receivable \$98,000 and Allowance for Doubtful Accounts \$8,100. DeCarlo Company prepares financial statements annually. During the year, the following selected transactions occurred.

Prepare entries for various receivable transactions.

(SO 2, 4, 5, 6, 7, 8)

- Jan. 5 Sold \$10,800 of merchandise to Kelly Company, terms n/30.  
 Feb. 2 Accepted a \$10,800, 4-month, 10% promissory note from Kelly Company for the balance due.  
 12 Sold \$13,500 of merchandise to Raymond Company and accepted Raymond's \$13,500, 2-month, 10% note for the balance due.  
 26 Sold \$7,000 of merchandise to Ringspin Co., terms n/10.  
 Apr. 5 Accepted a \$7,000, 3-month, 8% note from Ringspin Co. for the balance due.  
 12 Collected Raymond Company note in full.  
 June 2 Collected Kelly Company note in full.  
 July 5 Ringspin Co. dishonors its note of April 5. It is expected that Ringspin will eventually pay the amount owed.  
 15 Sold \$12,000 of merchandise to Butter Co. and accepted Butter's \$12,000, 3-month, 12% note for the amount due.  
 Oct. 15 Butter Co.'s note was dishonored. Butter Co. is bankrupt, and there is no hope of future settlement.

### Instructions

Journalize the transactions.

## Problems: Set C

Visit the book's companion website, at [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), and choose the Student Companion site to access Problem Set C.

## Comprehensive Problem

**CP9** Porter Company's balance sheet at December 31, 2011, is presented below.

### PORTER COMPANY Balance Sheet December 31, 2011

|                                 |                 |                  |                 |
|---------------------------------|-----------------|------------------|-----------------|
| Cash                            | \$13,100        | Accounts payable | \$ 8,750        |
| Accounts receivable             | 19,780          | Owner's capital  | <u>32,730</u>   |
| Allowance for doubtful accounts | (800)           |                  | <u>\$41,480</u> |
| Inventory                       | <u>9,400</u>    |                  |                 |
|                                 | <u>\$41,480</u> |                  |                 |

During January 2012, the following transactions occurred. Porter uses the perpetual inventory method.

- Jan. 1 Porter accepted a 4-month, 8% note from Anderko Company in payment of Anderko's \$1,200 account.
- 3 Porter wrote off as uncollectible the accounts of Elrich Corporation (\$450) and Rios Company (\$280).
- 8 Porter purchased \$17,200 of inventory on account.
- 11 Porter sold for \$25,000 on account inventory that cost \$17,500.
- 15 Porter sold inventory that cost \$700 to Fred Berman for \$1,000. Berman charged this amount on his Visa First Bank card. The service fee charged Porter by First Bank is 3%.
- 17 Porter collected \$22,900 from customers on account.
- 21 Porter paid \$16,300 on accounts payable.
- 24 Porter received payment in full (\$280) from Rios Company on the account written off on January 3.
- 27 Porter purchased advertising supplies for \$1,400 cash.
- 31 Porter paid other operating expenses, \$3,218.

**Adjustment data:**

1. Interest is recorded for the month on the note from January 1.
2. Bad debts are expected to be 6% of the January 31, 2012, accounts receivable.
3. A count of advertising supplies on January 31, 2012, reveals that \$560 remains unused.

**Instructions**

(You may want to set up T accounts to determine ending balances.)

- (a) Prepare journal entries for the transactions listed above and adjusting entries. (Include entries for cost of goods sold using the perpetual system.)
- (b) Prepare an adjusted trial balance at January 31, 2012.
- (c) Prepare an income statement and an owner's equity statement for the month ending January 31, 2012, and a classified balance sheet as of January 31, 2012.

## Continuing Cookie Chronicle

(Note: This is a continuation of the Cookie Chronicle from Chapters 1 through 8.)

**CCC9** One of Natalie's friends, Curtis Lesperance, runs a coffee shop where he sells specialty coffees and prepares and sells muffins and cookies. He is eager to buy one of Natalie's fine European mixers, which would enable him to make larger batches of muffins and cookies. However, Curtis cannot afford to pay for the mixer for at least 30 days. He asks Natalie if she would be willing to sell him the mixer on credit. Natalie comes to you for advice.

Go to the book's companion website, [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), to see the completion of this problem.

# BROADENING YOUR PERSPECTIVE

## Financial Reporting and Analysis

### Financial Reporting Problem: SEK Company

**BYP9-1** SEK Company sells office equipment and supplies to many organizations in the city and surrounding area on contract terms of 2/10, n/30. In the past, over 75% of the credit customers have taken advantage of the discount by paying within 10 days of the invoice date.

The number of customers taking the full 30 days to pay has increased within the last year. Current indications are that less than 60% of the customers are now taking the discount. Bad debts as a percentage of gross credit sales have risen from the 2.5% provided in past years to about 4.5% in the current year.

The company's Finance Committee has requested more information on the collections of accounts receivable. The controller responded to this request with the report reproduced below.

**SEK COMPANY**  
Accounts Receivable Collections  
May 31, 2012

The fact that some credit accounts will prove uncollectible is normal. Annual bad debts write-offs have been 2.5% of gross credit sales over the past 5 years. During the last fiscal year, this percentage increased to slightly less than 4.5%. The current Accounts Receivable balance is \$1,400,000. The condition of this balance in terms of age and probability of collection is as follows.

| <u>Proportion of Total</u> | <u>Age Categories</u>      | <u>Probability of Collection</u> |
|----------------------------|----------------------------|----------------------------------|
| 62%                        | not yet due                | 98%                              |
| 20%                        | less than 30 days past due | 96%                              |
| 9%                         | 30 to 60 days past due     | 94%                              |
| 5%                         | 61 to 120 days past due    | 91%                              |
| 2½%                        | 121 to 180 days past due   | 75%                              |
| 1½%                        | over 180 days past due     | 30%                              |

Allowance for Doubtful Accounts had a credit balance of \$29,500 on June 1, 2011. SEK has provided for a monthly bad debts expense accrual during the current fiscal year based on the assumption that 4.5% of gross credit sales will be uncollectible. Total gross credit sales for the 2011–2012 fiscal year amounted to \$2,900,000. Write-offs of bad accounts during the year totaled \$102,000.

#### Instructions

- (a) Prepare an accounts receivable aging schedule for SEK Company using the age categories identified in the controller's report to the Finance Committee showing the following.
  - (1) The amount of accounts receivable outstanding for each age category and in total.
  - (2) The estimated amount that is uncollectible for each category and in total.
- (b) Compute the amount of the year-end adjustment necessary to bring Allowance for Doubtful Accounts to the balance indicated by the age analysis. Then prepare the necessary journal entry to adjust the accounting records.
- (c) In a recessionary environment with tight credit and high interest rates:
  - (1) Identify steps SEK Company might consider to improve the accounts receivable situation.
  - (2) Then evaluate each step identified in terms of the risks and costs involved.

## Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

**BYP9-2** PepsiCo, Inc.'s financial statements are presented in Appendix A. Financial statements of The Coca-Cola Company are presented in Appendix B.

#### Instructions

- (a) Based on the information in these financial statements, compute the following 2009 ratios for each company. (Assume all sales are credit sales and that PepsiCo's receivables on its balance sheet are all trade receivables.)
  - (1) Accounts receivable turnover ratio.
  - (2) Average collection period for receivables.
- (b) What conclusions about managing accounts receivable can you draw from these data?

## On the Web

**BYP9-3 Purpose:** To learn more about factoring services.

**Address:** [www.invoicebankers.com](http://www.invoicebankers.com), or go to [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt)

**Steps:** Go to the website and answer the following questions.

- (a) What are some of the benefits of factoring?
- (b) What is the range of the percentages of the typical discount rate?
- (c) If a company factors its receivables, what percentage of the value of the receivables can it expect to receive from the factor in the form of cash, and how quickly will it receive the cash?

## Critical Thinking

### Decision Making Across the Organization

**BYP9-4** Molly and Joe Mayne own Campus Fashions. From its inception Campus Fashions has sold merchandise on either a cash or credit basis, but no credit cards have been accepted. During the past several months, the Maynes have begun to question their sales policies. First, they have lost some sales because of refusing to accept credit cards. Second, representatives of two metropolitan banks have been persuasive in almost convincing them to accept their national credit cards. One bank, City National Bank, has stated that its credit card fee is 4%.

The Maynes decide that they should determine the cost of carrying their own credit sales. From the accounting records of the past 3 years, they accumulate the following data.

|  | <u>2012</u> | <u>2011</u> | <u>2010</u> |
|--|-------------|-------------|-------------|
| Net credit sales                                 | \$500,000   | \$600,000   | \$400,000   |
| Collection agency fees for slow-paying customers | 2,450       | 2,500       | 2,400       |
| Salary of part-time accounts receivable clerk    | 4,100       | 4,100       | 4,100       |

Credit and collection expenses as a percentage of net credit sales are: uncollectible accounts 1.6%, billing and mailing costs 0.5%, and credit investigation fee on new customers 0.15%.

Molly and Joe also determine that the average accounts receivable balance outstanding during the year is 5% of net credit sales. The Maynes estimate that they could earn an average of 8% annually on cash invested in other business opportunities.

#### Instructions

With the class divided into groups, answer the following.

- Prepare a table showing, for each year, total credit and collection expenses in dollars and as a percentage of net credit sales.
- Determine the net credit and collection expense in dollars and as a percentage of sales after considering the revenue not earned from other investment opportunities.
- Discuss both the financial and nonfinancial factors that are relevant to the decision.

### Communication Activity

**BYP9-5** Rene Mai, a friend of yours, overheard a discussion at work about changes her employer wants to make in accounting for uncollectible accounts. Rene knows little about accounting, and she asks you to help make sense of what she heard. Specifically, she asks you to explain the differences between the percentage-of-sales, percentage-of-receivables, and the direct write-off methods for uncollectible accounts.

#### Instructions

In a letter of one page (or less), explain to Rene the three methods of accounting for uncollectibles. Be sure to discuss differences among these methods.

### Ethics Case

**BYP9-6** The controller of Ruiz Co. believes that the yearly allowance for doubtful accounts for Ruiz Co. should be 2% of net credit sales. The president of Ruiz Co., nervous that the stockholders might expect the company to sustain its 10% growth rate, suggests that the controller increase the allowance for doubtful accounts to 4%. The president thinks that the lower net income, which reflects a 6% growth rate, will be a more sustainable rate for Ruiz Co.

#### Instructions

- Who are the stakeholders in this case?
- Does the president's request pose an ethical dilemma for the controller?
- Should the controller be concerned with Ruiz Co.'s growth rate? Explain your answer.

## “All About You” Activity

**BYP9-7** As the **All About You** feature (available on the book’s companion website) indicates, credit card usage in the United States is substantial. Many startup companies use credit cards as a way to help meet short-term financial needs. The most common forms of debt for startups are use of credit cards and loans from relatives.

Suppose that you start up Brothers Sandwich Shop. You invested your savings of \$20,000 and borrowed \$70,000 from your relatives. Although sales in the first few months are good, you see that you may not have sufficient cash to pay expenses and maintain your inventory at acceptable levels, at least in the short term. You decide you may need to use one or more credit cards to fund the possible cash shortfall.

### Instructions

- Go to the Internet and find two sources that provide insight into how to compare credit card terms.
- Develop a list, in descending order of importance, as to what features are most important to you in selecting a credit card for your business.
- Examine the features of your present credit card. (If you do not have a credit card, select a likely one online for this exercise.) Given your analysis above, what are the three major disadvantages of your present credit card?

## FASB Codification Activity

**BYP9-8** If your school has a subscription to the FASB Codification, go to <http://aaahq.org/ascLogin.cfm> to log in and prepare responses to the following.

- How are receivables defined in the Codification?
- What are the conditions under which losses from uncollectible receivables (Bad Debts Expense) should be reported?

### Answers to Insight and Accounting Across the Organization Questions

**p. 427 How Does a Credit Card Work?** **Q:** Assume that Nordstrom prepares a bank reconciliation at the end of each month. If some credit card sales have not been processed by the bank, how should Nordstrom treat these transactions on its bank reconciliation? **A:** Nordstrom would treat the credit card receipts as deposits in transit. It has already recorded the receipts as cash. Its bank will increase Nordstrom’s cash account when it receives the receipts.

**p. 430 Can Fair Value Be Unfair?** **Q:** What are the arguments in favor of and against fair value accounting for loans and receivables? **A:** Arguments in favor of fair value accounting for loans and receivables are that fair value would provide a more accurate view of a company’s financial position. This might provide a useful early warning of when a bank or other financial institution was in trouble because its loans were of poor quality. But, banks argue that estimating fair values is very difficult to do accurately. They are also concerned that volatile fair values could cause large swings in a bank’s reported net income.

**p. 432 Bad Information Can Lead to Bad Loans** **Q:** What steps should the banks have taken to ensure the accuracy of financial information provided on loan applications? **A:** At a minimum, the bank should have requested copies of recent income tax forms and contacted the supposed employer to verify income. To verify ownership and value of assets, it should have examined bank statements, investment statements, and title documents and should have employed appraisers.

### Answers to Self-Test Questions

1. d 2. c  $(\$1,000 - \$300) \times (100\% - 2\%)$  3. a 4. b  $(\$60,000 - \$5,000)$  5. d  $(\$60,000 + \$5,000)$  6. b  $(\$800,000 \times 1.5\%) + \$15,000$  7. b  $(\$750,000 \times 3\%) + (\$18,000 - \$30,000)$  8. d  $(\$800,000 - \$65,000)$  9. c 10. c 11. a 12. b 13. d  $\$10,000 + (\$10,000 \times 120/360 \times 9\%)$  14. a 15. c  $\$800,000 \div [(\$100,000 + \$15,000) \div 2]$

## Key Points

- IFRS requires that loans and receivables be accounted for at amortized cost, adjusted for allowances for doubtful accounts. IFRS sometimes refers to these allowances as *provisions*. The entry to record the allowance would be:

|                                 |        |        |
|---------------------------------|--------|--------|
| Bad Debts Expense               | xxxxxx |        |
| Allowance for Doubtful Accounts |        | xxxxxx |

- Although IFRS implies that receivables with different characteristics should be reported separately, there is no standard that mandates this segregation.
- The FASB and IASB have worked to implement fair value measurement (the amount they currently could be sold for) for financial instruments. Both Boards have faced bitter opposition from various factions. As a consequence, the Boards have adopted a piecemeal approach; the first step is disclosure of fair value information in the notes. The second step is the fair value option, which permits, but does not require, companies to record some types of financial instruments at fair values in the financial statements.
- IFRS requires a two-tiered approach to test whether the value of loans and receivables are impaired. First, a company should look at specific loans and receivables to determine whether they are impaired. Then, the loans and receivables as a group should be evaluated for impairment. GAAP does not prescribe a similar two-tiered approach.
- IFRS and GAAP differ in the criteria used to determine how to record a factoring transaction. IFRS is a combination of an approach focused on risks and rewards and loss of control. GAAP uses loss of control as the primary criterion. In addition, IFRS permits partial derecognition of receivables; GAAP does not.

## Looking to the Future

It appears likely that the question of recording fair values for financial instruments will continue to be an important issue to resolve as the Boards work toward convergence. Both the IASB and the FASB have indicated that they believe that financial statements would be more transparent and understandable if companies recorded and reported all financial instruments at fair value. That said, in *IFRS 9*, which was issued in 2009, the IASB created a split model, where some financial instruments are recorded at fair value, but other financial assets, such as loans and receivables, can be accounted for at amortized cost if certain criteria are met. Critics say that this can result in two companies with identical securities accounting for those securities in different ways. A proposal by the FASB would require that nearly all financial instruments, including loans and receivables, be accounted for at fair value. It has been suggested that *IFRS 9* will likely be changed or replaced as the FASB and IASB continue to deliberate the best treatment for financial instruments. In fact, one past member of the IASB said that companies should ignore *IFRS 9* and continue to report under the old standard, because in his opinion, it was extremely likely that it would be changed before the mandatory adoption date of the standard arrived in 2013.

## IFRS Self-Test Questions

- Under IFRS, loans and receivables are to be reported on the balance sheet at:
  - amortized cost.
  - amortized cost adjusted for estimated loss provisions.
  - historical cost.
  - replacement cost.
- Which of the following statements is *false*?
  - Loans and receivables include equity securities purchased by the company.
  - Loans and receivables include credit card receivables.

- (c) Loans and receivables include amounts owed by employees as a result of company loans to employees.
  - (d) Loans and receivables include amounts resulting from transactions with customers.
3. In recording a factoring transaction:
    - (a) IFRS focuses on loss of control.
    - (b) GAAP focuses on loss of control and risks and rewards.
    - (c) IFRS and GAAP allow partial derecognition.
    - (d) IFRS allows partial derecognition
  4. Under IFRS:
    - (a) the entry to record estimated uncollected accounts is the same as GAAP.
    - (b) loans and receivables should only be tested for impairment as a group.
    - (c) it is always acceptable to use the direct write-off method.
    - (d) all financial instruments are recorded at fair value.
  5. Which of the following statements is *true*?
    - (a) The fair value option requires that some types of financial instruments be recorded at fair value.
    - (b) The fair value option allows, but does not require, that some types of financial instruments be recorded at amortized cost.
    - (c) The fair value option allows, but does not require, that some types of financial instruments be recorded at fair value.
    - (d) The FASB and IASB would like to reduce the reliance on fair value accounting for financial instruments in the future.

## IFRS Concepts and Application

**IFRS9-1** What are some steps taken by both the FASB and IASB to move to fair value measurement for financial instruments? In what ways have some of the approaches differed?

### *International Financial Reporting*

#### **Problem: Zetar plc**

**IFRS9-2** The financial statements of **Zetar plc** are presented in Appendix C. The company's complete annual report, including the notes to its financial statements, is available at [www.zetarplc.com](http://www.zetarplc.com).

#### **Instructions**

Use the company's annual report to answer the following questions.

- (a) According to the Operational Review of Financial Performance, what was one reason why the balance in receivables increased relative to the previous year?
- (b) According to the notes to the financial statements, how are loans and receivables defined?
- (c) In the notes to the financial statements, the company reports a "one off item" related to receivables. Explain what this item was.
- (d) Using information in the notes to the financial statements, determine what percentage the provision for impairment of receivables was as a percentage of total trade receivables for 2009 and 2008. How did the ratio change from 2008 to 2009, and what does this suggest about the company's receivables?

# CHAPTER 10

## Plant Assets, Natural Resources, and Intangible Assets

### Study Objectives

After studying this chapter, you should be able to:

- 1 Describe how the cost principle applies to plant assets.
- 2 Explain the concept of depreciation.
- 3 Compute periodic depreciation using different methods.
- 4 Describe the procedure for revising periodic depreciation.
- 5 Distinguish between revenue and capital expenditures, and explain the entries for each.
- 6 Explain how to account for the disposal of a plant asset.
- 7 Compute periodic depletion of natural resources.
- 8 Explain the basic issues related to accounting for intangible assets.
- 9 Indicate how plant assets, natural resources, and intangible assets are reported.

### Feature Story

#### HOW MUCH FOR A RIDE TO THE BEACH?

It's spring break. Your plane has landed, you've finally found your bags, and you're dying to hit the beach—but first you need a “vehicular unit” to get you there. As you turn away from baggage claim you see a long row of rental agency booths. Many are names you are familiar with—**Hertz**, **Avis**, and **Budget**. But a booth at the far end catches your eye—**Rent-A-Wreck**. Now there's a company making a clear statement!

Any company that relies on equipment to generate revenues must make decisions about what kind of equipment to buy, how long to keep it, and how vigorously to maintain it. Rent-A-Wreck has decided to rent used rather than new cars and trucks. It rents these vehicles across the United States, Europe, and Asia. While the big-name agencies push vehicles with that “new car smell,” Rent-A-Wreck competes on price. The message is simple: Rent a used car and

save some cash. It's not a message that appeals to everyone. If you're a marketing executive wanting to impress a big client, you probably don't want to pull up in a Rent-A-Wreck car. But if you want

to get from point A to point B for the minimum cash per mile, then they are playing your tune. The company's message seems to be getting across to the right clientele. Revenues have increased significantly.

When you rent a car from Rent-A-Wreck, you are renting from an independent business person who has paid a "franchise fee" for the right to use the Rent-A-Wreck name. In order to gain a franchise, he or she must meet financial and other criteria, and must agree to run the rental agency according to rules prescribed by Rent-A-Wreck. Some of these rules require that each franchise maintain its cars in a reasonable fashion. This ensures that, though you won't be cruising down Daytona Beach's Atlantic Avenue in a Mercedes convertible, you can be reasonably assured that you won't be calling a towtruck.

- *Accounting Across the Organization: Many U.S. Firms Use Leases* (p. 461)
- *Anatomy of a Fraud* (p. 470)
- *International Insight: Should Companies Write Up Goodwill?* (p. 478)

# Preview of CHAPTER 10

The accounting for long-term assets has important implications for a company's reported results. In this chapter, we explain the application of the cost principle of accounting to property, plant, and equipment, such as **Rent-A-Wreck** vehicles, as well as to natural resources and intangible assets such as the "Rent-A-Wreck" trademark. We also describe the methods that companies may use to allocate an asset's cost over its useful life. In addition, we discuss the accounting for expenditures incurred during the useful life of assets, such as the cost of replacing tires and brake pads on rental cars.

The content and organization of Chapter 10 are as follows.

| Plant Assets, Natural Resources, and Intangible Assets   |   |  |  |
|--|---|--|--|
| Plant Assets   | Natural Resources   | Intangible Assets  | Statement Presentation and Analysis  |
| <ul style="list-style-type: none"> <li>• Determining the cost of plant assets</li> <li>• Depreciation</li> <li>• Expenditures during useful life</li> <li>• Plant asset disposals</li> </ul> | <ul style="list-style-type: none"> <li>• Depletion</li> </ul> | <ul style="list-style-type: none"> <li>• Accounting for intangibles</li> <li>• Research and development costs</li> </ul> | <ul style="list-style-type: none"> <li>• Presentation</li> <li>• Analysis</li> </ul> |

## SECTION 1 PLANT ASSETS

**Plant assets** are resources that have three characteristics: they have a physical substance (a definite size and shape), are used in the operations of a business, and are not intended for sale to customers. They are also called **property, plant, and equipment; plant and equipment; and fixed assets**. These assets are expected to provide services to the company for a number of years. Except for land, plant assets decline in service potential over their useful lives.

Because plant assets play a key role in ongoing operations, companies keep plant assets in good operating condition. They also replace worn-out or out-dated plant assets, and expand productive resources as needed. Many companies have substantial investments in plant assets. Illustration 10-1 shows the

**Illustration 10-1**  
Percentages of plant assets in relation to total assets

percentages of plant assets in relation to total assets of companies in a number of industries.

## Determining the Cost of Plant Assets

The cost principle requires that companies record plant assets at cost. Thus **Rent-A-Wreck** records its vehicles at cost. **Cost consists of all expenditures necessary to acquire the asset and make it ready for its intended use.** For example, the cost of factory machinery includes the purchase price, freight costs paid by the purchaser, and installation costs. Once cost is established, the company uses that amount as the basis of accounting for the plant asset over its useful life.

In the following sections, we explain the application of the cost principle to each of the major classes of plant assets.

### Land

Companies often use **land** as a building site for a manufacturing plant or office site. The cost of land includes (1) the cash purchase price, (2) closing costs such as title and attorney's fees, (3) real estate brokers' commissions, and (4) accrued property taxes and other liens assumed by the purchaser. For example, if the cash price is \$50,000 and the purchaser agrees to pay accrued taxes of \$5,000, the cost of the land is \$55,000.

Companies record as debits (increases) to the Land account all necessary costs incurred to make land **ready for its intended use.** When a company acquires vacant land, these costs include expenditures for clearing, draining, filling, and grading. Sometimes the land has a building on it that must be removed before construction of a new building. In this case, the company debits to the Land account all demolition and removal costs, less any proceeds from salvaged materials.

To illustrate, assume that Hayes Manufacturing Company acquires real estate at a cash cost of \$100,000. The property contains an old warehouse that is razed at a net cost of \$6,000 (\$7,500 in costs less \$1,500 proceeds from salvaged materials). Additional expenditures are the attorney's fee, \$1,000, and the real estate broker's commission, \$8,000. The cost of the land is \$115,000, computed as shown in Illustration 10-2.

| <u>Land</u>                     |                         |
|---------------------------------|-------------------------|
| Cash price of property          | \$100,000               |
| Net removal cost of warehouse   | 6,000                   |
| Attorney's fee                  | 1,000                   |
| Real estate broker's commission | 8,000                   |
| <b>Cost of land</b>             | <b><u>\$115,000</u></b> |

When Hayes records the acquisition, it debits Land for \$115,000 and credits Cash for \$115,000.

### Land Improvements

**Land improvements** are structural additions made to land. Examples are drive-ways, parking lots, fences, landscaping, and underground sprinklers. The cost of land improvements includes all expenditures necessary to make the improvements

#### Study Objective [1]

Describe how the cost principle applies to plant assets.

#### Helpful Hint

Management's intended use is important in applying the cost principle.

#### Illustration 10-2

Computation of cost of land

ready for their intended use. For example, the cost of a new parking lot for **Home Depot** includes the amount paid for paving, fencing, and lighting. Thus, Home Depot debits to Land Improvements the total of all of these costs.

Land improvements have limited useful lives, and their maintenance and replacement are the responsibility of the company. Because of their limited useful life, companies expense (depreciate) the cost of land improvements over their useful lives.

## Buildings

**Buildings** are facilities used in operations, such as stores, offices, factories, warehouses, and airplane hangars. Companies debit to the Buildings account all necessary expenditures related to the purchase or construction of a building. When a building is **purchased**, such costs include the purchase price, closing costs (attorney's fees, title insurance, etc.) and real estate broker's commission. Costs to make the building ready for its intended use include expenditures for remodeling and replacing or repairing the roof, floors, electrical wiring, and plumbing. When a new building is **constructed**, cost consists of the contract price plus payments for architects' fees, building permits, and excavation costs.

In addition, companies charge certain interest costs to the Buildings account: Interest costs incurred to finance the project are included in the cost of the building when a significant period of time is required to get the building ready for use. In these circumstances, interest costs are considered as necessary as materials and labor. However, the inclusion of interest costs in the cost of a constructed building is **limited to the construction period**. When construction has been completed, the company records subsequent interest payments on funds borrowed to finance the construction as debits (increases) to Interest Expense.

## Equipment

**Equipment** includes assets used in operations, such as store check-out counters, office furniture, factory machinery, delivery trucks, and airplanes. The cost of equipment, such as **Rent-A-Wreck** vehicles, consists of the **cash purchase price, sales taxes, freight charges, and insurance during transit paid by the purchaser**. It also includes expenditures required in assembling, installing, and testing the unit. However, Rent-A-Wreck does not include motor vehicle licenses and accident insurance on company vehicles in the cost of equipment. These costs **represent annual recurring expenditures and do not benefit future periods**. Thus, they are treated as expenses as they are incurred.

To illustrate, assume Merten Company purchases factory machinery at a cash price of \$50,000. Related expenditures are for sales taxes \$3,000, insurance during shipping \$500, and installation and testing \$1,000. The cost of the factory machinery is \$54,500, computed in Illustration 10-3.

**Illustration 10-3**  
Computation of cost of  
factory machinery

| <u>Factory Machinery</u>         |                               |
|----------------------------------|-------------------------------|
| Cash price                       | \$50,000                      |
| Sales taxes                      | 3,000                         |
| Insurance during shipping        | 500                           |
| Installation and testing         | <u>1,000</u>                  |
| <b>Cost of factory machinery</b> | <b><u><u>\$54,500</u></u></b> |

Merten makes the following summary entry to record the purchase and related expenditures.

|   |        |        |
|---|--------|--------|
| Equipment                               | 54,500 |        |
| Cash                                    |        | 54,500 |
| (To record purchase of factory machine) |        |        |

|                   |   |   |   |    |
|-------------------|---|---|---|----|
| A                 | = | L | + | OE |
| +54,500           |   |   |   |    |
| -54,500           |   |   |   |    |
| <b>Cash Flows</b> |   |   |   |    |
| -54,500           |   |   |   |    |

For another example, assume that Lenard Company purchases a delivery truck at a cash price of \$22,000. Related expenditures consist of sales taxes \$1,320, painting and lettering \$500, motor vehicle license \$80, and a three-year accident insurance policy \$1,600. The cost of the delivery truck is \$23,820, computed as follows.

| <u>Delivery Truck</u>         |                 |
|-------------------------------|-----------------|
| Cash price                    | \$22,000        |
| Sales taxes                   | 1,320           |
| Painting and lettering        | 500             |
| <b>Cost of delivery truck</b> | <b>\$23,820</b> |

**Illustration 10-4**  
Computation of cost of delivery truck

Lenard treats the cost of the motor vehicle license as an expense, and the cost of the insurance policy as a prepaid asset. Thus, Lenard makes the following entry to record the purchase of the truck and related expenditures:

|   |        |        |
|---|--------|--------|
| Equipment   | 23,820 |        |
| License Expense   |        | 80     |
| Prepaid Insurance   |        | 1,600  |
| Cash  |        | 25,500 |
| (To record purchase of delivery truck and related expenditures) |        |        |

|                   |   |   |   |         |
|-------------------|---|---|---|---------|
| A                 | = | L | + | OE      |
| +23,820           |   |   |   |         |
|                   |   |   |   | -80 Exp |
| +1,600            |   |   |   |         |
| -25,500           |   |   |   |         |
| <b>Cash Flows</b> |   |   |   |         |
| -25,500           |   |   |   |         |

## ACCOUNTING ACROSS THE ORGANIZATION

### Many U.S. Firms Use Leases

Leasing is big business for U.S. companies. For example, business investment in equipment in a recent year totaled \$709 billion. Leasing accounted for about 31% of all business investment (\$218 billion).

Who does the most leasing? Interestingly major banks, such as **Continental Bank**, **J.P. Morgan Leasing**, and **US Bancorp Equipment Finance**, are the major lessors. Also, many companies have established separate leasing companies, such as **Boeing Capital Corporation**, **Dell Financial Services**, and **John Deere Capital Corporation**. And, as an excellent example of the magnitude of leasing, leased planes account for nearly 40% of the U.S. fleet of commercial airlines. In addition, leasing is becoming increasingly common in the hotel industry. **Marriott**, **Hilton**, and **InterContinental** are increasingly choosing to lease hotels that are owned by someone else.

**?** Why might airline managers choose to lease rather than purchase their planes? (See page 503.)

## Do it!

### Cost of Plant Assets

#### action plan

- ✓ Identify expenditures made in order to get delivery equipment ready for its intended use.
- ✓ Treat operating costs as expenses.

Assume that Drummond Heating and Cooling Co. purchases a delivery truck for \$15,000 cash, plus sales taxes of \$900 and delivery costs of \$500. The buyer also pays \$200 for painting and lettering, \$600 for an annual insurance policy, and \$80 for a motor vehicle license. Explain how each of these costs would be accounted for.

#### Solution

The first four payments (\$15,000, \$900, \$500, and \$200) are expenditures necessary to make the truck ready for its intended use. Thus, the cost of the truck is \$16,600. The payments for insurance and the license are operating costs and therefore are expensed.

Related exercise material: BE10-1, BE10-2, E10-1, E10-2, E10-3, and **Do it!** 10-1.

## Depreciation

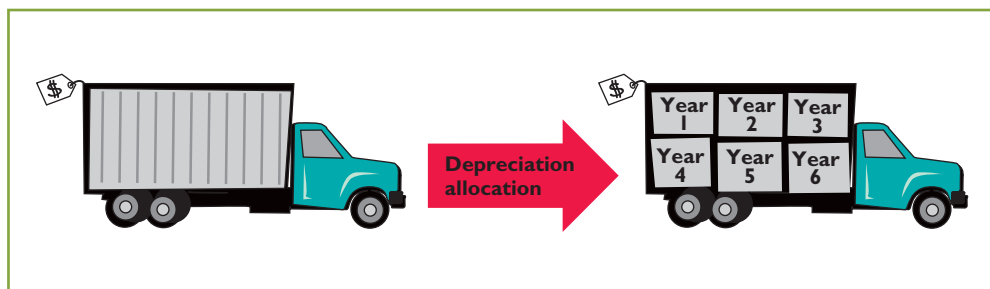

### Study Objective [2]

Explain the concept of depreciation.

As explained in Chapter 3, **depreciation is the process of allocating to expense the cost of a plant asset over its useful (service) life in a rational and systematic manner.** Cost allocation enables companies to properly match expenses with revenues in accordance with the expense recognition principle (see Illustration 10-5).

#### Illustration 10-5

Depreciation as a cost allocation concept

It is important to understand that **depreciation is a process of cost allocation. It is not a process of asset valuation.** No attempt is made to measure the change in an asset's fair value during ownership. So, the **book value** (cost less accumulated depreciation) of a plant asset may be quite different from its fair value. In fact, if an asset is fully depreciated, it can have a zero book value but still have a significant fair value.

#### Ethics Note

When a business is acquired, proper allocation of the purchase price to various asset classes is important, since different depreciation treatment can materially affect income. For example, buildings are depreciated, but land is not.

Depreciation applies to three classes of plant assets: land improvements, buildings, and equipment. Each asset in these classes is considered to be a **depreciable asset**. Why? Because the usefulness to the company and revenue-producing ability of each asset will decline over the asset's useful life. Depreciation **does not apply to land** because its usefulness and revenue-producing ability generally remain intact over time. In fact, in many cases, the usefulness of land is greater over time because of the scarcity of good land sites. Thus, **land is not a depreciable asset.**

During a depreciable asset's useful life, its revenue-producing ability declines because of **wear and tear**. A delivery truck that has been driven 100,000 miles will be less useful to a company than one driven only 800 miles.

Revenue-producing ability may also decline because of obsolescence. **Obsolescence** is the process of becoming out of date before the asset physically wears out. For example, major airlines moved from Chicago's Midway Airport to Chicago-O'Hare International Airport because Midway's runways were too short for jumbo jets. Similarly, many companies replace their computers long before they originally planned to do so because improvements in new computing technology make the old computers obsolete.

**Recognizing depreciation on an asset does not result in an accumulation of cash for replacement of the asset.** The balance in Accumulated Depreciation represents the total amount of the asset's cost that the company has charged to expense. It is not a cash fund.

Note that the concept of depreciation is consistent with the going-concern assumption. The **going-concern assumption** states that the company will continue in operation for the foreseeable future. If a company does not use a going-concern assumption, then plant assets should be stated at their fair value. In that case, depreciation of these assets is not needed.

## Factors in Computing Depreciation

Three factors affect the computation of depreciation, as shown in Illustration 10-6.

**Illustration 10-6**

Three factors in computing depreciation

### Helpful Hint

Depreciation expense is reported on the income statement. Accumulated depreciation is reported on the balance sheet as a deduction from plant assets.

- 1. Cost.** Earlier, we explained the issues affecting the cost of a depreciable asset. Recall that companies record plant assets at cost, in accordance with the cost principle.
- 2. Useful life.** **Useful life** is an estimate of the expected *productive life*, also called *service life*, of the asset for its owner. Useful life may be expressed in terms of time, units of activity (such as machine hours), or units of output. Useful life is an estimate. In making the estimate, management considers such factors as the intended use of the asset, its expected repair and maintenance, and its vulnerability to obsolescence. Past experience with similar assets is often helpful in deciding on expected useful life. We might reasonably expect **Rent-A-Wreck** and **Avis** to use different estimated useful lives for their vehicles.
- 3. Salvage value.** **Salvage value** is an estimate of the asset's value at the end of its useful life. This value may be based on the asset's worth as scrap or on its expected trade-in value. Like useful life, salvage value is an estimate. In making the estimate, management considers how it plans to dispose of the asset and its experience with similar assets.

### Alternative Terminology

Another term sometimes used for salvage value is *residual value*.

## Depreciation Methods

### Study Objective [3]

Compute periodic depreciation using different methods.

Depreciation is generally computed using one of the following methods:

1. Straight-line
2. Units-of-activity
3. Declining-balance

Each method is acceptable under generally accepted accounting principles. Management selects the method(s) it believes to be appropriate. The objective is to select the method that best measures an asset's contribution to revenue over its useful life. Once a company chooses a method, it should apply it consistently over the useful life of the asset. Consistency enhances the comparability of financial statements. Depreciation affects the balance sheet through accumulated depreciation and the income statement through depreciation expense.

We will compare the three depreciation methods using the following data for a small delivery truck purchased by Barb's Florists on January 1, 2012.

**Illustration 10-7**  
Delivery truck data

|                                |          |
|--------------------------------|----------|
| Cost                           | \$13,000 |
| Expected salvage value         | \$ 1,000 |
| Estimated useful life in years | 5        |
| Estimated useful life in miles | 100,000  |

**Illustration 10-8**  
Use of depreciation methods in 600 large U.S. companies

Illustration 10-8 (in the margin) shows the use of the primary depreciation methods in 600 of the largest companies in the United States.

### STRAIGHT-LINE

Under the **straight-line method**, companies expense the same amount of depreciation for each year of the asset's useful life. It is measured solely by the passage of time.

To compute depreciation expense under the straight-line method, companies need to determine depreciable cost. **Depreciable cost** is the cost of the asset less its salvage value. It represents the total amount subject to depreciation. Under the straight-line method, to determine annual depreciation expense, we divide depreciable cost by the asset's useful life. Illustration 10-9 shows the computation of the first year's depreciation expense for Barb's Florists.

**Illustration 10-9**  
Formula for straight-line method

|                  |   |                        |   |                            |
|------------------|---|------------------------|---|----------------------------|
| Cost             | − | Salvage Value          | = | Depreciable Cost           |
| \$13,000         | − | \$1,000                | = | \$12,000                   |
| ↓                |   |                        |   |                            |
| Depreciable Cost | ÷ | Useful Life (in years) | = | Annual Depreciable Expense |
| \$12,000         | ÷ | 5                      | = | \$2,400                    |

Alternatively, we also can compute an annual **rate** of depreciation. In this case, the rate is 20% (100% ÷ 5 years). When a company uses an annual straight-line rate, it applies the percentage rate to the depreciable cost of the asset. Illustration 10-10 shows a **depreciation schedule** using an annual rate.

| Barb's Florists |                  |                     |                             |                          |            |
|-----------------|------------------|---------------------|-----------------------------|--------------------------|------------|
| Year            | Computation      |                     | Annual Depreciation Expense | End of Year              |            |
|                 | Depreciable Cost | × Depreciation Rate |                             | Accumulated Depreciation | Book Value |
| 2012            | \$12,000         | × 20%               | = \$2,400                   | \$ 2,400                 | \$10,600*  |
| 2013            | 12,000           | × 20                | = 2,400                     | 4,800                    | 8,200      |
| 2014            | 12,000           | × 20                | = 2,400                     | 7,200                    | 5,800      |
| 2015            | 12,000           | × 20                | = 2,400                     | 9,600                    | 3,400      |
| 2016            | 12,000           | × 20                | = 2,400                     | 12,000                   | 1,000      |

\*Book Value = Cost – Accumulated depreciation = (\$13,000 – \$2,400).

**Illustration 10-10**  
Straight-line depreciation schedule

Note that the depreciation expense of \$2,400 is the same each year. The book value (computed as cost minus accumulated depreciation) at the end of the useful life is equal to the expected \$1,000 salvage value.

What happens to these computations for an asset purchased **during** the year, rather than on January 1? In that case, it is necessary to **prorate the annual depreciation** on a time basis. If Barb's Florists had purchased the delivery truck on April 1, 2012, the company would own the truck for nine months of the first year (April–December). Thus, depreciation for 2012 would be \$1,800 (\$12,000 × 20% × 9/12 of a year).

The straight-line method predominates in practice. Such large companies as **Campbell Soup**, **Marriott**, and **General Mills** use the straight-line method. It is simple to apply, and it matches expenses with revenues when the use of the asset is reasonably uniform throughout the service life.

### UNITS-OF-ACTIVITY

Under the **units-of-activity method**, useful life is expressed in terms of the total units of production or use expected from the asset, rather than as a time period. The units-of-activity method is ideally suited to factory machinery. Manufacturing companies can measure production in units of output or in machine hours. This method can also be used for such assets as delivery equipment (miles driven) and airplanes (hours in use). The units-of-activity method is generally not suitable for buildings or furniture, because depreciation for these assets is more a function of time than of use.

To use this method, companies estimate the total units of activity for the entire useful life, and then divide these units into depreciable cost. The resulting number represents the depreciation cost per unit. The depreciation cost per unit is then applied to the units of activity during the year to determine the annual depreciation expense.

To illustrate, assume that Barb's Florists drives its delivery truck 15,000 miles in the first year. Illustration 10-11 shows the units-of-activity formula and the computation of the first year's depreciation expense.

### Alternative Terminology

Another term often used is the *units-of-production method*.

### Helpful Hint

Under any method, depreciation stops when the asset's book value equals expected salvage value.

|                           |   |                                   |   |                            |
|---------------------------|---|-----------------------------------|---|----------------------------|
| Depreciable Cost          | ÷ | Total Units of Activity           | = | Depreciable Cost per Unit  |
| \$12,000                  | ÷ | 100,000 miles                     | = | \$0.12                     |
| ↓                         |   |                                   |   |                            |
| Depreciable Cost per Unit | × | Units of Activity during the Year | = | Annual Depreciable Expense |
| \$0.12                    | × | 15,000 miles                      | = | \$1,800                    |

**Illustration 10-11**  
Formula for units-of-activity method

The units-of-activity depreciation schedule, using assumed mileage, is as follows.

**Illustration 10-12**  
Units-of-activity depreciation schedule

| Barb's Florists |                   |                          |   |                             |                          |            |
|-----------------|-------------------|--------------------------|---|-----------------------------|--------------------------|------------|
| Year            | Computation       |                          | = | Annual Depreciation Expense | End of Year              |            |
|                 | Units of Activity | × Depreciation Cost/Unit |   |                             | Accumulated Depreciation | Book Value |
| 2012            | 15,000            | × \$0.12                 |   | \$1,800                     | \$1,800                  | \$11,200*  |
| 2013            | 30,000            | × 0.12                   |   | 3,600                       | 5,400                    | 7,600      |
| 2014            | 20,000            | × 0.12                   |   | 2,400                       | 7,800                    | 5,200      |
| 2015            | 25,000            | × 0.12                   |   | 3,000                       | 10,800                   | 2,200      |
| 2016            | 10,000            | × 0.12                   |   | 1,200                       | 12,000                   | 1,000      |

\*(\$13,000 – \$1,800).

This method is easy to apply for assets purchased mid-year. In such a case, the company computes the depreciation using the productivity of the asset for the partial year.

The units-of-activity method is not nearly as popular as the straight-line method (see Illustration 10-8, page 464), primarily because it is often difficult for companies to reasonably estimate total activity. However, some very large companies, such as **Chevron** and **Boise Cascade** (a forestry company), do use this method. When the productivity of an asset varies significantly from one period to another, the units-of-activity method results in the best matching of expenses with revenues.

**DECLINING-BALANCE**

The **declining-balance method** produces a decreasing annual depreciation expense over the asset's useful life. The method is so named because the periodic depreciation is based on a **declining book value** (cost less accumulated depreciation) of the asset. With this method, companies compute annual depreciation expense by multiplying the book value at the beginning of the year by the declining-balance depreciation rate. **The depreciation rate remains constant from year to year, but the book value to which the rate is applied declines each year.**

At the beginning of the first year, book value is the cost of the asset. This is so because the balance in accumulated depreciation at the beginning of the asset's useful life is zero. In subsequent years, book value is the difference between cost and accumulated depreciation to date. Unlike the other depreciation methods, the declining-balance method does not use depreciable cost. That is, **it ignores salvage value in determining the amount to which the declining-balance rate is applied.** Salvage value, however, does limit the total depreciation that can be taken. Depreciation stops when the asset's book value equals expected salvage value.

A common declining-balance rate is double the straight-line rate. The method is often called the **double-declining-balance method**. If Barb's Florists uses the double-declining-balance method, it uses a depreciation rate of 40% (2 × the straight-line rate of 20%). Illustration 10-13 shows the declining-balance formula and the computation of the first year's depreciation on the delivery truck.

**Illustration 10-13**  
Formula for declining-balance method

|                                 |   |                        |   |                             |
|---------------------------------|---|------------------------|---|-----------------------------|
| Book Value at Beginning of Year | × | Declining-Balance Rate | = | Annual Depreciation Expense |
| \$13,000                        | × | 40%                    | = | \$5,200                     |

The depreciation schedule under this method is as follows.

| Barb's Florists |                                 |                           |   |                                   |                             |               |
|-----------------|---------------------------------|---------------------------|---|-----------------------------------|-----------------------------|---------------|
| Year            | Computation                     |                           | = | Annual<br>Depreciation<br>Expense | End of Year                 |               |
|                 | Book Value<br>Beginning of Year | ×<br>Depreciation<br>Rate |   |                                   | Accumulated<br>Depreciation | Book<br>Value |
| 2012            | \$13,000                        | 40%                       |   | <b>\$5,200</b>                    | \$ 5,200                    | \$7,800       |
| 2013            | 7,800                           | 40                        |   | <b>3,120</b>                      | 8,320                       | 4,680         |
| 2014            | 4,680                           | 40                        |   | <b>1,872</b>                      | 10,192                      | 2,808         |
| 2015            | 2,808                           | 40                        |   | <b>1,123</b>                      | 11,315                      | 1,685         |
| 2016            | 1,685                           | 40                        |   | <b>685*</b>                       | 12,000                      | <b>1,000</b>  |

\*Computation of \$674 ( $\$1,685 \times 40\%$ ) is adjusted to \$685 in order for book value to equal salvage value.

The delivery equipment is 69% depreciated ( $\$8,320 \div \$12,000$ ) at the end of the second year. Under the straight-line method, the truck would be depreciated 40% ( $\$4,800 \div \$12,000$ ) at that time. Because the declining-balance method produces higher depreciation expense in the early years than in the later years, it is considered an **accelerated-depreciation method**. The declining-balance method is compatible with the expense recognition principle. It matches the higher depreciation expense in early years with the higher benefits received in these years. It also recognizes lower depreciation expense in later years, when the asset's contribution to revenue is less. Some assets lose usefulness rapidly because of obsolescence. In these cases, the declining-balance method provides the most appropriate depreciation amount.

When a company purchases an asset during the year, it must prorate the first year's declining-balance depreciation on a time basis. For example, if Barb's Florists had purchased the truck on April 1, 2012, depreciation for 2012 would become \$3,900 ( $\$13,000 \times 40\% \times 9/12$ ). The book value at the beginning of 2013 is then \$9,100 ( $\$13,000 - \$3,900$ ), and the 2013 depreciation is \$3,640 ( $\$9,100 \times 40\%$ ). Subsequent computations would follow from those amounts.

**Illustration 10-14**  
Double-declining-balance  
depreciation schedule

### Helpful Hint

The method recommended for an asset that is expected to be significantly more productive in the first half of its useful life is the declining-balance method.

## Do it!

On January 1, 2012, Iron Mountain Ski Corporation purchased a new snow-grooming machine for \$50,000. The machine is estimated to have a 10-year life with a \$2,000 salvage value. What journal entry would Iron Mountain Ski Corporation make at December 31, 2012, if it uses the straight-line method of depreciation?

### Solution

$$\text{Depreciation expense} = \frac{\text{Cost} - \text{Salvage value}}{\text{Useful life}} = \frac{\$50,000 - \$2,000}{10} = \$4,800$$

The entry to record the first year's depreciation would be:

|         |  |       |       |
|---------|--|-------|-------|
| Dec. 31 | Depreciation Expense                                     | 4,800 |       |
|         | Accumulated Depreciation—Equipment                       |       | 4,800 |
|         | (To record annual depreciation on snow-grooming machine) |       |       |

Related exercise material: BE10-3, BE10-4, BE10-5, BE10-6, BE10-7, E10-5, E10-6, E10-7, E10-8, and **Do it!** 10-2.

## Straight-Line Depreciation

### action plan

- ✓ Calculate depreciable cost (Cost – Salvage value).
- ✓ Divide the depreciable cost by the asset's estimated useful life.

**COMPARISON OF METHODS**

Illustration 10-15 compares annual and total depreciation expense under each of the three methods for Barb's Florists.

**Illustration 10-15**

Comparison of depreciation methods

| Year | Straight-Line   | Units-of-Activity | Declining-Balance |
|------|-----------------|-------------------|-------------------|
| 2012 | \$ 2,400        | \$ 1,800          | \$ 5,200          |
| 2013 | 2,400           | 3,600             | 3,120             |
| 2014 | 2,400           | 2,400             | 1,872             |
| 2015 | 2,400           | 3,000             | 1,123             |
| 2016 | 2,400           | 1,200             | 685               |
|      | <u>\$12,000</u> | <u>\$12,000</u>   | <u>\$12,000</u>   |

Annual depreciation varies considerably among the methods, but **total depreciation is the same for the five-year period** under all three methods. Each method is acceptable in accounting because each recognizes in a rational and systematic manner the decline in service potential of the asset. Illustration 10-16 graphs the depreciation expense pattern under each method.

**Illustration 10-16**

Patterns of depreciation

**Depreciation and Income Taxes**

The Internal Revenue Service (IRS) allows corporate taxpayers to deduct depreciation expense when they compute taxable income. However, the IRS does not require the taxpayer to use the same depreciation method on the tax return that is used in preparing financial statements.

Many corporations use straight-line in their financial statements to maximize net income. At the same time, they use a special accelerated-depreciation method on their tax returns to minimize their income taxes. Taxpayers must use on their tax returns either the straight-line method or a special accelerated-depreciation method called the **Modified Accelerated Cost Recovery System (MACRS)**.

**Revising Periodic Depreciation**

Depreciation is one example of the use of estimation in the accounting process. Management should periodically review annual depreciation expense. If wear and tear or obsolescence indicate that annual depreciation estimates are inadequate or excessive, the company should change the amount of depreciation expense.

**Study Objective [4]**

Describe the procedure for revising periodic depreciation.

When a change in an estimate is required, the company makes the change in **current and future years. It does not change depreciation in prior periods.** The rationale is that continual restatement of prior periods would adversely affect confidence in financial statements.

To determine the new annual depreciation expense, the company first computes the asset's depreciable cost at the time of the revision. It then allocates the revised depreciable cost to the remaining useful life.

To illustrate, assume that Barb's Florists decides on January 1, 2015, to extend the useful life of the truck one year (a total life of six years) and increase its salvage value to \$2,200. The company has used the straight-line method to depreciate the asset to date. Depreciation per year was \$2,400  $(\$13,000 - \$1,000) \div 5$ . Accumulated depreciation after three years (2012–2014) is \$7,200  $(\$2,400 \times 3)$ , and book value is \$5,800  $(\$13,000 - \$7,200)$ . The new annual depreciation is \$1,200, computed as follows.

|   |                        |             |
|---|------------------------|-------------|
| Book value, 1/1/15  | \$ 5,800               |             |
| Less: Salvage value   | <u>2,200</u>           |             |
| Depreciable cost  | <u>\$ 3,600</u>        |             |
| Remaining useful life   | <u>3 years</u>         | (2015–2017) |
| <b>Revised annual depreciation <math>(\\$3,600 \div 3)</math></b> | <b><u>\$ 1,200</u></b> |             |

Barb's Florists makes no entry for the change in estimate. On December 31, 2015, during the preparation of adjusting entries, it records depreciation expense of \$1,200. Companies must describe in the financial statements significant changes in estimates.

### Helpful Hint

Use a step-by-step approach: (1) determine new depreciable cost; (2) divide by remaining useful life.

### Illustration 10-17

Revised depreciation computation

## Do it!

Chambers Corporation purchased a piece of equipment for \$36,000. It estimated a 6-year life and \$6,000 salvage value. Thus, straight-line depreciation was \$5,000 per year  $(\$36,000 - \$6,000) \div 6$ . At the end of year three (before the depreciation adjustment), it estimated the new total life to be 10 years and the new salvage value to be \$2,000. Compute the revised depreciation.

### Solution

$$\text{Original depreciation expense} = [(\$36,000 - \$6,000) \div 6] = \$5,000$$

$$\text{Accumulated depreciation after 2 years} = 2 \times \$5,000 = \$10,000$$

$$\text{Book value} = \$36,000 - \$10,000 = \$26,000$$

|   |                 |
|---|-----------------|
| Book value after 2 years of depreciation        | \$26,000        |
| Less: New salvage value                         | <u>2,000</u>    |
| Depreciable cost                                | <u>24,000</u>   |
| Remaining useful life                           | <u>8 years</u>  |
| Revised annual depreciation $(\$24,000 \div 8)$ | <u>\$ 3,000</u> |

## Revised Depreciation

### action plan

- ✓ Calculate remaining depreciable cost.
- ✓ Divide remaining depreciable cost by new remaining life.

Related exercise material: BE10-7, E10-8, and **Do it!** 10-3.

## Expenditures During Useful Life

### Study Objective [5]

Distinguish between revenue and capital expenditures, and explain the entries for each.

During the useful life of a plant asset, a company may incur costs for ordinary repairs, additions, or improvements. **Ordinary repairs** are expenditures to **maintain** the operating efficiency and productive life of the unit. They usually are fairly small amounts that occur frequently. Examples are motor tune-ups and oil changes, the painting of buildings, and the replacing of worn-out gears on machinery. Companies record such repairs as debits to Maintenance and Repairs Expense as they are incurred. Because they are immediately charged as an expense against revenues, these costs are often referred to as **revenue expenditures**.

In contrast, **additions and improvements** are costs incurred to **increase** the operating efficiency, productive capacity, or useful life of a plant asset. They are usually material in amount and occur infrequently. Additions and improvements increase the company's investment in productive facilities. Companies generally debit these amounts to the plant asset affected. They are often referred to as **capital expenditures**.

Companies must use good judgment in deciding between a revenue expenditure and capital expenditure. For example, assume that Rodriguez Co. purchases a number of wastepaper baskets. Although the proper accounting would appear to be to capitalize and then depreciate these wastepaper baskets over their useful life, it would be more usual for Rodriguez to expense them immediately. This practice is justified on the basis of **materiality**. Materiality refers to the impact of an item's size on a company's financial operations. The **materiality principle** states that if an item would not make a difference in decision making, the company does not have to follow GAAP in reporting that item.

### ANATOMY OF A FRAUD

Bernie Ebbers was the founder and CEO of the phone company **WorldCom**. The company engaged in a series of increasingly large, debt-financed acquisitions of other companies. These acquisitions made the company grow quickly, which made the stock price increase dramatically. However, because the acquired companies all had different accounting systems, WorldCom's financial records were a mess. When WorldCom's performance started to flatten out, Bernie coerced WorldCom's accountants to engage in a number of fraudulent activities to make net income look better than it really was and thus prop up the stock price. One of these frauds involved treating \$7 billion of line costs as capital expenditures. The line costs, which were rental fees paid to other phone companies to use their phone lines, had always been properly expensed in previous years. Capitalization delayed expense recognition to future periods and thus boosted current-period profits.

Total take: \$7 billion

### THE MISSING CONTROLS

**Documentation procedures.** The company's accounting system was a disorganized collection of non-integrated systems, which resulted from a series of corporate acquisitions. Top management took advantage of this disorganization to conceal its fraudulent activities.

**Independent internal verification.** A fraud of this size should have been detected by a routine comparison of the actual physical assets with the list of physical assets shown in the accounting records.

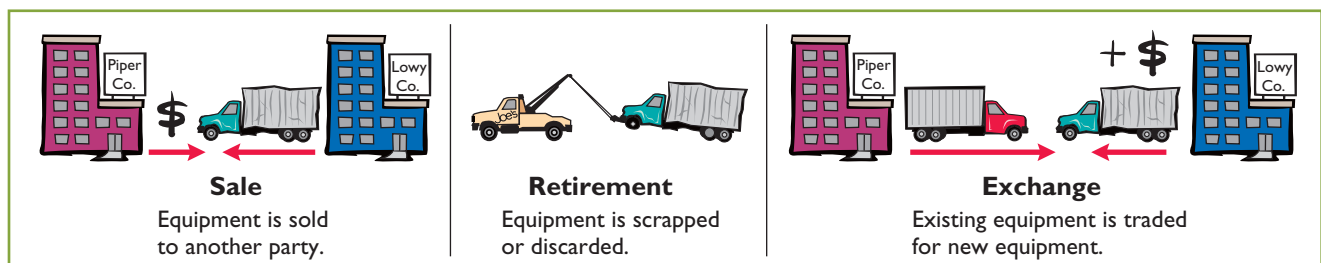

## Plant Asset Disposals

Companies dispose of plant assets that are no longer useful to them. Illustration 10-18 below shows the three ways in which companies make plant asset disposals.

Whatever the disposal method, the company must determine the book value of the plant asset at the disposal date to determine the gain or loss. Recall that the book value is the difference between the cost of the plant asset and the accumulated depreciation to date. If the disposal occurs at any time during the year, the company must record depreciation for the fraction of the year to the date of disposal. The company then eliminates the book value by reducing (debiting) Accumulated Depreciation for the total depreciation associated with that asset to the date of disposal and reducing (crediting) the asset account for the cost of the asset.

### Study Objective [6]

Explain how to account for the disposal of a plant asset.

**Illustration 10-18**  
Methods of plant asset disposal

In this chapter, we examine the accounting for the retirement and sale of plant assets. In the appendix to the chapter, we discuss and illustrate the accounting for exchanges of plant assets.

### Retirement of Plant Assets

To illustrate the retirement of plant assets, assume that Hobart Enterprises retires its computer printers, which cost \$32,000. The accumulated depreciation on these printers is \$32,000. The equipment, therefore, is fully depreciated (zero book value). The entry to record this retirement is as follows.

|   |        |        |
|---|--------|--------|
| Accumulated Depreciation—Equipment                    | 32,000 |        |
| Equipment   |        | 32,000 |
| (To record retirement of fully depreciated equipment) |        |        |

|                   |   |          |   |           |
|-------------------|---|----------|---|-----------|
| <b>A</b>          | = | <b>L</b> | + | <b>OE</b> |
| +32,000           |   |          |   |           |
| −32,000           |   |          |   |           |
| <hr/>             |   |          |   |           |
| <b>Cash Flows</b> |   |          |   |           |
| no effect         |   |          |   |           |

What happens if a fully depreciated plant asset is still useful to the company? In this case, the asset and its accumulated depreciation continue to be reported on the balance sheet, without further depreciation adjustment, until the company retires the asset. Reporting the asset and related accumulated depreciation on the balance sheet informs the financial statement reader that the asset is still in use. Once fully depreciated, no additional depreciation should be taken, even if an asset is still being used. In no situation can the accumulated depreciation on a plant asset exceed its cost.

If a company retires a plant asset before it is fully depreciated, and no cash is received for scrap or salvage value, a loss on disposal occurs. For example, assume

### Helpful Hint

When a company disposes of a plant asset, the company must remove from the accounts all amounts related to the asset. This includes the original cost in the asset account and the total depreciation to date in the accumulated depreciation account.

that Sunset Company discards delivery equipment that cost \$18,000 and has accumulated depreciation of \$14,000. The entry is as follows.

|                   |   |   |   |            |
|-------------------|---|---|---|------------|
| A                 | = | L | + | OE         |
| +14,000           |   |   |   | -4,000 Exp |
| -18,000           |   |   |   |            |
| <b>Cash Flows</b> |   |   |   |            |
| no effect         |   |   |   |            |

|  |        |  |        |
|--|--------|--|--------|
| Accumulated Depreciation—Equipment                     | 14,000 |  |        |
| Loss on Disposal of Plant Assets                       | 4,000  |  |        |
| Equipment  |        |  | 18,000 |
| (To record retirement of delivery equipment at a loss) |        |  |        |

Companies report a loss on disposal of plant assets in the “Other expenses and losses” section of the income statement.

### Sale of Plant Assets

In a disposal by sale, the company compares the book value of the asset with the proceeds received from the sale. If the proceeds of the sale **exceed** the book value of the plant asset, **a gain on disposal occurs**. If the proceeds of the sale **are less than** the book value of the plant asset sold, **a loss on disposal occurs**.

Only by coincidence will the book value and the fair value of the asset be the same when the asset is sold. Gains and losses on sales of plant assets are therefore quite common. For example, **Delta Airlines** reported a \$94,343,000 gain on the sale of five **Boeing** B727-200 aircraft and five **Lockheed** L-1011-1 aircraft.

#### GAIN ON SALE

To illustrate a gain on sale of plant assets, assume that on July 1, 2012, Wright Company sells office furniture for \$16,000 cash. The office furniture originally cost \$60,000. As of January 1, 2012, it had accumulated depreciation of \$41,000. Depreciation for the first six months of 2012 is \$8,000. Wright records depreciation expense and updates accumulated depreciation to July 1 with the following entry.

|                   |   |   |   |            |
|-------------------|---|---|---|------------|
| A                 | = | L | + | OE         |
|                   |   |   |   | -8,000 Exp |
| -8,000            |   |   |   |            |
| <b>Cash Flows</b> |   |   |   |            |
| no effect         |   |   |   |            |

|        |   |       |       |
|--------|---|-------|-------|
| July 1 | Depreciation Expense  | 8,000 |       |
|        | Accumulated Depreciation—Equipment                              |       | 8,000 |
|        | (To record depreciation expense for the first 6 months of 2012) |       |       |

After the accumulated depreciation balance is updated, the company computes the gain or loss. The gain or loss is the difference between the proceeds from the sale and the book value at the date of disposal. Illustration 10-19 shows this computation for Wright Company, which has a gain on disposal of \$5,000.

**Illustration 10-19**  
Computation of gain on disposal

|   |                        |
|---|------------------------|
| Cost of office furniture                            | \$60,000               |
| Less: Accumulated depreciation (\$41,000 + \$8,000) | 49,000                 |
| Book value at date of disposal                      | 11,000                 |
| Proceeds from sale                                  | 16,000                 |
| <b>Gain on disposal of plant asset</b>              | <b><u>\$ 5,000</u></b> |

Wright records the sale and the gain on disposal of the plant asset as follows.

|        |  |        |  |        |
|--------|--|--------|--|--------|
| July 1 | Cash   | 16,000 |  |        |
|        | Accumulated Depreciation—Equipment             | 49,000 |  |        |
|        | Equipment                                      |        |  | 60,000 |
|        | Gain on Disposal of Plant Assets               |        |  | 5,000  |
|        | (To record sale of office furniture at a gain) |        |  |        |

|                   |   |   |   |            |
|-------------------|---|---|---|------------|
| A                 | = | L | + | OE         |
|                   |   |   |   | +5,000 Rev |
|                   |   |   |   | +16,000    |
|                   |   |   |   | +49,000    |
|                   |   |   |   | -60,000    |
|                   |   |   |   | +16,000    |
| <b>Cash Flows</b> |   |   |   |            |

Companies report a gain on disposal of plant assets in the “Other revenues and gains” section of the income statement.

**LOSS ON SALE**

Assume that instead of selling the office furniture for \$16,000, Wright sells it for \$9,000. In this case, Wright computes a loss of \$2,000 as follows.

|  |                        |
|--|------------------------|
| Cost of office furniture               | \$60,000               |
| Less: Accumulated depreciation         | <u>49,000</u>          |
| Book value at date of disposal         | 11,000                 |
| Proceeds from sale                     | <u>9,000</u>           |
| <b>Loss on disposal of plant asset</b> | <b><u>\$ 2,000</u></b> |

**Illustration 10-20**  
Computation of loss on disposal

Wright records the sale and the loss on disposal of the plant asset as follows.

|        |  |        |  |        |
|--------|--|--------|--|--------|
| July 1 | Cash   | 9,000  |  |        |
|        | Accumulated Depreciation—Equipment             | 49,000 |  |        |
|        | Loss on Disposal of Plant Assets               | 2,000  |  |        |
|        | Equipment                                      |        |  | 60,000 |
|        | (To record sale of office furniture at a loss) |        |  |        |

|                   |   |   |   |            |
|-------------------|---|---|---|------------|
| A                 | = | L | + | OE         |
|                   |   |   |   | -2,000 Exp |
|                   |   |   |   | +9,000     |
|                   |   |   |   | +49,000    |
|                   |   |   |   | +60,000    |
|                   |   |   |   | +9,000     |
| <b>Cash Flows</b> |   |   |   |            |

Companies report a loss on disposal of plant assets in the “Other expenses and losses” section of the income statement.

**Do it!**

Overland Trucking has an old truck that cost \$30,000, and it has accumulated depreciation of \$16,000 on this truck. Overland has decided to sell the truck. (a) What entry would Overland Trucking make to record the sale of the truck for \$17,000 cash? (b) What entry would Overland trucking make to record the sale of the truck for \$10,000 cash?

**Solution**

**(a) Sale of truck for cash at a gain:**

|   |        |  |        |
|---|--------|--|--------|
| Cash  | 17,000 |  |        |
| Accumulated Depreciation—Equipment                                      | 16,000 |  |        |
| Equipment   |        |  | 30,000 |
| Gain on Disposal of Plant Assets [ $\$17,000 - (\$30,000 - \$16,000)$ ] |        |  | 3,000  |
| (To record sale of truck at a gain)                                     |        |  |        |

**Plant Asset Disposal**

**action plan**

- ✓ At the time of disposal, determine the book value of the asset.
- ✓ Compare the asset’s book value with the proceeds received to determine whether a gain or loss has occurred.

(b) Sale of truck for cash at a loss:

|   |        |        |
|---|--------|--------|
| Cash  | 10,000 |        |
| Loss on Disposal of Plant Assets [ $\$10,000 - (\$30,000 - \$16,000)$ ] | 4,000  |        |
| Accumulated Depreciation—Equipment                                      | 16,000 |        |
| Equipment   |        | 30,000 |
| (To record sale of truck at a loss)                                     |        |        |

Related exercise material: BE10-9, BE10-10, E10-9, E10-10, and **Do it!** 10-3.

## SECTION 2 NATURAL RESOURCES

### Helpful Hint

On a balance sheet, natural resources may be described more specifically as *timberlands, mineral deposits, oil reserves*, and so on.

**Natural resources** consist of standing timber and underground deposits of oil, gas, and minerals. These long-lived productive assets have two distinguishing characteristics: (1) They are physically extracted in operations (such as mining, cutting, or pumping). (2) They are replaceable only by an act of nature.

The acquisition cost of a natural resource is the price needed to acquire the resource **and** prepare it for its intended use. For an already-discovered resource, such as an existing coal mine, cost is the price paid for the property.

The allocation of the cost of natural resources to expense in a rational and systematic manner over the resource’s useful life is called **depletion**. (That is, *depletion* is to natural resources as *depreciation* is to plant assets.) **Companies generally use the units-of-activity method** (learned earlier in the chapter) **to compute depletion**. The reason is that **depletion generally is a function of the units extracted during the year**.

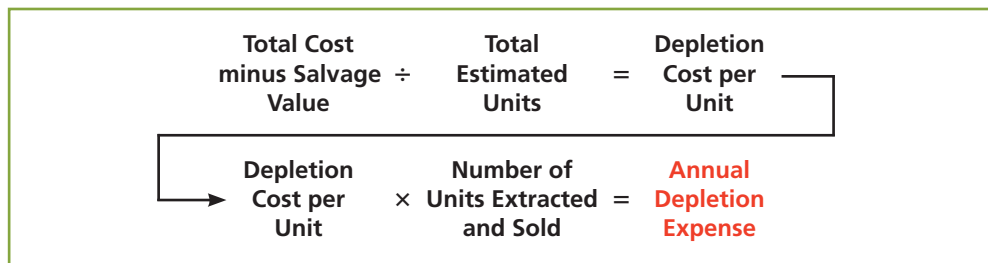

Under the units-of-activity method, companies divide the total cost of the natural resource minus salvage value by the number of units estimated to be in the resource. The result is a **depletion cost per unit of product**. They then multiply the depletion cost per unit by the number of units extracted and sold. The result is the **annual depletion expense**. Illustration 10-21 shows the formula to compute depletion expense.

### Study Objective [7]

Compute periodic depletion of natural resources.

### Illustration 10-21

Formula to compute depletion expense

### Ethics Note

Investors were stunned at news that **Royal Dutch/Shell Group** had significantly overstated its reported oil reserves—and perhaps had done so intentionally.

To illustrate, assume that Lane Coal Company invests \$5 million in a mine estimated to have 10 million tons of coal and no salvage value. In the first year, Lane extracts and sells 800,000 tons of coal. Using the formulas above, Lane computes the depletion expense as follows:

$$\$5,000,000 \div 10,000,000 = \$0.50 \text{ depletion cost per ton}$$

$$\$0.50 \times 800,000 = \$400,000 \text{ annual depletion expense}$$

Lane records depletion expense for the first year of operation as follows.

|         |  |                        |
|---------|--|------------------------|
| Dec. 31 | Depletion Expense<br>Accumulated Depletion<br>(To record depletion expense on coal deposits) | 400,000<br><br>400,000 |
|---------|--|------------------------|

|                   |   |   |   |    |
|-------------------|---|---|---|----|
| A                 | = | L | + | OE |
| -400,000 Exp      |   |   |   |    |
| -400,000          |   |   |   |    |
| <b>Cash Flows</b> |   |   |   |    |
| no effect         |   |   |   |    |

The company reports the account Depletion Expense as a part of the cost of producing the product. Accumulated Depletion is a contra-asset account, similar to accumulated depreciation. It is deducted from the cost of the natural resource in the balance sheet, as Illustration 10-22 shows.

| Lane Coal Company<br>Balance Sheet (partial) |                       |             |
|--|-----------------------|-------------|
| Coal mine                                    | \$5,000,000           |             |
| <b>Less: Accumulated depletion</b>           | <b><u>400,000</u></b> | \$4,600,000 |

**Illustration 10-22**  
Statement presentation of  
accumulated depletion

Many companies do not use an Accumulated Depletion account. In such cases, the company credits the amount of depletion directly to the natural resources account.

Sometimes, a company will extract natural resources in one accounting period but not sell them until a later period. In this case, the company does not expense the depletion until it sells the resource. It reports the amount not sold as inventory in the current assets section.

## SECTION 3 INTANGIBLE ASSETS

**Intangible assets** are rights, privileges, and competitive advantages that result from the ownership of long-lived assets that do not possess physical substance. Evidence of intangibles may exist in the form of contracts or licenses. Intangibles may arise from the following sources:

1. Government grants, such as patents, copyrights, licenses, trademarks, and trade names.
2. Acquisition of another business, in which the purchase price includes a payment for *goodwill*.
3. Private monopolistic arrangements arising from contractual agreements, such as franchises and leases.

Some widely known intangibles are **Microsoft's** patents, **McDonald's** franchises, **Apple's** trade name iPod, J.K. Rowling's copyrights on the Harry Potter books, and the trademark **Rent-A-Wreck** in the Feature Story.

## Accounting for Intangible Assets

Companies record intangible assets at cost. Intangibles are categorized as having either a limited life or an indefinite life. If an intangible has a **limited life**, the company allocates its cost over the asset's useful life using a process similar to depreciation. The process of allocating the cost of intangibles is referred to as **amortization**. The cost of intangible assets with **indefinite lives should not be amortized**.

### Study Objective [8]

Explain the basic issues related to accounting for intangible assets.

**Helpful Hint**

*Amortization* is to intangibles what *depreciation* is to plant assets and *depletion* is to natural resources.

|                   |   |   |   |            |
|-------------------|---|---|---|------------|
| A                 | = | L | + | OE         |
| -7,500            |   |   |   | -7,500 Exp |
| <b>Cash Flows</b> |   |   |   |            |
| no effect         |   |   |   |            |

To record amortization of an intangible asset, a company increases (debits) Amortization Expense, and decreases (credits) the specific intangible asset. (Unlike depreciation, no contra account, such as Accumulated Amortization, is usually used.)

Intangible assets are typically amortized on a straight-line basis. For example, the legal life of a patent is 20 years. Companies **amortize the cost of a patent over its 20-year life or its useful life, whichever is shorter**. To illustrate the computation of patent amortization, assume that National Labs purchases a patent at a cost of \$60,000. If National estimates the useful life of the patent to be eight years, the annual amortization expense is \$7,500 (\$60,000 ÷ 8). National records the annual amortization as follows.

|         |  |       |       |
|---------|--|-------|-------|
| Dec. 31 | Amortization Expense<br>Patents<br>(To record patent amortization) | 7,500 | 7,500 |
|---------|--|-------|-------|

Companies classify Amortization Expense as an operating expense in the income statement.

There is a difference between intangible assets and plant assets in determining cost. For plant assets, cost includes both the purchase price of the asset and the costs incurred in designing and constructing the asset. In contrast, cost for an intangible asset includes **only the purchase price**. Companies expense any costs incurred in developing an intangible asset.

**Patents**

A **patent** is an exclusive right issued by the U.S. Patent Office that enables the recipient to manufacture, sell, or otherwise control an invention for a period of 20 years from the date of the grant. A patent is nonrenewable. But companies can extend the legal life of a patent by obtaining new patents for improvements or other changes in the basic design. **The initial cost of a patent is the cash or cash equivalent price paid to acquire the patent.**

The saying, “A patent is only as good as the money you’re prepared to spend defending it” is very true. Most patents are subject to litigation by competitors. Any legal costs an owner incurs in successfully defending a patent in an infringement suit are considered necessary to establish the patent’s validity. **The owner adds those costs to the Patents account and amortizes them over the remaining life of the patent.**

**The patent holder amortizes the cost of a patent over its 20-year legal life or its useful life, whichever is shorter.** Companies consider obsolescence and inadequacy in determining useful life. These factors may cause a patent to become economically ineffective before the end of its legal life.

**Copyrights**

The federal government grants **copyrights** which give the owner the exclusive right to reproduce and sell an artistic or published work. Copyrights extend for the life of the creator plus 70 years. The cost of a copyright is the **cost of acquiring and defending it**. The cost may be only the small fee paid to the U.S. Copyright Office. Or it may amount to much more if an infringement suit is involved.

The useful life of a copyright generally is significantly shorter than its legal life. Therefore, copyrights usually are amortized over a relatively short period of time.

**Trademarks and Trade Names**

A **trademark** or **trade name** is a word, phrase, jingle, or symbol that identifies a particular enterprise or product. Trade names like Wheaties, Monopoly, Big Mac,

Kleenex, Coca-Cola, and Jeep create immediate product identification. They also generally enhance the sale of the product. The creator or original user may obtain exclusive legal right to the trademark or trade name by registering it with the U.S. Patent Office. Such registration provides 20 years of protection. The registration may be renewed indefinitely as long as the trademark or trade name is in use.

If a company purchases the trademark or trade name, its cost is the purchase price. If a company develops and maintains the trademark or trade name, any costs related to these activities are expensed as incurred. Because trademarks and trade names have indefinite lives, they are not amortized.

## Franchises and Licenses

When you fill up your tank at the corner **Shell** station, eat lunch at **Subway**, or rent a car from **Rent-A-Wreck**, you are dealing with franchises. A **franchise** is a contractual arrangement between a franchisor and a franchisee. The franchisor grants the franchisee the right to sell certain products, provide specific services, or use certain trademarks or trade names, usually within a designated geographical area.

Another type of franchise is that entered into between a governmental body (commonly municipalities) and a company. This franchise permits the company to use public property in performing its services. Examples are the use of city streets for a bus line or taxi service, use of public land for telephone and electric lines, and the use of airwaves for radio or TV broadcasting. Such operating rights are referred to as **licenses**. Franchises and licenses may be granted for a definite period of time, an indefinite period, or perpetually.

**When a company can identify costs with the purchase of a franchise or license, it should recognize an intangible asset.** Companies should amortize the cost of a limited-life franchise (or license) over its useful life. If the life is indefinite, the cost is not amortized. Annual payments made under a franchise agreement are recorded as **operating expenses** in the period in which they are incurred.

## Goodwill

Usually, the largest intangible asset that appears on a company's balance sheet is goodwill. **Goodwill** represents the value of all favorable attributes that relate to a company that are not attributable to any other specific asset. These include exceptional management, desirable location, good customer relations, skilled employees, high-quality products, and harmonious relations with labor unions. Goodwill is unique: Unlike assets such as investments and plant assets, which can be sold *individually* in the marketplace, goodwill can be identified only with the business as a whole.

If goodwill can be identified only with the business as a whole, how can its amount be determined? One could try to put a dollar value on the factors listed above (exceptional management, desirable location, and so on). But the results would be very subjective, and such subjective valuations would not contribute to the reliability of financial statements. **Therefore, companies record goodwill only when an entire business is purchased. In that case, goodwill is the excess of cost over the fair value of the net assets (assets less liabilities) acquired.**

In recording the purchase of a business, the company debits (increases) the identifiable acquired assets, and credits liabilities at their fair values, credits cash for the purchase price, and records the difference as goodwill. **Goodwill is not amortized** because it is considered to have an indefinite life. Companies report goodwill in the balance sheet under intangible assets.

## INTERNATIONAL INSIGHT

**Should Companies Write Up Goodwill?**

**Softbank Corp.** is Japan's biggest Internet company. At one time, it boosted the profit margin of its mobile-phone unit from 3.2% to 11.2% through what appeared to some as accounting tricks. What did it do? It wrote down the value of its mobile-phone-unit assets by half. This would normally result in a huge loss. But rather than take a loss, the company wrote up goodwill by the same amount. How did this move increase earnings? The assets were being depreciated over 10 years, but the company amortizes goodwill over 20 years. (Amortization of goodwill was allowed under the accounting standards it followed at that time.) While the new treatment did not break any rules, the company was criticized by investors for not providing sufficient justification or a detailed explanation for the sudden shift in policy.

Source: Andrew Morse and Yukari Iwatani Kane, "Softbank's Accounting Shift Raises Eyebrows," *Wall Street Journal* (August 28, 2007), p. C1.

**?** Do you think that this treatment would be allowed under U.S. GAAP? (See page 503.)

## Research and Development Costs

### Helpful Hint

Research and development (R&D) costs are not intangible assets. But because they may lead to patents and copyrights, we discuss them in this section.

**Research and development costs** are expenditures that may lead to patents, copyrights, new processes, and new products. Many companies spend considerable sums of money on research and development (R&D). For example, in a recent year **IBM** spent over \$5.1 billion on R&D.

Research and development costs present accounting problems. For one thing, it is sometimes difficult to assign the costs to specific projects. Also, there are uncertainties in identifying the extent and timing of future benefits. As a result, companies usually record R&D costs **as an expense when incurred**, whether the research and development is successful or not.

To illustrate, assume that Laser Scanner Company spent \$3 million on R&D that resulted in two highly successful patents. It spent \$20,000 on legal fees for the patents. The company would add the lawyers' fees to the patent account. The R&D costs, however, cannot be included in the cost of the patent. Instead, the company would record the R&D costs as an expense when incurred.

Many disagree with this accounting approach. They argue that expensing R&D costs leads to understated assets and net income. Others, however, argue that capitalizing these costs will lead to highly speculative assets on the balance sheet. Who is right is difficult to determine.

## Do it!

### Classification Concepts

Match the statement with the term most directly associated with it.

Copyrights

Depletion

Intangible assets

Franchises

Research and development costs

- \_\_\_\_\_ The allocation of the cost of a natural resource to expense in a rational and systematic manner.
- \_\_\_\_\_ Rights, privileges, and competitive advantages that result from the ownership of long-lived assets that do not possess physical substance.

3. \_\_\_\_\_ An exclusive right granted by the federal government to reproduce and sell an artistic or published work.
4. \_\_\_\_\_ A right to sell certain products or services or to use certain trademarks or trade names within a designated geographic area.
5. \_\_\_\_\_ Costs incurred by a company that often lead to patents or new products. These costs must be expensed as incurred.

**action plan**

- ✓ Know that the accounting for intangibles often depends on whether the item has a finite or indefinite life.
- ✓ Recognize the many similarities and differences between the accounting for natural resources, plant assets, and intangible assets.

**Solution**

1. Depletion
2. Intangible assets
3. Copyrights
4. Franchises
5. Research and development costs

## Statement Presentation and Analysis

### Presentation

Usually, companies combine plant assets and natural resources under “Property, plant, and equipment” in the balance sheet. They show intangibles separately. Companies disclose either in the balance sheet or the notes the balances of the major classes of assets, such as land, buildings, and equipment, and accumulated depreciation by major classes or in total. In addition, they should describe the depreciation and amortization methods that were used, as well as disclose the amount of depreciation and amortization expense for the period.

Illustration 10-23 shows a typical financial statement presentation of property, plant, and equipment and intangibles for **The Procter & Gamble Company**

### Study Objective [9]

Indicate how plant assets, natural resources, and intangible assets are reported.

|   | June 30         |                 |
|---|-----------------|-----------------|
|   | 2009            | 2008            |
| Property, plant, and equipment              |                 |                 |
| Buildings                                   | \$ 6,724        | \$ 7,052        |
| Machinery and equipment                     | 29,042          | 30,145          |
| Land  | 885             | 889             |
|   | <u>36,651</u>   | <u>38,086</u>   |
| Accumulated depreciation                    | (17,189)        | (17,446)        |
| Net property, plant, and equipment          | 19,462          | 20,640          |
| Goodwill and other intangible assets        |                 |                 |
| Goodwill                                    | 56,512          | 59,767          |
| Trademarks and other intangible assets, net | 32,606          | 34,233          |
| Net goodwill and other intangible assets    | <u>\$89,118</u> | <u>\$94,000</u> |

### Illustration 10-23

P&G's presentation of property, plant, and equipment, and intangible assets

(P&G) in its 2009 balance sheet. The notes to P&G's financial statements present greater details about the accounting for its long-term tangible and intangible assets.

Illustration 10-24 shows another comprehensive presentation of property, plant, and equipment, from the balance sheet of **Owens-Illinois**. The notes to the financial statements of Owens-Illinois identify the major classes of property, plant, and equipment. They also indicate that depreciation and amortization are by the straight-line method, and depletion is by the units-of-activity method.

#### Illustration 10-24

Owens-Illinois' presentation of property, plant, and equipment, and intangible assets

|  |                |              |              |
|--|----------------|--------------|--------------|
| Property, plant, and equipment                   |                |              |              |
| Timberlands, at cost, less accumulated depletion |                | \$ 95.4      |              |
| Buildings and equipment, at cost                 | \$2,207.1      |              |              |
| Less: Accumulated depreciation                   | <u>1,229.0</u> | <u>978.1</u> |              |
| Total property, plant, and equipment             |                |              | \$1,073.5    |
| Intangibles                                      |                |              |              |
| Patents  |                |              | <u>410.0</u> |
| Total  |                |              | \$1,483.5    |

### Analysis

Using ratios, we can analyze how efficiently a company uses its assets to generate sales. The **asset turnover ratio** analyzes the productivity of a company's assets. It tells us how many dollars of sales a company generates for each dollar invested in assets. This ratio is computed by dividing net sales by average total assets for the period. The formula in Illustration 10-25 shows the computation of the asset turnover ratio for **The Procter & Gamble Company**. P&G's net sales for 2009 were \$79,029 million. Its total ending assets were \$134,833 million, and beginning assets were \$143,992 million.

#### Illustration 10-25

Asset turnover formula and computation

|           |   |                                   |   |                      |
|-----------|---|-----------------------------------|---|----------------------|
| Net Sales | ÷ | Average Total Assets              | = | Asset Turnover Ratio |
| \$79,029  | ÷ | $\frac{\$134,833 + \$143,992}{2}$ | = | .57 times            |

Thus, each dollar invested in assets produced \$0.57 in sales for P&G. If a company is using its assets efficiently, each dollar of assets will create a high amount of sales. This ratio varies greatly among different industries—from those that are asset intensive (utilities) to those that are not (services).

## COMPREHENSIVE

## Do it! 1

DuPage Company purchases a factory machine at a cost of \$18,000 on January 1, 2012. DuPage expects the machine to have a salvage value of \$2,000 at the end of its 4-year useful life.

During its useful life, the machine is expected to be used 160,000 hours. Actual annual hourly use was: 2012, 40,000; 2013, 60,000; 2014, 35,000; and 2015, 25,000.

## Instructions

Prepare depreciation schedules for the following methods: (a) straight-line, (b) units-of-activity, and (c) declining-balance using double the straight-line rate.

## action plan

- ✓ Under the straight-line method, apply the depreciation rate to depreciable cost.
- ✓ Under the units-of-activity method, compute the depreciation cost per unit by dividing depreciable cost by total units of activity.
- ✓ Under the declining-balance method, apply the depreciation rate to **book value** at the beginning of the year.

## Solution to Comprehensive Do it! 1

(a)

## Straight-Line Method

| Year | Computation          |   |                      | = | Annual<br>Depreciation<br>Expense | End of Year                 |               |
|------|----------------------|---|----------------------|---|-----------------------------------|-----------------------------|---------------|
|      | Depreciable<br>Cost* | × | Depreciation<br>Rate |   |                                   | Accumulated<br>Depreciation | Book<br>Value |
| 2012 | \$16,000             |   | 25%                  |   | \$4,000                           | \$4,000                     | \$14,000**    |
| 2013 | 16,000               |   | 25%                  |   | 4,000                             | 8,000                       | 10,000        |
| 2014 | 16,000               |   | 25%                  |   | 4,000                             | 12,000                      | 6,000         |
| 2015 | 16,000               |   | 25%                  |   | 4,000                             | 16,000                      | 2,000         |

\*\$18,000 – \$2,000.

\*\*\$18,000 – \$4,000.

(b)

## Units-of-Activity Method

| Year | Computation          |   |                           | = | Annual<br>Depreciation<br>Expense | End of Year                 |               |
|------|----------------------|---|---------------------------|---|-----------------------------------|-----------------------------|---------------|
|      | Units of<br>Activity | × | Depreciation<br>Cost/Unit |   |                                   | Accumulated<br>Depreciation | Book<br>Value |
| 2012 | 40,000               |   | \$0.10*                   |   | \$4,000                           | \$4,000                     | \$14,000      |
| 2013 | 60,000               |   | 0.10                      |   | 6,000                             | 10,000                      | 8,000         |
| 2014 | 35,000               |   | 0.10                      |   | 3,500                             | 13,500                      | 4,500         |
| 2015 | 25,000               |   | 0.10                      |   | 2,500                             | 16,000                      | 2,000         |

\*( $\$18,000 - \$2,000$ )  $\div$  160,000.

(c)

## Declining-Balance Method

| Year | Computation                        |   |                       | = | Annual<br>Depreciation<br>Expense | End of Year                 |               |
|------|------------------------------------|---|-----------------------|---|-----------------------------------|-----------------------------|---------------|
|      | Book Value<br>Beginning of<br>Year | × | Depreciation<br>Rate* |   |                                   | Accumulated<br>Depreciation | Book<br>Value |
| 2012 | \$18,000                           |   | 50%                   |   | \$9,000                           | \$9,000                     | \$9,000       |
| 2013 | 9,000                              |   | 50%                   |   | 4,500                             | 13,500                      | 4,500         |
| 2014 | 4,500                              |   | 50%                   |   | 2,250                             | 15,750                      | 2,250         |
| 2015 | 2,250                              |   | 50%                   |   | 250**                             | 16,000                      | 2,000         |

\* $\frac{1}{4} \times 2$ .

\*\*Adjusted to \$250 because ending book value should not be less than expected salvage value.

## COMPREHENSIVE

## Do it! 2

On January 1, 2012, Skyline Limousine Co. purchased a limo at an acquisition cost of \$28,000. The vehicle has been depreciated by the straight-line method using a 4-year service life and a \$4,000 salvage value. The company's fiscal year ends on December 31.

## Instructions

Prepare the journal entry or entries to record the disposal of the limousine assuming that it was:

- (a) Retired and scrapped with no salvage value on January 1, 2016.  
 (b) Sold for \$5,000 on July 1, 2015.

## action plan

- ✓ At the time of disposal, determine the book value of the asset.
- ✓ Recognize any gain or loss from disposal of the asset.
- ✓ Remove the book value of the asset from the records by debiting Accumulated Depreciation for the total depreciation to date of disposal and crediting the asset account for the cost of the asset.

## Solution to Comprehensive Do it! 2

|     |        |  |        |        |
|-----|--------|--|--------|--------|
| (a) | 1/1/16 | Accumulated Depreciation—Equipment   | 24,000 | 28,000 |
|     |        | Loss on Disposal of Plant Assets<br>Equipment<br>(To record retirement of limousine) | 4,000  |        |

## Summary of Study Objectives

**[1] Describe how the cost principle applies to plant assets.** The cost of plant assets includes all expenditures necessary to acquire the asset and make it ready for its intended use. Cost is measured by the cash or cash equivalent price paid.

**[2] Explain the concept of depreciation.** Depreciation is the allocation of the cost of a plant asset to expense over its useful (service) life in a rational and systematic manner. Depreciation is not a process of valuation, nor is it a process that results in an accumulation of cash.

**[3] Compute periodic depreciation using different methods.** Three depreciation methods are:

| Method            | Effect on Annual Depreciation | Formula  |
|-------------------|-------------------------------|--|
| Straight-line     | Constant amount               | Depreciable cost ÷ Useful life (in years)                      |
| Units-of-activity | Varying amount                | Depreciation cost per unit × Units of activity during the year |
| Declining-balance | Decreasing amount             | Book value at beginning of year × Declining-balance rate       |

**[4] Describe the procedure for revising periodic depreciation.** Companies make revisions of periodic depreciation in present and future periods, not retroactively. They determine the new annual depreciation by dividing the depreciable cost at the time of the revision by the remaining useful life.

**[5] Distinguish between revenue and capital expenditures, and explain the entries for each.** Companies incur revenue expenditures to maintain the operating efficiency and productive life of an asset. They debit these expenditures to Maintenance and Repairs Expense as incurred. Capital expenditures increase the operating efficiency, productive capacity, or expected useful life of the asset. Companies generally debit these expenditures to the plant asset affected.

**[6] Explain how to account for the disposal of a plant asset.** The accounting for disposal of a plant asset through retirement or sale is as follows.

- (a) Eliminate the book value of the plant asset at the date of disposal.  
 (b) Record cash proceeds, if any.  
 (c) Account for the difference between the book value and the cash proceeds as a gain or loss on disposal.

**[7] Compute periodic depletion of natural resources.**

Companies compute depletion cost per unit by dividing the total cost of the natural resource minus salvage value by the number of units estimated to be in the resource. They then multiply the depletion cost per unit by the number of units extracted and sold.

**[8] Explain the basic issues related to accounting for intangible assets.**

The process of allocating the cost of an intangible asset is referred to as amortization. The cost of intangible assets with indefinite lives are not amortized. Companies normally use the straight-line method for amortizing intangible assets.

**[9] Indicate how plant assets, natural resources, and intangible assets are reported.**

Companies usually

combine plant assets and natural resources under property, plant, and equipment; they show intangibles separately under intangible assets. Either within the balance sheet or in the notes, companies should disclose the balances of the major classes of assets, such as land, buildings, and equipment, and accumulated depreciation by major classes or in total. They also should describe the depreciation and amortization methods used, and should disclose the amount of depreciation and amortization expense for the period. The asset turnover ratio measures the productivity of a company's assets in generating sales.

## Glossary

**Accelerated-depreciation method** Depreciation method that produces higher depreciation expense in the early years than in the later years. (p. 467).

**Additions and improvements** Costs incurred to increase the operating efficiency, productive capacity, or useful life of a plant asset. (p. 470).

**Amortization** The allocation of the cost of an intangible asset to expense over its useful life in a systematic and rational manner. (p. 475).

**Asset turnover ratio** A measure of how efficiently a company uses its assets to generate sales; calculated as net sales divided by average total assets. (p. 480).

**Capital expenditures** Expenditures that increase the company's investment in productive facilities. (p. 470).

**Copyrights** Exclusive grant from the federal government that allows the owner to reproduce and sell an artistic or published work. (p. 476).

**Declining-balance method** Depreciation method that applies a constant rate to the declining book value of the asset and produces a decreasing annual depreciation expense over the useful life of the asset. (p. 466).

**Depletion** The allocation of the cost of a natural resource to expense in a rational and systematic manner over the resource's useful life. (p. 474).

**Depreciation** The process of allocating to expense the cost of a plant asset over its useful (service) life in a rational and systematic manner. (p. 462).

**Depreciable cost** The cost of a plant asset less its salvage value. (p. 464).

**Franchise (license)** A contractual arrangement under which the franchisor grants the franchisee the right to sell certain products, provide specific services, or use certain trademarks or trade names, usually within a designated geographical area. (p. 477).

**Going-concern assumption** States that the company will continue in operation for the foreseeable future. (p. 463).

**Goodwill** The value of all favorable attributes that relate to a company that is not attributable to any other specific asset. (p. 477).

**Intangible assets** Rights, privileges, and competitive advantages that result from the ownership of long-lived assets that do not possess physical substance. (p. 475).

**Licenses** Operating rights to use public property, granted to a business by a governmental agency. (p. 477).

**Materiality principle** If an item would not make a difference in decision making, a company does not have to follow GAAP in reporting it. (p. 470).

**Natural resources** Assets that consist of standing timber and underground deposits of oil, gas, or minerals. (p. 474).

**Ordinary repairs** Expenditures to maintain the operating efficiency and productive life of the unit. (p. 470).

**Patent** An exclusive right issued by the U.S. Patent Office that enables the recipient to manufacture, sell, or otherwise control an invention for a period of 20 years from the date of the grant. (p. 476).

**Plant assets** Tangible resources that are used in the operations of the business and are not intended for sale to customers. (p. 458).

**Research and development (R&D) costs** Expenditures that may lead to patents, copyrights, new processes, or new products. (p. 478).

**Revenue expenditures** Expenditures that are immediately charged against revenues as an expense. (p. 470).

**Salvage value** An estimate of an asset's value at the end of its useful life. (p. 463).

**Straight-line method** Depreciation method in which periodic depreciation is the same for each year of the asset's useful life. (p. 464).

**Trademark (trade name)** A word, phrase, jingle, or symbol that identifies a particular enterprise or product. (p. 476).

**Units-of-activity method** Depreciation method in which useful life is expressed in terms of the total units of production or use expected from an asset. (p. 465).

**Useful life** An estimate of the expected productive life, also called service life, of an asset. (p. 463).

# APPENDIX 10A

## Exchange of Plant Assets

### Study Objective [10]

Explain how to account for the exchange of plant assets.

Ordinarily, companies record a gain or loss on the exchange of plant assets. The rationale for recognizing a gain or loss is that most exchanges have **commercial substance**. An exchange has commercial substance if the future cash flows change as a result of the exchange.

To illustrate, Ramos Co. exchanges some of its equipment for land held by Brodhead Inc. It is likely that the timing and amount of the cash flows arising from the land will differ significantly from the cash flows arising from the equipment. As a result, both Ramos and Brodhead are in different economic positions. Therefore **the exchange has commercial substance**, and the companies recognize a gain or loss in the exchange. Because most exchanges have commercial substance (even when similar assets are exchanged), we illustrate only this type of situation, for both a loss and a gain.

### Loss Treatment

To illustrate an exchange that results in a loss, assume that Roland Company exchanged a set of used trucks plus cash for a new semi-truck. The used trucks have a combined book value of \$42,000 (cost \$64,000 less \$22,000 accumulated depreciation). Roland’s purchasing agent, experienced in the second-hand market, indicates that the used trucks have a fair value of \$26,000. In addition to the trucks, Roland must pay \$17,000 for the semi-truck. Roland computes the cost of the semi-truck as follows.

**Illustration 10A-1**  
Cost of semi-truck

|                           |                 |
|---------------------------|-----------------|
| Fair value of used trucks | \$26,000        |
| Cash paid                 | <u>17,000</u>   |
| Cost of semi-truck        | <u>\$43,000</u> |

Roland incurs a loss on disposal of plant assets of \$16,000 on this exchange. The reason is that the book value of the used trucks is greater than the fair value of these trucks. The computation is as follows.

**Illustration 10A-2**  
Computation of loss on disposal

|   |                        |
|---|------------------------|
| Book value of used trucks (\$64,000 – \$22,000) | \$42,000               |
| Fair value of used trucks                       | <u>26,000</u>          |
| <b>Loss on disposal of plant assets</b>         | <b><u>\$16,000</u></b> |

In recording an exchange at a loss, three steps are required: (1) Eliminate the book value of the asset given up, (2) record the cost of the asset acquired, and (3) recognize the loss on disposal of plant assets. Roland Company thus records the exchange on the loss as follows.

|                   |   |             |   |           |
|-------------------|---|-------------|---|-----------|
| <b>A</b>          | = | <b>L</b>    | + | <b>OE</b> |
| +43,000           |   |             |   |           |
| +22,000           |   |             |   |           |
|                   |   | -16,000 Exp |   |           |
| -64,000           |   |             |   |           |
| -17,000           |   |             |   |           |
| <b>Cash Flows</b> |   |             |   |           |
| -17,000           |   |             |   |           |

|                                    |        |        |
|------------------------------------|--------|--------|
| Equipment (new)                    | 43,000 |        |
| Accumulated Depreciation—Equipment | 22,000 |        |
| Loss on Disposal of Plant Assets   | 16,000 |        |
| Equipment (old)                    |        | 64,000 |
| Cash                               |        | 17,000 |

(To record exchange of used trucks for semi-truck)

## Gain Treatment

To illustrate a gain situation, assume that Mark Express Delivery decides to exchange its old delivery equipment plus cash of \$3,000 for new delivery equipment. The book value of the old delivery equipment is \$12,000 (cost \$40,000 less accumulated depreciation \$28,000). The fair value of the old delivery equipment is \$19,000.

The cost of the new asset is the fair value of the old asset exchanged plus any cash paid (or other consideration given up). The cost of the new delivery equipment is \$22,000, computed as follows.

|                                       |                        |
|---------------------------------------|------------------------|
| Fair value of old delivery equipment  | \$19,000               |
| Cash paid                             | <u>3,000</u>           |
| <b>Cost of new delivery equipment</b> | <b><u>\$22,000</u></b> |

**Illustration 10A-3**  
Cost of new delivery equipment

A gain results when the fair value of the old delivery equipment is greater than its book value. For Mark Express, there is a gain of \$7,000 on disposal of plant assets, computed as follows.

|  |                        |
|--|------------------------|
| Fair value of old delivery equipment                       | \$19,000               |
| Book value of old delivery equipment (\$40,000 – \$28,000) | <u>12,000</u>          |
| <b>Gain on disposal of plant assets</b>                    | <b><u>\$ 7,000</u></b> |

**Illustration 10A-4**  
Computation of gain on disposal

Mark Express Delivery records the exchange as follows.

|   |        |        |
|---|--------|--------|
| Equipment (new)   | 22,000 |        |
| Accumulated Depreciation—Equipment (old)                                  | 28,000 |        |
| Equipment (old)   |        | 40,000 |
| Gain on Disposal of Plant Assets  |        | 7,000  |
| Cash  |        | 3,000  |
| (To record exchange of old delivery equipment for new delivery equipment) |        |        |

|                   |   |          |   |            |
|-------------------|---|----------|---|------------|
| <b>A</b>          | = | <b>L</b> | + | <b>OE</b>  |
| +22,000           |   |          |   |            |
| +28,000           |   |          |   |            |
| -40,000           |   |          |   |            |
|                   |   |          |   | +7,000 Rev |
| -3,000            |   |          |   |            |
| <b>Cash Flows</b> |   |          |   |            |
| -3,000            |   |          |   |            |

In recording an exchange at a gain, the following three steps are involved: (1) Eliminate the book value of the asset given up, (2) record the cost of the asset acquired, and (3) recognize the gain on disposal of plant assets. Accounting for exchanges of plant assets becomes more complex if the transaction does not have commercial substance. This issue is discussed in more advanced accounting classes.

## Summary of Study Objective for Appendix 10A

**[10] Explain how to account for the exchange of plant assets.** Ordinarily, companies record a gain or loss on the exchange of plant assets. The rationale for recognizing a

gain or loss is that most exchanges have commercial substance. An exchange has commercial substance if the future cash flows change as a result of the exchange.

- 20.** McDonald's Corporation reports total average assets of \$28.9 billion and net sales of \$20.5 billion. What is the company's asset turnover ratio?
- 21.** Resco Corporation and Yapan Corporation operate in the same industry. Resco uses the straight-line method to account for depreciation; Yapan uses an accelerated method. Explain what complications might arise in trying to compare the results of these two companies.
- 22.** Lopez Corporation uses straight-line depreciation for financial reporting purposes but an accelerated method for tax purposes. Is it acceptable to use different methods for the two purposes? What is Lopez's motivation for doing this?
- 23.** You are comparing two companies in the same industry. You have determined that May Corp. depreciates its plant assets over a 40-year life, whereas Won Corp. depreciates its plant assets over a 20-year life. Discuss the implications this has for comparing the results of the two companies.
- 24.** Wade Company is doing significant work to revitalize its warehouses. It is not sure whether it should capitalize these costs or expense them. What are the implications for current-year net income and future net income of expensing versus capitalizing these costs?
- 25.**  **PEPSICO** What classifications and amounts are shown in PepsiCo's Note 4 to explain its total property, plant, and equipment (net) of \$12,671 million?
- 26.** When assets are exchanged in a transaction involving commercial substance, how is the gain or loss on disposal of plant assets computed?
- \*27.** Tatum Refrigeration Company trades in an old machine on a new model when the fair value of the old machine is greater than its book value. The transaction has commercial substance. Should Tatum recognize a gain on disposal of plant assets? If the fair value of the old machine is less than its book value, should Tatum recognize a loss on disposal of plant assets?

## Brief Exercises

*Determine the cost of land.*

(SO 1)

**BE10-1** The following expenditures were incurred by Krunk Company in purchasing land: cash price \$70,000, accrued taxes \$3,000, attorneys' fees \$2,500, real estate broker's commission \$2,000, and clearing and grading \$3,500. What is the cost of the land?

*Determine the cost of a truck.*

(SO 1)

**BE10-2** Mick Ferguson Company incurs the following expenditures in purchasing a truck: cash price \$30,000, accident insurance \$2,000, sales taxes \$1,500, motor vehicle license \$100, and painting and lettering \$400. What is the cost of the truck?

*Compute straight-line depreciation.*

(SO 3)

**BE10-3** Tomorry Company acquires a delivery truck at a cost of \$42,000. The truck is expected to have a salvage value of \$6,000 at the end of its 4-year useful life. Compute annual depreciation for the first and second years using the straight-line method.

*Compute depreciation and evaluate treatment.*

(SO 3)

**BE10-4** String Dance Company purchased land and a building on January 1, 2012. Management's best estimate of the value of the land was \$100,000 and of the building \$200,000. But management told the accounting department to record the land at \$220,000 and the building at \$80,000. The building is being depreciated on a straight-line basis over 20 years with no salvage value. Why do you suppose management requested this accounting treatment? Is it ethical?

*Compute declining-balance depreciation.*

(SO 3)

**BE10-5** Depreciation information for Tomorry Company is given in BE10-3. Assuming the declining-balance depreciation rate is double the straight-line rate, compute annual depreciation for the first and second years under the declining-balance method.

*Compute depreciation using the units-of-activity method.*

(SO 3)

**BE10-6** Koman Taxi Service uses the units-of-activity method in computing depreciation on its taxicabs. Each cab is expected to be driven 150,000 miles. Taxi no. 10 cost \$33,500 and is expected to have a salvage value of \$500. Taxi no. 10 is driven 30,000 miles in year 1 and 20,000 miles in year 2. Compute the depreciation for each year.

*Compute revised depreciation.*

(SO 4)

**BE10-7** On January 1, 2012, the Dancing Gorillas Company ledger shows Equipment \$29,000 and Accumulated Depreciation—Equipment \$9,000. The depreciation resulted from using the straight-line method with a useful life of 10 years and salvage value of \$2,000. On this date, the company concludes that the equipment has a remaining useful life of only 4 years with the same salvage value. Compute the revised annual depreciation.

*Prepare entries for delivery truck costs.*

(SO 5)

**BE10-8** Euro Guy Company had the following two transactions related to its delivery truck.

1. Paid \$45 for an oil change.
2. Paid \$400 to install special gear unit, which increases the operating efficiency of the truck.

Prepare Euro Guy's journal entries to record these two transactions.

*Prepare entries for disposal by retirement.*

(SO 6)

**BE10-9** Prepare journal entries to record the following.

- (a) Twitter Tracker Company retires its delivery equipment, which cost \$41,000. Accumulated depreciation is also \$41,000 on this delivery equipment. No salvage value is received.
- (b) Assume the same information as (a), except that accumulated depreciation is \$39,000, instead of \$41,000, on the delivery equipment.

**BE10-10** Wing Pang Company sells equipment on September 30, 2012, for \$20,000 cash. The equipment originally cost \$72,000 and as of January 1, 2012, had accumulated depreciation of \$42,000. Depreciation for the first 9 months of 2012 is \$5,250. Prepare the journal entries to (a) update depreciation to September 30, 2012, and (b) record the sale of the equipment.

*Prepare entries for disposal by sale.*

(SO 6)

**BE10-11** Deon Cole Mining Co. purchased for \$7 million a mine that is estimated to have 35 million tons of ore and no salvage value. In the first year, 6 million tons of ore are extracted and sold.

*Prepare depletion expense entry and balance sheet presentation for natural resources.*

(SO 7)

(a) Prepare the journal entry to record depletion expense for the first year.

(b) Show how this mine is reported on the balance sheet at the end of the first year.

**BE10-12** Pevensie Company purchases a patent for \$120,000 on January 2, 2012. Its estimated useful life is 10 years.

*Prepare amortization expense entry and balance sheet presentation for intangibles.*

(SO 8)

(a) Prepare the journal entry to record amortization expense for the first year.

(b) Show how this patent is reported on the balance sheet at the end of the first year.

**BE10-13** Information related to plant assets, natural resources, and intangibles at the end of 2012 for Lucy Company is as follows: buildings \$1,100,000; accumulated depreciation—buildings \$650,000; goodwill \$410,000; coal mine \$500,000; accumulated depletion—coal mine \$108,000. Prepare a partial balance sheet of Lucy Company for these items.

*Classify long-lived assets on balance sheet.*

(SO 9)

**BE10-14** In its 2009 annual report, Target reported beginning total assets of \$44.1 billion; ending total assets of \$44.5 billion; and net sales of \$63.4 billion. Compute Target's asset turnover ratio.

*Analyze long-lived assets.*

(SO 9)

\***BE10-15** Edmund Company exchanges old delivery equipment for new delivery equipment. The book value of the old delivery equipment is \$31,000 (cost \$61,000 less accumulated depreciation \$30,000). Its fair value is \$19,000, and cash of \$5,000 is paid. Prepare the entry to record the exchange, assuming the transaction has commercial substance.

*Prepare entry for disposal by exchange.*

(SO 10)

\***BE10-16** Assume the same information as BE10-15, except that the fair value of the old delivery equipment is \$38,000. Prepare the entry to record the exchange.

*Prepare entry for disposal by exchange.*

(SO 10)

## Do it! Review

**Do it! 10-1** Henley Company purchased a delivery truck. The total cash payment was \$27,900, including the following items.

*Explain accounting for cost of plant assets.*

(SO 1)

|                                  |                 |
|----------------------------------|-----------------|
| Negotiated purchase price        | \$24,000        |
| Installation of special shelving | 1,100           |
| Painting and lettering           | 900             |
| Motor vehicle license            | 100             |
| Annual insurance policy          | 500             |
| Sales tax                        | 1,300           |
| Total paid                       | <u>\$27,900</u> |

Explain how each of these costs would be accounted for.

**Do it! 10-2** On January 1, 2012, Skandar Country Club purchased a new riding mower for \$15,000. The mower is expected to have an 8-year life with a \$1,000 salvage value. What journal entry would Skandar make at December 31, 2012, if it uses straight-line depreciation?

*Calculate depreciation expense and make journal entry.*

(SO 2)

**Do it! 10-3** Whistler Corporation purchased a piece of equipment for \$50,000. It estimated an 8-year life and \$2,000 salvage value. At the end of year four (before the depreciation adjustment), it estimated the new total life to be 10 years and the new salvage value to be \$4,000. Compute the revised depreciation.

*Calculate revised depreciation.*

(SO 4)

**Do it! 10-4** Keynes Manufacturing has old equipment that cost \$50,000. The equipment has accumulated depreciation of \$28,000 and a fair value of \$26,000. Keynes has decided to sell the equipment.

*Make journal entries to record plant asset disposal.*

(SO 6)

(a) What entry would Keynes make to record the sale of the equipment for \$26,000 cash?

(b) What entry would Keynes make to record the sale of the equipment for \$15,000 cash?

Match intangibles classifications concepts. (SO 7, 8)

**Do it! 10-5** Match the statement with the term most directly associated with it.

- |                                |              |
|--------------------------------|--------------|
| Goodwill                       | Amortization |
| Intangible assets              | Franchises   |
| Research and development costs |              |

1. \_\_\_\_\_ Rights, privileges, and competitive advantages that result from the ownership of long-lived assets that do not possess physical substance.
2. \_\_\_\_\_ The allocation of the cost of an intangible asset to expense in a rational and systematic manner.
3. \_\_\_\_\_ A right to sell certain products or services, or use certain trademarks or trade names within a designated geographic area.
4. \_\_\_\_\_ Costs incurred by a company that often lead to patents or new products. These costs must be expensed as incurred.
5. \_\_\_\_\_ The excess of the cost of a company over the fair value of the net assets acquired.

## Exercises

Determine cost of plant acquisitions. (SO 1)

**E10-1** The following expenditures relating to plant assets were made by Georgie Company during the first 2 months of 2012.

1. Paid \$5,000 of accrued taxes at time plant site was acquired.
2. Paid \$200 insurance to cover possible accident loss on new factory machinery while the machinery was in transit.
3. Paid \$850 sales taxes on new delivery truck.
4. Paid \$17,500 for parking lots and driveways on new plant site.
5. Paid \$250 to have company name and advertising slogan painted on new delivery truck.
6. Paid \$8,000 for installation of new factory machinery.
7. Paid \$900 for one-year accident insurance policy on new delivery truck.
8. Paid \$75 motor vehicle license fee on the new truck.

### Instructions

- (a)  Explain the application of the cost principle in determining the acquisition cost of plant assets.
- (b) List the numbers of the foregoing transactions, and opposite each indicate the account title to which each expenditure should be debited.

Determine property, plant, and equipment costs. (SO 1)

**E10-2** Moseley Company incurred the following costs.

|   |          |
|---|----------|
| 1. Sales tax on factory machinery purchased                       | \$ 5,000 |
| 2. Painting of and lettering on truck immediately upon purchase   | 700      |
| 3. Installation and testing of factory machinery                  | 2,000    |
| 4. Real estate broker's commission on land purchased              | 3,500    |
| 5. Insurance premium paid for first year's insurance on new truck | 880      |
| 6. Cost of landscaping on property purchased                      | 7,200    |
| 7. Cost of paving parking lot for new building constructed        | 17,900   |
| 8. Cost of clearing, draining, and filling land                   | 13,300   |
| 9. Architect's fees on self-constructed building                  | 10,000   |

### Instructions

Indicate to which account Moseley would debit each of the costs.

Determine acquisition costs of land. (SO 1)

**E10-3** On March 1, 2012, Popplewell Company acquired real estate on which it planned to construct a small office building. The company paid \$80,000 in cash. An old warehouse on the property was razed at a cost of \$8,600; the salvaged materials were sold for \$1,700. Additional expenditures before construction began included \$1,100 attorney's fee for work concerning the land purchase, \$5,000 real estate broker's fee, \$7,800 architect's fee, and \$14,000 to put in driveways and a parking lot.

### Instructions

- (a) Determine the amount to be reported as the cost of the land.
- (b) For each cost not used in part (a), indicate the account to be debited.

**E10-4** Jim McAvoy has prepared the following list of statements about depreciation.

1. Depreciation is a process of asset valuation, not cost allocation.
2. Depreciation provides for the proper matching of expenses with revenues.
3. The book value of a plant asset should approximate its fair value.
4. Depreciation applies to three classes of plant assets: land, buildings, and equipment.
5. Depreciation does not apply to a building because its usefulness and revenue-producing ability generally remain intact over time.
6. The revenue-producing ability of a depreciable asset will decline due to wear and tear and to obsolescence.
7. Recognizing depreciation on an asset results in an accumulation of cash for replacement of the asset.
8. The balance in accumulated depreciation represents the total cost that has been charged to expense.
9. Depreciation expense and accumulated depreciation are reported on the income statement.
10. Four factors affect the computation of depreciation: cost, useful life, salvage value, and residual value.

*Understand depreciation concepts.*

(SO 2)

**Instructions**

Identify each statement as true or false. If false, indicate how to correct the statement.

**E10-5** Tilda Bus Lines uses the units-of-activity method in depreciating its buses. One bus was purchased on January 1, 2012, at a cost of \$168,000. Over its 4-year useful life, the bus is expected to be driven 100,000 miles. Salvage value is expected to be \$8,000.

*Compute depreciation under units-of-activity method.*

(SO 3)

**Instructions**

- (a) Compute the depreciation cost per unit.
- (b) Prepare a depreciation schedule assuming actual mileage was: 2012, 26,000; 2013, 32,000; 2014, 25,000; and 2015, 17,000.

**E10-6** Swinton Company purchased a new machine on October 1, 2012, at a cost of \$120,000. The company estimated that the machine will have a salvage value of \$12,000. The machine is expected to be used for 10,000 working hours during its 5-year life.

*Determine depreciation for partial periods.*

(SO 3)

**Instructions**

Compute the depreciation expense under the following methods for the year indicated.

- (a) Straight-line for 2012.
- (b) Units-of-activity for 2012, assuming machine usage was 1,700 hours.
- (c) Declining-balance using double the straight-line rate for 2012 and 2013.

**E10-7** Tumnus Company purchased a delivery truck for \$30,000 on January 1, 2012. The truck has an expected salvage value of \$2,000, and is expected to be driven 100,000 miles over its estimated useful life of 8 years. Actual miles driven were 15,000 in 2012 and 12,000 in 2013.

*Compute depreciation using different methods.*

(SO 3)

**Instructions**

- (a) Compute depreciation expense for 2012 and 2013 using (1) the straight-line method, (2) the units-of-activity method, and (3) the double-declining-balance method.
- (b) Assume that Tumnus uses the straight-line method.
  - (1) Prepare the journal entry to record 2012 depreciation.
  - (2) Show how the truck would be reported in the December 31, 2012, balance sheet.

**E10-8** Kiran Shah, the new controller of Ginarrbrik Company, has reviewed the expected useful lives and salvage values of selected depreciable assets at the beginning of 2012. His findings are as follows.

*Compute revised annual depreciation.*

(SO 4)

| Type of Asset | Date Acquired | Cost      | Accumulated Depreciation 1/1/12 | Useful Life in Years |          | Salvage Value |          |
|---------------|---------------|-----------|---------------------------------|----------------------|----------|---------------|----------|
|               |               |           |                                 | Old                  | Proposed | Old           | Proposed |
| Building      | 1/1/06        | \$800,000 | \$114,000                       | 40                   | 50       | \$40,000      | \$37,000 |
| Warehouse     | 1/1/07        | 100,000   | 19,000                          | 25                   | 20       | 5,000         | 3,600    |

All assets are depreciated by the straight-line method. Ginarrbrik Company uses a calendar year in preparing annual financial statements. After discussion, management has agreed to accept Kiran's proposed changes.

**Instructions**

- (a) Compute the revised annual depreciation on each asset in 2012. (Show computations.)  
 (b) Prepare the entry (or entries) to record depreciation on the building in 2012.

*Journalize entries for disposal of plant assets.*

(SO 6)

**E10-9** Presented below are selected transactions at Kirke Company for 2012.

- Jan. 1 Retired a piece of machinery that was purchased on January 1, 2002. The machine cost \$62,000 on that date. It had a useful life of 10 years with no salvage value.  
 June 30 Sold a computer that was purchased on January 1, 2009. The computer cost \$40,000. It had a useful life of 5 years with no salvage value. The computer was sold for \$14,000.  
 Dec. 31 Discarded a delivery truck that was purchased on January 1, 2008. The truck cost \$39,000. It was depreciated based on a 6-year useful life with a \$3,000 salvage value.

**Instructions**

Journalize all entries required on the above dates, including entries to update depreciation, where applicable, on assets disposed of. Kirke Company uses straight-line depreciation. (Assume depreciation is up to date as of December 31, 2011.)

*Journalize entries for disposal of equipment.*

(SO 6)

**E10-10** Cosmo Company owns equipment that cost \$50,000 when purchased on January 1, 2009. It has been depreciated using the straight-line method based on estimated salvage value of \$5,000 and an estimated useful life of 5 years.

**Instructions**

Prepare Cosmo Company's journal entries to record the sale of the equipment in these four independent situations.

- (a) Sold for \$28,000 on January 1, 2012.  
 (b) Sold for \$28,000 on May 1, 2012.  
 (c) Sold for \$11,000 on January 1, 2012.  
 (d) Sold for \$11,000 on October 1, 2012.

*Journalize entries for natural resources depletion.*

(SO 7)

**E10-11** On July 1, 2012, Macready Inc. invested \$720,000 in a mine estimated to have 800,000 tons of ore of uniform grade. During the last 6 months of 2012, 100,000 tons of ore were mined and sold.

**Instructions**

- (a) Prepare the journal entry to record depletion expense.  
 (b) Assume that the 100,000 tons of ore were mined, but only 80,000 units were sold. How are the costs applicable to the 20,000 unsold units reported?

*Prepare adjusting entries for amortization.*

(SO 8)

**E10-12** The following are selected 2012 transactions of Oveius Corporation.

- Jan. 1 Purchased a small company and recorded goodwill of \$150,000. Its useful life is indefinite.  
 May 1 Purchased for \$90,000 a patent with an estimated useful life of 5 years and a legal life of 20 years.

**Instructions**

Prepare necessary adjusting entries at December 31 to record amortization required by the events above.

*Prepare entries to set up appropriate accounts for different intangibles; amortize intangible assets.*

(SO 8)

**E10-13** Kake Company, organized in 2012, has the following transactions related to intangible assets.

|        |   |           |
|--------|---|-----------|
| 1/2/12 | Purchased patent (7-year life)              | \$560,000 |
| 4/1/12 | Goodwill purchased (indefinite life)        | 360,000   |
| 7/1/12 | 10-year franchise; expiration date 7/1/2022 | 440,000   |
| 9/1/12 | Research and development costs              | 185,000   |

**Instructions**

Prepare the necessary entries to record these intangibles. All costs incurred were for cash. Make the adjusting entries as of December 31, 2012, recording any necessary amortization and reflecting all balances accurately as of that date.

*Calculate asset turnover ratio.*

(SO 9)

**E10-14** During 2012 Otmin Corporation reported net sales of \$4,900,000 and net income of \$1,500,000. Its balance sheet reported average total assets of \$1,400,000.

**Instructions**

Calculate the asset turnover ratio.

**\*E10-15** Presented below are two independent transactions. Both transactions have commercial substance.

1. Rangi Co. exchanged old trucks (cost \$64,000 less \$22,000 accumulated depreciation) plus cash of \$17,000 for new trucks. The old trucks had a fair value of \$36,000.
2. Dryad Inc. trades its used machine (cost \$12,000 less \$4,000 accumulated depreciation) for a new machine. In addition to exchanging the old machine (which had a fair value of \$9,000), Dryad also paid cash of \$3,000.

**Instructions**

- (a) Prepare the entry to record the exchange of assets by Rangi Co.
- (b) Prepare the entry to record the exchange of assets by Dryad Inc.

**\*E10-16** Jaxin's Delivery Company and Felicity's Express Delivery exchanged delivery trucks on January 1, 2012. Jaxin's truck cost \$22,000. It has accumulated depreciation of \$15,000 and a fair value of \$4,000. Felicity's truck cost \$10,000. It has accumulated depreciation of \$8,000 and a fair value of \$4,000. The transaction has commercial substance.

**Instructions**

- (a) Journalize the exchange for Jaxin's Delivery Company.
- (b) Journalize the exchange for Felicity's Express Delivery.

*Journalize entries for exchanges.*

(SO 10)

*Journalize entries for the exchange of plant assets.*

(SO 10)

## Exercises: Set B

Visit the book's companion website, at [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), and choose the Student Companion site to access Exercise Set B.

## Problems: Set A

**P10-1A** Rumblebuffin Company was organized on January 1. During the first year of operations, the following plant asset expenditures and receipts were recorded in random order.

|   | <u>Debits</u> |           |
|---|---------------|-----------|
| 1. Cost of filling and grading the land   |               | \$ 4,000  |
| 2. Full payment to building contractor  |               | 700,000   |
| 3. Real estate taxes on land paid for the current year                                  |               | 5,000     |
| 4. Cost of real estate purchased as a plant site (land \$100,000 and building \$45,000) |               | 145,000   |
| 5. Excavation costs for new building  |               | 35,000    |
| 6. Architect's fees on building plans   |               | 10,000    |
| 7. Accrued real estate taxes paid at time of purchase of real estate                    |               | 2,000     |
| 8. Cost of parking lots and driveways   |               | 14,000    |
| 9. Cost of demolishing building to make land suitable for construction of new building  |               | 15,000    |
|   |               | \$930,000 |
|   | <u>Credit</u> |           |
| 10. Proceeds from salvage of demolished building  |               | \$ 3,500  |

**Instructions**

Analyze the foregoing transactions using the following column headings. Insert the number of each transaction in the Item space, and insert the amounts in the appropriate columns. For amounts entered in the Other Accounts column, also indicate the account titles.

| <u>Item</u> | <u>Land</u> | <u>Buildings</u> | <u>Other Accounts</u> |
|-------------|-------------|------------------|-----------------------|
|-------------|-------------|------------------|-----------------------|

**P10-2A** In recent years, Sonya Transportation purchased three used buses. Because of frequent turnover in the accounting department, a different accountant selected the depreciation method for each bus, and various methods were selected. Information concerning the buses is summarized on page 494.

*Determine acquisition costs of land and building.*

(SO 1)

| <u>Totals</u>       |
|---------------------|
| Land \$162,500      |
| Buildings \$745,000 |

*Compute depreciation under different methods.*

(SO 3)

| <u>Bus</u> | <u>Acquired</u> | <u>Cost</u> | <u>Salvage Value</u> | <u>Useful Life in Years</u> | <u>Depreciation Method</u> |
|------------|-----------------|-------------|----------------------|-----------------------------|----------------------------|
| 1          | 1/1/10          | \$ 96,000   | \$ 6,000             | 5                           | Straight-line              |
| 2          | 1/1/10          | 120,000     | 10,000               | 4                           | Declining-balance          |
| 3          | 1/1/11          | 80,000      | 8,000                | 5                           | Units-of-activity          |

For the declining-balance method, the company uses the double-declining rate. For the units-of-activity method, total miles are expected to be 120,000. Actual miles of use in the first 3 years were: 2011, 24,000; 2012, 34,000; and 2013, 30,000.

**Instructions**

(a) Bus 2, 2011, \$90,000

- (a) Compute the amount of accumulated depreciation on each bus at December 31, 2012.
- (b) If bus no. 2 was purchased on April 1 instead of January 1, what is the depreciation expense for this bus in (1) 2010 and (2) 2011?

Compute depreciation under different methods.  
(SO 3)

**P10-3A** On January 1, 2012, Tiggy Company purchased the following two machines for use in its production process.

Machine A: The cash price of this machine was \$38,000. Related expenditures included: sales tax \$1,700, shipping costs \$150, insurance during shipping \$80, installation and testing costs \$70, and \$100 of oil and lubricants to be used with the machinery during its first year of operations. Tiggy estimates that the useful life of the machine is 5 years with a \$5,000 salvage value remaining at the end of that time period. Assume that the straight-line method of depreciation is used.

Machine B: The recorded cost of this machine was \$160,000. Tiggy estimates that the useful life of the machine is 4 years with a \$10,000 salvage value remaining at the end of that time period.

**Instructions**

(b) (2) 2012 DDB depreciation \$80,000

- (a) Prepare the following for Machine A.
  - (1) The journal entry to record its purchase on January 1, 2012.
  - (2) The journal entry to record annual depreciation at December 31, 2012.
- (b) Calculate the amount of depreciation expense that Tiggy should record for machine B each year of its useful life under the following assumptions.
  - (1) Tiggy uses the straight-line method of depreciation.
  - (2) Tiggy uses the declining-balance method. The rate used is twice the straight-line rate.
  - (3) Tiggy uses the units-of-activity method and estimates that the useful life of the machine is 125,000 units. Actual usage is as follows: 2012, 45,000 units; 2013, 35,000 units; 2014, 25,000 units; 2015, 20,000 units.
- (c) Which method used to calculate depreciation on machine B reports the highest amount of depreciation expense in year 1 (2012)? The highest amount in year 4 (2015)? The highest total amount over the 4-year period?

Calculate revisions to depreciation expense.  
(SO 3, 4)

**P10-4A** At the beginning of 2010, Sarofim Company acquired equipment costing \$90,000. It was estimated that this equipment would have a useful life of 6 years and a residual value of \$9,000 at that time. The straight-line method of depreciation was considered the most appropriate to use with this type of equipment. Depreciation is to be recorded at the end of each year.

During 2012 (the third year of the equipment's life), the company's engineers reconsidered their expectations, and estimated that the equipment's useful life would probably be 7 years (in total) instead of 6 years. The estimated residual value was not changed at that time. However, during 2015 the estimated residual value was reduced to \$5,000.

**Instructions**

Indicate how much depreciation expense should be recorded each year for this equipment, by completing the following table.

| <u>Year</u> | <u>Depreciation Expense</u> | <u>Accumulated Depreciation</u> |
|-------------|-----------------------------|---------------------------------|
| 2010        |                             |                                 |
| 2011        |                             |                                 |
| 2012        |                             |                                 |
| 2013        |                             |                                 |
| 2014        |                             |                                 |
| 2015        |                             |                                 |
| 2016        |                             |                                 |

2016 depreciation expense, \$12,800

**P10-5A** At December 31, 2012, Alina Company reported the following as plant assets.

|  |                   |                     |
|--|-------------------|---------------------|
| Land                                     |                   | \$ 4,000,000        |
| Buildings                                | \$28,500,000      |                     |
| Less: Accumulated depreciation—buildings | <u>12,100,000</u> | 16,400,000          |
| Equipment                                | 48,000,000        |                     |
| Less: Accumulated depreciation—equipment | <u>5,000,000</u>  | <u>43,000,000</u>   |
| Total plant assets                       |                   | <u>\$63,400,000</u> |

*Journalize a series of equipment transactions related to purchase, sale, retirement, and depreciation.*

(SO 3, 6, 9)

During 2013, the following selected cash transactions occurred.

- April 1 Purchased land for \$2,130,000.
- May 1 Sold equipment that cost \$780,000 when purchased on January 1, 2009. The equipment was sold for \$450,000.
- June 1 Sold land purchased on June 1, 2003 for \$1,500,000. The land cost \$400,000.
- July 1 Purchased equipment for \$2,000,000.
- Dec. 31 Retired equipment that cost \$500,000 when purchased on December 31, 2003. No salvage value was received.

**Instructions**

- (a) Journalize the above transactions. The company uses straight-line depreciation for buildings and equipment. The buildings are estimated to have a 50-year life and no salvage value. The equipment is estimated to have a 10-year useful life and no salvage value. Update depreciation on assets disposed of at the time of sale or retirement.
- (b) Record adjusting entries for depreciation for 2013.
- (c) Prepare the plant assets section of Alina’s balance sheet at December 31, 2013.

- (b) Depreciation Expense—Buildings \$570,000; Equipment \$4,772,000
- (c) Total plant assets \$61,270,000

**P10-6A** Faun Co. has equipment that cost \$75,000 and that has been depreciated \$50,000. Record the disposal under the following assumptions.

- (a) It was scrapped as having no value.
- (b) It was sold for \$21,000.
- (c) It was sold for \$31,000.

*Record disposals.*  
(SO 6)

**P10-7A** The intangible assets section of Centaur Company at December 31, 2012, is presented below.

|   |                 |
|---|-----------------|
| Patents (\$70,000 cost less \$7,000 amortization)     | \$63,000        |
| Franchises (\$48,000 cost less \$19,200 amortization) | <u>28,800</u>   |
| Total   | <u>\$91,800</u> |

*Prepare entries to record transactions related to acquisition and amortization of intangibles; prepare the intangible assets section.*  
(SO 8, 9)

The patent was acquired in January 2012 and has a useful life of 10 years. The franchise was acquired in January 2009 and also has a useful life of 10 years. The following cash transactions may have affected intangible assets during 2013.

- Jan. 2 Paid \$45,000 legal costs to successfully defend the patent against infringement by another company.
- Jan.–June Developed a new product, incurring \$140,000 in research and development costs. A patent was granted for the product on July 1. Its useful life is equal to its legal life.
- Sept. 1 Paid \$50,000 to an extremely large defensive lineman to appear in commercials advertising the company’s products. The commercials will air in September and October.
- Oct. 1 Acquired a franchise for \$100,000. The franchise has a useful life of 50 years.

**Instructions**

- (a) Prepare journal entries to record the transactions above.
- (b) Prepare journal entries to record the 2013 amortization expense.
- (c) Prepare the intangible assets section of the balance sheet at December 31, 2013.

- (b) Amortization Expense (patents) \$12,000  
Amortization Expense (franchises) \$5,300
- (c) Total intangible assets \$219,500

**P10-8A** Due to rapid turnover in the accounting department, a number of transactions involving intangible assets were improperly recorded by the Satyr Company in 2012.

1. Satyr developed a new manufacturing process, incurring research and development costs of \$136,000. The company also purchased a patent for \$60,000. In early January, Satyr capitalized \$196,000 as the cost of the patents. Patent amortization expense of \$9,800 was recorded based on a 20-year useful life.

*Prepare entries to correct errors made in recording and amortizing intangible assets.*  
(SO 8)

- On July 1, 2012, Satyr purchased a small company and as a result acquired goodwill of \$92,000. Satyr recorded a half-year's amortization in 2012, based on a 50-year life (\$920 amortization). The goodwill has an indefinite life.

**Instructions**

Prepare all journal entries necessary to correct any errors made during 2012. Assume the books have not yet been closed for 2012.

1. R&D Exp. \$136,000

Calculate and comment on asset turnover ratio.

(SO 9)

**P10-9A** Ratilal Company and Navi Corporation, two corporations of roughly the same size, are both involved in the manufacture of in-line skates. Each company depreciates its plant assets using the straight-line approach. An investigation of their financial statements reveals the following information.

|                      | <u>Ratilal Co.</u> | <u>Navi Corp.</u> |
|----------------------|--------------------|-------------------|
| Net income           | \$ 800,000         | \$1,000,000       |
| Sales revenue        | 1,200,000          | 1,080,000         |
| Average total assets | 2,500,000          | 2,000,000         |
| Average plant assets | 1,800,000          | 1,000,000         |

**Instructions**

- For each company, calculate the asset turnover ratio.
-  Based on your calculations in part (a), comment on the relative effectiveness of the two companies in using their assets to generate sales and produce net income.

## Problems: Set B

Determine acquisition costs of land and building.

(SO 1)

**P10-1B** Bhaja Company was organized on January 1. During the first year of operations, the following plant asset expenditures and receipts were recorded in random order.

|  | <u>Debits</u>    |                 |
|--|------------------|-----------------|
| 1. Accrued real estate taxes paid at time of purchase of real estate                   | \$ 5,000         |                 |
| 2. Real estate taxes on land paid for the current year                                 | 7,500            |                 |
| 3. Full payment to building contractor   | 500,000          |                 |
| 4. Excavation costs for new building   | 19,000           |                 |
| 5. Cost of real estate purchased as a plant site (land \$75,000 and building \$25,000) | 100,000          |                 |
| 6. Cost of parking lots and driveways  | 18,000           |                 |
| 7. Architect's fees on building plans  | 9,000            |                 |
| 8. Installation cost of fences around property   | 6,000            |                 |
| 9. Cost of demolishing building to make land suitable for construction of new building | 17,000           |                 |
|  | <u>\$681,500</u> |                 |
|  | <u>Credit</u>    |                 |
| 10. Proceeds from salvage of demolished building                                       |                  | <u>\$ 3,500</u> |

**Instructions**

Analyze the foregoing transactions using the following column headings. Insert the number of each transaction in the Item space, and insert the amounts in the appropriate columns. For amounts entered in the Other Accounts column, also indicate the account title.

| <u>Totals</u>       |
|---------------------|
| Land \$118,500      |
| Buildings \$528,000 |

Compute depreciation under different methods.

(SO 3)

| <u>Item</u> | <u>Land</u> | <u>Buildings</u> | <u>Other Accounts</u> |
|-------------|-------------|------------------|-----------------------|
|-------------|-------------|------------------|-----------------------|

**P10-2B** In recent years, Kannada Company purchased three machines. Because of heavy turnover in the accounting department, a different accountant was in charge of selecting the depreciation method for each machine, and each selected a different method. Information concerning the machines is summarized below.

| <u>Machine</u> | <u>Acquired</u> | <u>Cost</u> | <u>Salvage Value</u> | <u>Useful Life in Years</u> | <u>Depreciation Method</u> |
|----------------|-----------------|-------------|----------------------|-----------------------------|----------------------------|
| 1              | 1/1/09          | \$105,000   | \$ 5,000             | 10                          | Straight-line              |
| 2              | 1/1/10          | 150,000     | 10,000               | 8                           | Declining-balance          |
| 3              | 11/1/12         | 100,000     | 15,000               | 6                           | Units-of-activity          |

For the declining-balance method, the company uses the double-declining rate. For the units-of-activity method, total machine hours are expected to be 25,000. Actual hours of use in the first 3 years were: 2012, 2,000; 2013, 4,500; and 2014, 5,500.

**Instructions**

- (a) Compute the amount of accumulated depreciation on each machine at December 31, 2012.
- (b) If machine 2 had been purchased on May 1 instead of January 1, what would be the depreciation expense for this machine in (1) 2010 and (2) 2011?

(a) Machine 2, 2011, \$28,125

**P10-3B** On January 1, 2012, Zakiuddin Company purchased the following two machines for use in its production process.

Compute depreciation under different methods.

(SO 3)

Machine A: The cash price of this machine was \$55,000. Related expenditures included: sales tax \$2,750, shipping costs \$100, insurance during shipping \$75, installation and testing costs \$75, and \$90 of oil and lubricants to be used with the machinery during its first year of operation. Zakiuddin estimates that the useful life of the machine is 4 years with a \$5,000 salvage value remaining at the end of that time period.

Machine B: The recorded cost of this machine was \$100,000. Zakiuddin estimates that the useful life of the machine is 4 years with a \$10,000 salvage value remaining at the end of that time period.

**Instructions**

- (a) Prepare the following for Machine A.
  - (1) The journal entry to record its purchase on January 1, 2012.
  - (2) The journal entry to record annual depreciation at December 31, 2012, assuming the straight-line method of depreciation is used.
- (b) Calculate the amount of depreciation expense that Zakiuddin should record for machine B each year of its useful life under the following assumption.
  - (1) Zakiuddin uses the straight-line method of depreciation.
  - (2) Zakiuddin uses the declining-balance method. The rate used is twice the straight-line rate.
  - (3) Zakiuddin uses the units-of-activity method and estimates the useful life of the machine is 25,000 units. Actual usage is as follows: 2012, 5,500 units; 2013, 7,000 units; 2014, 8,000 units; 2015, 4,500 units.
- (c) Which method used to calculate depreciation on machine B reports the lowest amount of depreciation expense in year 1 (2012)? The lowest amount in year 4 (2015)? The lowest total amount over the 4-year period?

(a) (2) \$13,250

**P10-4B** At the beginning of 2010, Farooque Company acquired equipment costing \$200,000. It was estimated that this equipment would have a useful life of 6 years and a residual value of \$20,000 at that time. The straight-line method of depreciation was considered the most appropriate to use with this type of equipment. Depreciation is to be recorded at the end of each year.

Calculate revisions to depreciation expense.

(SO 3, 4)

During 2012 (the third year of the equipment's life), the company's engineers reconsidered their expectations, and estimated that the equipment's useful life would probably be 7 years (in total) instead of 6 years. The estimated residual value was not changed at that time. However, during 2015 the estimated residual value was reduced to \$5,000.

**Instructions**

Indicate how much depreciation expense should be recorded for this equipment each year by completing the following table.

| <u>Year</u> | <u>Depreciation Expense</u> | <u>Accumulated Depreciation</u> |
|-------------|-----------------------------|---------------------------------|
| 2010        |                             |                                 |
| 2011        |                             |                                 |
| 2012        |                             |                                 |
| 2013        |                             |                                 |
| 2014        |                             |                                 |
| 2015        |                             |                                 |
| 2016        |                             |                                 |

2016 depreciation expense, \$31,500

Journalize a series of equipment transactions related to purchase, sale, retirement, and depreciation.

(SO 3, 6, 9)

**P10-5B** At December 31, 2012, Ramaswami Company reported the following as plant assets.

|  |                  |                     |
|--|------------------|---------------------|
| Land                                     |                  | \$ 2,000,000        |
| Buildings                                | \$20,000,000     |                     |
| Less: Accumulated depreciation—buildings | <u>8,000,000</u> | 12,000,000          |
| Equipment                                | 30,000,000       |                     |
| Less: Accumulated depreciation—equipment | <u>4,000,000</u> | <u>26,000,000</u>   |
| Total plant assets                       |                  | <u>\$40,000,000</u> |

During 2013, the following selected cash transactions occurred.

- April 1 Purchased land for \$1,200,000.  
 May 1 Sold equipment that cost \$420,000 when purchased on January 1, 2009. The equipment was sold for \$240,000.  
 June 1 Sold land purchased on June 1, 2003, for \$1,000,000. The land cost \$340,000.  
 July 1 Purchased equipment for \$1,100,000.  
 Dec. 31 Retired equipment that cost \$300,000 when purchased on December 31, 2003. No salvage value was received.

#### Instructions

- (a) Journalize the above transactions. Ramaswami uses straight-line depreciation for buildings and equipment. The buildings are estimated to have a 50-year useful life and no salvage value. The equipment is estimated to have a 10-year useful life and no salvage value. Update depreciation on assets disposed of at the time of sale or retirement.  
 (b) Record adjusting entries for depreciation for 2013.  
 (c) Prepare the plant assets section of Ramaswami's balance sheet at December 31, 2013.

- (b) Depreciation Expense—  
Buildings \$400,000;  
Equipment \$2,983,000  
 (c) Total plant assets  
\$38,295,000

Record disposals.

(SO 6)

**P10-6B** Nikhom's has equipment that cost \$40,000 and that has been depreciated \$26,000. Record the disposal under the following assumptions.

- (a) It was scrapped as having no value.  
 (b) It was sold for \$29,000.  
 (c) It was sold for \$10,000.

Prepare entries to record transactions related to acquisition and amortization of intangibles; prepare the intangible assets section.

(SO 8, 9)

**P10-7B** The intangible assets section of Praphaphorn Company at December 31, 2012, is presented below.

|   |                  |
|---|------------------|
| Patents (\$100,000 cost less \$10,000 amortization)   | \$ 90,000        |
| Copyrights (\$60,000 cost less \$24,000 amortization) | <u>36,000</u>    |
| Total   | <u>\$126,000</u> |

The patent was acquired in January 2012 and has a useful life of 10 years. The copyright was acquired in January 2009 and also has a useful life of 10 years. The following cash transactions may have affected intangible assets during 2013.

- Jan. 2 Paid \$45,000 legal costs to successfully defend the patent against infringement by another company.  
 Jan.–June Developed a new product, incurring \$230,000 in research and development costs. A patent was granted for the product on July 1. Its useful life is equal to its legal life.  
 Sept. 1 Paid \$125,000 to an Xgames star to appear in commercials advertising the company's products. The commercials will air in September and October.  
 Oct. 1 Acquired a copyright for \$200,000. The copyright has a useful life of 50 years.

- (b) Amortization Expense  
(patents) \$15,000;  
Amortization Expense  
(copyrights) \$7,000  
 (c) Total intangible assets,  
\$349,000

#### Instructions

- (a) Prepare journal entries to record the transactions above.  
 (b) Prepare journal entries to record the 2013 amortization expense for intangible assets.  
 (c) Prepare the intangible assets section of the balance sheet at December 31, 2013.  
 (d)  Prepare the note to the financials on Praphaphorn's intangibles as of December 31, 2013.

Prepare entries to correct errors made in recording and amortizing intangible assets.

(SO 8)

**P10-8B** Due to rapid turnover in the accounting department, a number of transactions involving intangible assets were improperly recorded by Chansantor Company in 2012.

1. Chansantor developed a new manufacturing process, incurring research and development costs of \$110,000. The company also purchased a patent for \$50,000. In early January, Chansantor

capitalized \$160,000 as the cost of the patents. Patent amortization expense of \$8,000 was recorded based on a 20-year useful life.

2. On July 1, 2012, Chansantor purchased a small company and as a result acquired goodwill of \$200,000. Chansantor recorded a half-year's amortization in 2012, based on a 50-year life (\$2,000 amortization). The goodwill has an indefinite life.

### Instructions

Prepare all journal entries necessary to correct any errors made during 2012. Assume the books have not yet been closed for 2012.

R&D Exp. \$110,000

**P10-9B** Liam Corporation and Aslan Corporation, two corporations of roughly the same size, are both involved in the manufacture of canoes and sea kayaks. Each company depreciates its plant assets using the straight-line approach. An investigation of their financial statements reveals the following information.

Calculate and comment on asset turnover ratio.  
(SO 9)

|                      | <u>Liam Corp.</u> | <u>Aslan Corp.</u> |
|----------------------|-------------------|--------------------|
| Net income           | \$ 300,000        | \$ 325,000         |
| Sales revenue        | 1,100,000         | 990,000            |
| Average total assets | 1,000,000         | 1,050,000          |
| Average plant assets | 750,000           | 770,000            |

### Instructions

- (a) For each company, calculate the asset turnover ratio.  
 (b)  Based on your calculations in part (a), comment on the relative effectiveness of the two companies in using their assets to generate sales and produce net income.

## Problems: Set C

Visit the book's companion website, at [www.wiley.com/college/veygandt](http://www.wiley.com/college/veygandt), and choose the Student Companion site to access Problem Set C.

## Comprehensive Problem: Chapters 3 to 10

**CP10** Winterschid Company's trial balance at December 31, 2012, is presented below. All 2012 transactions have been recorded except for the items described on page 500.

|                                    | <u>Debit</u> | <u>Credit</u> |
|------------------------------------|--------------|---------------|
| Cash                               | \$ 28,000    |               |
| Accounts Receivable                | 36,800       |               |
| Notes Receivable                   | 10,000       |               |
| Interest Receivable                | –0–          |               |
| Inventory                          | 36,200       |               |

|----------------------------------|--------------------|--------------------|
| Sales Revenue                    |                    | 900,000            |
| Interest Revenue                 |                    | –0–                |
| Rent Revenue                     |                    | –0–                |
| Gain on Disposal of Plant Assets |                    | –0–                |
| Bad Debts Expense                | –0–                |                    |
| Cost of Goods Sold               | 630,000            |                    |
| Depreciation Expense             | –0–                |                    |
| Insurance Expense                | –0–                |                    |
| Interest Expense                 | –0–                |                    |
| Other Operating Expenses         | 61,800             |                    |
| Amortization Expense             | –0–                |                    |
| Salaries and Wages Expense       | 110,000            |                    |
| Total                            | <u>\$1,167,400</u> | <u>\$1,167,400</u> |

## Unrecorded transactions:

- On May 1, 2012, Winterschid purchased equipment for \$13,200 plus sales taxes of \$600 (all paid in cash).
- On July 1, 2012, Winterschid sold for \$3,500 equipment which originally cost \$5,000. Accumulated depreciation on this equipment at January 1, 2012, was \$1,800; 2012 depreciation prior to the sale of the equipment was \$450.
- On December 31, 2012, Winterschid sold for \$9,000 on account inventory that cost \$6,300.
- Winterschid estimates that uncollectible accounts receivable at year-end is \$4,000.
- The note receivable is a one-year, 8% note dated April 1, 2012. No interest has been recorded.
- The balance in prepaid insurance represents payment of a \$3,600 6-month premium on September 1, 2012.
- The building is being depreciated using the straight-line method over 30 years. The salvage value is \$30,000.
- The equipment owned prior to this year is being depreciated using the straight-line method over 5 years. The salvage value is 10% of cost.
- The equipment purchased on May 1, 2012, is being depreciated using the straight-line method over 5 years, with a salvage value of \$1,800.
- The patent was acquired on January 1, 2012, and has a useful life of 10 years from that date.
- Unpaid salaries and wages at December 31, 2012, total \$2,200.
- The unearned rent revenue of \$6,000 was received on December 1, 2012, for 3 months rent.
- Both the short-term and long-term notes payable are dated January 1, 2012, and carry a 9% interest rate. All interest is payable in the next 12 months.

**Instructions**

- Prepare journal entries for the transactions listed above.
- Prepare an updated December 31, 2012, trial balance.
- Prepare a 2012 income statement and an owner's equity statement.
- Prepare a December 31, 2012, classified balance sheet.

(b) Totals \$1,201,290

(d) Total assets \$260,400

## Continuing Cookie Chronicle

(Note: This is a continuation of the Cookie Chronicle from Chapters 1 through 9.)

**CCC10** Natalie is also thinking of buying a van that will be used only for business. Natalie is concerned about the impact of the van's cost on her income statement and balance sheet. She has come to you for advice on calculating the van's depreciation.

Go to the book's companion website, [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt), to see the completion of this problem.

# BROADENING YOUR PERSPECTIVE

## Financial Reporting and Analysis

### Financial Reporting Problem: PepsiCo, Inc.

**BYP10-1** The financial statements and the Notes to Consolidated Financial Statements of PepsiCo, Inc. are presented in Appendix A.

#### Instructions

Refer to PepsiCo's financial statements and answer the following questions.

- What was the total cost and book value of property, plant, and equipment at December 26, 2009?
- What method or methods of depreciation are used by the company for financial reporting purposes?
- What was the amount of depreciation and amortization expense for each of the three years 2007–2009?
- Using the statement of cash flows, what is the amount of capital spending in 2009 and 2008?
- Where does the company disclose its intangible assets, and what types of intangibles did it have at December 26, 2009?

### Comparative Analysis Problem: PepsiCo, Inc. vs. The Coca-Cola Company

**BYP10-2** PepsiCo's financial statements are presented in Appendix A. Financial statements of The Coca-Cola Company are presented in Appendix B.

#### Instructions

- Compute the asset turnover ratio for each company for 2009.
- What conclusions concerning the efficiency of assets can be drawn from these data?

### On the Web

**BYP10-3** A company's annual report identifies the amount of its plant assets and the depreciation method used.

**Address:** [www.reportgallery.com](http://www.reportgallery.com), or go to [www.wiley.com/college/weygandt](http://www.wiley.com/college/weygandt)

#### Steps

- From Report Gallery Homepage, choose **Search by Alphabet**, and pick a letter.
- Select a particular company.
- Choose the most recent **Annual Report**.
- Follow instructions below.

#### Instructions

- What is the name of the company?
- At fiscal year-end, what is the net amount of its plant assets?
- What is the accumulated depreciation?
- Which method of depreciation does the company use?

## Critical Thinking

### Decision Making Across the Organization

**BYP10-4** Reimer Company and Lingo Company are two proprietorships that are similar in many respects. One difference is that Reimer Company uses the straight-line method and Lingo Company uses the declining-balance method at double the straight-line rate. On January 2, 2010, both companies acquired the depreciable assets shown on page 502.

| <u>Asset</u> | <u>Cost</u> | <u>Salvage Value</u> | <u>Useful Life</u> |
|--------------|-------------|----------------------|--------------------|
| Buildings    | \$320,000   | \$20,000             | 40 years           |
| Equipment    | 110,000     | 10,000               | 10 years           |

Including the appropriate depreciation charges, annual net income for the companies in the years 2010, 2011, and 2012 and total income for the 3 years were as follows.

|                | <u>2010</u> | <u>2011</u> | <u>2012</u> | <u>Total</u> |
|----------------|-------------|-------------|-------------|--------------|
| Reimer Company | \$84,000    | \$88,400    | \$90,000    | \$262,400    |
| Lingo Company  | 68,000      | 76,000      | 85,000      | 229,000      |

At December 31, 2012, the balance sheets of the two companies are similar except that Lingo Company has more cash than Reimer Company.

Sally Vogts is interested in buying one of the companies. She comes to you for advice.

### Instructions

With the class divided into groups, answer the following.

- Determine the annual and total depreciation recorded by each company during the 3 years.
- Assuming that Lingo Company also uses the straight-line method of depreciation instead of the declining-balance method as in (a), prepare comparative income data for the 3 years.
- Which company should Sally Vogts buy? Why?

## Communication Activity

**BYP10-5** The following was published with the financial statements to [American Exploration Company](#).

### American Exploration Company Notes to the Financial Statements

**Property, Plant, and Equipment**—The Company accounts for its oil and gas exploration and production activities using the successful efforts method of accounting. Under this method, acquisition costs for proved and unproved properties are capitalized when incurred.... The costs of drilling exploratory wells are capitalized pending determination of whether each well has discovered proved reserves. If proved reserves are not discovered, such drilling costs are charged to expense.... Depletion of the cost of producing oil and gas properties is computed on the units-of-activity method.

### Instructions

Write a brief memo to your instructor discussing American Exploration Company's note regarding property, plant, and equipment. Your memo should address what is meant by the "successful efforts method" and "units-of-activity method."

## Ethics Case

**BYP10-6** Buster Container Company is suffering declining sales of its principal product, nonbiodegradable plastic cartons. The president, Dennis Harwood, instructs his controller, Shelly McGlone, to lengthen asset lives to reduce depreciation expense. A processing line of automated plastic extruding equipment, purchased for \$3.1 million in January 2012, was originally estimated to have a useful life of 8 years and a salvage value of \$300,000. Depreciation has been recorded for 2 years on that basis. Dennis wants the estimated life changed to 12 years total, and the straight-line method continued. Shelly is hesitant to make the change, believing it is unethical to increase net income in this manner. Dennis says, "Hey, the life is only an estimate, and I've heard that our competition uses a 12-year life on their production equipment."

### Instructions

- Who are the stakeholders in this situation?
- Is the change in asset life unethical, or is it simply a good business practice by an astute president?
- What is the effect of Dennis Harwood's proposed change on income before taxes in the year of change?

## “All About You” Activity

**BYP10-7** Both the **All About You** feature (available at the book’s companion website) and the Feature Story at the beginning of the chapter discussed the company Rent-A-Wreck. Note that the trade name Rent-A-Wreck is a very important asset to the company, as it creates immediate product identification. As indicated in the chapter, companies invest substantial sums to ensure that their product is well-known to the consumer. Test your knowledge of who owns some famous brands and their impact on the financial statements.

### Instructions

- (a) Provide an answer to the five multiple-choice questions below.
- (1) Which company owns both Taco Bell and Pizza Hut?
 

|                 |                 |
|-----------------|-----------------|
| (a) McDonald’s. | (c) Yum Brands. |
| (b) CKE.        | (d) Wendy’s.    |
  - (2) Dairy Queen belongs to:
 

|                         |                            |
|-------------------------|----------------------------|
| (a) Breyer.             | (c) GE.                    |
| (b) Berkshire Hathaway. | (d) The Coca-Cola Company. |
  - (3) Phillip Morris, the cigarette maker, is owned by:
 

|             |                 |
|-------------|-----------------|
| (a) Altria. | (c) Boeing.     |
| (b) GE.     | (d) ExxonMobil. |
  - (4) AOL, a major Internet provider, belongs to:
 

|                |                  |
|----------------|------------------|
| (a) Microsoft. | (c) NBC.         |
| (b) Cisco.     | (d) Time Warner. |
  - (5) ESPN, the sports broadcasting network, is owned by:
 

|                       |                            |
|-----------------------|----------------------------|
| (a) Procter & Gamble. | (c) Walt Disney.           |
| (b) Altria.           | (d) The Coca-Cola Company. |
- (b) How do you think the value of these brands is reported on the appropriate company’s balance sheet?

## FASB Codification Activity

**BYP10-8** If your school has a subscription to the FASB Codification, go to <http://aaahq.org/ascLogin.cfm> to log in and prepare responses to the following.

- (a) What does it mean to capitalize an item?
- (b) What is the definition provided for an intangible asset?
- (c) Your great-uncle, who is a CPA, is impressed that you are taking an accounting class. Based on his experience, he believes that depreciation is something that companies do based on past practice, not on the basis of authoritative guidance. Provide the authoritative literature to support the practice of fixed-asset depreciation.

### Answers to Insight and Accounting Across the Organization Questions

**p. 461 Many U.S. Firms Use Leases** **Q:** Why might airline managers choose to lease rather than purchase their planes? **A:** The reasons for leasing include favorable tax treatment, better financing options, increased flexibility, reduced risk of obsolescence, and low airline income.

**p. 478 Should Companies Write Up Goodwill?** **Q:** Do you think that this treatment would be allowed under U.S. GAAP? **A:** The write-down of assets would have been allowed if it could be shown that the assets had declined in value (an impairment). However, the creation of goodwill to offset the write-down would not have been allowed. Goodwill can be recorded only when it results from the acquisition of a business. It cannot be recorded as the result of being created internally.

### Answers to Self-Test Questions

1. d  $(\$24,000 + \$1,200 + \$200 + \$400)$  2. b 3. d  $[(\$400,000 - \$10,000) \div 5] \times 2$  4. d 5. b  $\$60,000 \times 25\% = \$15,000; (\$60,000 - \$15,000) \times 25\% = \$11,250$  6. b 7. d  $[(\$60,000 - \$12,000) \div 10] \times 2 = \$9,600; (\$60,000 - \$9,600 - \$2,000) \div 4$  8. d 9. a  $[(\$80,000 \div 10) \times 4.5] = \$36,000; (\$80,000 - \$36,000) - \$26,000$  10. c  $(\$12 \text{ million} \div 20 \text{ million}) \times 2 \text{ million}$  11. d 12. b 13. c 14. c  $\$180,000 \div [(\$200,000 + \$300,000) \div 2]$  \*15. a  $(\$35,000 + \$10,000)$  \*16. d

# IFRS A Look at IFRS

IFRS follows most of the same principles as GAAP in the accounting for property, plant, and equipment. There are, however, some significant differences in the implementation: IFRS allows the use of revaluation of property, plant, and equipment, and it also requires the use of component depreciation. In addition, there are some significant differences in the accounting for both intangible assets and impairments.

## Key Points

- The definition for plant assets for both IFRS and GAAP is essentially the same.
- Both international standards and GAAP follow the cost principle when accounting for property, plant, and equipment at date of acquisition. Cost consists of all expenditures necessary to acquire the asset and make it ready for its intended use.
- Under both IFRS and GAAP, interest costs incurred during construction are capitalized. Recently, IFRS converged to GAAP requirements in this area.
- IFRS, like GAAP, capitalizes all direct costs in self-constructed assets such as raw materials and labor. IFRS does not address the capitalization of fixed overhead, although in practice these costs are generally capitalized.
- IFRS also views depreciation as an allocation of cost over an asset's useful life. IFRS permits the same depreciation methods (e.g., straight-line, accelerated, and units-of-activity) as GAAP. However, a major difference is that IFRS requires component depreciation. *Component depreciation* specifies that any significant parts of a depreciable asset that have different estimated useful lives should be separately depreciated. Component depreciation is allowed under GAAP but is seldom used.

To illustrate, assume that Lexure Construction builds an office building for \$4,000,000, not including the cost of the land. If the \$4,000,000 is allocated over the 40-year useful life of the building, Lexure reports \$100,000 of depreciation per year, assuming straight-line depreciation and no disposal value. However, assume that \$320,000 of the cost of the building relates to personal property and \$600,000 relates to land improvements. The personal property has a depreciable life of 5 years, and the land improvements have a depreciable life of 10 years. In accordance with IFRS, Lexure must use component depreciation. It must reclassify \$320,000 of the cost of the building to personal property and \$600,000 to the cost of land improvements. Assuming that Lexure uses straight-line depreciation, component depreciation for the first year of the office building is computed as follows.

|  |                   |
|--|-------------------|
| Building cost adjusted (\$4,000,000 – \$320,000 – \$600,000) | \$3,080,000       |
| Building cost depreciation per year (\$3,080,000/40)         | \$ 77,000         |
| Personal property depreciation (\$320,000/5)                 | 64,000            |
| Land improvements depreciation (\$600,000/10)                | 60,000            |
| Total component depreciation in first year                   | <u>\$ 201,000</u> |

- IFRS uses the term *residual value*, rather than salvage value, to refer to an owner's estimate of an asset's value at the end of its useful life for that owner.
- IFRS allows companies to revalue plant assets to fair value at the reporting date. Companies that choose to use the revaluation framework must follow revaluation procedures. If revaluation is used, it must be applied to all assets in a class of assets. Assets that are experiencing rapid price changes must be revalued on an annual basis, otherwise less frequent revaluation is acceptable.

To illustrate asset revaluation accounting, assume that Pernice Company applies revaluation to plant assets with a carrying value of \$1,000,000, a useful life of 5 years, and no residual value. Pernice makes the following journal entries in year 1, assuming straight-line depreciation.

|  |         |         |
|--|---------|---------|
| Depreciation Expense                       | 200,000 |         |
| Accumulated Depreciation—Plant Assets      |         | 200,000 |
| (To record depreciation expense in year 1) |         |         |

After this entry, Pernice's plant assets have a carrying amount of \$800,000 (\$1,000,000 – \$200,000). At the end of year 1, independent appraisers determine that the asset has a fair value of \$850,000. To report the plant assets at fair value, or \$850,000, Pernice eliminates the Accumulated Depreciation—Plant Assets account, reduces Plant Assets to its fair value of \$850,000, and records Revaluation Surplus of \$50,000. The entry to record the revaluation is as follows.

|  |         |         |
|--|---------|---------|
| Accumulated Depreciation—Plant Assets                | 200,000 |         |
| Plant Assets   |         | 150,000 |
| Revaluation Surplus                                  |         | 50,000  |
| (To record adjusting the plant assets to fair value) |         |         |

Thus, Pernice follows a two-step process. First, Pernice records depreciation based on the cost basis of \$1,000,000. As a result, it reports depreciation expense of \$200,000 on the income statement. Second, it records the revaluation. It does this by eliminating any accumulated depreciation, adjusting the recorded value of the plant assets to fair value, and debiting or crediting the Revaluation Surplus account. In this example, the revaluation surplus is \$50,000, which is the difference between the fair value of \$850,000 and the book value of \$800,000. Revaluation surplus is an example of an item reported as other comprehensive income, as discussed in the *A Look at IFRS* section of Chapter 5. Pernice now reports the following information in its statement of financial position at the end of year 1.

|  |                  |
|--|------------------|
| Plant assets (\$1,000,000 – \$150,000) | \$850,000        |
| Accumulated depreciation—plant assets  | <u>0</u>         |
|  | \$850,000        |
| Revaluation surplus (equity)           | <u>\$ 50,000</u> |

As indicated, \$850,000 is the new basis of the asset. Pernice reports depreciation expense of \$200,000 in the income statement and \$50,000 in other comprehensive income. Assuming no change in the total useful life, depreciation in year 2 will be \$212,500 (\$850,000 ÷ 4).

- Under both GAAP and IFRS, changes in the depreciation method used and changes in useful life are handled in current and future periods. Prior periods are not affected. GAAP recently conformed to international standards in the accounting for changes in depreciation methods.
- The accounting for subsequent expenditures, such as ordinary repairs and additions, are essentially the same under IFRS and GAAP.
- The accounting for plant asset disposals is essentially the same under IFRS and GAAP.
- Initial costs to acquire natural resources are essentially the same under IFRS and GAAP.
- The definition of intangible assets is essentially the same under IFRS and GAAP.
- As in GAAP, under IFRS the costs associated with research and development are segregated into the two components. Costs in the research phase are always expensed under both IFRS and GAAP. Under IFRS, however, costs in the development phase are capitalized as Development Costs once technological feasibility is achieved.

To illustrate, assume that Laser Scanner Company spent \$1 million on research and \$2 million on development of new products. Of the \$2 million in development costs, \$500,000 was incurred prior to technological feasibility and \$1,500,000 was incurred after technological feasibility had been demonstrated. The company would record these costs as follows.

|  |           |           |
|--|-----------|-----------|
| Research Expense                           | 1,000,000 |           |
| Development Expense                        | 500,000   |           |
| Development Costs                          | 1,500,000 |           |
| Cash                                       |           | 3,000,000 |
| (To record research and development costs) |           |           |

- IFRS permits revaluation of intangible assets (except for goodwill). GAAP prohibits revaluation of intangible assets.

- IFRS requires an impairment test at each reporting date for plant assets and intangibles and records an impairment if the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of the asset's fair value less costs to sell or its value-in-use. Value-in-use is the future cash flows to be derived from the particular asset, discounted to present value. Under GAAP, impairment loss is measured as the excess of the carrying amount over the asset's fair value.
- IFRS allows reversal of impairment losses when there has been a change in economic conditions or in the expected use of the asset. Under GAAP, impairment losses cannot be reversed for assets to be held and used; the impairment loss results in a new cost basis for the asset. IFRS and GAAP are similar in the accounting for impairments of assets held for disposal.
- The accounting for exchanges of nonmonetary assets has recently converged between IFRS and GAAP. GAAP now requires that gains on exchanges of nonmonetary assets be recognized if the exchange has commercial substance. This is the same framework used in IFRS.

## Looking to the Future

With respect to revaluations, as part of the conceptual framework project, the Boards will examine the measurement bases used in accounting. It is too early to say whether a converged conceptual framework will recommend fair value measurement (and revaluation accounting) for plant assets and intangibles. However, this is likely to be one of the more contentious issues, given the long-standing use of historical cost as a measurement basis in GAAP.

The IASB and FASB have identified a project that would consider expanded recognition of internally generated intangible assets. IFRS permits more recognition of intangibles compared to GAAP. Thus, it will be challenging to develop converged standards for intangible assets, given the long-standing prohibition on capitalizing internally generated intangible assets and research and development costs in GAAP.

## IFRS Self-Test Questions

- Which of the following statements is *correct*?
  - Both IFRS and GAAP permit revaluation of property, plant, and equipment and intangible assets (except for goodwill).
  - IFRS permits revaluation of property, plant, and equipment and intangible assets (except for goodwill).
  - Both IFRS and GAAP permit revaluation of property, plant, and equipment but not intangible assets.
  - GAAP permits revaluation of property, plant, and equipment but not intangible assets.
- International Company has land that cost \$450,000 but now has a fair value of \$600,000. International Company decides to use the revaluation method specified in IFRS to account for the land. Which of the following statements is *correct*?
  - International Company must continue to report the land at \$450,000.
  - International Company would report a net income increase of \$150,000 due to an increase in the value of the land.
  - International Company would debit Revaluation Surplus for \$150,000.
  - International Company would credit Revaluation Surplus by \$150,000.
- Francisco Corporation is constructing a new building at a total initial cost of \$10,000,000. The building is expected to have a useful life of 50 years with no residual value. The building's finished surfaces (e.g., roof cover and floor cover) are 5% of this cost and have a useful life of 20 years. Building services systems (e.g., electric, heating, and plumbing) are 20% of the cost and have a useful life of 25 years. The depreciation in the first year using component depreciation, assuming straight-line depreciation with no residual value, is:
 

|                |                        |
|----------------|------------------------|
| (a) \$200,000. | (c) \$255,000.         |
| (b) \$215,000. | (d) None of the above. |

4. Research and development costs are:
- (a) expensed under GAAP.
  - (b) expensed under IFRS.
  - (c) expensed under both GAAP and IFRS.
  - (d) None of the above.
5. Under IFRS, value-in-use is defined as:
- (a) net realizable value.
  - (b) fair value.
  - (c) future cash flows discounted to present value.
  - (d) total future undiscounted cash flows.

## IFRS Concepts and Application

**IFRS10-1** What is component depreciation, and when must it be used?

**IFRS10-2** What is revaluation of plant assets? When should revaluation be applied?

**IFRS10-3** Some product development expenditures are recorded as development expenses and others as development costs. Explain the difference between these accounts and how a company decides which classification is appropriate.

**IFRS10-4** Mandall Company constructed a warehouse for \$280,000. Mandall estimates that the warehouse has a useful life of 20 years and no residual value. Construction records indicate that \$40,000 of the cost of the warehouse relates to its heating, ventilation, and air conditioning (HVAC) system, which has an estimated useful life of only 10 years. Compute the first year of depreciation expense using straight-line component depreciation.

**IFRS10-5** At the end of its first year of operations, Brianna Company chose to use the revaluation framework allowed under IFRS. Brianna's ledger shows Plant Assets \$480,000 and Accumulated Depreciation—Plant Assets \$60,000. Prepare journal entries to record the following.

- (a) Independent appraisers determine that the plant assets have a fair value of \$460,000.
- (b) Independent appraisers determine that the plant assets have a fair value of \$400,000.

**IFRS10-6** Newell Industries spent \$300,000 on research and \$600,000 on development of a new product. Of the \$600,000 in development costs, \$400,000 was incurred prior to technological feasibility and \$200,000 after technological feasibility had been demonstrated. Prepare the journal entry to record research and development costs.

## International Financial Statement

### Analysis: Zetar plc

**IFRS10-7** The financial statements of Zetar plc are presented in Appendix C.

#### Instructions

Use the company's annual report, available at [www.zetarplc.com](http://www.zetarplc.com), to answer the following questions.

- (a) According to the notes to the financial statements, what method or methods does the company use to depreciate "plant and equipment?" What rate does it use to depreciate plant and equipment?
- (b) According to the notes to the financial statements, how often is goodwill tested for impairment?
- (c) Using the notes to the financial statements, as well as information from the statement of cash flows, prepare the journal entry to record the disposal of property, plant, and equipment during 2009. (Round your amounts to the nearest thousand.)

#### Answers to IFRS Self-Test Questions

1. b 2. d 3. c  $(\$10,000,000 \times .05/20) + (\$10,000,000 \times .20/25) + (\$10,000,000 \times .75/50)$  4. a 5. c

# CHAPTER 11

## Current Liabilities and Payroll Accounting

### Study Objectives

After studying this chapter, you should be able to:

- 1 Explain a current liability, and identify the major types of current liabilities.
- 2 Describe the accounting for notes payable.
- 3 Explain the accounting for other current liabilities.
- 4 Explain the financial statement presentation and analysis of current liabilities.
- 5 Describe the accounting and disclosure requirements for contingent liabilities.
- 6 Compute and record the payroll for a pay period.
- 7 Describe and record employer payroll taxes.
- 8 Discuss the objectives of internal control for payroll.

### Feature Story

#### FINANCING HIS DREAMS

What would you do if you had a great idea for a new product, but couldn't come up with the cash to get the business off the ground? Small businesses often cannot attract investors. Nor can they obtain traditional debt financing through bank loans or bond issuances. Instead, they often resort to unusual, and costly, forms of nontraditional financing.

Such was the case for Wilbert Murdock. Murdock grew up in a New York housing project, and always had great ambitions. This ambitious spirit led him into some business ventures that failed: a medical diagnostic tool, a device to eliminate carpal-tunnel syndrome, custom-designed sneakers, and a device to keep people from falling asleep while driving.

Another idea was computerized golf clubs that analyze a golfer's swing and provide immediate feedback. Murdock saw great

potential in the idea: Many golfers are willing to shell out considerable sums of money for devices that might improve their game. But Murdock had no cash to

develop his product, and banks and other lenders had shied away. Rather than give up, Murdock resorted to credit cards—in a big way. He quickly owed \$25,000 to credit card companies.

While funding a business with credit cards might sound unusual, it isn't. A recent study found that one-third of businesses with fewer than 20 employees financed at least part of their operations with credit cards. As Murdock explained, credit cards are an appealing way to finance a start-up because "credit-card companies don't care how the money is spent." However, they do care how they are paid. And so Murdock faced high interest charges and a barrage of credit card collection letters.

Murdock's debt forced him to sacrifice nearly everything in order to keep his business afloat. His car stopped running, he barely had enough money to buy food, and he lived and worked out of a dimly lit apartment in his mother's basement. Through it all he tried to maintain a positive spirit, joking that, if he becomes successful, he might some day get to appear in an American Express commercial.

## Preview of CHAPTER 11

Inventor-entrepreneur Wilbert Murdock, as you can tell from the Feature Story, had to use multiple credit cards to finance his business ventures. Murdock's credit card debts would be classified as *current liabilities* because they are due every month. Yet by making minimal payments and paying high interest each month, Murdock used this credit source long-term. Some credit card balances remain outstanding for years as they accumulate interest.

Earlier, we defined liabilities as creditors' claims on total assets and as existing debts and obligations. These claims, debts, and obligations must be settled or paid at some time **in the future** by the transfer of assets or services. The future date on which they are due or payable (maturity date) is a significant feature of liabilities. This "future date" feature gives rise to two basic classifications of liabilities: (1) current liabilities and (2) long-term liabilities. We will explain current liabilities, along with payroll accounting, in this chapter. We will explain long-term liabilities in Chapter 15.

The content and organization of Chapter 11 are as follows.

| Current Liabilities and Payroll Accounting   |   |  |

## Accounting for Current Liabilities

### Study Objective [1]

Explain a current liability, and identify the major types of current liabilities.

As explained in Chapter 4, a **current liability** is a debt with two key features: (1) The company reasonably expects to pay the debt from existing current assets or through the creation of other current liabilities. (2) The company will pay the debt within one year or the operating cycle, whichever is longer. Debts that do not meet **both criteria** are classified as long-term liabilities.

Companies must carefully monitor the relationship of current liabilities to current assets. This relationship is critical in evaluating a company's short-term debt-paying ability. A company that has more current liabilities than current assets may not be able to meet its current obligations when they become due.

Current liabilities include notes payable, accounts payable, and unearned revenues. They also include accrued liabilities such as taxes, salaries and wages, and interest payable. In the sections that follow, we discuss a few of the common types of current liabilities.

### Notes Payable

Companies record obligations in the form of written notes as **notes payable**. Notes payable are often used instead of accounts payable because they give the lender formal proof of the obligation in case legal remedies are needed to collect the debt. Companies frequently issue notes payable to meet short-term financing needs. Notes payable usually require the borrower to pay interest.

Notes are issued for varying periods of time. **Those due for payment within one year of the balance sheet date are usually classified as current liabilities.**

### Study Objective [2]

Describe the accounting for notes payable.

To illustrate the accounting for notes payable, assume that First National Bank agrees to lend \$100,000 on September 1, 2012, if Cole Williams Co. signs a \$100,000, 12%, four-month note maturing on January 1. When a company issues an interest-bearing note, the amount of assets it receives upon issuance of the note generally equals the note's face value. Cole Williams Co. therefore will receive \$100,000 cash and will make the following journal entry.

|         |  |         |         |
|---------|--|---------|---------|
| Sept. 1 | Cash   | 100,000 |         |
|         | Notes Payable  |         | 100,000 |
|         | (To record issuance of 12%, 4-month note to First National Bank) |         |         |

|                   |   |   |   |          |
|-------------------|---|---|---|----------|
| A                 | = | L | + | OE       |
|                   |   |   |   | +100,000 |
|                   |   |   |   | +100,000 |
| <b>Cash Flows</b> |   |   |   |          |
| +100,000          |   |   |   |          |

Interest accrues over the life of the note, and the company must periodically record that accrual. If Cole Williams Co. prepares financial statements annually, it makes an adjusting entry at December 31 to recognize interest expense and interest payable of \$4,000 ( $\$100,000 \times 12\% \times 4/12$ ). Illustration 11-1 shows the formula for computing interest, and its application to Cole Williams Co.'s note.

|                           |   |                             |   |                                  |   |                 |
|---------------------------|---|-----------------------------|---|----------------------------------|---|-----------------|
| <b>Face Value of Note</b> | × | <b>Annual Interest Rate</b> | × | <b>Time in Terms of One Year</b> | = | <b>Interest</b> |
| \$100,000                 | × | 12%                         | × | 4/12                             | = | <b>\$4,000</b>  |

**Illustration 11-1**  
Formula for computing interest

Cole Williams makes an adjusting entry as follows:

|         |   |       |       |
|---------|---|-------|-------|
| Dec. 31 | Interest Expense  | 4,000 |       |
|         | Interest Payable  |       | 4,000 |
|         | (To accrue interest for 4 months on First National Bank note) |       |       |

|                   |   |   |   |            |
|-------------------|---|---|---|------------|
| A                 | = | L | + | OE         |
|                   |   |   |   | -4,000 Exp |
|                   |   |   |   | +4,000     |
| <b>Cash Flows</b> |   |   |   |            |
| no effect         |   |   |   |            |

In the December 31 financial statements, the current liabilities section of the balance sheet will show notes payable \$100,000 and interest payable \$4,000. In addition, the company will report interest expense of \$4,000 under "Other expenses and losses" in the income statement. If Cole Williams Co. prepared financial statements monthly, the adjusting entry at the end of each month would have been \$1,000 ( $\$100,000 \times 12\% \times 1/12$ ).

At maturity (January 1, 2013), Cole Williams Co. must pay the face value of the note (\$100,000) plus \$4,000 interest ( $\$100,000 \times 12\% \times 4/12$ ). It records payment of the note and accrued interest as follows.

|        |   |         |         |
|--------|---|---------|---------|
| Jan. 1 | Notes Payable   | 100,000 |         |
|        | Interest Payable  | 4,000   |         |
|        | Cash  |         | 104,000 |
|        | (To record payment of First National Bank interest-bearing note and accrued interest at maturity) |         |         |

|                   |   |   |   |          |
|-------------------|---|---|---|----------|
| A                 | = | L | + | OE       |
|                   |   |   |   | -100,000 |
|                   |   |   |   | -4,000   |
|                   |   |   |   | -104,000 |
| <b>Cash Flows</b> |   |   |   |          |
| -104,000          |   |   |   |          |

## Sales Taxes Payable

As a consumer, you know that many of the products you purchase at retail stores are subject to sales taxes. Many states also are now collecting sales taxes on purchases made on the Internet as well. Sales taxes are expressed as a percentage of the sales price. The selling company collects the tax from the customer when the

**Study Objective [3]**  
Explain the accounting for other current liabilities.

sale occurs. Periodically (usually monthly), the retailer remits the collections to the state's department of revenue.

Under most state sales tax laws, the selling company must ring up separately on the cash register the amount of the sale and the amount of the sales tax collected. (Gasoline sales are a major exception.) The company then uses the cash register readings to credit Sales Revenue and Sales Taxes Payable. For example, if the March 25 cash register reading for Cooley Grocery shows sales of \$10,000 and sales taxes of \$600 (sales tax rate of 6%), the journal entry is:

|                   |   |   |   |             |
|-------------------|---|---|---|-------------|
| A                 | = | L | + | OE          |
| +10,600           |   |   |   |             |
|                   |   |   |   | +10,000 Rev |
|                   |   |   |   | +600        |
|                   |   |   |   |             |
| <b>Cash Flows</b> |   |   |   |             |
| +10,600           |   |   |   |             |

|         |   |        |        |
|---------|---|--------|--------|
| Mar. 25 | Cash                                    | 10,600 | 10,000 |
|         | Sales Revenue                           |        | 10,000 |
|         | Sales Taxes Payable                     |        | 600    |
|         | (To record daily sales and sales taxes) |        |        |

When the company remits the taxes to the taxing agency, it debits Sales Taxes Payable and credits Cash. The company does not report sales taxes as an expense. It simply forwards to the government the amount paid by the customers. Thus, Cooley Grocery serves only as a **collection agent** for the taxing authority.

Sometimes, companies do not ring up sales taxes separately on the cash register. To determine the amount of sales in such cases, divide total receipts by 100% plus the sales tax percentage. To illustrate, assume that in the above example Cooley Grocery rings up total receipts of \$10,600. The receipts from the sales are equal to the sales price (100%) plus the tax percentage (6% of sales), or 1.06 times the sales total. We can compute the sales amount as follows.

$$\$10,600 \div 1.06 = \$10,000$$

Thus, Cooley Grocery could find the sales tax amount it must remit to the state (\$600) by subtracting sales from total receipts (\$10,600 – \$10,000).

**Helpful Hint**

Alternatively, Cooley could find the tax by multiplying sales by the sales tax rate (\$10,000 × .06).

**Unearned Revenues**

A magazine publisher, such as **Sports Illustrated**, receives customers' checks when they order magazines. An airline company, such as **American Airlines**, often receives cash when it sells tickets for future flights. Season tickets for concerts, sporting events, and theater programs are also paid for in advance. How do companies account for unearned revenues that are received before goods are delivered or services are provided?

1. When a company receives the advance payment, it debits Cash, and credits a current liability account identifying the source of the unearned revenue.
2. When the company earns the revenue, it debits an unearned revenue account, and credits an earned revenue account.

To illustrate, assume that Superior University sells 10,000 season football tickets at \$50 each for its five-game home schedule. The university makes the following entry for the sale of season tickets.

|                   |   |   |   |          |
|-------------------|---|---|---|----------|
| A                 | = | L | + | OE       |
| +500,000          |   |   |   |          |
|                   |   |   |   | +500,000 |
|                   |   |   |   |          |
| <b>Cash Flows</b> |   |   |   |          |
| +500,000          |   |   |   |          |

|        |   |         |         |
|--------|---|---------|---------|
| Aug. 6 | Cash                                      | 500,000 | 500,000 |
|        | Unearned Ticket Revenue                   |         | 500,000 |
|        | (To record sale of 10,000 season tickets) |         |         |

As each game is completed, Superior records the earning of revenue with the following entry.

|                   |   |          |   |              |
|-------------------|---|----------|---|--------------|
| A                 | = | L        | + | OE           |
|                   |   | -100,000 |   |              |
|                   |   |          |   | +100,000 Rev |
|                   |   |          |   |              |
| <b>Cash Flows</b> |   |          |   |              |
| no effect         |   |          |   |              |

|         |  |         |         |
|---------|--|---------|---------|
| Sept. 7 | Unearned Ticket Revenue                    | 100,000 | 100,000 |
|         | Ticket Revenue                             |         | 100,000 |
|         | (To record football ticket revenue earned) |         |         |

The account Unearned Ticket Revenue represents unearned revenue, and Superior reports it as a current liability. As the school earns the revenue, it reclassifies the amount from unearned revenue to earned revenue. Unearned revenue is material for some companies. In the airline industry, for example, tickets sold for future flights represent almost 50% of total current liabilities. At **United Air Lines**, unearned ticket revenue was its largest current liability, recently amounting to over \$1 billion.

Illustration 11-2 shows specific unearned and earned revenue accounts used in selected types of businesses.

| Type of Business   | Account Title                 |                      |
|--------------------|-------------------------------|----------------------|
|                    | Unearned Revenue              | Earned Revenue       |
| Airline            | Unearned Ticket Revenue       | Ticket Revenue       |
| Magazine publisher | Unearned Subscription Revenue | Subscription Revenue |
| Hotel              | Unearned Rent Revenue         | Rent Revenue         |

**Illustration 11-2**  
Unearned and earned revenue accounts

## Current Maturities of Long-Term Debt

Companies often have a portion of long-term debt that comes due in the current year. That amount is considered a current liability. As an example, assume that Wendy Construction issues a five-year interest-bearing \$25,000 note on January 1, 2011. This note specifies that each January 1, starting January 1, 2012, Wendy should pay \$5,000 of the note. When the company prepares financial statements on December 31, 2011, it should report \$5,000 as a current liability and \$20,000 as a long-term liability. (The \$5,000 amount is the portion of the note that is due to be paid within the next 12 months.) Companies often identify current maturities of long-term debt on the balance sheet as **long-term debt due within one year**.

It is not necessary to prepare an adjusting entry to recognize the current maturity of long-term debt. At the balance sheet date, all obligations due within one year are classified as current, and all other obligations as long-term.

## Do it!

You and several classmates are studying for the next accounting examination. They ask you to answer the following questions.

1. If cash is borrowed on a \$50,000, 6-month, 12% note on September 1, how much interest expense would be incurred by December 31?
2. How is the sales tax amount determined when the cash register total includes sales taxes?
3. If \$15,000 is collected in advance on November 1 for 3-months' rent, what amount of rent revenue is earned by December 31?

### Solution

1.  $\$50,000 \times 12\% \times 4/12 = \$2,000$
2. First, divide the total cash register receipts by 100% plus the sales tax percentage to find the sales amount. Second, subtract the sales amount from the total cash register receipts to determine the sales taxes.
3.  $\$15,000 \times 2/3 = \$10,000$

## Current Liabilities

### action plan

- ✓ Use the interest formula: Face value of note  $\times$  Annual interest rate  $\times$  Time in terms of one year.
- ✓ Divide total receipts by 100% plus the tax rate to determine sales; then subtract sales from the total receipts.
- ✓ Determine what fraction of the total unearned rent was earned this year.

**Study Objective [4]**

Explain the financial statement presentation and analysis of current liabilities.

**Statement Presentation and Analysis****PRESENTATION**

As indicated in Chapter 4, current liabilities are the first category under liabilities on the balance sheet. Each of the principal types of current liabilities is listed separately. In addition, companies disclose the terms of notes payable and other key information about the individual items in the notes to the financial statements.

Companies seldom list current liabilities in the order of liquidity. The reason is that varying maturity dates may exist for specific obligations such as notes payable. A more common method of presenting current liabilities is to list them by **order of magnitude**, with the largest ones first. Or, as a matter of custom, many companies show notes payable first, and then accounts payable, regardless of amount. Then the remaining current liabilities are listed by magnitude. (*Use this approach in your homework.*) The following adapted excerpt from the balance sheet of **Caterpillar Inc.** illustrates its order of presentation.

**Illustration 11-3**  
Balance sheet presentation  
of current liabilities

**Caterpillar Inc.**  
Balance Sheet  
December 31, 2009  
(in millions)

| <u>Assets</u>                                  |                     |
|--|---------------------|
| Current assets                                 | \$26,789            |
| Property, plant and equipment (net)            | 12,386              |
| Other long-term assets                         | <u>20,863</u>       |
| Total assets                                   | <u>\$60,038</u>     |
| <u>Liabilities and Stockholders' Equity</u>    |                     |
| <b>Current liabilities</b>                     |                     |
| Short-term borrowings (notes payable)          | <b>\$ 4,083</b>     |
| Accounts payable                               | <b>2,993</b>        |
| Accrued expenses                               | <b>3,351</b>        |
| Accrued wages, salaries, and employee benefits | <b>797</b>          |
| Customer advances                              | <b>1,217</b>        |
| Dividends payable                              | <b>262</b>          |
| Other current liabilities                      | <b>888</b>          |
| Long-term debt due within one year             | <b><u>5,701</u></b> |
| Total current liabilities                      | <b>19,292</b>       |
| Noncurrent liabilities                         | <u>31,446</u>       |
| Total liabilities                              | 50,738              |
| Stockholders' equity                           | <u>9,300</u>        |
| Total liabilities and stockholders' equity     | <u>\$60,038</u>     |

**Helpful Hint**

For other examples of current liabilities sections, refer to the **PepsiCo** and **Coca-Cola** balance sheets in Appendixes A and B.

**ANALYSIS**

Use of current and noncurrent classifications makes it possible to analyze a company's liquidity. **Liquidity** refers to the ability to pay maturing obligations and meet unexpected needs for cash. The relationship of current assets to current liabilities is critical in analyzing liquidity. We can express this relationship as a dollar amount (working capital) and as a ratio (the current ratio).

The excess of current assets over current liabilities is **working capital**. Illustration 11-4 shows the formula for the computation of Caterpillar's working capital (dollar amounts in millions).

|                       |   |                            |   |                        |
|-----------------------|---|----------------------------|---|------------------------|
| <b>Current Assets</b> | – | <b>Current Liabilities</b> | = | <b>Working Capital</b> |
| \$26,789              | – | \$19,292                   | = | <b>\$7,497</b>         |

**Illustration 11-4**  
Working capital formula and computation

As an absolute dollar amount, working capital offers limited informational value. For example, \$1 million of working capital may be far more than needed for a small company but be inadequate for a large corporation. Also, \$1 million of working capital may be adequate for a company at one time but inadequate at another time.

The **current ratio** permits us to compare the liquidity of different-sized companies and of a single company at different times. The current ratio is calculated as current assets divided by current liabilities. The formula for this ratio is illustrated below, along with its computation using Caterpillar's current asset and current liability data (dollar amounts in millions).

|                       |   |                            |   |                      |
|-----------------------|---|----------------------------|---|----------------------|
| <b>Current Assets</b> | ÷ | <b>Current Liabilities</b> | = | <b>Current Ratio</b> |
| \$26,789              | ÷ | \$19,292                   | = | <b>1.39:1</b>        |

**Illustration 11-5**  
Current ratio formula and computation

Historically, companies and analysts considered a current ratio of 2:1 to be the standard for a good credit rating. In recent years, however, many healthy companies have maintained ratios well below 2:1 by improving management of their current assets and liabilities. Caterpillar's ratio of 1.39:1 is adequate but certainly below the standard of 2:1.

## Contingent Liabilities

With notes payable, interest payable, accounts payable, and sales taxes payable, we know that an obligation to make a payment exists. But suppose that your company is involved in a dispute with the Internal Revenue Service (IRS) over the amount of its income tax liability. Should you report the disputed amount as a liability on the balance sheet? Or suppose your company is involved in a lawsuit which, if you lose, might result in bankruptcy. How should you report this major contingency? The answers to these questions are difficult, because these liabilities are dependent—contingent—upon some future event. In other words, a **contingent liability** is a potential liability that may become an actual liability in the future.

How should companies report contingent liabilities? They use the following guidelines:

1. If the contingency is **probable** (if it is *likely* to occur) **and** the amount can be **reasonably estimated**, the liability should be recorded in the accounts.
2. If the contingency is only **reasonably possible** (if it *could* happen), then it needs to be disclosed only in the notes that accompany the financial statements.
3. If the contingency is **remote** (if it is *unlikely* to occur), it need not be recorded or disclosed.

### Study Objective [5]

Describe the accounting and disclosure requirements for contingent liabilities.

## ACCOUNTING ACROSS THE ORGANIZATION

### Contingencies: How Big Are They?

Contingent liabilities abound in the real world. Consider the following: **Manville Corp.** filed for bankruptcy when it was hit by billions of dollars in asbestos product-liability claims. Companies having multiple toxic waste sites are faced with cleanup costs that average \$10 to \$30 million and can reach as high as \$500 million depending on the type of waste. For life and health insurance companies and their stockholders, the cost of diseases such as diabetes, Alzheimer's, and AIDS is like an iceberg: Everyone wonders how big such costs really are and what damage they might do in the future. And frequent-flyer programs are so popular that airlines at one time owed participants more than 3 million round-trip domestic tickets. That's enough to fly at least 5.4 billion miles—free for the passengers, but at what future cost to the airlines?

**?** Why do you think most companies disclose, but do not record, contingent liabilities? (See page 549.)

### Recording a Contingent Liability

Product warranties are an example of a contingent liability that companies should record in the accounts. Warranty contracts result in future costs that companies may incur in replacing defective units or repairing malfunctioning units. Generally, a manufacturer, such as **Stanley Black & Decker**, knows that it will incur some warranty costs. From prior experience with the product, the company usually can reasonably estimate the anticipated cost of servicing (honoring) the warranty.

The accounting for warranty costs is based on the expense recognition principle. **The estimated cost of honoring product warranty contracts should be recognized as an expense in the period in which the sale occurs.** To illustrate, assume that in 2012 Denson Manufacturing Company sells 10,000 washers and dryers at an average price of \$600 each. The selling price includes a one-year warranty on parts. Denson expects that 500 units (5%) will be defective and that warranty repair costs will average \$80 per unit. In 2012, the company honors warranty contracts on 300 units, at a total cost of \$24,000.

At December 31, it is necessary to accrue the estimated warranty costs on the 2012 sales. Denson computes the estimated warranty liability as follows.

**Illustration 11-6**  
Computation of estimated product warranty liability

|   |                 |
|---|-----------------|
| Number of units sold                        | 10,000          |
| Estimated rate of defective units           | × 5%            |
| Total estimated defective units             | 500             |
| Average warranty repair cost                | × \$80          |
| <b>Estimated product warranty liability</b> | <b>\$40,000</b> |

|                   |   |             |   |           |
|-------------------|---|-------------|---|-----------|
| <b>A</b>          | = | <b>L</b>    | + | <b>OE</b> |
|                   |   | -40,000 Exp |   |           |
|                   |   | +40,000     |   |           |
| <b>Cash Flows</b> |   |             |   |           |
| <b>no effect</b>  |   |             |   |           |

The company makes the following adjusting entry.

|         |                                      |        |        |
|---------|--------------------------------------|--------|--------|
| Dec. 31 | Warranty Expense                     | 40,000 |        |
|         | Warranty Liability                   |        | 40,000 |
|         | (To accrue estimated warranty costs) |        |        |

Denson records those repair costs incurred in 2012 to honor warranty contracts on 2012 sales as shown below.

|         |  |        |        |
|---------|--|--------|--------|
| Jan. 1– | Warranty Liability   | 24,000 |        |
| Dec. 31 | Repair Parts   |        | 24,000 |
|         | (To record honoring of 300 warranty contracts on 2012 sales) |        |        |

|                   |   |         |   |    |
|-------------------|---|---------|---|----|
| A                 | = | L       | + | OE |
|                   |   | -24,000 |   |    |
|                   |   | -24,000 |   |    |
| <b>Cash Flows</b> |   |         |   |    |
| no effect         |   |         |   |    |

The company reports warranty expense of \$40,000 under selling expenses in the income statement. It classifies warranty liability of \$16,000 (\$40,000 – \$24,000) as a current liability on the balance sheet.

In the following year, Denson should debit to Warranty Liability all expenses incurred in honoring warranty contracts on 2012 sales. To illustrate, assume that the company replaces 20 defective units in January 2013, at an average cost of \$80 in parts and labor. The summary entry for the month of January 2013 is:

|         |   |       |       |
|---------|---|-------|-------|
| Jan. 31 | Warranty Liability  | 1,600 |       |
|         | Repair Parts  |       | 1,600 |
|         | (To record honoring of 20 warranty contracts on 2012 sales) |       |       |

|                   |   |        |   |    |
|-------------------|---|--------|---|----|
| A                 | = | L      | + | OE |
|                   |   | -1,600 |   |    |
|                   |   | -1,600 |   |    |
| <b>Cash Flows</b> |   |        |   |    |
| no effect         |   |        |   |    |

## Disclosure of Contingent Liabilities

When it is probable that a company will incur a contingent liability but it cannot reasonably estimate the amount, or when the contingent liability is only reasonably possible, only disclosure of the contingency is required. Examples of contingencies that may require disclosure are pending or threatened lawsuits and assessment of additional income taxes pending an IRS audit of the tax return.

The disclosure should identify the nature of the item and, if known, the amount of the contingency and the expected outcome of the future event. Disclosure is usually accomplished through a note to the financial statements, as illustrated by the following.

### Yahoo! Inc. Notes to the Financial Statements

**Contingencies.** From time to time, third parties assert patent infringement claims against the company. Currently the company is engaged in several lawsuits regarding patent issues and has been notified of a number of other potential patent disputes. In addition, from time to time the company is subject to other legal proceedings and claims in the ordinary course of business, including claims for infringement of trademarks, copyrights and other intellectual property rights.... The Company does not believe, based on current knowledge, that any of the foregoing legal proceedings or claims are likely to have a material adverse effect on the financial position, results of operations or cash flows.

**Illustration 11-7**  
Disclosure of contingent liability

The required disclosure for contingencies is a good example of the use of the full-disclosure principle. The **full-disclosure principle** requires that companies disclose all circumstances and events that would make a difference to financial statement users. Some important financial information, such as contingencies, is not easily reported in the financial statements. Reporting information on contingencies in the notes to

the financial statements will help investors be aware of events that can affect the financial health of a company.

## Do it!

### Current Liabilities

Lepid Company has the following account balances at December 31, 2012.

|   |           |
|---|-----------|
| Notes payable (\$80,000 due after 12/31/13) | \$200,000 |
| Unearned service revenue                    | 75,000    |
| Other long-term debt (\$30,000 due in 2013) | 150,000   |
| Salaries and wages payable                  | 22,000    |
| Other accrued expenses                      | 15,000    |
| Accounts payable                            | 100,000   |

In addition, Lepid is involved in a lawsuit. Legal counsel feels it is probable Lepid will pay damages of \$38,000 in 2013.

- (a) Prepare the current liability section of Lepid's December 31, 2012, balance sheet.
- (b) Lepid's current assets are \$504,000. Compute Lepid's working capital and current ratio.

#### action plan

- ✓ Determine which liabilities will be paid within one year or the operating cycle and include those as current liabilities.
- ✓ If the contingent liability is probable and reasonably estimable, include it as a current liability.
- ✓ Use the formula for working capital: Current assets – Current liabilities.
- ✓ Use the formula for the current ratio: Current assets ÷ Current liabilities.

#### Solution

|  |           |
|--|-----------|
| (a) Current liabilities  |           |
| Notes payable  | \$120,000 |
| Accounts payable   | 100,000   |
| Unearned service revenue   | 75,000    |
| Lawsuit liability  | 38,000    |
| Salaries and wages payable   | 22,000    |
| Other accrued expenses   | 15,000    |
| Long-term debt due within one year   | 30,000    |
| Total current liabilities  | \$400,000 |
| (b) Working capital = Current assets – Current liabilities = \$504,000 – \$400,000 = \$104,000 |           |
| Current ratio: Current assets ÷ Current liabilities = \$504,000 ÷ \$400,000 = 1.26:1           |           |

## Payroll Accounting

Payroll and related fringe benefits often make up a large percentage of current liabilities. Employee compensation is often the most significant expense that a company incurs. For example, **Costco** recently reported total employees of 103,000 and labor and fringe benefits costs which approximated 70% of the company's total cost of operations.

Payroll accounting involves more than paying employees' wages. Companies are required by law to maintain payroll records for each employee, to file and pay payroll taxes, and to comply with state and federal tax laws related to employee compensation.

The term "payroll" **pertains to both salaries and wages of employees**. Managerial, administrative, and sales personnel are generally paid **salaries**. Salaries are often expressed in terms of a specified amount per month or per year rather than an hourly rate. Store clerks, factory employees, and manual laborers are normally paid **wages**.

Wages are based on a rate per hour or on a piecework basis (such as per unit of product). Frequently, people use the terms “salaries” and “wages” interchangeably.

The term “payroll” **does not apply to payments made for services of professionals** such as certified public accountants, attorneys, and architects. Such professionals are independent contractors rather than salaried employees. Payments to them are called **fees**. This distinction is important because government regulations relating to the payment and reporting of payroll taxes apply only to employees.

## Determining the Payroll

Determining the payroll involves computing three amounts: (1) gross earnings, (2) payroll deductions, and (3) net pay.

### GROSS EARNINGS

**Gross earnings** is the total compensation earned by an employee. It consists of wages or salaries, plus any bonuses and commissions.

Companies determine total **wages** for an employee by multiplying the hours worked by the hourly rate of pay. In addition to the hourly pay rate, most companies are required by law to pay hourly workers a minimum of 1½ times the regular hourly rate for overtime work in excess of eight hours per day or 40 hours per week. In addition, many employers pay overtime rates for work done at night, on weekends, and on holidays.

For example, assume that Michael Jordan, an employee of Academy Company, worked 44 hours for the weekly pay period ending January 14. His regular wage is \$12 per hour. For any hours in excess of 40, the company pays at one-and-a-half times the regular rate. Academy computes Jordan’s gross earnings (total wages) as follows.

| Type of Pay        | Hours | × | Rate | = | Gross Earnings |
|--------------------|-------|---|------|---|----------------|
| Regular            | 40    | × | \$12 | = | \$480          |
| Overtime           | 4     | × | 18   | = | 72             |
| <b>Total wages</b> |       |   |      |   | <b>\$552</b>   |

### Study Objective [6]

Compute and record the payroll for a pay period.

### Illustration 11-8

Computation of total wages

This computation assumes that Jordan receives 1½ times his regular hourly rate ( $\$12 \times 1.5$ ) for his overtime hours. Union contracts often require that overtime rates be as much as twice the regular rates.

An employee’s **salary** is generally based on a monthly or yearly rate. The company then prorates these rates to its payroll periods (e.g., biweekly or monthly). Most executive and administrative positions are salaried. Federal law does not require overtime pay for employees in such positions.

Many companies have **bonus** agreements for employees. One survey found that over 94% of the largest U.S. manufacturing companies offer annual bonuses to key executives. Bonus arrangements may be based on such factors as increased sales or net income. Companies may pay bonuses in cash and/or by granting employees the opportunity to acquire shares of company stock at favorable prices (called stock option plans).

### PAYROLL DEDUCTIONS

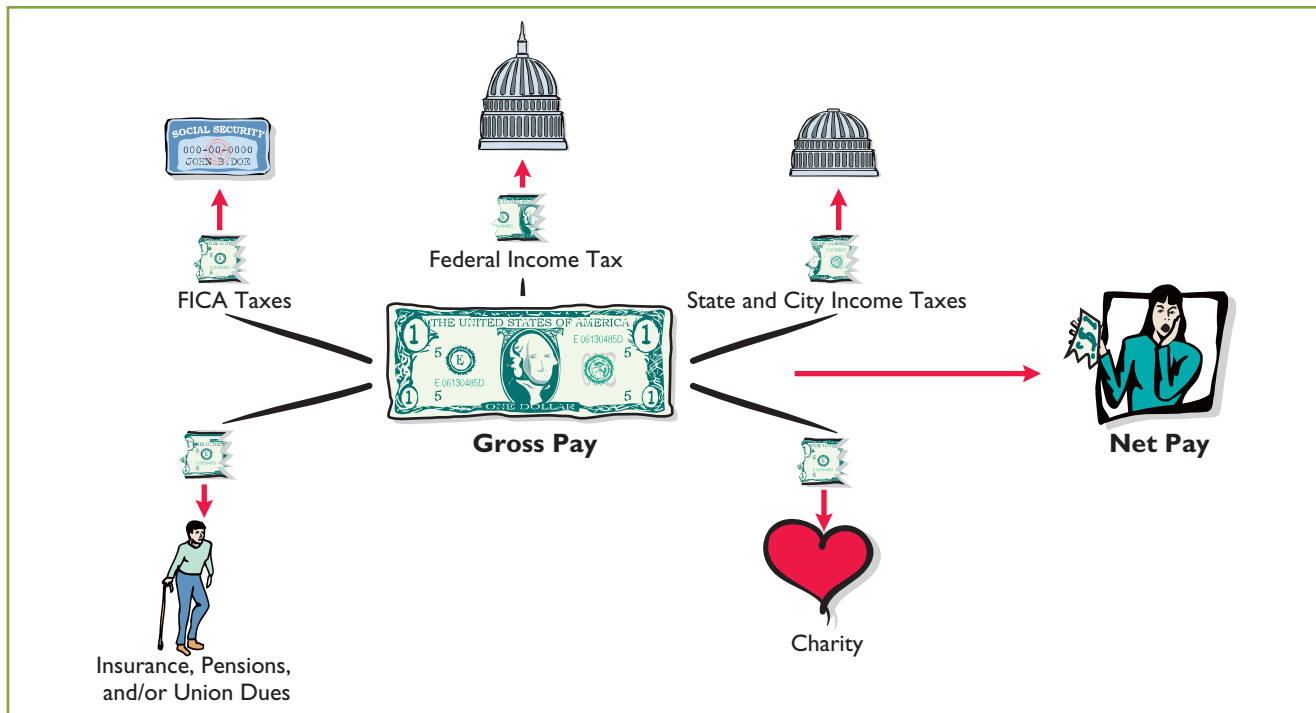

As anyone who has received a paycheck knows, gross earnings are usually very different from the amount actually received. The difference is due to **payroll deductions**.

Payroll deductions may be mandatory or voluntary. **Mandatory deductions are required by law and consist of FICA taxes and income taxes.** Voluntary deductions are at the option of the employee. Illustration 11-9 (page 520) summarizes common

### Ethics Note

Bonuses often reward outstanding individual performance, but successful corporations also need considerable teamwork. A challenge is to motivate individuals while preventing an unethical employee from taking another’s idea for his or her own advantage.

**Illustration 11-9**  
Payroll deductions

types of payroll deductions. Such deductions do not result in payroll tax expense to the employer. The employer is merely a collection agent, and subsequently transfers the deducted amounts to the government and designated recipients.

**FICA Taxes.** In 1937, Congress enacted the Federal Insurance Contribution Act (FICA). **FICA taxes are designed to provide workers with supplemental retirement, employment disability, and medical benefits.** In 1965, Congress extended benefits to include Medicare for individuals over 65 years of age. The benefits are financed by a tax levied on employees' earnings. FICA taxes are commonly referred to as **Social Security taxes**.

Congress sets the tax rate and the tax base for FICA taxes. When FICA taxes were first imposed, the rate was 1% on the first \$3,000 of gross earnings, or a maximum of \$30 per year. The rate and base have changed dramatically since that time! In 2010, the rate was 7.65% (6.2% Social Security plus 1.45% Medicare) on the first \$106,800 of gross earnings for each employee.<sup>1</sup> For purpose of illustration in this chapter, we will assume a rate of 8% on the first \$100,000 of gross earnings, or a maximum of \$8,000. Using the 8% rate, the FICA withholding for Jordan for the weekly pay period ending January 14 is \$44.16 ( $\$552 \times 8\%$ ).

**Income Taxes.** Under the U.S. pay-as-you-go system of federal income taxes, employers are required to withhold income taxes from employees each pay period. Three variables determine the amount to be withheld: (1) the employee's gross earnings; (2) the number of allowances claimed by the employee; and (3) the length of the pay period. The number of allowances claimed typically includes the employee, his or her spouse, and other dependents.

<sup>1</sup>The Medicare provision also includes a tax of 1.45% on gross earnings in excess of \$106,800. In the interest of simplification, we ignore this 1.45% charge in our end-of-chapter assignment material. We assume zero FICA withholdings on gross earnings above \$100,000.

Withholding tables furnished by the Internal Revenue Service indicate the amount of income tax to be withheld. Withholding amounts are based on gross wages and the number of allowances claimed. Separate tables are provided for weekly, biweekly, semimonthly, and monthly pay periods. Illustration 11-10 shows the withholding tax table for Michael Jordan (assuming he earns \$552 per week and claims two allowances). For a weekly salary of \$552 with two allowances, the income tax to be withheld is \$49.

| MARRIED Persons — WEEKLY Payroll Period<br>(For Wages Paid in 2010) |               |   |    |    |    |    |    |    |    |    |    |    |
|---|---------------|---|----|----|----|----|----|----|----|----|----|----|
| If the wages are —  |               | And the number of withholding allowances claimed is — |    |    |    |    |    |    |    |    |    |    |

**Illustration 11-10**  
Withholding tax table

In addition, most states (and some cities) require **employers** to withhold income taxes from employees' earnings. As a rule, the amounts withheld are a percentage (specified in the state revenue code) of the amount withheld for the federal income tax. Or they may be a specified percentage of the employee's earnings. For the sake of simplicity, we have assumed that Jordan's wages are subject to state income taxes of 2%, or \$11.04 ( $2\% \times \$552$ ) per week.

There is no limit on the amount of gross earnings subject to income tax withholdings. In fact, under our progressive system of taxation, the higher the earnings, the higher the percentage of income withheld for taxes.

**Other Deductions.** Employees may voluntarily authorize withholdings for charitable organizations, retirement, and other purposes. All voluntary deductions from gross earnings should be authorized in writing by the employee. The authorization(s) may be made individually or as part of a group plan. Deductions for charitable organizations, such as the United Fund, or for financial arrangements, such as U.S. savings bonds and repayment of loans from company credit unions, are made individually. Deductions for union dues, health and life insurance, and pension plans are often made on a group basis. We will assume that Jordan has weekly voluntary deductions of \$10 for the United Fund and \$5 for union dues.

**Alternative Terminology** **NET PAY**

Net pay is also called *take-home pay*.

Academy determines **net pay** by subtracting payroll deductions from gross earnings. Illustration 11-11 shows the computation of Jordan's net pay for the pay period.

**Illustration 11-11**  
Computation of net pay

|                      |         |                        |
|----------------------|---------|------------------------|
| Gross earnings       |         | \$552.00               |
| Payroll deductions:  |         |                        |
| FICA taxes           | \$44.16 |                        |
| Federal income taxes | 49.00   |                        |
| State income taxes   | 11.04   |                        |
| United Fund          | 10.00   |                        |
| Union dues           | 5.00    | 119.20                 |
| <b>Net pay</b>       |         | <b><u>\$432.80</u></b> |

Assuming that Michael Jordan's wages for each week during the year are \$552, total wages for the year are \$28,704 ( $52 \times \$552$ ). Thus, all of Jordan's wages are subject to FICA tax during the year. In comparison, let's assume that Jordan's department head earns \$2,000 per week, or \$104,000 for the year. Since we assume that only the first \$100,000 is subject to FICA taxes, the maximum FICA withholdings on the department head's earnings would be \$8,000 ( $\$100,000 \times 8\%$ ).

## Recording the Payroll

Recording the payroll involves maintaining payroll department records, recognizing payroll expenses and liabilities, and recording payment of the payroll.

### MAINTAINING PAYROLL DEPARTMENT RECORDS

To comply with state and federal laws, an employer must keep a cumulative record of each employee's gross earnings, deductions, and net pay during the year. The record that provides this information is the **employee earnings record**. Illustration 11-12 (page 523) shows Michael Jordan's employee earnings record.

Companies keep a separate earnings record for each employee, and update these records after each pay period. The employer uses the cumulative payroll data on the earnings record to: (1) determine when an employee has earned the maximum earnings subject to FICA taxes, (2) file state and federal payroll tax returns (as explained later), and (3) provide each employee with a statement of gross earnings and tax withholdings for the year. Illustration 11-16 on page 529 shows this statement.

In addition to employee earnings records, many companies find it useful to prepare a **payroll register**. This record accumulates the gross earnings, deductions, and net pay by employee for each pay period. Illustration 11-13 (page 523) presents Academy Company's payroll register. It provides the documentation for preparing a paycheck for each employee. For example, it shows the data for Michael Jordan in the wages section. In this example, Academy Company's total weekly payroll is \$17,210, as shown in the gross earnings column (column E, row 24).

Note that this record is a listing of each employee's payroll data for the pay period. In some companies, a payroll register is a journal or book of original entry. Postings are made from it directly to ledger accounts. In other companies, the payroll register is a memorandum record that provides the data for a general journal entry and subsequent posting to the ledger accounts. At Academy Company, the latter procedure is followed.

| ACADEMY COMPANY          |                   |                |          |          |                         |                   |               |                |             |            |         |            |           |

**RECOGNIZING PAYROLL EXPENSES AND LIABILITIES**

From the payroll register in Illustration 11-13, Academy Company makes a journal entry to record the payroll. For the week ending January 14, the entry is:

|                   |   |            |     |    |
|-------------------|---|------------|-----|----|
| A                 | = | L          | +   | OE |
|                   |   | -17,210.00 | Exp |    |
|                   |   | +1,376.80  |     |    |
|                   |   | +3,490.00  |     |    |
|                   |   | +344.20    |     |    |
|                   |   | +421.50    |     |    |
|                   |   | +115.00    |     |    |

|         | Union Dues Payable                                 |           | 115.00    |
|         | Salaries and Wages Payable                         |           | 11,462.50 |
|         | (To record payroll for the week ending January 14) |           |           |

The company credits specific liability accounts for the mandatory and voluntary deductions made during the pay period. In the example, Academy debits Salaries and Wages Expense for the gross earnings of its employees. The amount credited to Salaries and Wages Payable is the sum of the individual checks the employees will receive.

**RECORDING PAYMENT OF THE PAYROLL**

A company makes payments by check (or electronic funds transfer) either from its regular bank account or a payroll bank account. Each paycheck is usually accompanied by a detachable **statement of earnings** document. This shows the employee's gross earnings, payroll deductions, and net pay, both for the period and for the year-to-date. Academy Company uses its regular bank account for payroll checks. Illustration 11-14 shows the paycheck and statement of earnings for Michael Jordan.

**Illustration 11-14**  
Paycheck and statement of earnings

**Helpful Hint**

Do any of the income tax liabilities result in payroll tax expense for the employer?

Answer: No. The employer is acting only as a collection agent for the government.

Following payment of the payroll, the company enters the check numbers in the payroll register. Academy Company records payment of the payroll as follows.

|         |                                |           |           |
|---------|--------------------------------|-----------|-----------|
| Jan. 14 | Salaries and Wages Payable     | 11,462.50 |           |
|         | Cash                           |           | 11,462.50 |
|         | (To record payment of payroll) |           |           |

Many medium- and large-size companies use a payroll processing center that provides payroll record-keeping services. Companies send the center payroll information about employee pay rates and hours worked. The center maintains the payroll records and prepares the payroll checks. In most cases, it costs less to process the payroll through the center than if the company did so internally.

## Do it!

In January, gross earnings in Ramirez Company were \$40,000. All earnings are subject to 8% FICA taxes. Federal income tax withheld was \$9,000, and state income tax withheld was \$1,000. (a) Calculate net pay for January, and (b) record the payroll.

### Solution

- (a) Net pay:  $\$40,000 - (8\% \times \$40,000) - \$9,000 - \$1,000 = \$26,800$
- (b) Salaries and Wages Expense                      40,000
- FICA Taxes Payable                                      3,200
- Federal Income Taxes Payable                         9,000
- State Income Taxes Payable                            1,000
- Salaries and Wages Payable                         26,800
- (To record payroll)
